IMPORTANT INFORMATION

IMPORTANT: If you are in any doubt about the contents of this Explanatory Memorandum, you should seek independent professional financial advice. This Explanatory Memorandum has been written and authorised for distribution in the Hong Kong Special Administrative Region ("Hong Kong") only. It does not constitute a distribution of information or an offer in any other jurisdiction.

Investment involves risk and investors should note that losses may be sustained on their investment. There is no assurance that the investment objectives of a Sub-Fund will be achieved. Investors should read the Explanatory Memorandum, particularly the sections headed "General risks", "Asset class risks" and "Sub-Fund specific risks" before making their investment decisions.

When distributing a Sub-Fund to retail investors in Hong Kong then this Explanatory Memorandum must be accompanied by the relevant Sub-Fund's Product Key Facts Statements alongside a copy of the latest available annual report and accounts of the Fund and any subsequent semi-annual report (if available).

This Explanatory Memorandum and the associated Product Key Facts Statements are issued by the Manager. The Manager accepts full responsibility for the accuracy of the information contained in this Explanatory Memorandum and the Product Key Facts Statements of the Sub-Funds, as at the date of such documents, and confirms, having made all reasonable enquiries, that to the best of its knowledge and belief there are no other facts the omission of which make any statement misleading.

Units issued after the date hereof are offered on the basis only of the information contained in this Explanatory Memorandum, the Product Key Facts Statements of the Sub-Funds and any addendum or addenda issued by the Manager expressly in conjunction with the issue of this Explanatory Memorandum or the Product Key Facts Statements of the Sub-Funds. Any further information or representations made by any dealer, salesman or other person must be regarded as unauthorised and must accordingly not be relied upon. The delivery of this Explanatory Memorandum or the other documents mentioned above or the offer, issue or sale of the Units shall not in any way constitute a representation that the information and representations given herein or in such documents are correct as at any time subsequent to the date of this Explanatory Memorandum or such documents. This Explanatory Memorandum and the Product Key Facts Statements of the Sub-Funds may from time to time be updated and intending applicants of Units should enquire of the Manager as to the issue of any later Explanatory Memorandum or Product Key Facts Statements.

No action has been taken to permit an offering of Units of the Fund or the Sub-Funds or distribution of this Explanatory Memorandum and the Product Key Facts Statements of the Sub-Funds in any jurisdiction other than Hong Kong where action would be required for such purposes. Accordingly, this Explanatory Memorandum and the Product Key Facts Statements of the Sub-Funds may not be used for the purpose of an offer or solicitation in any jurisdiction or in any circumstances in which such offer or solicitation is not authorised. Further, Units of the Sub-Funds may not be offered or sold, directly or indirectly, to any persons for reoffering or resale, in any jurisdiction where such action is not authorised. Receipt of this Explanatory Memorandum or the Product Key Facts Statements of the Sub-Funds does not constitute an offer of Units of the Sub-Funds in those jurisdictions in which it is illegal to make such an offer.

In particular, potential investors should note the following:-

- **United States**

Units in the Fund have not been and will not be registered under the United States Securities Act of 1933 (the "Securities Act") or under the securities laws of any state and the Fund has not been and will not be registered under the Investment Company Act 1940 (the "Investment Company Act"). This document may not be distributed, and the Units in the Fund may not be offered or sold within the United States or to US Persons (as specified under the US Person definition in the section headed "Definitions" of this Explanatory Memorandum).

- **Canada**

This Explanatory Memorandum does not constitute, and may not be used for, a solicitation of an offer to buy Units in Canada or to Canadian residents by any party, with the exception of agreed and approved 3rd party distributors in Canada. For the avoidance of doubt, the Units may be solicited or offered to Canadian non-residents providing that their registered addresses are not in Canada.

- **Mainland China**

Applicable to: HSBC All China Bond Fund

No invitation to offer, or offer for, or sale of, the Units will be made to the public in mainland China or by any means that would be deemed public under the laws of mainland China. The information relating to the Units of HSBC All China Bond Fund contained in this Explanatory Memorandum has not been submitted to or approved by the China Securities Regulatory Commission or other relevant governmental authorities in mainland China. The Units may only be offered or sold to mainland Chinese investors within mainland China where such investors are authorised to buy and sell interests in collective investment schemes outside mainland China. Potential investors resident in mainland China are responsible for obtaining all relevant approvals from the mainland Chinese government authorities, including but not limited to the State Administration of Foreign Exchange, before purchasing the Units.

Applicable to: HSBC Asia Pacific ex Japan Equity Volatility Focused Fund and HSBC Asia High Income Bond Fund

The Sub-Funds have been registered with the China Securities Regulatory Commission ("CSRC") for offering to investors in the mainland China under the mainland-Hong Kong Mutual Recognition of Funds regime (CSRC's approval for registration does not indicate that the CSRC makes any substantive judgment or

guarantee on the investment value and market prospect of the Sub-Funds, nor does it indicate that there is no risk in investing in the Sub-Funds). Class B Units of the Sub-Funds may be issued from time to time at the Manager's discretion. Such Units are available to investors in mainland China only and will not be offered in Hong Kong.

Potential applicants for Units in the Sub-Fund and existing Unitholders should inform themselves as to (a) the possible tax consequences, (b) the legal requirements and (c) any foreign exchange restrictions or exchange control requirements which they might encounter under the laws of the countries or regions of their incorporation, citizenship, residence or domicile and which might be relevant to the subscription, holding or disposal of Units in the Sub-Fund.

Enquiries and complaints

Enquiries and complaints concerning the Fund and the Sub-Funds (including information concerning subscription and redemption procedures and the current net asset value) should be directed to HSBC Investment Funds (Hong Kong) Limited (the "**Manager**") at 2284 1118 or at Level 22, HSBC Main Building, 1 Queen's Road Central, Hong Kong. The Manager will respond to any enquiry or complaint as soon as practicable.

April 2025

DEFINITIONS

The following terms used in this Explanatory Memorandum have the meanings set out below:-

| | |
|---|--|
| “AUD” | Australian dollar, the lawful currency of Australia |
| “Base Currency” | the currency in which the net asset value of a Sub-Fund is expressed and calculated |
| “Base Currency Hedged Unit Class” | a Currency Hedged Unit Class offered for Sub-Funds which may have (or will have) material exposure to assets which are denominated in a currency (or currencies) which is (or are) different to the Sub-Fund's Base Currency. |
| | Further information is disclosed in the “Class features and naming convention” section. |
| “Business Day” | a day on which The Stock Exchange of Hong Kong Limited is open for normal trading and the regulated markets in countries or regions where a Sub-Fund is materially invested are normally open for business or such other day or days as the Manager and the Trustee may determine |
| “CAD” | Canadian dollar, the lawful currency of Canada |
| “Class” or “Classes” | a separate class or classes of Units in a Sub-Fund of the Fund |
| “Class Currency” | the currency of account of a Class specified by the Manager |
| “Code” | Section I and Section II of the <i>SFC Handbook for Unit Trusts and Mutual Funds, Investment-Linked Assurance Schemes and Unlisted Structured Investment Products</i> or any handbook, guideline and code issued by the SFC, as may be amended from time to time |
| “Connected Person” | shall unless otherwise specified have the meaning as set out in the Code, meaning, in relation to a company: <ul style="list-style-type: none"> (a) any person or company beneficially owning, directly or indirectly, 20% or more of the ordinary share capital of that company or able to exercise directly or indirectly, 20% or more of the total votes in that company; or (b) any person or company controlled by a person who or which meets one or both of the descriptions given in (a); or (c) any member of the group of which that company forms part; or (d) any director or officer of that company or of any of its Connected Persons as defined in (a), (b) or (c). |
| “Currency Hedged Unit Class” | <p>Currency Hedged Unit Classes seek to minimise the effect of currency fluctuations between the Class Currency of the Class and the Base Currency of the relevant Sub-Fund.</p> <p>Hedging is achieved by the Sub-Fund entering into foreign currency transactions such as currency forward transactions, currency futures or other forms of financial derivative instruments. Currency positions are not actively managed but rather applied passively at the level of the Currency Hedged Unit Class.</p> <p>Depending on the currency exposure of a Sub-Fund's underlying assets and its objective then a Currency Hedged Unit Class will either be classified as a Base Currency Hedged Unit Class or a Portfolio Currency Hedged Unit Class.</p> |
| “CSRC” | the China Securities Regulatory Commission. |
| “Dealing Day” | each Business Day or such other day(s) as the Manager may determine with the consent of the Trustee. |
| “EUR” | Euro, the lawful currency of the member states of the European Union that have adopted the single currency in accordance with the relevant laws and treaties as amended from time to time |
| “Fund” | HSBC Collective Investment Trust |
| “GBP” | Pound Sterling, the lawful currency of the United Kingdom of Great Britain and Northern Ireland |
| “Government and other public securities” | any investment issued by, or the payment of principal and interest on which is guaranteed by, a government or any fixed-interest investment issued by its public or local authorities or other multilateral agencies |

| | |
|---|---|
| “HKD” | Hong Kong dollar, the lawful currency of Hong Kong |
| “Initial Offer Period” | in respect of a Sub-Fund or Class(es) of a Sub-Fund, such period as the Manager may determine for the purpose of making an initial offer of Units of such Sub-Fund or such Class(es) of a Sub-Fund and as specified in the relevant Appendix (if applicable). |
| “INR” | Indian Rupee, the lawful currency of India |
| “Investment Adviser” | The investment adviser of a Sub-Fund as appointed by the Manager and disclosed in the “Appendix 1 – Sub-Fund Details” section. |
| “Issue Price” | in respect of a Class of a Sub-Fund the price at which Units will be issued, as more fully described in the section “Unit prices”. |
| “JPY” | Japanese Yen, the lawful currency of Japan |
| “mainland China” or “mainland” | all the customs territories of the People's Republic of China, for the purposes of interpretation of this Explanatory Memorandum only, excluding Hong Kong Special Administrative Region, Macau Special Administrative Region and Taiwan. |
| “mainland China Broker” | a broker in mainland China appointed to execute securities trading and/or settlement transactions for the Sub-Fund. |
| “Manager” | HSBC Investment Funds (Hong Kong) Limited. |
| “NZD” | New Zealand dollar, the lawful currency of New Zealand. |
| “OTC” | over-the-counter |
| “PBOC” | the People's Bank of China |
| “Portfolio Currency Hedged Unit Class” | a Currency Hedged Unit Class offered for Sub-Funds where the underlying portfolio will consist of assets which are wholly, or almost wholly, denominated in the Sub-Fund's Base Currency and/or the underlying portfolio of assets are hedged (either wholly, or almost wholly) to the Sub-Fund's Base Currency or which aims to obtain a return calculated in their Base Currency whilst the underlying assets are denominated in a currency (or currencies) which is (or are) different to the Sub-Fund's Base currency. Further information is disclosed in the “Class features and naming convention” section. |
| “QFI” | qualified foreign investor(s) approved pursuant to the relevant mainland China laws and regulations, as may be promulgated and/or amended from time to time. |
| “QFI Custodian” | the QFI custodian of the Sub-Fund as appointed by the QFI Holder and disclosed in the “Appendix 1 – Sub-Fund Details” section. |
| “QFI Underlying Funds” | Underlying Funds that are eligible to invest in onshore mainland Chinese securities through QFI. |
| “QFI Holder” | the holder of QFI licence as disclosed in the “Appendix 1 – Sub-Fund Details” section. |
| “Redemption Price” | the price at which Units of a Class of Sub-Fund will be redeemed, as more fully described in the section “Unit prices”. |
| “Registrar” | HSBC Institutional Trust Services (Asia) Limited |
| “RMB” | Renminbi, the lawful currency of mainland China |
| “SAFE” | the State Administration of Foreign Exchange. |
| “Repurchase Transactions” | transactions whereby a Sub-Fund sells its securities to a counterparty of Reverse Repurchase Transactions and agrees to buy such securities back at an agreed price with a financing cost in the future |
| “Reverse Repurchase Transactions” | transactions whereby a Sub-Fund purchases securities from a counterparty of Repurchase Transactions and agrees to sell such securities back at an agreed price in the future. |

| | |
|--|--|
| “Securities Financing Transactions” | collectively Securities Lending transactions, Repurchase Transactions and Reverse Repurchase Transactions |
| “Securities Market” | any stock exchange, OTC market or other securities market that is open to the international public and on which such securities are regularly traded |
| “Securities Lending” | transactions whereby a Sub-Fund lends its securities to a security-borrowing counterparty for an agreed fee |
| “SFC” “Sub-Fund” or “Sub-Funds” | the Securities and Futures Commission of Hong Kong a separate sub-fund or sub-funds of the Fund as covered by this Explanatory Memorandum in accordance with the disclosure in the section “The Sub-Funds” |
| “Sub-Investment Adviser” | the sub-investment adviser of a Sub-Fund as appointed by the Investment Adviser (subject to the approval of the Manager) and disclosed in the “Appendix 1 – Sub-Fund Details” section. |
| “Sub-Delegate” | the sub-delegate of a Sub-Fund as appointed by the Sub-Investment Adviser (subject to the approval of the Manager) and disclosed in the “Appendix 1 – Sub-Fund Details” section. |
| “Substantial Financial Institution” | an authorized institution as defined in section 2(1) of the Banking Ordinance (Chapter 155 of Laws of Hong Kong) or a financial institution which is on an ongoing basis subject to prudential regulation and supervision, with a minimum net asset value of HK\$2 billion or its equivalent in foreign currency |
| “Trust Deed” | the trust deed dated 27 February 2014 entered into between the Manager and the Trustee as amended, supplemented and substituted from time to time |
| “Trustee” | HSBC Institutional Trust Services (Asia) Limited |
| “Underlying Funds” | the collective investment schemes in which a Sub-Fund may invest in, including unit trusts, mutual funds, and exchange traded funds |
| “Unit” | a unit in a Sub-Fund of the Fund and, except where used in relation to a particular Class of Unit, a reference to Unit means and includes Units of all Classes |
| “Unitholder” | a person registered as a holder of a Unit |
| “USD” | United States dollar, the lawful currency of the United States of America |
| “US” | the United States of America (including the States and the District of Columbia), its territories, possessions and all other areas subject to its jurisdiction. |
| “US Law” | the laws of the US. US Law shall additionally include all applicable rules and regulations, as supplemented and amended from time to time, as promulgated by any US regulatory authority, including, but not limited to, the Securities and Exchange Commission and the Commodity Futures Trading Commission. |
| “US Person” | <p>US Person (“USP”) to whom Units of the Fund may not be offered or sold, for the purposes of this restriction, the term US Person shall mean the following:</p> <ol style="list-style-type: none"> 1) an individual who is a resident of the US under any US Law. 2) a corporation, partnership, limited liability company, collective investment vehicle, investment company, pooled account, or other business, investment, or legal entity: <ol style="list-style-type: none"> a. created or organized under US Law; b. created (regardless of domicile of formation or organisation) principally for passive investment (e.g. an investment company, fund or similar entity excluding employee benefit or pension plans): <ol style="list-style-type: none"> i. and owned directly or indirectly by one or more USPs who hold, directly or indirectly, in aggregate a 10% or greater beneficial interest, provided that any such USP is not defined as a Qualified Eligible Person under CFTC Regulation 4.7(a); ii. where a USP is the general partner, managing member, managing director or other position with authority to direct the entity's activities; iii. where the entity was formed by or for a USP principally for the purpose of investing in securities not registered with the SEC unless such entity is comprised of Accredited Investors, as defined in Regulation D, 17 CFR 230.501(a), and no such Accredited Investors are individuals or natural persons; or |

- iv. where more than 50% of its voting ownership interests or non-voting ownership interests are directly or indirectly owned by USPs;
 - c. that is an agency or branch of a non-US entity located in the US; or
 - d. that has its principal place of business in the US.
- 3) a trust:
- a. created or organized under US Law; or
 - b. where, regardless of domicile of formation or organisation:
 - i. any settlor, founder, trustee, or other person responsible in whole or in part for investment decisions for the trust is a USP;
 - ii. the administration of the trust or its formation documents are subject to the supervision of one or more US courts; or
 - iii. the income of which is subject to US income tax regardless of source.
- 4) an estate of a deceased person:
- a. who was a resident of the US at the time of death or the income of which is subject to US income tax regardless of source; or
 - b. where, regardless of the deceased person's residence while alive, an executor or administrator having sole or shared investment discretion is a USP or the estate is governed by US Law.
- 5) an employee benefit or pension plan that is:
- a. established and administered in accordance with US Law; or
 - b. established for employees of a legal entity that is a USP or has its principal place of business in the US.
- 6) a discretionary or non-discretionary or similar account (including a joint account) where:
- a. one or more beneficial owners is a USP or held for the benefit of one or more USPs; or
 - b. the discretionary or similar account is held by a dealer or fiduciary organized in the US.

If, subsequent to a Unitholder's investment in the Fund, the Unitholder becomes a US Person, such Unitholder (i) will be restricted from making any additional investments in the Fund and (ii) as soon as practicable have its Units compulsorily redeemed by the Fund (subject to the requirements of the Trust Deed and the applicable law).

The Manager may, from time to time, waive or modify the above restrictions, subject to the provisions of the Trust Deed.

"Valuation Day"

for a Sub-Fund, the relevant Business Day or Dealing Day or such other day(s) as the Manager may from time to time determine in its absolute discretion

"Valuation Point"

for a Sub-Fund, around the close of business in the last relevant market to close on the relevant Valuation Day or such other time on that day or such other day as the Manager may from time to time determine

SECTION A: OVERVIEW OF THE FUND, SUB-FUNDS AND CLASSES OF UNITS

The Fund

HSBC Collective Investment Trust (the “**Fund**”) is an umbrella unit trust established under the laws of Hong Kong by Trust Deed between HSBC Investment Funds (Hong Kong) Limited as Manager and HSBC Institutional Trust Services (Asia) Limited as Trustee.

The Sub-Funds have been authorised by the SFC. SFC authorisation is not a recommendation or endorsement of the Sub-Funds nor does it guarantee the commercial merits of the Sub-Funds or the performance of the Sub-Funds. It does not mean that a Sub-Fund is suitable for all investors nor is it an endorsement of a Sub-Fund's suitability for any particular investor or class of investors.

Trust Deed

Some of the information in this Explanatory Memorandum is a summary of corresponding provisions in the Trust Deed. The Trust Deed contains provisions for the indemnification of the parties and their exculpation from liability in certain circumstances. However neither the Trustee nor the Manager shall be exempted from any liability to Unitholders imposed under Hong Kong law or breaches of trust through fraud or negligence nor may they be indemnified against such liability by Unitholders or at Unitholders' expense. Whilst every effort has been made to ensure the accuracy of the facts and matters stated in this Explanatory Memorandum, in the event of any conflict between any of the provisions of this Explanatory Memorandum and the Trust Deed, the provisions of the Trust Deed will prevail. Unitholders and intending applicants are advised to consult the Trust Deed for further details on the relevant provisions.

A copy of the Trust Deed as for the time being in force may be obtained from the Manager at a reasonable fee and may be inspected during normal working hours at the offices of the Manager free of charge.

The Trustee and the Manager may modify, alter or add to the provisions of the Trust Deed. Such modification should be approved by an Extraordinary Resolution of Unitholders unless the Trustee and the Manager certify in writing that such modification, alteration or addition (i) does not materially prejudice the interests of the Unitholders, does not operate to release to any material extent the Trustee or the Manager or any other person from liability to Unitholders and (with the exception of the costs of preparing the relevant supplemental deed) will not result in any increase in the costs and charges; or (ii) is necessary in order to make possible compliance with any fiscal, statutory, regulatory or official requirement (whether or not having the force of law); or (iii) is made to correct a manifest error.

Meetings of Unitholders and voting rights

Meetings of Unitholders may be convened by the Manager or the Trustee, and Unitholders of 10% or more in value of the Units in issue of a Class, Sub-Fund or the Fund may also require a meeting to be convened to discuss resolutions specific to them. Unitholders will be given not less than 21 days' notice of any meeting.

The quorum for all meetings is Unitholders present in person or by proxy representing 10% of the Units for the time being in issue except for the purpose of passing an extraordinary resolution (as defined in the Trust Deed) (“**Extraordinary Resolution**”). The quorum for passing an Extraordinary Resolution shall be Unitholders present in person or by proxy representing 25% or more of the units in issue. In the case of an adjourned meeting of which separate notice will be given, such Unitholders as are present in person or by proxy will form a quorum. On a poll every Unitholder present in person, by proxy or by representative has one vote for every unit of which he is the holder and no vote for a fraction of a unit. In the case of joint Unitholders the senior of those who tenders a vote (in person or by proxy) will be accepted and seniority is determined by the order in which the names appear on the Register of Unitholders. A poll may be demanded by the Chairman or one or more Unitholders present in person or by proxy representing 5% in value of the units for the time being in issue.

Reports and accounts

Financial year end of the Fund and the Sub-Funds is on 31 March in each year. An annual report containing audited accounts will be made available to Unitholders as soon as possible, and in any event within four months, after the end of the financial year.

Unaudited semi-annual reports will also be made available within two months after 30 September in each year. Such reports contain a statement of the net asset value of each Sub-Fund and of the investments comprising its portfolio.

The annual reports and semi-annual reports will be available in English only.

The latest annual reports and semi-annual reports will be available on the website of the Manager at www.assetmanagement.hsbc.com/hk¹, within four months of the end of the financial year, and within two months of 30 September each year. Printed copies of the latest annual reports and semi-annual reports will also be available at the offices of the Manager and provided to Unitholders upon their request. Please note that, where a number 8 or above typhoon signal or black rainstorm warning is hoisted or other similar event occurs at any time during a Business Day, the office of the Manager shall not be open for such purpose.

The annual report and accounts of the Fund is prepared in accordance with HKFRS (Hong Kong Financial Reporting Standards). Investors should note that the above valuation policies may not necessarily comply with HKFRS. Under HKFRS, investments should be valued at fair value and bid and ask pricing is considered to be representative of fair value for long and short listed investments respectively. However, under the valuation basis described in the section entitled “Valuation and prices”, listed investments are expected to be valued at the last traded price instead of bid and

¹ Please note that this website has not been reviewed by the SFC.

ask pricing as required under HKFRS. To the extent that the valuation basis adopted by the Sub-Funds deviates from HKFRS, adjustments may be required in the annual accounts of the Sub-Funds in order to comply with HKFRS, and if relevant will include a reconciliation note in the annual accounts of the Sub-Funds to reconcile values shown in the annual accounts determined under HKFRS to those arrived at by applying the Sub-Funds' valuation rules. Otherwise, non-compliance with HKFRS may result in the Auditors issuing a qualified or an adverse opinion on the annual accounts depending on the nature and level of materiality of the non-compliance.

As described under the heading "Amortised establishment costs" in the section "Charges and expenses", it should also be noted that the policy relating to amortisation of establishment expenses is not strictly in accordance with the HKFRS, which requires establishment expenses to be expensed as incurred. This may result in the net asset value of the Sub-Funds from the daily valuation being higher than the net asset value of the Sub-Funds reported in the audited annual accounts, which are prepared in accordance with HKFRS.

Investor Notice, Communication or Other Documents

Notice, communication or other documents required to be given to investors under this Explanatory Memorandum or the Trust Deed may be disseminated either (i) in printed copies or (ii) through electronic means. The arrangements of each distributor may be different, please check with the distributor through which you invested in the Fund for details of the arrangements applicable to you.

Manager, Trustee and related service providers

Manager

HSBC Investment Funds (Hong Kong) Limited

Address: HSBC Investment Funds (Hong Kong) Limited, HSBC Main Building, 1 Queen's Road Central, Hong Kong

The Manager of the Fund is incorporated in and under the laws of Hong Kong. The directors comprise:

LAU, Ka Yin Joanne
HO, Wai Fun
TAM, Chun Pong Stephen
Edgar GEHRINGER
Michael, CROSS

Address: all of HSBC Main Building, 1 Queen's Road Central, Hong Kong

The Manager is registered with SFC to carry on Type 1 (dealing in securities), Type 4 (advising on securities), Type 5 (advising on futures contracts) and Type 9 (asset management) regulated activities (CE Number: AAL518). The Manager is a member of the HSBC Group.

The Manager may be subject to removal (a) if the Manager goes into liquidation (b) if for good and sufficient reason the Trustee is of the opinion that a change of Manager is desirable in the interests of Unitholders and (c) if the Unitholders of not less than 50% in value of the Units for the time being outstanding deliver to the Trustee in writing a request that the Manager should retire.

In the event that the Manager is removed under the circumstances above, the Trustee shall as soon as reasonably practicable appoint a successor manager to replace the Manager. The Trustee shall at all times act in the best interest of the Unitholders in exercising its rights of removing the Manager and the appointment of a successor manager.

Investment Advisers, Sub-Investment Advisers and Sub-Delegates

The Manager has delegated its investment management duties for each Sub-Fund to an Investment Adviser. Such Investment Adviser may then appoint one or more Sub-Investment Adviser(s) (subject to the approval of the Manager) to provide discretionary or non-discretionary advice, who may in turn appoint one or more Sub-Delegates to provide such advice. The specific Investment Adviser, Sub-Investment Adviser(s) and Sub-Delegate(s) with discretionary investment functions (if applicable) for each Sub-Fund is disclosed in the section "Appendix 1 – Sub-Fund Details". The Investment Advisers, Sub-Investment Advisers and Sub-Delegate(s) are all members of the HSBC Group and comprise:

HSBC Global Asset Management (Hong Kong) Limited

Address: HSBC Global Asset Management (Hong Kong) Limited, HSBC Main Building, 1 Queen's Road Central, Hong Kong

HSBC Global Asset Management (France)

Address: HSBC Global Asset Management (France), Immeuble Cœur Défense – Tour A, 110 Esplanade du Général de Gaulle, La Défense 4, 92400 Courbevoie, France

HSBC Global Asset Management (UK) Limited

Address: 8 Canada Square, London E14 5HQ, United Kingdom

HSBC Global Asset Management (Singapore) Limited

Address: 10 Marina Boulevard Marina Bay Financial Centre Tower 2, #48-01 Singapore, Singapore, 018983

HSBC Global Asset Management (Deutschland) GmbH

Address: Hansaallee 3 40549 Düsseldorf, Germany

The fees of the Investment Adviser, Sub-Investment Adviser and Sub-Delegate will be borne by the entity which appointed them (i.e. the Manager, the Investment Adviser or the Sub-Investment Adviser (as the case may be)).

The Manager may appoint a replacement Investment Adviser or discretionary Sub-Investment Adviser or Sub-Delegate for a Sub-Fund at its discretion subject to necessary prior approval by the SFC and giving at least one month's prior notice to affected Unitholders in normal circumstances.

Trustee and Registrar

HSBC Institutional Trust Services (Asia) Limited

Address: HSBC Institutional Trust Services (Asia) Limited, 1 Queen's Road Central, Hong Kong

The Trustee of the Fund is incorporated with limited liability in Hong Kong in 1974. It is registered as a trust company under Section 78(1) of the Hong Kong Trustee Ordinance (Cap.29), is an approved trustee under the Mandatory Provident Fund Schemes Ordinance. The Trustee is an indirectly wholly owned subsidiary of HSBC Holdings plc, a public company incorporated in England and Wales. The Trustee is licensed by the SFC to carry out type 13 regulated activity (providing depositary services for relevant collective investment schemes under the Securities and Futures Ordinance and has a Trust or Company Service Provider ("TCSP") License under Anti-Money Laundering and Counter-Terrorist Financing Ordinance (Cap.615).

The Trustee shall be responsible for the safe-keeping of the investments, assets and other property forming part of the Fund in accordance with the provisions of the Trust Deed and, to the extent permitted by law, such investments, assets and other property shall be dealt with as the Trustee may think proper for the purpose of providing for the safe-keeping thereof, subject to the provisions of the Trust Deed.

The Trustee may (i) appoint such person or persons (including, without limitation, any of its Connected Persons) or have such person(s) appointed, to hold, as agent, nominee, custodian, joint custodian, co-custodian or sub-custodian, all or any investments, assets, collateral or other property comprised in a sub-fund and may empower any such person to appoint, with the prior consent in writing of the Trustee, additional co-custodians and/or sub-custodians (each such agent, nominee, custodian, joint custodian, co-custodian or sub-custodian a "**Correspondent**"), or (ii) delegate to a person or persons (including, without limitation, any of its Connected Persons) the performance of its duties, powers or discretions under the Trust Deed. The Trustee confirms that the Trustee shall (a) exercise reasonable care, skill and diligence in the selection, appointment and ongoing monitoring of any such persons and, (b) be satisfied that such persons retained remain suitably qualified and competent to provide the relevant services to the relevant sub-fund. The Trustee shall remain liable for any act or omission of any such person as described in the aforesaid (i) and (ii) that is a Connected Person of the Trustee as if the same were the acts or omissions of the Trustee. Provided however that if the Trustee has discharged its obligations set out in the aforesaid (a) and (b), the Trustee shall not be liable for any act, omission, insolvency, liquidation or bankruptcy of any such person(s) not being the Trustee's Connected Person appointed as Correspondent and/or delegates of any sub-fund.

For the purpose of the aforesaid and where applicable, "Correspondent" shall also include the QFI Custodian. For the avoidance of doubt, Bank of Communications Co., Ltd acting as QFI Custodian is not a Connected Person of the Trustee as of the date of this Explanatory Memorandum.

The Trustee shall not be liable for any act, omission, insolvency, liquidation or bankruptcy of Euro-clear Clearing System Limited or Clearstream Banking, S.A. or any other recognised depositary or clearing system.

The Trustee also acts as the Registrar and will be responsible for maintaining the Fund's register.

Subject as provided in the Trust Deed, the Trustee is entitled to be indemnified from the assets of the relevant sub-fund from and against any and all actions, proceedings, liabilities, costs, claims, damages, expenses, including all reasonable legal, professional and other similar expenses (other than any liability imposed under the laws of Hong Kong or for breach of trust through fraud or negligence on the part of the Trustee or any of its officers, employees, agents or delegates for which the Trustee would be liable under the Trust Deed), which may be incurred by or asserted against the Trustee in performing its obligations or duties in connection with any Sub-Fund.

The Trustee is entitled to the fees set out under the section headed "Charges and expenses" and to be reimbursed for other costs and expenses permitted under the Trust Deed.

The Manager has sole responsibility for making investment decisions in relation to the Fund and/or each Sub-Fund and the Trustee (including its delegate) is not responsible or has no liability for any investment decision made by the Manager. The Trustee and its delegate will not participate in transactions or activities or make any payments denominated in US dollars, which, if carried out by a US person, would be subject to the United States Office of Foreign Assets Control (OFAC) sanctions.

Neither the Trustee nor its delegate is involved directly or indirectly with the sponsorship or investment management of the Fund or any Sub-Fund. In addition, neither the Trustee nor its delegate is responsible for the preparation or issue of this Explanatory Memorandum and therefore they accept no responsibility for any information contained in this Explanatory Memorandum other than information relating to themselves and the HSBC Group under this section - "Trustee and Registrar".

The appointment of the Trustee may be terminated in the circumstances set out in the Trust Deed.

The Trustee may not be entitled to retire voluntarily except upon the appointment of a new Trustee. In the event of the Trustee desiring to retire, the Manager shall find a qualified corporation under any applicable law and by a supplemental deed replace the Trustee. The Manager shall as soon as practicable thereafter give notice to the Unitholders specifying the name and the address of the new Trustee.

Auditors

KPMG

Address: KPMG, Certified Public Accountants, 8th Floor, Prince's Building, 10 Chater Road, Central, Hong Kong

KPMG currently acts as auditors to the Fund. The Manager (with the approval of the Trustee) may appoint a replacement auditor at any point without prior notice to Unitholders.

Legal Advisers

Deacons

Address: Deacons, 5th Floor, Alexandra House, 18 Chater Road, Central, Hong Kong

Deacons currently acts as the main legal adviser of the Fund. However, the Manager may engage alternative legal advisers for specific legal advice pertaining to the Fund. Moreover, at the Manager's discretion, the main legal adviser of the Fund may be replaced at any point without prior notice to Unitholders.

Conflicts of interest

The Manager, the Investment Adviser, the Sub-Investment Adviser (if any), Sub-Delegate (if any) and the Trustee and their respective delegates or Connected Persons may from time to time act as trustee, administrator, registrar, manager, custodian, investment manager or investment adviser, representative or otherwise as may be required from time to time in relation to, or be otherwise involved in or with, other funds and clients which have similar investment objectives to those of the Sub-Funds. It is, therefore, possible that any of them may, in the course of business, have potential conflicts of interest with the Sub-Funds.

In such event, each will at all times have regard to its obligations under any agreements to which it is party or by which it is bound in relation to the Fund or the Sub-Funds. In particular, but without limitation to its obligations to act in the best interests of the Unitholders when undertaking any dealings or investments where conflicts of interest may arise, each will respectively endeavour to ensure that such conflicts are managed and minimised so far as reasonably practicable and that measures are adopted that seek to ensure such conflicts are resolved fairly and taking into account the interests of Unitholders of the relevant Sub-Fund as a whole.

The Fund and/or the Sub-Funds may enter into transactions with the Manager, the Investment Advisers, the Sub-Investment Advisers (if any), Sub-Delegate (if any) and the Trustee or with any of their affiliates, or invest the assets of or reinvest the cash collateral received by the Sub-Funds in any investment products or funds managed, launched or offered by any of the above-mentioned entities, provided that such transactions are carried out as if effected on normal commercial terms negotiated at arm's length and provided that the transactions comply with the requirements set out in the section headed "Transactions with Connected Persons". Subject to the requirements under the "Transactions with Connected Persons" and "Cash rebates and soft commissions" sections, affiliates of the HSBC Group may also provide broking services to a Sub-Fund and/or to other funds including acting as counterparties for certain forward foreign exchange and financial futures contracts.

For example, The Hongkong and Shanghai Banking Corporation Limited may provide foreign exchange services to a Sub-Fund for which it receives a fee out of the property of such Sub-Fund. At the same time, The Hongkong and Shanghai Banking Corporation Limited or any of its Connected Persons may also act as financial adviser, banker, derivatives counterparty or otherwise provide services to the issuer of investments that such Sub-Fund may invest in; act in the same transaction as agent for more than one client; have a material interest in the issue of the investments of such Sub-Fund; or earn profits from or have a financial or business interest in any of these activities.

The Investment Advisers or any affiliates acting in a fiduciary capacity with respect to client accounts may recommend to or direct clients to buy and sell Units of the Sub-Funds. If a client defaults on its obligation to repay indebtedness to the HSBC Group that is secured by Units in the Fund, and the HSBC Group forecloses on such interest, the HSBC Group would become a Unitholder of the Fund. As a consequence, the HSBC Group and its affiliates could hold a relatively large proportion of Units and voting rights in the Fund and/or Sub-Fund.

The services of the Trustee provided to the Fund and the Sub-Funds are not deemed to be exclusive. The Trustee shall be free to render similar services to others so long as its services to the Fund and the Sub-Funds are not impaired thereby and to retain for its own use and benefit all fees and other moneys payable in relation to such services. Further, the Trustee shall not be deemed to be affected with notice of or to be under any duty to disclose to the Fund and the Sub-Funds any fact or thing which comes to the notice of the Trustee in the course of the Trustee rendering similar services to others or in the course of its business in any other capacity or in any manner, otherwise than in the course of carrying out its duties under the Trust Deed.

Termination of the Fund (or a Sub-Fund or Class thereof)

The Fund shall continue until it is terminated in one of the ways set out below.

The Fund may be terminated by the Trustee, if (a) within 30 days of the Manager leaving office, no new manager is appointed or (b) if in the opinion of the Trustee the Manager is incapable of performing or fails to perform its duties satisfactorily or shall do any other thing which in the opinion of the Trustee is calculated to bring the Fund into disrepute or to be harmful to the interests of the Unitholders or (c) if the Manager goes into liquidation or if a receiver is appointed over any of their assets and not discharged within 60 days or (d) if any law shall be passed which renders it illegal or in the opinion of the Trustee impracticable or inadvisable in consultation with the relevant regulatory agencies to continue the Fund or (e) if the Trustee shall desire to retire and no new Trustee is appointed within six months of the Trustee giving notice of such desire.

Further at any time the Unitholders of a Sub-Fund may authorise termination of a Sub-Fund or any Class of Units thereof by Extraordinary Resolution.

The Fund may be terminated by the Manager if on any date the aggregate net asset value of the Units outstanding shall be less than USD40 million or equivalent.

A Sub-Fund may be terminated by the Manager if on any date the aggregate net asset value of the relevant Class(es) of Units outstanding in respect of the Sub-Fund shall be less than the threshold set out below:

| Sub-Fund | Threshold |
|---|-------------------------------|
| HSBC Asia High Income Bond Fund | USD 40 million or equivalent |
| HSBC China Multi-Asset Income Fund | USD 40 million or equivalent |
| HSBC European Multi-Asset Income Fund | EUR 50 million or equivalent |
| HSBC Asia Multi-Asset High Income Fund | USD 50 million or equivalent |
| HSBC Asia Pacific ex Japan Equity Volatility Focused Fund | USD 40 million or equivalent |
| HSBC Evolving Asia Equity Fund | USD 50 million or equivalent |
| HSBC Global Sustainable Multi-Asset Income Fund | USD 200 million or equivalent |
| HSBC Global Diversified Real Return Fund | USD 50 million or equivalent |
| HSBC India Multi Income Fund | USD 50 million or equivalent |
| HSBC Post Retirement Multi-Asset Fund | USD 50 million or equivalent |
| HSBC US Dynamic Opportunities Equity Fund | USD 50 million or equivalent |

Further, the Fund, a Sub-Fund and / or any Class of Units may be terminated if (a) in the opinion of the Manager, it is impracticable or inadvisable to continue a Sub-Fund and/or any Class of Units of a Sub-Fund (as the case may be) (including without limitation, a situation where it is no longer economically viable to operate a Sub-Fund) or (b) if any law shall be passed which renders it illegal or in the opinion of the Manager impracticable or inadvisable in consultation with the relevant regulatory agencies to continue the Fund or a Sub-Fund and/or any Class of Units of a Sub-Fund or (c) if the Manager is unable to implement the investment objective in respect of a Sub-Fund (including without limitation where a Sub-Fund cannot access investment quota or where the instruments in which a Sub-Fund primarily invests become not available).

At least one month's notice will be given to affected Unitholders.

Upon the termination of the Fund or a Sub-Fund, any unclaimed proceeds held by the Trustee may, at the expiration of twelve months from the date upon which the same were payable, be paid into a court of competent jurisdiction subject to the right of the Trustee to deduct therefrom any expenses it may incur in making such payment.

The Sub-Funds

List of available Sub-Funds

The Fund is an umbrella fund and currently offers units in the following Sub-Funds covered by this Explanatory Memorandum:

- HSBC Asia High Income Bond Fund
- HSBC China Multi-Asset Income Fund
- HSBC European Multi-Asset Income Fund
- HSBC All China Bond Fund
- HSBC Asia Multi-Asset High Income Fund
- HSBC Asia Pacific ex Japan Equity Volatility Focused Fund
- HSBC Evolving Asia Equity Fund
- HSBC Global Sustainable Multi-Asset Income Fund
- HSBC Global Diversified Real Return Fund
- HSBC India Multi Income Fund
- HSBC Post Retirement Multi-Asset Fund
- HSBC US Dynamic Opportunities Equity Fund

Each Sub-Fund is a separate trust and has its own separate and distinct investment policy.

General risks

Investors should consider the risks outlined in this section alongside the applicable risks in the "Asset class risks", and "Sub-Fund specific risks" sections before investing in a Sub-Fund. Investors should note that the decision whether or not to invest remains with them. If investors have any doubt as to whether or not a Sub-Fund is suitable for them, they should obtain independent professional advice.

Market risks

Investors should be aware that the value of securities in which a Sub-Fund invests, and the return derived from it can fluctuate. Each Sub-Fund invests in and actively trades securities utilising strategies and investment techniques with significant risk characteristics, including risks arising from the volatility of the market. Prices of investments may be volatile, and a variety of factors that are inherently difficult to predict, such as actions by various governmental agencies and domestic or international economic and political developments, may cause sharp market fluctuations, which could significantly and adversely affect the value of a Sub-Fund's investments.

Performance risks

There is no guarantee that the investment objective of a Sub-Fund can be achieved. There is no express or implied assurance as to the likelihood of achieving the investment objective for a Sub-Fund.

There is no guarantee that in any time period, particularly in the short term, a Sub-Fund's portfolio will achieve appreciation in terms of income or capital growth. A Sub-Fund's portfolio may be subject to market fluctuations and to all the risks inherent in all investments and markets. As a result, the price of Units may go down as well as up. Whilst the Manager intends to implement strategies designed to minimise potential losses, there can be no assurance that these strategies will be successful. Making an investment in a Sub-Fund is not the same as making a deposit in a bank. An investor may lose a substantial proportion or all of its investments in a Sub-Fund.

The prices of a Sub-Fund's Units depends on the market values of the Sub-Fund's investments and such prices as well as the income from Units can go down as well as up. Past performance of a Sub-Fund does not indicate future performance. Investment in a Sub-Fund is not capital guaranteed and is only suitable for investors who can leave their capital for medium to long-term investment.

A Sub-Fund's performance is subject to the risks associated with its investments and cash exposure including, among others, market, interest rate, currency, exchange rate, economic, credit, liquidity, counterparty, foreign securities and political risks.

Foreign exchange risks

Relative to the Base Currency

A Sub-Fund's assets and liabilities may be denominated in currencies different from the Sub-Fund's Base Currency. An investor's return (as measured in terms of the Base Currency) may be affected unfavourably by exchange control regulations or changes in the exchange rates between a Sub-Fund's Base Currency and other currencies.

Changes in currency exchange rates may influence the value of a Sub-Fund's Units, the dividends or interest earned and the gains and losses realised by a Sub-Fund. Exchange rates between currencies are determined by supply and demand in the currency exchange markets, the international balance of payments, governmental intervention, speculation and other economic and political conditions.

If the currency in which a security is denominated appreciates against the Base Currency of the Sub-Fund, the value of the security will increase in terms of the Sub-Fund's Base Currency. Conversely, a decline in the exchange rate of the currency in which a security is denominated would adversely affect the value of the security in terms of the Sub-Fund's Base Currency. Depending on this, in terms of the Sub-Fund's Base Currency, an investor (i) may suffer losses even if there are gains or no losses in the value of the non-Base Currency denominated underlying securities; or (ii) may suffer additional losses if the non-Base Currency denominated underlying investments of a Sub-Fund fall in value.

Further, dividends/payouts will be paid in the relevant Class Currency, which may involve currency conversion of the proceeds obtained from realisation of the Sub-Fund's assets. Currency conversion involves foreign exchange risks as the exchange rates are subject to fluctuations.

Relative to the Class Currency

For those investors investing in a Class with Class Currency other than the Base Currency which is not a Currency Hedged Unit Class then the above disclosure should be read giving reference to Class Currency of the Class instead of the Base Currency of the Sub-Fund.

Currency Hedged Unit Classes

For those investors investing in a Currency Hedged Unit Class then any reference to an increase or decrease in the Base Currency should be read as an equivalent increase or decrease in the Class Currency of the Currency Hedged Unit Class insofar as the Class is effectively hedged.

Further details may be found in the "Currency Hedged Unit Classes" section.

Currency conversion risks for RMB denominated Classes and investments in RMB

A Sub-Fund will need to convert cash (at the applicable exchange rate and subject to the applicable spread) into or out of RMB in the following circumstances:

- (1) Conversion of RMB settled subscriptions into another currency for investment.
- (2) Conversion of cash in a Sub-Fund into RMB for the purposes of settling RMB settled redemptions.
- (3) Conversion of available RMB into another currency in the course of investing.
- (4) Conversion of available cash into RMB in the course of investing.

Such transactions could incur considerable currency conversion costs. Further, as RMB is not freely convertible and is subject to exchange controls and restrictions, currency conversion is subject to availability of RMB at the relevant time. A Sub-Fund may not be able to invest according to its intended strategy in the event that there is insufficient RMB available to it. A Sub-Fund's payment of redemption proceeds or dividends/payouts may be delayed in the event that there is insufficient RMB available to it (for a period not exceeding one calendar month of receipt of a properly documented redemption request).

The RMB is traded in both the onshore and offshore markets. While both onshore RMB (“**CNY**”) and offshore RMB (“**CNH**”) represent the same currency, they are traded in different and separate markets which operate independently. Therefore CNY and CNH do not necessarily have the same exchange rate and their movement may not be in the same direction. When calculating the net asset value of a Unit Class with a RMB Class Currency (and hence the Issue Price/Redemption Price of such Class), the Manager will apply the CNH rate. Any divergence between CNH and CNY may adversely impact investors.

For investors with a non-RMB Home Currency who invest in RMB Currency Hedged Unit Classes, they will be exposed to the RMB and any associated foreign exchange risk. Currency Hedged Unit Classes are not recommended for such investors. There is no guarantee that the value of RMB against the investor’s Home Currency will not depreciate. Any depreciation of RMB could adversely affect the value of such investors’ investment in RMB denominated Currency Hedged Unit Classes. Investors should read the “Currency Hedged Unit Classes” section for further details.

Liquidity risks

Liquidity risk exists within most financial products including the investments held by the Sub-Funds. This means that a delay may occur in receiving sales proceeds from the investments held by a Sub-Fund, and those proceeds may be less than recent valuations used to determine the net asset value of a Sub-Fund.

This risk is greater in exceptional market conditions or when large numbers of market participants are trying to sell their investments at the same time. In such cases, the Sub-Funds may also experience substantial redemptions of Units which could require the Manager to liquidate investments of the Sub-Funds more rapidly than otherwise desirable in order to raise the necessary cash to fund the redemptions. This could adversely affect the Redemption Price and, in such circumstances, the receipt of sale proceeds may be delayed and/or take place at lower prices.

Further, the Manager is entitled under certain circumstances to suspend dealings in the Units. In this event, valuation of the net asset value will be suspended, and any affected redemption applications and payment of redemption proceeds will be deferred. The risk of decline in net asset value of the Units during the period up to the redemption of the Units will be borne by the redeeming Unitholders.

Over-the-counter markets risks

There are special risks associated with bonds, financial derivatives instruments, participation notes, structured products and other investments traded on over-the-counter (OTC) markets. In general, there is less governmental regulation and supervision of transactions in the OTC markets (in which many different kinds of financial derivatives instruments and structured products are generally traded) than of transactions entered into on organized exchanges. In addition, many of the protections afforded to participants on some organized exchanges, such as the performance guarantee of an exchange clearing house, may not be available in connection with transactions carried out on OTC markets. Therefore, a Sub-Fund entering into OTC transactions will be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that a Sub-Fund will sustain losses. The relevant Sub-Fund will only enter into transactions with counterparties in accordance with the counterparty policy and may seek to reduce counterparty exposure through the receipt of collateral in accordance with the counterparty policy. Both counterparty policy and collateral policy are set out in sub-section “5. Counterparty policy and collateral policy” within the “Fund Restrictions” section.

Regardless of the measures a Sub-Fund may seek to implement to reduce counterparty credit risk, however, there can be no assurance that a counterparty will not default or that a Sub-Fund will not sustain losses as a result.

Instruments traded on the OTC markets may be less liquid. From time to time, the counterparties with which a Sub-Fund effects transactions may cease making markets or quoting prices in certain instruments. In such instances, the Sub-Fund may be unable to enter into a desired transaction or to enter into an offsetting transaction with respect to an open position, which may adversely affect its performance.

Investor risks

The Manager may compulsorily redeem all or a portion of the Unitholder’s Units in the Sub-Fund. Such compulsory redemption may create adverse tax and/or economic consequences to the Unitholder depending on the timing thereof. No person will have any obligation to reimburse any portion of an investor’s losses upon termination of the Sub-Fund, compulsory redemption or otherwise.

Valuation risks

Valuation of a Sub-Fund’s investments may involve uncertainties and judgmental determinations, and independent pricing information may not at all times be available. If such valuations should prove to be incorrect, the net asset value of a Sub-Fund may be adversely affected.

Government or central banks’ intervention risks

Changes in regulation or government policy leading to intervention in the currency and interest rate markets (e.g. restrictions on capital movements or changes to the way in which a national currency is supported such as currency de-pegging) may adversely affect some financial instruments and the performance of the Sub-Fund.

Early termination risks

The Fund or any of its Sub-Funds may be liquidated on the occurrence of certain events as set out in the section headed "Termination of the Fund (or a Sub-Fund or Class thereof)" in this Explanatory Memorandum.

In the event of the early termination of a Sub-Fund, the Sub-Fund would have to distribute to the Unitholders their pro rata interest in the assets of the Sub-Fund. It is possible that at the time of such sale or distribution, certain investments held by the Sub-Fund may be worth less than the initial cost of such investments, resulting in a substantial loss to the Unitholders. Moreover, any organizational expenses with regard to the Units that had not yet become fully amortised would be debited against the Sub-Fund's capital at that time.

Tax risks

Investors should note that (i) the proceeds from the sale of securities in some markets or the receipt of any dividends or other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market including taxation levied by withholding at source and/or (ii) a Sub-Fund's investments may be subject to specific taxes or charges imposed by authorities in some markets.

Investors should refer to the tax disclosures in the section headed "Taxation" for further details including details on tax provisions.

Distribution/payout out of capital risks

Under the Trust Deed, distributions/payouts of a Sub-Fund may be paid from capital (including capital gains) of the Sub-Fund. The Manager may in its discretion distribute / make payouts from capital if the income generated from a Sub-Fund's investments attributable to the relevant Class of Units during the relevant period is insufficient to pay distributions/payouts as declared. The Manager may also at its discretion pay dividend/payout out of gross income while charging/paying all or part of a Sub-Fund's fees and expenses to/out of the capital of the Sub-Fund (resulting in an increase in distributable income for the payment of dividends/payout by the Sub-Fund), and thereby effectively pay distributions/payout out of capital of the Sub-Fund.

In addition, for certain Currency Hedged Unit Classes, the dividend distribution amount and the net asset value may be adversely affected by differences in the interest rates of the Class Currency of the Currency Hedged Unit Classes and the Sub-Fund's Base Currency. Also, for certain Currency Hedged Unit Classes, differences in interest rates may result in an increase in the amount of dividend distribution paid out of capital and hence a greater erosion of capital than other non-hedged Classes.

Investors should note that the payment of distributions/payouts out of capital or effectively out of capital represents a return or withdrawal of part of the amount they originally invested or from any capital gains attributable to the original investment.

Any distributions/payouts involving payment out of a Sub-Fund's capital or effectively out of a Sub-Fund's capital will result in an immediate reduction in the net asset value per Unit (or adjusted net asset value per Unit) of the relevant Class (and hence the Issue Price/Redemption Price of the relevant Class).

Hedging risks

Hedging a risk typically attempts to preclude a Sub-Fund or Class from both benefitting and suffering from any return associated with the hedged risk (e.g. currency risk between non-Base Currency assets and the Base Currency). If there is positive return associated with a hedged risk then a Sub-Fund's performance will fare relatively poorer than if it had not hedged the risk. Conversely, if there is negative return associated with a hedged risk then a Sub-Fund's performance will fare relatively better than if it had not hedged the risk.

There is no guarantee that the desired hedging instruments will be available or hedging techniques will achieve their desired result. In adverse situations, a Sub-Fund's hedging technique may become ineffective and a Sub-Fund may suffer significant losses.

Furthermore, the return of a hedge will be impacted by various factors including transaction costs and, for currency hedging, interest rate differentials between the currency being hedged and the currency it is being hedged into. These impacts may be significant depending on prevailing market conditions and they will be reflected in the net asset values of the relevant Sub-Funds and Classes. This may adversely affect the returns of investors in such Sub-Funds and Classes.

Hedging may involve the use of derivatives (e.g. forward contracts). Please refer to the "Derivatives risks" section for the associated risks.

Investing in Underlying Funds risks

A Sub-Fund may invest in shares or units in Underlying Funds, including QFI Underlying Funds and securities investment funds in mainland China which are authorised by the CSRC for investment by the retail public in mainland China, to obtain exposure to underlying assets, such as equity and bonds. Investors should note that such investment may involve another layer of fees charged at the Underlying Fund level. This is because, in addition to the expenses and charges payable by a Sub-Fund as disclosed in this Explanatory Memorandum, a Sub-Fund will bear indirectly the fees charged by the managers and other service providers of the Underlying Funds, or will incur charges in subscribing for or redeeming shares in the Underlying Funds. Please refer to the section headed "Charges and expenses" for further details.

The Manager will consider various factors in selecting the Underlying Funds, for example, the investment objective and strategy, level of fees and charges, the redemption frequency and liquidity of such funds. However, a Sub-Fund does not have control of the investments of the Underlying Funds and there is no assurance that the investment objective or strategy of an underlying fund will be successfully achieved.

Where Underlying Funds are not able to meet redemption requests of a Sub-Fund, such Sub-Fund will be subject to liquidity risks, and may suffer losses as a result of delays in receiving redemption proceeds.

Some Underlying Funds adopting liquid alternative strategies may use financial derivative instruments extensively for investment purposes and may have a net leveraged exposure of more than 100% of their respective net asset value. This will further magnify any potential negative impact of any change in the value of the underlying assets on the Underlying Funds and also increase the volatility of the Underlying Funds' price and may lead to significant losses which will have a negative impact to the net asset value of the Sub-Fund.

Underlying Funds may include those managed by the Manager, the Investment Adviser, the Sub-Investment Adviser, Sub-Delegate or other entities of the HSBC Group. Where potential conflicts of interest arise, the Manager will endeavour to ensure that such conflicts are resolved fairly. Please refer to the section headed "Conflicts of interest" for further details.

Cross-class liability risks

Multiple Classes of Units may be issued in relation to a Sub-Fund of the Fund, with particular assets and liabilities of a Sub-Fund attributable to particular Classes. For instance, Sub-Funds offering Currency Hedged Unit Classes will have assets and liabilities related to the hedge which are attributable to the relevant Currency Hedged Unit Classes. Moreover, these assets and liabilities may be denominated in various currencies, introducing currency risk (including RMB currency risk for which the "RMB currency risk" section and "Currency conversion risks for RMB denominated Classes" section should be considered).

Where the liabilities of a particular Class exceed the assets pertaining to that Class, creditors pertaining to one Class may have recourse to the assets attributable to other Classes. Although for the purposes of internal accounting, a separate account will be established for each Class, in the event of an insolvency or termination of a Sub-Fund (i.e., when the assets of a Sub-Fund are insufficient to meet its liabilities), all assets will be used to meet a Sub-Fund's liabilities, not just the amount standing to the credit of any individual Class. However, the assets of a Sub-Fund may not be used to satisfy the liabilities of another Sub-Fund.

Prohibited securities risks

In accordance with the HSBC Group policy, the Fund will not invest in the securities of companies that are involved directly and indirectly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel mines. As this policy aims to prohibit investment in certain types of securities, investors should be aware that this reduces the investment universe and prevents a Sub-Fund from benefitting from any potential returns from these companies.

Custody risks

Assets of a Sub-Fund are safe kept by the custodian (which may be the Trustee or a Correspondent thereof) and Unitholders are exposed to the risk of the custodian not being able to fully meet its obligation to reconstitute in a short time frame all of the assets of the Fund in the case of bankruptcy of the custodian. The assets of a Sub-Fund will be identified in the custodian's books as belonging to such Sub-Fund. Securities held by the custodian will be segregated from other assets of the custodian which mitigates the risk of non-restitution in case of bankruptcy. However, no such segregation applies to cash deposited with a bank which increases the risk of non-restitution in case of bankruptcy.

Further, the custodian may (with the prior consent in writing of the Trustee) appoint local Correspondents for the purpose of safekeeping assets in relevant local markets. Unitholders are exposed to the risk of the local Correspondents not being able to fully meet their obligation to reconstitute in a short time frame all of the assets of a Sub-Fund in the case of bankruptcy of the local Correspondent. In extreme circumstances, as the retroactive application of legislation and fraud or improper registration of title, a Sub-Fund may even be unable to recover all of its assets and the Trustee and the custodian may not be liable to make good any such loss (further details on the liability of the Trustee and its Correspondents is set out in the sub-section headed "Trustee and Registrar" of the "Manager, Trustee and related service providers" section). This risk may be greater where a Sub-Fund invests in markets where custody and settlement systems and controls are not fully developed.

Asset class risks

Equity risks

Investment in equity securities is subject to market risk and the prices of such securities may be volatile. Factors affecting the stock values are numerous, including but not limited to changes in investment sentiment, political environment, economic environment, regional or global economic instability, currency and interest rate fluctuations. Prices of equity securities are also affected by the business, performance and activities of individual companies as well as general market and economic conditions. If the market value of equity securities in which a Sub-Fund invests in goes down, the net asset value of a Sub-Fund may be adversely affected, and investors may suffer substantial losses. Investors may not get back the amount they initially invested in a Sub-Fund.

Risks of investing in small-cap/mid-cap companies

A Sub-Fund may not have a capitalisation requirement on stock investment and may invest in stocks issued by small cap and/or mid-cap companies. These stocks are more abrupt or erratic in price movements and their sensitivity to

market changes is higher than stocks of larger companies. They may be subject to a lower liquidity and cannot be sold readily. Further, even relatively small orders for purchase or sale of illiquid these securities can lead to significant price volatility. There is the risk that the stocks cannot be sold or can only be sold at a significant discount to the purchase price. This may result in investment losses to a Sub-Fund.

Fixed income risks

Debt securities risks

The principal factors that may affect the value of a Sub-Fund's securities holdings include: (i) changes in interest rates, (ii) the credit worthiness of the issuers of securities, (iii) unanticipated prepayment, and (iv) the decline of bond prices in general in the relevant bond market.

Credit ratings risks and credit rating agency risks

Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times. The credit ratings assigned by credit rating agencies are a generally accepted barometer of credit risk of a fixed income security. They are, however, subject to certain limitations. For example, the rating of an issuer is heavily weighted by past developments and does not necessarily reflect probable future conditions. There is often a time lag in updating the credit ratings in response to recent credit events.

In addition, a Sub-Fund may invest in securities the credit ratings of which are assigned by mainland Chinese local credit rating agencies. However, the rating criteria and methodology used by such agencies may be different from those adopted by most of the established international credit rating agencies. Therefore, such rating system may not provide an equivalent standard for comparison with securities rated by international credit rating agencies. Investors should be cautious when they refer to ratings assigned by mainland Chinese local credit agencies, noting the differences in rating criteria mentioned above. If assessments based on credit ratings do not reflect the credit quality of and the risks inherent in a security, investors may suffer losses, possibly greater than originally envisaged.

Downgrading risks

Debt securities may be subject to the risk of being downgraded (i.e. lowering of credit ratings assigned to the securities). In the event of downgrading in the credit ratings of a security or an issuer relating to a security, a Sub-Fund's investment value in such security may be adversely affected. The Manager may or may not be able to dispose of the securities that are being downgraded. The risks disclosed in the foregoing paragraph in relation to low rated debt securities will generally apply.

Credit risks

Investment in fixed income securities is subject to the credit and default risk of the issuers which may be unable or unwilling to make timely payments on principal and/or interest. Generally, a fixed income security that is lower rated or unrated will be subject to higher credit and default risk of the issuer than a higher rated fixed income security.

In the event that any issuer of such securities defaults, becomes insolvent or experiences financial or economic difficulties, the value of the securities will be adversely affected. A Sub-Fund may suffer losses in its investment in such securities. There is no certainty in the credit worthiness of issuers of debt securities. Unstable market conditions may mean there are increased instances of default amongst issuers. In case of default, a Sub-Fund may also encounter difficulties or delays in enforcing its rights against the issuers of securities as such issuers may be incorporated outside Hong Kong and subject to foreign laws.

The fixed income securities that a Sub-Fund invests in may be offered on an unsecured basis without collateral. In such circumstances, a Sub-Fund will rank equally with other unsecured creditors of the relevant issuer. As a result, if the issuer becomes bankrupt, proceeds obtained from the liquidation of the issuer's assets will be paid to holders of the fixed income securities only after all secured claims have been satisfied in full. A Sub-Fund is therefore fully exposed to the credit/insolvency risk of issuers as an unsecured creditor.

Below investment grade or unrated securities risks

A Sub-Fund may invest in securities which are rated below investment grade (in case of internationally recognised credit rating agencies) or rated AA or below (in case of mainland China local credit rating agencies) or are unrated. Such securities are considered to have a higher risk exposure than securities which have a higher credit rating with respect to payment of interest and the return of principal, and may also have a higher chance of default. Low rated or unrated debt securities generally offer a higher current yield than higher grade issues. However, low rated or unrated debt securities involve higher risks and are more sensitive to adverse changes in general economic conditions and in the industries in which the issuers are engaged, as well as to changes in the financial condition of the issuers and changes in interest rates. Valuation of these securities is more difficult and thus a Sub-Fund's price may be more volatile. Additionally, the market for below investment grade (in case of internationally recognised credit rating agencies) or AA or below (in case of mainland China local credit rating agencies) or unrated debt securities generally is less active than that for higher quality securities and a Sub-Fund's ability to liquidate its holdings in response to changes in the economy or the financial markets may be further limited by such factors as adverse publicity and investor perceptions.

Volatility and liquidity risks

The debt instruments in which a Sub-Fund invests may not be listed on a stock exchange or a Securities Market where trading is conducted on a regular basis. The debt securities in emerging markets may be subject to higher volatility and lower liquidity compared to more developed markets. The prices of securities traded in such markets may be subject to fluctuations. Even if the debt securities are listed, the market for such securities may be inactive and the trading volume may be low. In the absence of an active secondary market, a Sub-Fund may need to hold the

debt securities until their maturity date. If sizeable redemption requests are received, a Sub-Fund may need to liquidate its investments at a substantial discount in order to satisfy such requests and a Sub-Fund may suffer losses in trading such securities. The price at which the debt securities are traded may be higher or lower than the initial purchase price due to many factors including the prevailing interest rates.

Further, the bid and offer spreads of the price of debt instruments in which a Sub-Fund invests may be high, and a Sub-Fund may therefore incur significant trading costs and may even suffer losses when selling such investments.

Interest rate risks

Changes in market interest rates will affect the value of securities held by a Sub-Fund. Generally, the prices of debt instruments rise when interest rates fall, and vice versa. Long-term securities are generally more sensitive to changes in interest rates and, therefore, are subject to a greater degree of market price volatility. To the extent that a Sub-Fund holds long-term fixed income securities, its net asset value will be subject to a greater degree of fluctuation than if it held fixed income securities of a shorter duration. Fluctuations in interest rates may cause a Sub-Fund to suffer a loss in its investments if it disposes of such fixed income securities before their maturity.

Derivatives risks

Subject to a Sub-Fund's investment objective, policy and strategy, a Sub-Fund may use derivatives for hedging and/or investment purposes and such instruments may include futures, forwards (including non-delivery forwards), and swaps (including total return swaps and inflation swaps) as well as other financial derivative instruments.

Due to the inherent nature of financial derivative instruments, a Sub-Fund that uses financial derivative instruments as part of its investment strategy may involve risks different from, or possibly greater than, the risks associated with a fund that does not make use of financial derivatives. Specifically financial derivative instruments are subject to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and OTC markets risk. Further, a financial derivative may include an element of leverage meaning that a small movement in the price of the underlying security, index, interest rate or currency may result in a substantial movement in the price of the financial derivative instrument. This may result in losses being magnified and losses may exceed the amount invested in the financial derivative instrument resulting in a significant loss to a Sub-Fund.

Risks relating to Securities Lending transactions

Securities Lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner. In this event, the relevant Sub-Fund could experience delays in recovering its securities and may possibly incur a capital loss. The value of the collateral may fall below the value of the securities lent out.

Collateral management and re-investment of cash collateral risks

Where a Sub-Fund enters into an OTC derivative transaction or a Securities Financing Transaction, collateral may be received from or provided to the relevant counterparty.

As of the date of this Explanatory Memorandum, the Sub-Funds may receive both non-cash collateral or cash collateral.

In the event a Sub-Fund re-invests cash collateral, the relevant Sub-Fund will be exposed to the risk of a failure or default of the issuer of the relevant security in which the cash collateral has been invested. Notwithstanding that a Sub-Fund may only accept non-cash collateral which is highly liquid, the relevant Sub-Fund is subject to the risk that it will be unable to liquidate collateral provided to it to cover a counterparty default. The relevant Sub-Fund is also subject to the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.

Where collateral is provided by a Sub-Fund to the relevant counterparty, in the event of the insolvency of the counterparty, the relevant Sub-Fund may become subject to the risk that it may not receive the return of its collateral or that the collateral may take some time to return if the collateral becomes available to the creditors of the relevant counterparty.

Finance charges received by a Sub-Fund under a Securities Lending transaction may be reinvested in order to generate additional income. Similarly cash collateral received by a Sub-Fund may also be reinvested in order to generate additional income. In both circumstances, the relevant Sub-Fund will be exposed to market risk in respect of any such investments and may incur a loss in reinvesting the financing charges and cash collateral it receives. Such a loss may arise due to a decline in the value of the investment made. A decline in the value of investment of the cash collateral would reduce the amount of collateral available to be returned by the relevant Sub-Fund to the Securities Lending counterparty at the conclusion of the Securities Lending contract. The relevant Sub-Fund would be required to cover the difference in value between the collateral originally received and the amount available to be returned to the counterparty, thereby resulting in a loss to the relevant Sub-Fund.

Sub-Fund specific risks

Concentration risks

A Sub-Fund's investments may be concentrated in specific industry sectors, instruments, geographical location, etc. The value of the Sub-Fund may be more volatile than that of a sub-fund having a more diverse portfolio of investments.

For Sub-Funds with geographical concentration, the value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the specific geographical market.

Emerging and less developed markets securities risks

Emerging or developing markets may have relatively unstable governments, economies based on a less diversified industrial base and Securities Markets that trade a smaller number of securities. Companies in emerging markets may generally be smaller, less experienced and more recently organized than many companies in more developed markets. Prices of securities traded in the Securities Markets of emerging or developing countries/regions tend to be volatile. Furthermore, foreign investors are often subject to restrictions in emerging or developing markets. These restrictions may require, among other things, governmental approval prior to making investments or repatriating income or capital, or may impose limits on the amount or type of securities held by foreigners or on the companies in which the foreigners may invest.

The economies of individual emerging markets may differ favourably or unfavourably from developed economies in such respects as growth of gross domestic product, rates of inflation, currency depreciation, capital reinvestment, resource self-sufficiency and balance of payment position and may be based on a substantially less diversified industrial base. Further, the economies of developing markets generally are heavily dependent upon international trade and, accordingly, have been, and may continue to be, adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries/regions with which they trade. These economies also have been, and may continue to be, adversely affected by economic conditions in the countries/regions with which they trade.

Risks of emerging market securities may include: greater social, economic and political uncertainty and instability; greater settlement and custody risks; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed legal systems. In addition, taxation of interest and dividend and capital gains received by non-residents varies among emerging and less developed markets and, in some cases may be comparatively high. There may also be less well-defined tax laws and procedures and such laws may permit retroactive taxation so that the Sub-Fund could in the future become subject to local tax liabilities that had not been anticipated in conducting investment activities or valuing assets.

Mainland China market risks

Investing in the mainland China market is subject to the risks of investing in emerging markets generally and the risks specific to the mainland China market.

Since 1978, the mainland Chinese government has implemented economic reform measures which emphasise decentralisation and the utilisation of market forces in the development of the mainland Chinese economy, moving from the previous planned economy system. However, many of the economic measures are experimental or unprecedented and may be subject to adjustment and modification. Any significant change in mainland China's political, social or economic policies may have a negative impact on investments in the mainland China market.

The mainland Chinese government's macro-economic policies and controls will have significant influence over the capital markets in mainland China. Changes in fiscal policies, such as interest rates policies, may have an adverse impact on the pricing of debt instruments, and thus the return of the Sub-Fund.

The regulatory and legal framework for capital markets and joint stock companies in mainland China may not be as well developed as those of developed countries/regions. The mainland Chinese government's macro-economic policies and controls will have significant influence over the capital markets in mainland China. A Sub-Fund may be subject to the risks associated with changes in fiscal policies, mainland China laws and regulations (including tax laws) and such changes may have retrospective effect and may adversely affect a Sub-Fund.

Mainland Chinese accounting standards and practices may deviate significantly from international accounting standards. The settlement and clearing systems of the mainland Chinese securities markets may not be well tested and may be subject to increased risks of error or inefficiency.

The mainland Chinese government's control of currency conversion and movements in the RMB exchange rates may adversely affect the operations and financial results of companies in mainland China.

Mainland China tax risks

Various tax reform policies have been implemented by the mainland Chinese government in recent years, and existing tax laws and regulations may be revised or amended in the future (including abolishing, revising or amending tax exemptions currently offered to foreign institutional investors). There is a possibility that the current tax laws, regulations and practice in mainland China will be changed with retrospective effect in the future and any such change may have an adverse effect on the net asset value of a Sub-Fund.

Please refer to "Mainland China" under the section of "Taxes on the Fund/Sub-Funds" for details of the current tax laws, regulations and practices relating to the securities that Sub-Funds may invest in. In view of the details set out in the aforementioned section, the Manager, after taking professional tax advice, has decided to make provision for tax as follows:

- a Sub-Fund will make a CIT provision of 10% on interest from its investments in debt securities issued by mainland China tax resident enterprises, if it was not withheld at source nor borne by the bond issuers (except (i) interests from investments in mainland China onshore bonds received during the Tax Exempt

Period (as defined in “mainland China” under the section of “Taxes on the Fund/Sub-Funds”) and (ii) interest from mainland China government bonds and local government bonds);

- a Sub-Fund will not withhold any amount of realised or unrealised capital gains derived from the disposal of or investment in mainland China debt securities;
- a Sub-Fund will not withhold any amount for interest derived from Bank Deposits in mainland China as CIT provision because CIT is withheld at source;
- a Sub-Fund will not withhold (or will not request the CAAP issuers to withhold) any amount of realised or unrealised gains on its investments in CAAPs as tax provisions;
- a Sub-Fund will not withhold any amount of realised or unrealised gains on its investments in China A-shares through the Stock Connect and China B-shares as tax provisions; and
- a Sub-Fund will make a VAT provision at 6% plus surcharge (if applicable) on interest from its investment in the relevant bonds provided that such VAT is not borne by the bond issuers (except (i) interests from investments in mainland China onshore bonds received during the Tax Exempt Period and (ii) interest from mainland China government bonds and local government bonds).

Investors should also be aware that changes in mainland China taxation legislation could affect the amount of income which may be derived, and the amount of capital returned, from the investments of the Sub-Funds. Laws governing taxation will continue to change and may contain conflicts and ambiguities which may impact the value of a Sub-Fund.

RMB currency risks

Starting from 2005, the exchange rate of the RMB is no longer pegged to the US dollar. The RMB has now moved to a managed floating exchange rate based on market supply and demand with reference to a basket of foreign currencies. The daily trading price of the RMB against other major currencies in the inter-bank foreign exchange market is allowed to float within a narrow band around the central parity published by the People's Bank of China.

As the exchange rates are based primarily on market forces, the exchange rates for RMB against other currencies, including US dollars and HKD, are susceptible to movements based on external factors. It should be noted that the RMB is currently not a freely convertible currency as it is subject to foreign exchange control policies and restrictions of the mainland Chinese government. Trading in the RMB may be subject to possible delay in the settlement process. Further, future changes to foreign exchange control policies and restrictions of the mainland Chinese government may adversely affect the operations and financial results of the companies invested in by a Sub-Fund, and the abilities of such companies to make payment of dividends declared in respect of China B-shares and China H-shares (as well as other equities issued by a mainland Chinese company in a region other than mainland China).

The possibility that the appreciation of RMB will be accelerated cannot be excluded. On the other hand, there can be no assurance that the RMB will not be subject to devaluation. A Sub-Fund's Base Currency may not be the RMB, but a Sub-Fund may invest in RMB denominated investments. Any devaluation of the RMB could adversely affect the value of investors' investments in a Sub-Fund (as measured in terms of the Sub-Fund's Base Currency).

China A-shares and B-shares risks

Insofar as a Sub-Fund obtains exposure to China A-shares or China B-shares, it will be subject to the following risks:

- The existence of a liquid trading market for China A-shares or China B-shares may depend on whether there is supply of, and demand for, such China A-shares or China B-shares. The price at which securities may be purchased or sold by a Sub-Fund and the net asset value of a Sub-Fund may be adversely affected if the trading market for China A-shares or China B-shares are limited or absent. The China A-share and China B-share market may be more volatile and unstable (for example, due to the risk of suspension of a particular stock or government intervention). Market volatility and settlement difficulties in the China A-share and China B-share market may also result in significant fluctuations in the prices of the securities traded on such market and thereby may affect the value of a Sub-Fund.
- Securities exchanges in mainland China typically have the right to suspend or limit trading in any security traded on the relevant exchange. In particular, trading band limits are imposed by the stock exchanges in mainland China on China A-shares and China B-shares, where trading in any China A-share or China B-share security on the relevant stock exchange may be suspended if the trading price of the security has increased or decreased to the extent beyond the trading band limit. A suspension may render it impossible for the Manager to liquidate positions and can thereby expose a Sub-Fund to significant losses. Further, when the suspension is subsequently lifted, it may not be possible for the Manager to liquidate positions at a favourable price.

China A-shares access products risks

A Sub-Fund may obtain exposure to China A-shares through investment in China A-shares access products (“CAAPs”), including equity linked notes and other similar equity linked securities and instruments. CAAPs are derivative instruments which are linked to China A-shares, and are intended to provide an economic performance that is equivalent to holding the underlying China A-shares.

Seeking exposure through CAAPs could lead to additional costs of investments. For example, investment in CAAPs is subject to the fees, charges and costs of issuers. As the availability of CAAPs is limited by applicable mainland China regulations, the cost of investing in such products is subject to market supply and demand forces. Where the market supply is low relative to market demand, acquiring further CAAPs may involve a higher cost or a premium, which may adversely affect the Sub-Fund's overall performance.

CAAPs may not be listed and are subject to the terms and conditions imposed by their issuer. These terms may lead to delays in implementing the Manager's investment strategy due to restrictions on the issuer acquiring or disposing of the securities underlying the CAAPs. Investment in CAAPs can be illiquid as there is no active market in CAAPs. In order to meet realisation requests, a Sub-Fund relies upon the counterparty issuing the CAAPs to quote a price to unwind any part of the CAAPs. This price will reflect the market liquidity conditions and the size of the transaction.

By seeking exposure to investments in China A-shares through CAAPs, a Sub-Fund is taking on the credit risk of the issuer of the CAAPs. There is a risk that the issuer will not settle a transaction due to a credit or liquidity problem, or will otherwise default in its obligations under the CAAPs, thus causing a Sub-Fund to suffer a loss. In addition, in the case of a default, a Sub-Fund could become subject to adverse market movements while a Sub-Fund enters into a replacement transaction with a new counterparty.

An investment in a CAAP entitles the holder to certain cash payments calculated by reference to the China A-shares to which the CAAP is linked. It is not an investment directly in the China A-shares themselves. An investment in the CAAP does not entitle the holder of the CAAP to the beneficial interest in the China A-shares nor to make any claim against the company issuing the China A-shares.

Investment through CAAPs may lead to a dilution of performance of a Sub-Fund when compared to a fund investing directly in similar assets. In addition, when a Sub-Fund intends to invest in a particular China A-share through CAAPs, there is no guarantee that subsequent application monies for Units in a Sub-Fund can be immediately invested in such China A-share through CAAPs. This may impact on the performance of a Sub-Fund.

An issuer of a CAAP may deduct various charges, expenses or potential liabilities from the prices of the CAAP including but not limited to any actual or potential mainland China tax liabilities (if any) determined by the CAAP issuer at its discretion and such deduction may not be refundable.

As at the date hereof, it is likely that a Sub-Fund will invest in the China A-shares market through CAAPs issued by institutions which have obtained the status as a QFI in mainland China; and certain restrictions imposed by the mainland Chinese government on QFIs may have an adverse effect on a Sub-Fund's liquidity and performance. QFIs are subject to restrictions on the maximum stake which can be held in any one listed company. A Sub-Fund will generally invest in CAAPs that are realisable on each Dealing Day under normal market conditions, subject to the credit risk of the counterparty. If the CAAPs cannot be realised on each Dealing Day, a Sub-Fund may be subject to additional liquidity risks.

Fluctuation in the exchange rate between the denomination currency of the underlying shares and the CAAPs will affect the value of the CAAPs, the redemption amount and the distribution amount on the CAAPs.

For the purpose of investment restriction monitoring, CAAPs will be treated as an equity investment in China A-shares instead of being classified as a derivative in determining the appropriate limits.

Sustainable investment policy risk

A Sub-Fund may invest its asset based on an overall ESG Score, an overall Carbon Intensity Rating (both terms as defined in the Sub-Fund's investment policy) and in certain sustainable investment strategies (which themselves may invest according to ESG Scores and Carbon Intensity Ratings) as set out in the investment policy of the relevant Sub-Fund ("Sustainable Criteria"). These Sustainable Criteria are subjective and are subject to the Investment Adviser's discretion. The use of Sustainable Criteria may affect the Sub-Fund's investment performance and, as such, the Sub-Fund may perform differently compared to similar funds that do not use such criteria. For instance, Sustainable Criteria used in the Sub-Fund's investment policy may result in the Sub-Fund forgoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities due to Sustainable Criteria when it might be disadvantageous to do so. As such, the application of Sustainable Criteria may restrict the ability of the Sub-Fund to acquire or dispose of its investments at a price and time that it wishes to do so, and may therefore result in a loss to the Sub-Fund. The use of Sustainable Criteria may also result in the Sub-Fund being concentrated in companies with a focus on Sustainable Criteria and its value may be more volatile than that of a fund having a more diverse portfolio of investments.

There is a lack of standardised taxonomy of Sustainable Criteria evaluation methodology and the way in which different funds apply such Sustainable Criteria may vary.

The Investment Adviser's evaluation of Sustainable Criteria of a Sub-Fund's investments may be dependent upon information and data from third party Sustainable Criteria data providers, which may be incomplete, inaccurate or unavailable. As a result, there is a risk associated with the assessment of a security or issuer based on such information or data.

The Sustainable Investment Strategies adopted by the Sub-Fund may change from time to time. There may be periods where all of the sustainable investment strategies disclosed in the investment policy above are adopted by the Sub-Fund and other times where this is not the case. Change in sustainable investment strategies may involve rebalancing of the investments of the Sub-Fund and therefore the Sub-Fund may incur greater transaction costs than a Sub-Fund employing a buy-and-hold allocation strategy.

Investment strategy risk: lower volatility

Whilst the Sub-Fund aims for lower portfolio volatility compared to its reference performance benchmark, there is no guarantee that such investment objective and strategy (i.e. to lower portfolio volatility) can be achieved.

There is a possibility that portfolio optimisation may not be achieved and the Sub-Fund's value may be adversely affected.

Investment strategy risk: multi-asset income

The asset allocation strategy balancing income, long term expected returns and risk may not achieve the desired results under all circumstances and market conditions.

The investments of the Sub-Fund may be periodically rebalanced and therefore the Sub-Fund may incur greater transaction costs than a fund employing a buy-and-hold allocation strategy.

Investment strategy risk: writing covered call options

The Sub-Fund may generate additional income by collecting option premium from writing (selling) call options on selected equities held by the Sub-Fund ("Covered Call Options") or indices of equities that the Sub-Fund is exposed to. Writing Covered Call Options or writing call options on indices of equities that the Sub-Fund is exposed to gives the option purchasers the right, but not the obligation, to purchase the referenced equities or indices of equities that the Sub-Fund is exposed to in the future at a pre-determined price ("Strike Price"). Writing Covered Call Options or writing call options on indices of equities that the Sub-Fund is exposed to limits the potential capital growth of the referenced equities to the Strike Price thereby limiting the overall return of the Sub-Fund.

Beyond the collected option premium, writing Covered Call Options or writing call options on indices of equities that the Sub-Fund is exposed to does not limit downside risk and the Sub-Fund will remain fully exposed to the risk that the referenced equities substantially fall in value.

Investment strategy risk: thematic

Investments in specific themes may not achieve the desired results under all circumstances and market conditions. The investments of the Sub-Fund may be adjusted among different themes from time to time depending on the market conditions of the respective themes and therefore the Sub-Fund may incur greater transaction costs than a fund with static allocation strategy.

The Sub-Fund may focus its investments in specific themes, which may increase the concentration risk. Consequently, the Sub-Fund is particularly susceptible to adverse development and risks in these themes that influence each other or companies of such themes. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments.

Investment strategy risk: multi-asset real return

To achieve its investment objective, the Sub-Fund may focus on assets that tend to perform in an inflationary environment. There is a possibility that the Sub-Fund may not achieve the desired results under all circumstances and market conditions.

The investments of the Sub-Fund may be periodically rebalanced and therefore the Sub-Fund may incur greater transaction costs than a fund employing a buy-and-hold allocation strategy.

Investment strategy risk: systematic investment process based on a variety of attributes

The systematic investment process to identify equity securities based on a variety of attributes which are considered to contribute positively to return may not achieve the desired results under all circumstances and market conditions. For example, securities that have previously been identified with strong valuation and/or overall quality attributes may not continue to be good value and/or quality companies and that the returns of such securities may be less than returns on other styles of investing. Also, price trends and market trends can turn quickly, and securities and/or markets that previously have exhibited positive trend may not experience continued trend.

Asset allocation strategy risk

The asset allocation strategy balancing long term expected returns and risk for different global asset classes may not achieve the desired results under all circumstances and market conditions.

The investments of the Sub-Fund may be periodically rebalanced and therefore the Sub-Fund may incur greater transaction costs than a fund employing a buy-and-hold allocation strategy.

Stock Connect risks

The Shanghai-Hong Kong Stock Connect programme and the Shenzhen-Hong Kong Stock Connect programme (collectively, the "Stock Connect") are recently announced and are novel in nature. The Stock Connect enables Hong Kong and overseas investors to directly access eligible China A-shares through Hong Kong brokers. It is subject to regulations promulgated by regulatory authorities and implementation rules (e.g. trading rules) made by the stock exchanges in mainland China and Hong Kong. The Stock Connect is subject to quota limitations. New regulations may be promulgated from time to time by the regulators in connection with operations and cross-border legal enforcement in connection with cross-border trades under the Stock Connect.

It should be noted that the regulations are untested and there is no certainty as to how they will be applied, and their application may have retrospective effects. Moreover, the current regulations are subject to change. There can be no assurance that the Stock Connect will not be abolished. A Sub-Fund, which may invest in mainland China markets through the Stock Connect, may be adversely affected as a result of such changes.

Risks associated with the ChiNext Board and/or the Science and Technology Innovation Board

A Sub-Fund may have exposure to stocks listed on the ChiNext Board of the Shenzhen Stock Exchange (the “**ChiNext Board**”) and/or the Science and Technology Innovation Board of the Shanghai Stock Exchange (the “**STAR Board**”).

Higher fluctuation on stock prices and liquidity risk - Listed companies on the ChiNext Board and/or STAR Board are usually of emerging nature with smaller operating scale. Listed companies on ChiNext Board and STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to those listed on other boards. Hence, they are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main board.

Over-valuation risk - Stocks listed on ChiNext Board and/or STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.

Differences in regulation applicable to ChiNext Board and STAR Board - The rules and regulations regarding companies listed on ChiNext Board and STAR Board are less stringent in terms of profitability and share capital than those in the main boards.

Delisting risk - It may be more common and faster for companies listed on the ChiNext Board and/or STAR Board to delist. ChiNext Board and STAR Board have stricter criteria for delisting compared to the main boards. This may have an adverse impact on a Sub-Fund if the companies that it invests in are delisted.

Concentration risk applicable to STAR Board - STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in STAR Board may be concentrated in a small number of stocks and subject the Sub-Fund to higher concentration risk.

Investments in the ChiNext Board and/or STAR Board may result in significant losses for a Sub-Fund and its investors.

QFI risks

The Fund is not a QFI but it may obtain access directly to securities and instruments issued within mainland China using QFI status of a QFI Holder. The following risks are relevant to the QFI regime:

- ***Risks regarding QFI status***

Investors should note that QFI status could be suspended or revoked, which may have an adverse effect on a Sub-Fund's performance as a Sub-Fund may be required to dispose of its securities holdings.

Investors should note that there can be no assurance that a QFI Holder will continue to maintain its QFI status or that redemption requests can be processed in a timely manner due to adverse changes in relevant laws or regulations. The aforementioned restrictions may respectively result in a rejection of applications and a suspension of dealings of a Sub-Fund. In extreme circumstances, a Sub-Fund may incur significant losses due to limited investment capabilities, or may not be able to fully implement or pursue its investment objective or strategy, due to QFI investment restrictions, illiquidity of the mainland Chinese domestic securities market, and/or delay or disruption in execution of trades or in settlement of trades.

The rules and restrictions under QFI regulations generally apply to the QFI Holder as a whole and not simply to the investments made by a Sub-Fund. Relevant mainland China regulators are vested with the power to impose regulatory sanctions if a QFI Holder or the QFI Custodian violates any provision of QFI rules. Any violations could result in the revocation of the QFI's licence or other regulatory sanctions and may adversely impact on investment by a Sub-Fund.

- ***Repatriation and liquidity risks***

In addition, certain restrictions imposed by the mainland Chinese government on QFI Holders may have an adverse effect on a Sub-Fund's liquidity and performance. The PBOC and SAFE regulate and monitor the repatriation of funds out of mainland China by the QFI Holder pursuant to the QFI rules. Repatriations by QFI Holders in respect of a Sub-Fund are currently not subject to repatriation restrictions (such as lock up periods) or prior approval, although authenticity and compliance reviews will be conducted by the QFI Custodian.

There is no assurance, however, that mainland China rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Any restrictions on repatriation of the invested capital and net profits may impact on a Sub-Fund's ability to meet redemption requests from the Unitholders. Furthermore, as the QFI Custodian's review on authenticity and compliance is conducted on each repatriation, the repatriation may be delayed or even rejected by the QFI Custodian in case of non-compliance with the QFI rules and regulations. In such case, it is expected that redemption proceeds will be paid to the redeeming Unitholder as soon as practicable and after the completion of the repatriation of funds concerned. It should be noted that the actual time required for the completion of the relevant repatriation will be beyond the Manager's control.

- ***Application of QFI rules***

The prevailing QFI rules relating to the QFI regime enable RMB to be remitted into and repatriated out of mainland China. The application of these rules may depend on the interpretation given by the relevant mainland Chinese authorities. Any changes to the relevant rules may have an adverse impact on investors' investment in a Sub-Fund. In the worst scenario, the Manager may determine that a Sub-Fund shall be terminated if it is not legal or viable to operate a Sub-Fund because of changes to the application of the relevant rules.

The current QFI laws, rules and regulations are subject to change, which may take retrospective effect. In addition, there can be no assurance that the QFI laws, rules and regulations will not be abolished. A Sub-Fund, which invests in mainland China markets through a QFI Holder, may be adversely affected as a result of such changes.

- *Custodial risks*

Investment in mainland China through a QFI Holder will be subject to custodial risk of the QFI Custodian appointed for purpose of safekeeping assets in mainland China. If the QFI Custodian defaults, the Sub-Fund may encounter delays in recovering its assets which may in turn impact the net asset value of a Sub-Fund. Moreover, a Sub-Fund may not be able to recover all of its assets and may incur a substantial or even a total loss.

Investors should note that cash deposited in the cash account of a Sub-Fund with the QFI Custodian will not be segregated but will be a debt owing from the QFI Custodian to a Sub-Fund as a depositor. Such cash will be co-mingled with cash that belongs to other clients or creditors of the QFI Custodian. In the event of bankruptcy or liquidation of the QFI Custodian, a Sub-Fund will not have any proprietary rights to the cash deposited in such cash account, and a Sub-Fund will become an unsecured creditor, ranking *pari passu* with all other unsecured creditors, of the QFI Custodian. A Sub-Fund may face difficulty and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case a Sub-Fund may lose the total amount deposited with the QFI Custodian.

- *Mainland China brokerage risk*

The execution and settlement of transactions or the transfer of any funds or securities may be conducted by mainland China Brokers appointed by the QFI Holder. There is a risk that a Sub-Fund may suffer losses from the default, bankruptcy or disqualification of the mainland China Brokers. In such event, a Sub-Fund may be adversely affected in the execution or settlement of any transaction or in the transfer of any funds or securities.

In selection of mainland China Brokers, the QFI Holder will have regard to factors such as the competitiveness of commission rates, size of the relevant orders and execution standards. If a QFI considers appropriate, it is possible that a single mainland China Broker will be appointed and a Sub-Fund may not necessarily pay the lowest commission available in the market.

- *Fixed Income – counterparty and settlement risk*

Investment in mainland Chinese debt securities may expose a Sub-Fund to counterparty default risks. Exchange traded debt securities may be subject to counterparty risk, although such risk is mitigated by a centralised clearing system. On the other hand, the degree of counterparty risk may be higher in the China Interbank Bond Market which is a quote-driven market where deals are negotiated between two counterparties through a trading system. The counterparty which has entered into a transaction with a Sub-Fund may default in its obligation to settle the transaction by delivery of the relevant security or by payment for value.

Investors should refer to the section headed “China Interbank Bond Market risks” for further details on the risks of the China Interbank Bond market.

QFI Underlying Funds risks

A Sub-Fund may invest in mainland China domestic securities market through QFI Underlying Funds, which may be subject to the following risks:

- *Risks relating to onshore mainland China markets*

QFI Underlying Funds primarily invest in onshore mainland China securities markets and will be subject to risks inherent in such markets, including the debt and equity markets. Further, mainland China securities are denominated in RMB, and the QFI Underlying Funds’ returns will be subject to fluctuations of the RMB currency. Please refer to the risk factor “RMB currency risk” above.

- *Risks relating to the QFI regime*

Repatriations of capital out of mainland China by QFI Underlying Funds are currently not subject to repatriation restrictions or prior approval, but there is no guarantee that restrictions will not be imposed in future. Any restrictions on repatriation of the invested capital out of mainland China may impact on a QFI Underlying Fund’s ability to meet redemption requests from a Sub-Fund. It should be noted that the actual time required for the completion of the relevant repatriation will be beyond the control of the Manager (or the manager of a QFI Underlying Fund). Therefore, a Sub-Fund may be subject to liquidity risk insofar as it invests in QFI Underlying Funds.

For QFI rules, their application may depend on the interpretation given by the relevant mainland Chinese regulatory authorities. Any changes to the relevant rules may have an adverse impact on investments made by the QFI Underlying Funds and hence a Sub-Fund’s performance. The current QFI rules and regulations are subject to change, which may take retrospective effect. In the worst case, the relevant QFI Underlying Fund may be terminated if it is not legal or viable to operate because of changes to the application of the relevant rules. A Sub-Fund’s holdings in the relevant QFI Underlying Fund will be realised in case of such termination and a Sub-Fund may suffer losses.

- *Risks relating to QFI Underlying Funds that are exchange traded funds (“QFI ETFs”)*

QFI ETFs typically seek to track a particular China A-share market index by directly investing in the China A-shares constituting such market index using QFI status. As with other exchange traded funds, QFI ETFs are subject to tracking error risks (i.e. the returns of a QFI ETF may deviate from the performance of the index it is designed to track) due to a number of factors.

A Sub-Fund will trade units in QFI ETFs on the Stock Exchange of Hong Kong (where trading prices are affected by market factors such as demand and supply). The trading days or hours of mainland China and Hong Kong stock markets are not exactly the same and this may affect the QFI ETFs’ ability to track the market index. Further, any suspension due to a trading band limit in the mainland China stock markets may render it

impossible for the QFI ETFs to acquire certain index security, increasing the tracking error. These factors may result in the QFI ETFs' units being traded at a substantial premium or discount to their net asset value. A Sub-Fund may suffer a loss, depending on the relative prices at which a Sub-Fund trades the relevant QFI ETF's units. For example, if a Sub-Fund acquires units of an QFI ETF at a premium to the net asset value of such QFI ETF, it may realise a loss when it later sells the same units at a lower premium or at a discount (even if the net asset value of the QFI ETF remains unchanged).

QFI ETFs involve cross-border transfer of funds. They may be riskier than traditional exchange traded funds investing directly in markets other than mainland China. The operation of QFI ETFs depends heavily on the expertise and infrastructure of the QFI ETF's manager (or its mainland China parent company). There is no assurance that the QFI ETFs will be operated as envisaged and a Sub-Fund may sustain a loss in its investment in QFI ETFs.

China Interbank Bond Market risks

Certain Sub-Funds may invest in bonds traded on the China Interbank Bond Market (the "**CIBM**") via the CIBM Initiative (as defined below) and/or the Bond Connect (as defined below) and/or other means as may be permitted by the relevant regulations from time to time.

Overview of the CIBM Initiative

Since February 2016, PBOC has permitted foreign institutional investors to invest in CIBM ("**CIBM Initiative**") subject to meeting any other rules and regulations as promulgated by mainland China authorities, i.e., PBOC and SAFE. As at the date of this Explanatory Memorandum, the rules and regulations that a Sub-Fund must abide by include:

- Appointing an onshore settlement agent who will be responsible for making relevant filings and account opening with relevant authorities.
- Generally only repatriating cash out of mainland China in a currency ratio approximately proportionate to the currency ratio of remitted cash into mainland China.

There are currently no quota restrictions. Such rules and regulations may be amended from time to time.

Overview of the Bond Connect

Since July 2017, mutual bond market access between Hong Kong and mainland China ("**Bond Connect**") was established by China Foreign Exchange Trade System & National Interbank Funding Centre ("**CFETS**") and Hong Kong Exchanges and Clearing Limited (amongst others). Bond Connect is governed by rules and regulations as promulgated by mainland China authorities. As at the date of this Explanatory Memorandum, the rules and regulations that a Sub-Fund must abide by include:

- Appointing CFETS through Bond Connect Company Limited or other institutions recognised by the PBOC as registration agents to apply for registration with the PBOC.
- Transacting via an offshore custody agent recognised by the Hong Kong Monetary Authority (currently, the Central Moneymarkets Unit).

There are currently no quota restrictions. Such rules and regulations may be amended from time to time.

Trading through Bond Connect is performed through newly developed trading platforms and operational systems. There is no assurance that such systems will function properly or will continue to be adapted to changes and developments in the market. In the event that the relevant systems fails to function properly, trading through Bond Connect may be disrupted. The Sub-Fund's ability to trade through Bond Connect (and hence to pursue its investment strategy) may therefore be adversely affected. In addition, where Sub-Fund invests in the CIBM through Bond Connect, it may be subject to risks of delays inherent in the order placing and/or settlement systems.

Risks associated with investing in the CIBM

Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the CIBM may result in prices of certain debt securities traded on such market fluctuating significantly. A Sub-Fund investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and a Sub-Fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

To the extent that a Sub-Fund transacts in the CIBM, a Sub-Fund may also be exposed to risks associated with settlement procedures and default of counterparties. There are various transaction settlement methods in the CIBM, such as the delivery of security by the counterparty after receipt of payment by a Sub-Fund; payment by a Sub-Fund after delivery of security by the counterparty, or simultaneous delivery of security and payment by each party. Although the Investment Adviser may endeavour to negotiate terms which are favourable to a Sub-Fund (e.g. requiring simultaneous delivery of security and payment), there is no assurance that settlement risks can be eliminated. The counterparty which has entered into a transaction with a Sub-Fund may default in its obligation to settle the transaction by delivery of the relevant security or by payment for value.

For investments via the CIBM Initiative, since trading is via an onshore settlement agent, a Sub-Fund is subject to counterparty risks of the onshore settlement agent.

For investments via either the CIBM Initiative or Bond Connect, since relevant filings, registration with PBOC and account opening has to be carried out by other third parties (e.g. settlement agent, offshore custody agent, registration agent, etc) then a Sub-Fund is subject to the risks of errors on their part. In addition, the CIBM is also subject to regulatory risks and the relevant rules and regulations on investment in the CIBM is subject to change which may have potential retrospective effect.

In the event that the relevant mainland Chinese authorities suspend account opening or trading on the CIBM, a Sub-Fund's ability to invest in the CIBM will be limited and, after exhausting other trading alternatives, a Sub-Fund may suffer substantial losses as a result.

Convertible bonds risks

Convertible bonds are a hybrid between debt and equity which give an investor an option to exchange the bond for a pre-determined number of shares at a given price and a specified future date. As such, convertibles will be exposed to equity movement and greater volatility than straight bond investments.

Convertible bonds are subject to risks which typically apply to bonds including interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable straight bond investments. The value of convertible bonds tends to decline as interest rates increase and increase as interest rates decline. If the credit quality of the convertible bonds deteriorates or the issuer of the convertible bonds defaults, the performance of a Sub-Fund will be adversely affected. On the other hand, the prices of convertible bonds will be affected by the changes in the price of the underlying equity securities which, in turn, may have an unfavourable impact on the net asset value of a Sub-Fund.

"Dim Sum" bond risks

Dim Sum bonds are bonds issued outside mainland China but denominated in RMB. The Dim Sum bond market is still a relatively small market which is more susceptible to volatility and illiquidity. The operation of the Dim Sum bond market as well as new issuances could be disrupted causing a fall in the net asset value of a Sub-Fund should there be any promulgation of new rules which limit or restrict the ability of issuers to raise RMB by way of bond issuances and/or reversal or suspension of the liberalization of the offshore RMB (CNH) market by the relevant regulator(s).

Urban Investment Bonds risks

A Sub-Fund may invest in bonds issued by mainland China local government financing vehicles (LGFVs), i.e. also known as **"Urban Investment Bonds"**. This may subject a Sub-Fund to additional risks.

In view of limitations on directly raising funds, local governments in mainland China have set up numerous entities known as "Local Government Financing Vehicles" (LGFVs) to borrow and fund local development, public welfare investment and infrastructure projects. LGFV bonds have grown rapidly in size in recent years and have become a significant bond sector in mainland China.

Many LGFVs invest in urban development projects which involve substantial initial investment through high financial leverage and this causes cash flow mismatch for the LGFVs. In such cases LGFVs may not be able to service debts solely through their own operating revenue, and local governments may need to offer financial subsidies to the LGFVs to ensure on-going debt-servicing. However, a LGFV may not be able to get adequate subsidies from its local government (for example in regions of low local revenue and heavy debt burden) and its local government is not obligated to subsidise the LGFV. In some cases LGFVs will take on further borrowing to pay existing debts and this can result in liquidity risks if re-financing costs increase.

Worsening financial conditions may lead to credit rating downgrade. Recent cases of downgrading have led to investor concerns that the financial conditions of some LGFVs may be deteriorating. Downgrading in turn leads to higher financing costs for the LGFVs, making it more difficult for the LGFVs to sustain their debts.

Local governments may be seen to be closely connected to Urban Investment Bonds, as they are shareholders of the LGFVs issuing such bonds. However, Urban Investment Bonds are typically not guaranteed by the relevant local governments or the central government of mainland China. As such, local governments or the central government of mainland China are not obligated to support any LGFVs in default. The LGFVs' ability to repay debts depends on the financial condition of the LGFVs, and the extent to which the relevant local governments are prepared to support such LGFVs. However, slower revenue growth at some local governments may constrain their capacity to provide support, while regulatory constraints may also limit local governments' ability to inject land reserves into LGFVs. Further, local governments have taken on debt in various other forms, and recent analyses show that increased financing activities have posed a risk to local government finances.

Although in some cases collateral such as land is provided, in case of default of a LGFV, it may be difficult for bond holders (such as a Sub-Fund) to enforce its right to the collateral. In most cases, collateral is not provided, and the bond holders will be fully exposed to the credit/insolvency risk of LGFVs as an unsecured creditor. In the event that the LGFVs default on payment of principal or interest of the Urban Investment Bonds, a Sub-Fund could suffer substantial loss and the net asset value of a Sub-Fund could be adversely affected.

Though most LGFVs disclose basic financial information regularly (e.g. through audited annual report and credit rating report), timely disclosure of other relevant information, such as material asset allocation and capital injection, is still uncertain. Imperfect disclosure of financial information could lead to biased investment judgment, adding to the risks for investment in LGFV securities.

Bonds issued by LGFVs normally have lower liquidity than other government issued fixed income instruments (such as Central Bank Notes / Bills and Treasury Bonds), and a Sub-Fund's investment in bonds issued by LGFVs is subject to liquidity risk as disclosed in the paragraphs under "Liquidity Risk" in this section.

LGFVs take on loans in a substantial amount from mainland Chinese banks, and the total outstanding loans have risen rapidly in recent years. This has led the China Banking Regulatory Commission to require banks to limit their holdings of bonds sold by LGFVs. If LGFVs default on their repayment obligations, this may in turn pose a risk to the stability of the banking system in mainland China.

It was announced that the National Audit Office would start a nationwide assessment of government liabilities in order to address concerns about rising debts from local development projects. However, there is no assurance that the extent of local government debts can be comprehensively and accurately assessed.

Risks associated with investments in debt instruments with loss-absorption features

A Sub-Fund may invest in instruments with loss-absorption features which are subject to greater risks when compared to traditional debt instruments as such instruments typically include terms and conditions which may result in them being partly or wholly written off, written down, or converted to ordinary shares of the issuer upon the occurrence of a pre-defined trigger event (e.g. when the issuer is near or at the point of non-viability or when the issuer's capital ratio falls to a specified level).

Such trigger events are likely to be outside of the issuer's control and commonly include a reduction in the issuer's capital ratio below a specified level or upon specific government or regulatory action being taken as a result of the issuer's ongoing financial viability. Trigger events are complex and difficult to predict and can result in a significant or total reduction in the value of such instruments, giving rise to consequential loss of the Sub-Fund. In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.

For example, a Sub-Fund may invest in contingent convertible securities, which are hybrid capital securities that absorb losses when the capital of the issuer falls below a certain level. Upon the occurrence of a predetermined event (known as a trigger event), contingent convertible securities can be converted into shares of the issuing company, potentially at a discounted price, or the principal amount invested may be lost on a permanent or temporary basis. Contingent convertible securities are risky and highly complex instruments. Coupon payments on contingent convertible securities are discretionary and may at times also be ceased or deferred by the issuer. Trigger events can vary but these could include the capital ratio of the issuing company falling below a certain level, or the share price of the issuer falling to a particular level for a certain period of time.

Contingent convertible securities are also subject to additional risks specific to their structure including:

i. Trigger level risk

Trigger levels differ and determine exposure to conversion risk. It might be difficult for the Investment Adviser of a Sub-Fund invested in contingent convertible securities to anticipate the trigger events that would require the debt to convert into equity or the write down to zero of principal investment and/or accrued interest. Trigger events may include: (i) a reduction in the issuing bank's Core Tier 1/Common Equity Tier 1 (CT1/CET1) ratio or other ratios, (ii) a regulatory authority, at any time, making a subjective determination that an institution is "non-viable", i.e. a determination that the issuing bank requires public sector support in order to prevent the issuer from becoming insolvent, bankrupt or otherwise carry on its business and requiring or causing the conversion of the contingent convertible securities into equity or write down, in circumstances that are beyond the control of the issuer or (iii) a national authority deciding to inject capital.

ii. Coupon Cancellation risk

Coupon payments on some contingent convertible securities are entirely discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time. The discretionary cancellation of payments is not an event of default and there are no possibilities to require re-instatement of coupon payments or payment of any passed missed payments. Coupon payments may also be subject to approval by the issuer's regulator and may be suspended in the event there are insufficient distributable reserves. As a result of uncertainty surrounding coupon payments, contingent convertible securities may be volatile and their price may decline rapidly in the event that coupon payments are suspended.

iii. Capital structure inversion risk

Contrary to the classic capital hierarchy, investors in contingent convertible securities may suffer a loss of capital when equity holders do not, for example when the loss absorption mechanism of a high trigger/write down of a contingent convertible security is activated. This is contrary to the normal order of the capital structure where equity holders are expected to suffer the first loss.

iv. Call extension risk

Some contingent convertible securities are issued as perpetual instruments and only callable at pre-determined levels upon approval of the competent regulatory authority. It cannot be assumed that these perpetual contingent convertible securities will be called on a call date. Contingent convertible securities are a form of permanent capital. The investor may not receive return of principal as expected on call date or indeed at any date.

v. Conversion risk

Trigger levels differ between specific contingent convertible securities and determine exposure to conversion risk. It might be difficult at times for the Investment Adviser of a Sub-Fund to assess how the contingent convertible securities will behave upon conversion. In case of conversion into equity, the Investment Adviser might be forced to sell these new equity shares since the investment policy of a Sub-Fund may not allow the holding of equity securities. Given the trigger event is likely to be some event depressing the value of the issuer's common equity, this forced sale may result in a Sub-Fund experiencing some loss.

vi. Valuation and write-down risk

Contingent convertible securities often offer attractive yield which may be viewed as a complexity premium. The value of contingent convertible securities may need to be reduced due to a higher risk of overvaluation of such asset class on the relevant eligible markets. Therefore, a Sub-Fund may lose its entire investment or may be required to accept cash or securities with a value less than its original investment.

vii. Market Value fluctuations due to unpredictable factors

The value of contingent convertible securities is unpredictable and will be influenced by many factors including, without limitation (i) creditworthiness of the issuer and/or fluctuations in such issuer's applicable capital ratios; (ii) supply and demand for the contingent convertible securities; (iii) general market conditions and available liquidity and (iv) economic, financial and political events that affect the issuer, its particular market or the financial markets in general.

viii. Liquidity risk

Contingent convertible securities are relatively new instruments and the outstanding amount and trading volume of contingent convertible securities tend to be small. In certain circumstances finding a buyer ready to invest in contingent convertible securities may be difficult and the seller may have to accept a significant discount to the expected value of the bond in order to sell it.

ix. Sector concentration risk

Contingent convertible securities are issued by banking and insurance institutions. The performance of a Sub-Fund which invests significantly in contingent convertible securities will depend to a greater extent on the overall condition of the financial services industry than for a Sub-Fund following a more diversified strategy.

x. Subordinated instruments

Contingent convertible securities will, in the majority of circumstances, be issued in the form of subordinated debt instruments in order to provide the appropriate regulatory capital treatment prior to a conversion. Accordingly, in the event of liquidation, dissolution or winding-up of an issuer prior to a conversion having occurred, the rights and claims of the holders of the contingent convertible securities, such as a Sub-Fund, against the issuer in respect of or arising under the terms of the contingent convertible securities shall generally rank junior to the claims of all holders of unsubordinated obligations of the issuer.

xi. Unknown risk

The structure of contingent convertible securities is innovative yet untested. In a stressed environment, when the underlying features of these instruments will be put to the test, it is uncertain how they will perform.

Sovereign debt risks

A Sub-Fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request a Sub-Fund to participate in restructuring such debts. A Sub-Fund may suffer significant losses when there is a default of sovereign debt issuers.

Eurozone risks

In light of ongoing concerns on the sovereign debt risk of certain countries within the Eurozone, a Sub-Fund's investments in the region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU members from the Eurozone, may have a negative impact on the value of a Sub-Fund.

Collateralised and/or securitised products risks (such as asset-backed securities and mortgage-backed securities)

In general, asset-backed securities including asset-backed commercial papers ("ABS") and mortgage-backed securities ("MBS") are debt securities with interest and capital payments backed by a pool of financial assets such as mortgages and loans, with collateral backing often provided by physical assets such as residential or commercial property. Consequently, holders of ABS (such as a Sub-Fund) must rely solely on distributions on the underlying assets or proceeds thereof for payment.

Investment in ABS and MBS is subject to greater credit risk and interest rate risk compared to other debt securities due to, for example, a debtor's or obligor's default in paying the loan or other debt obligations constituting the underlying assets. If distributions on the underlying assets are insufficient to make payments on the ABS and MBS, no other assets will be available for payment of the deficiency and following realisation of the underlying assets, and the obligations of the issuer of the related security to pay such deficiency will be extinguished.

In addition, ABS and MBS are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the returns of the securities.

Underlying assets are usually illiquid and private in nature and are subject to risks including those relating to their liquidity and market value. Prices of ABS and MBS are volatile and will generally fluctuate due to a variety of factors that are difficult to predict, including but not limited to changes in interest rates, prevailing credit spreads, general economic conditions, and the financial condition of the debtors or obligors of the underlying assets. The Sub-Fund will be subject to fluctuations in its value insofar as investment is made in ABS and MBS.

Real estate risks

Investments in Real Estate Investment Trusts ("REITs") will subject a Sub-Fund to risks associated with the direct ownership of real estate. These risks include, among others, possible declines in the value of real estate, risks related

to general and local economic conditions, possible lack of availability of mortgage funds, overbuilding, extended vacancies of properties, increases in competition, real estate taxes and transaction, operating and foreclosure expenses, changes in zoning laws, costs resulting from the clean-up of, and liability to third parties for damages resulting from, environmental problems; casualty or condemnation losses, uninsured damages from natural disasters and acts of terrorism, limitations on and variations in rents; and changes in interest rates. Further, the underlying assets of REITs may be relatively illiquid.

Insofar as a Sub-Fund directly invests in REITs any dividend/payout policy at a Sub-Fund level may not be representative of the dividend/payout policy of the relevant underlying REIT.

The legal structure of a REIT, its investment restrictions and the regulatory and taxation regimes to which it is subject will differ depending on the jurisdiction in which it is established.

Infrastructure industry risk

Investment in infrastructure related companies are affected by a wide variety of factors such as interest rates, environmental and local regulations, increased competition, and terrorist activity. If a Sub-Fund is invested in a company that is subject to the adverse effects of these factors, the net asset value of the Sub-Fund may be negatively impacted.

Commodities risk

Exposure to commodities involves additional risks than those resulting from more standard asset classes such as equities and may subject the Sub-Fund to greater volatility than such investments. The value of commodities related instruments may be affected by the overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular commodity industry or the production and trading of commodities, such as natural events (e.g. drought, floods, weather, livestock disease), embargoes, tariffs and international economic, political and regulatory developments.

Risk associated with investing in exchange-traded commodities securities

Exchange-traded commodities securities are traded on stock exchanges in the same manner as other listed securities. The bid price and offer price at which the exchange-traded commodities securities are traded on stock exchanges are driven by factors such as the demand and supply of the securities, market liquidity and other market conditions. Therefore, the exchange-traded commodities securities may trade at a substantial premium or discount to the value of the underlying commodities.

Risks associated with exchange-traded commodities securities include counterparty/credit risk, greater liquidity risk and volatility risk. The liquidity of exchange-traded commodities securities may be severely reduced during volatile market conditions.

Investment in exchange-traded commodities securities will involve another layer of fees charged at the level of the exchange-traded commodities securities.

Risk associated with Indian securities

The following risks apply to Sub-Fund which invests in Indian bonds and equities.

Investing in Indian securities

In order to invest in Indian securities, the Sub-Fund must hold a Foreign Portfolio Investor ("FPI") license, which is issued by designated depository participants on behalf of the Securities and Exchange Board of India ("SEBI").

The investments in securities by FPI in India are regulated by the guidelines prescribed by SEBI and Reserve Bank of India ("RBI") ('both referred as Regulator') from time to time. The investments by FPI cannot exceed the thresholds as prescribed by the respective Regulator.

Such limits are allocated to FPI license holders through auction processes and/or applications submitted directly to regulators. The Sub-Fund may not be granted any quota to invest in such markets. In this case, the Sub-Fund may be closed to new subscriptions as the monies from new subscriptions could not be invested in such markets by the Manager.

Simultaneously, there are periods of time once allocations are made available for FPI license holders to make the investment effective. These depend on the type of security (government or corporate) and the method used to obtain such allocation (auction process or application). Limits that had been allocated and not made effective within such periods may be lost.

Loss of FPI Registration

The Sub-Fund will seek to register with SEBI as an FPI. The investment by the Sub-Fund is dependent on the continued registration of the Sub-Fund as an FPI. In the event the registration of the Sub-Fund as an FPI is terminated or is not renewed, the Sub-Fund could potentially be forced to redeem the investments held in the Sub-Fund, and such forced redemption could adversely affect the returns to the Unitholders.

Limitations on Investments

The Sub-Fund's debt investments cannot exceed the limits prescribed by the respective Regulator. FPIs cannot explicitly invest in INR denominated certificate of deposits and fixed deposits issued by banks in India.

Indian Capital Gains Tax and Interest / Dividend Income Tax

Capital Gains Tax ("CGT")

On transfer of listed or unlisted securities in India, tax is levied on the capital gains arising out of such transfers. Capital gains are classified into two kinds- short term capital gains and long-term capital gains, depending on the time for which securities are held. Thus, if the securities are held for a period not exceeding 12 months (for others including debit instruments and listed securities, units of equity oriented fund or business trust), 24 months (for unlisted securities), the gains arising out of transfer of such securities are classified as short-term capital gains. Alternatively, if the aforementioned period is exceeded, gains are classified as long-term capital gains. Further, Securities transaction tax (STT) is levied on the securities which are traded on the floor of a recognised stock exchange in India or unlisted securities subsequently listed on a recognised stock exchange. Further, income arising on transfer of securities is in the nature of capital gains, as discussed above. Such income is subject to tax for FPI in the following manner:

| Nature of capital gains | Rate of tax where no STT is paid | Rate of tax where STT is paid |
|---------------------------------|----------------------------------|---|
| Short-term capital gains (STCG) | 30 per cent. | 20 per cent. |
| Long-term capital gains (LTCG) | 10 per cent on the entire income | 12.5 per cent on the income exceeding INR 0.125 million |

| Type of security | Rate of tax for STCG | Rate of tax for LTCG |
|---|----------------------|--------------------------|
| Unlisted Equity shares | 30 per cent. | 10 per cent [#] |
| Listed bonds or listed debentures (other than notified ZCBs) | 30 per cent. | 10 per cent [#] |
| Unlisted bonds or unlisted debentures / | 30 per cent. | NA |
| Units of specified mutual fund* (acquired on or after 1 April 2023) | 30 per cent. | NA |

The above tax rates will be increased by applicable surcharge and cess.

Further, as per the Finance (No.2) Act 2024, with effect from 23 July 2024, unlisted bonds and debentures will be categorized as 'short term capital assets' irrespective of the period of holding of such assets.

[#] The rate of 10 per cent proposed to be increased to 12.5 per cent (on the income exceeding INR 0.125 million) with effect from 1 April 2025 as per Finance Bill 2025. The Bill awaits approval from Parliament and Presidential assent to be enacted.

** Specified mutual fund means (a) a Mutual Fund by whatever name called, which invests more than 65% of its total proceeds in debt and money market instruments; or (b) a fund which invests 65% or more of its total proceeds in units of a fund referred to in (a).*

Interest / Dividend Income Tax ("IIT")

Interest / dividend income arising from Indian securities will be subject to income tax at the rate of 20% on gross interest / dividend (plus applicable surcharge and education cess).

The above tax rates are under domestic tax law and are subject to beneficial rates, if any, available under a double taxation treaty.

The Manager, after seeking professional advice, may decide to make or not to make any tax provisions in respect of the Sub-Fund. Even if tax provisions are made, such provisions may be more than or less than the Sub-Fund's actual Indian tax liabilities and it is possible that such tax provisions made by the Manager may be insufficient. In case of a difference between the Sub-Fund's provision for taxes and its actual Indian tax liabilities, the relevant amounts shall be credited to or debited from the Sub-Fund's assets (as the case may be). As a result, the income from, and/or the performance of, the Sub-Fund may/may not be adversely affected and the impact/degree of impact on individual Unitholders of the Sub-Fund may vary, depending on factors such as the level of the Sub-Fund's provision for taxes (if any) and the amount of the difference at the relevant time and when the relevant Unitholders subscribed for and/or redeemed their Units in the Sub-Fund.

Any tax provision, if made by the Manager, will be reflected in the net asset value of the Sub-Fund at the time of debit or refund and thus will only impact on Units which remain in such Sub-Fund at that time. Units which are redeemed

prior to such time will not be affected by any debit of insufficient tax provisions. Likewise, such Units will not benefit from any refund of excess tax provisions. Investors should note that no Unitholders who have redeemed their Units in the Sub-Fund before the distribution of any excess provision shall be entitled to claim in whatsoever form any part of the withholding amounts distributed to the Sub-Fund, which amount would be reflected in the value of Units in the Sub-Fund. In the event the Manager considers it necessary to adopt any tax provision (whether in respect of CGT, IIT or any other applicable tax regulation/laws in India) on a retrospective basis, the prevailing and/or future net asset value of the Sub-Fund may be negatively impacted. The magnitude of such potential negative impact on the performance of the Sub-Fund may not correspond to the gains over an investor's holding period due to the retrospective nature.

Currently, the tax provision policy is to fully provide for both CGT and IIT (on a cash or realised basis) where it is not already withheld at source. This tax provision liability will be reflected in the net asset value of the Sub-Fund.

The Manager will review and make adjustments to the tax provision policy as and when it considers necessary from time to time and as soon as practicable upon issuance of further notices or clarification issued by the Indian tax authority in respect of the application of CGT, IIT and/or any other applicable tax regulations/laws and the respective implementation rules.

There is a possibility that the current tax laws, rules, regulations and practice in India and/or the current interpretation or understanding thereof may change in the future and such change(s) may have retrospective effect. The Sub-Fund could become subject to additional taxation that is not anticipated as at the date hereof or when the relevant investments are made, valued or disposed of. Any increased tax liabilities on the relevant Sub-Fund may adversely affect the Sub-Fund's net assets and may reduce the income from, and/or the value of, the relevant investments in the Sub-Fund.

Investors should consult their own tax advisors regarding the possible implications of CGT and IIT on the value of their holdings.

INR Currency and Exchange Risk

Investors should be aware of the fact that the INR is not freely convertible and is subject to exchange controls and certain requirements by the government of India. These controls are subject to change and may adversely impact the INR exchange rate which may impact the net asset value of the Sub-Fund.

Non-INR based investors are exposed to foreign exchange risk and there is no guarantee that the value of INR against the investors' Home Currency will not depreciate. Any depreciation of INR could adversely affect the value of investor's investment in the Sub-Fund.

Risks in relation to fixed payout Classes

Fixed payout Classes pay out a pre-determined annualized fixed percentage of their net asset value or adjusted net asset value at a pre-determined frequency. Under normal circumstances, the rate and frequency are pre-determined and are not subject to the Manager's ongoing discretion. Should the Manager decide to adjust the payout rate, affected investors will receive at least one month's prior written notification. Investments in the fixed payout Classes are not an alternative to a savings account or fixed interest paying investment. The pre-determined annualized fixed percentage does not reflect either the actual or expected income or performance of the relevant Sub-Fund.

Consequently, fixed payout Classes are expected to payout capital gains and/or capital and may do so over a prolonged or indefinite period. Paying-out of capital represents a withdrawal of investors' initial investment. This may result in an immediate reduction of the net asset value per unit and a substantial erosion of an investor's initial investment over the long term, in particular during adverse market conditions. This will also constrain future capital growth of the relevant Sub-Fund together with the possibility that the value of future returns may be diminished. Over the very long term an investor's initial investment may be nearly, or even completely, exhausted.

Fixed payout Classes do not distribute a fixed amount and the constant percentage of payout results in higher absolute payout when the net asset value of the relevant fixed payout Class is high, and lower absolute payout when the net asset value of the relevant fixed payout Class is low.

A positive payout does not imply a positive return. Payments will continue even when a Sub-Fund has not earned income and experiences capital losses. This will result in a more rapid fall in the value of the Unit Class than would occur if fixed payouts were not being paid.

Portfolio holding information

Information relating to a Sub-Fund's portfolio, at each month end, is available to Unitholders at an appropriate time after that month end. Unitholders should contact the Manager for such information. A small charge may be levied for the provision of this information.

Reference performance benchmark

The reference performance benchmark for each Sub-Fund is disclosed in the section "Appendix 1 – Sub-Fund Details".

Reference performance benchmarks are shown for comparison purposes only.

Unitholders should be aware that a Sub-Fund might not be managed to its reference performance benchmark and that investment returns may deviate materially from the performance of the specified benchmark.

Unitholders should also be aware that reference performance benchmark may change over time and that this Explanatory Memorandum will be updated accordingly.

The Classes

Description of classes

Within each Sub-Fund of the Fund, multiple Classes of Units may be issued.

Classes of Units have equal rights and are, upon issue, entitled to participate equally, in proportion to their value, in the profits (such as the distribution of dividends) and liquidation proceeds relating to the relevant Sub-Fund of the class.

As at the date of this Explanatory Memorandum, the following Classes may be made available:

| Class | Availability | Value of units | | |
|--|--|--|---|----------------------------|
| | | Currency <i>(for omitted currencies the value will be equivalent to the stated USD value denominated in the omitted currency)</i> | Minimum holding / Minimum subsequent subscription | Minimum partial redemption |
| Class A Units available to retail investors | | USD | 1,000 | 1,000 |
| | | HKD | 10,000 | 10,000 |
| | | AUD | 1,500 | 1,500 |
| | | CAD | 1,000 | 1,000 |
| | | EUR | 850* | 850* |
| | | GBP | 650 | 650 |
| | | JPY | 160,000 | 160,000 |
| | | RMB | 10,000 | 10,000 |
| | | SGD | 1,000 | 1,000 |
| | | NZD | 1,500 | 1,500 |
| Class I | Units available to institutional investors and private client investors (in each case as designated by the Manager) or such other clients as the Manager may select at its discretion. | USD | 1,000,000 | Nil |
| Class Z | Units available to institutional investors making investment through a discretionary management agreement entered into with an HSBC Group entity and to investors selected by the Manager at its discretion. | USD | Nil | Nil |

* Except for HSBC European Multi-Asset Income Fund which is EUR 1000 instead.

In addition, Class B Units are available to investors in mainland China *only* (through the "Mainland-Hong Kong Mutual Recognition of Funds" regime) and will *not* be offered in Hong Kong. Specific details in relation to such Units will be set out in a separate document.

Each Unit Class above may be offered with various different features including accumulation, distribution features, payout features and currency features. Each feature is denoted by additive suffixes to the class name as outlined in the below section – "Class features and naming convention".

The Manager may create additional Classes of Units in the future at its discretion and without prior notification to Unitholders.

Units will be initially issued at 10.000 in the currency of denomination of the class or such other price as determined by the Manager. The prices quoted are exclusive of applicable initial charges.

Retail investors in Hong Kong can consult the Product Key Fact Statement of the relevant Sub-Fund for a list of classes currently available to them. In addition, a full up-to-date list of launched classes can be obtained from the registered office of the Manager.

Class features and naming convention

Accumulation Units

Capital-Accumulation Units normally do not declare any dividends/payouts and instead retain all net income, capital and capital gains within the price of the Units.

These Classes are suffixed by a "C", for example "Class AC".

Distribution Units

Distribution Units may be offered with the following dividend declaration/payment frequencies and are indicated with the following suffixes:

| | Annual | Semi-annual | Quarterly | Monthly |
|---------------------|--------|-------------|-----------|---------|
| Suffix | "D" | "S" | "Q" | "M" |
| Example for Class A | AD | AS | AQ | AM |

In addition to the different dividend declaration/payment frequencies, distribution Units may be offered with the below dividend calculation methodologies and associated identifier suffixes:

| Suffix | Calculation methodology |
|---|--|
| <p>For illustrative purposes, each of the possible dividend frequencies is shown below on Class A Units.</p> | <p>The usual method for calculating dividends is described below. The Manager may decide, at their discretion, to change or amend any of the calculation methodologies at any time.</p> |
| <p>N/A</p> <p>Examples: Class AD Class AS Class AQ Class AM</p> | <p>It is intended that substantially all investment income (net of fees and expenses* and net of withholding taxes) attributable to such Class of Units will be declared as a dividend.</p> |
| <p>"1"</p> <p>Examples: Class AD1 Class AS1 Class AQ1 Class AM1</p> | <p>It is intended that substantially all investment income (gross of fees and expenses* and net of withholding taxes) attributable to such Class of Units will be declared as a dividend.</p> <p>Investors should be aware that fees and expenses* will be charged to capital. As a result it may be considered that such Classes of Units are effectively distributing capital gains, if any, and capital attributable to such units. Distribution of capital represents a withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment and may result in an immediate reduction in the net asset value per Unit (or adjusted net asset value per Unit) of the relevant Class (and hence the Issue Price/Redemption Price of the relevant Class).</p> |
| <p>"2"</p> <p>Examples: Class AD2 Class AS2 Class AQ2 Class AM2</p> | <p>It is intended that the Class of Units will declare a dividend based upon the estimated annualised yield of the relevant Sub-Fund's underlying portfolio which is attributable to the Class of Units.</p> <p>The Manager will review the estimated annualised yield at least semi-annually. However, the Manager may decide, at its discretion, to make adjustments to the dividend rate at any time to reflect changes in the estimated annualised yield of the Sub-Fund's portfolio.</p> <p>Investors should be aware that this dividend policy will pay dividends gross of fees and expenses* and may pay dividends gross of withholding taxes. The estimate of a Sub-Fund's underlying portfolio yield will not necessarily equal the income received by the Class of Units and may result in distribution of both realised and unrealised capital gains, if any, and capital attributable to such Units. Distribution of capital represents a withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.</p> <p>Such dividend distributions may result in an immediate reduction in the net asset value per Unit (or adjusted net asset value per Unit) of the relevant Class (and hence the Issue Price/Redemption Price of the relevant Class).</p> |
| <p>"3"</p> <p>For illustrative purposes, the Classes below are AUD Portfolio Currency Hedged Unit Classes:</p> <p>Examples: Class AD3H-AUD Class AS3H-AUD Class AQ3H-AUD Class AM3H-AUD</p> | <p>This type of Class of Units will only be offered on Sub-Funds which offer Currency Hedged Unit Classes. Please refer to the section headed "Currency Hedged Unit Classes" for more information on Currency Hedged Unit Classes.</p> <p>It is intended that the Class of Units will declare a dividend based upon: (i) the estimated annualised yield of the relevant Sub-Fund's underlying portfolio which is attributable to the Class of Units and (ii) an estimate of the interest rate carry (which could be positive or negative) and which is based upon the interest rate differential between the Sub-Fund's Base Currency and the Class Currency of the Class of Units. A negative interest rate differential will result in a reduction of the dividend payment and may result in no dividends being paid.</p> <p>The Manager will review the estimated annualised yield at least semi-annually. However, the Manager may decide, at its discretion, to make adjustments to the dividend rate at any time to reflect changes in the estimated annualised yield of the Sub-Fund's portfolio.</p> <p>Investors should be aware that this dividend policy will pay dividends gross of fees and expenses* and may pay dividends gross of withholding taxes. The estimate of Sub-Fund's underlying portfolio yield will not necessarily equal income received by the Class of Units and the estimate of the interest rate carry does not represent income received by the Class of Units. Therefore this may result in distribution of capital gains, if any, and could result in distribution of capital attributable to such Units. Consequently, the Issue Price/Redemption Price may be eroded and it may also reduce the potential for future appreciation in the Issue Price/Redemption Price. Distribution of capital</p> |

represents a withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.

Such dividend distributions may result in an immediate reduction in the net asset value per Unit (or adjusted net asset value per Unit) of the relevant Class (and hence the Issue Price/Redemption Price of the relevant Class).

This type of Class of Units is only intended for investors whose **"Home Currency"** (which is the main currency an investor uses on a day-to-day basis) is the same as the Class Currency of the Class of Units.

These Classes of Units are available through certain distributors and may only be available to certain investors who meet eligibility criteria as decided by the Manager.

** "Fees and expenses" refers to those described in the sub-section headed "Ongoing charges" in the "Charges and expenses" section.*

Unitholders should be aware that for Classes with the identifier suffix "1", "2" and "3" the distribution of dividends may be made out of income and/or capital gains and/or capital. Dividends may therefore impact their tax position and accordingly investors are encouraged to seek appropriate tax advice in relation to investment in the different Classes of Units. Investors should note that the payment of dividends out of capital represents a return or withdrawal of part of the amount they originally invested or from any capital gains attributable to the original investment. Investors should be aware of the effect of such dividend distribution and pay attention to the relevant risks disclosed under the section headed "General risks". The composition of the latest dividends of such Classes (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) (if any) for the last 12 months is available from the Manager on request and on the website www.assetmanagement.hsbc.com/hk².

Notwithstanding the aforesaid, the Manager may from time to time determine the amount of dividend distribution and the dividend distribution interval in respect of any Class of Units of any Sub-Fund by giving notice to the Trustee. The Manager may also determine at its absolute discretion that no dividend distribution shall be made in respect of any dividend distribution interval and there is no guarantee on regular distribution of dividends. The cost of remittance and other expenses and taxes in relation to the dividend distribution payments will be borne by the relevant investors. Please see the sub-section "Payments to unitholders" in the "Taxation" section for further details.

Payment of dividend distributions will normally be made within seven Dealing Days of the declaration date.

Dividends of a Class of Units declared, if any, shall be distributed among the Unitholders of the relevant Class of Units rateably in accordance with the number of Units held by them on the record date as determined by the Manager in respect of the corresponding dividend distribution. For the avoidance of doubt, only Unitholders whose names are entered on the register of Unitholders on such record date shall be entitled to the distribution declared in respect of the corresponding dividend distribution. Any payment of dividend distributions will only be made in the Class Currency of the relevant Class of Units.

In general, all dividend distributions will be paid in cash and Unitholders do not have the option to automatically re-invest them into the Sub-Fund. In accordance with the "Switching Units" section, Unitholders that no longer wish to receive dividends may want to consider switching their Units to another available Class e.g. a capital-accumulation Class of the same Sub-Fund. Alternatively, the Manager may provide the option for a Class to automatically re-invest dividend distributions if a Unitholder can fulfil the operational requirements.

If there is a change to the dividend policy, prior approval will be sought from the SFC (if required) and affected investors will receive at least one month's prior written notification.

Payout Units

Payout Units pay out an amount which is not based on investment income or estimated yield of a Sub-Fund and instead determine the payout amount using another such basis as further set out below.

Payout Units may be offered with the following announcement/payment frequencies and are indicated with the following suffixes:

| | | Annual | Semi-annual | Quarterly | Monthly |
|---------|-----|---------------|--------------------|------------------|----------------|
| Suffix | | "D" | "S" | "Q" | "M" |
| Example | for | AD | AS | AQ | AM |
| Class A | | | | | |

Payout Units may be offered with either a fixed or flexible payout basis which is indicated through the inclusion of a suffix of either a "-FIX#" (where # is a number, it indicates the pre-determined annualized fixed percentage; where # is an alphabet, it indicates that the pre-determined annualized fixed percentage is disclosed on the Manager's website and in the Product Key Facts Statement); or "-FLX". Investors should read the "Fixed Payout Units" and "Flexible Payout Units" section below for further information.

Fixed Payout Units

Units with a fixed payout may be offered for a Sub-Fund. Investors should be aware of the following:

² Please note that this website has not been reviewed by the SFC.

- Fixed payout Units pay out a pre-determined annualized fixed percentage of their net asset value or adjusted net asset value at a pre-determined frequency. Under normal circumstances, the rate and frequency are pre-determined and are not subject to the Manager's ongoing discretion. Should the Manager decide to adjust the payout rate, affected investors will receive at least one month's prior written notification. The amount of dividend for each payout is calculated by multiplying the pre-determined annualized fixed percentage with the net asset value or adjusted net asset value on the relevant Dealing Day divided by the pre-determined number of payouts per year. Investments in the fixed payout Units are not an alternative to a savings account or fixed interest paying investment. **The pre-determined annualized fixed percentage does not reflect either the actual or expected income or performance of the relevant Sub-Fund.**
- Consequently, fixed payout Units are expected to payout capital gains and/or capital and may do so over a prolonged or indefinite period. Paying-out of capital represents a withdrawal of investors' initial investment. **This may result in an immediate reduction of the net asset value per unit and a substantial erosion of an investor's initial investment over the long term, in particular during adverse market conditions. This will also constrain future capital growth of the relevant Sub-Fund together with the possibility that the value of the future returns may be diminished. Over the very long term an investor's initial investment may be nearly, or even completely, exhausted.**
- Fixed payout Units do not distribute a fixed amount and the constant percentage of payout results in higher absolute payout when the net asset value of the relevant fixed payout Class is high, and lower absolute payout when the net asset value of the relevant fixed payout Class is low.
- A positive payout does not imply a positive return. Payments will continue even when a Sub-Fund has not earned income and experiences capital losses. This will result in a more rapid fall in the value of the Unit Class than would occur if fixed payouts were not being paid. However, payout will only be announced on a Dealing Day of the Sub-Fund. Should a scheduled payout fall on an unanticipated non-Dealing Day of the Sub-Fund (due to a suspension of calculation of the net asset value as set out under the section headed "Suspension of calculation of net asset value") then such payout will be deferred until the next Dealing Day.

The table below sets out illustrative example Classes and describes how the payout amount would be set accordingly:

| Suffix | Frequency | Payout Amount |
|--|---|--|
| For illustrative purposes, each of the possible payout frequencies is shown below on Class A Units. | | The set levels shown are indicative only and other amounts may be set. |
| "5" | | The Class periodically pays out 5% of the net asset value or adjusted net asset value of the announcement day (net of the amount paid out) on an annualized basis. |
| Examples: Class AD-FIX5 Class AS-FIX5 Class AQ-FIX5 Class AM-FIX5 | Annual Semi-annual Quarterly Monthly | The annualized percentage will be converted to a periodic percentage by simply dividing it by the number of periods. E.g. for monthly classes the amount will be $5\% / 12 = 0.417\%$. |
| "7" | | The Class periodically pays out 7% of the net asset value or adjusted net asset value of the announcement day (net of the amount paid out) on an annualized basis |
| Examples: Class AD-FIX7 Class AS-FIX7 Class AQ-FIX7 Class AM-FIX7 | Annual Semi-annual Quarterly Monthly | The annualized percentage will be converted to a periodic percentage by simply dividing it by the number of periods. E.g. for monthly classes the amount will be $7\% / 12 = 0.583\%$. |
| "9" | | The Class periodically pays out 9% of the net asset value or adjusted net asset value of the announcement day (net of the amount paid out) on an annualized basis |
| For illustrative purposes, the Classes below are AUD Portfolio Currency Hedged Unit Classes: | | |
| Examples: | | The annualized percentage will be converted to a periodic percentage by simply dividing it by the number of periods. |

Class AD-FIX9H-AUD
Class AS-FIX9H-AUD
Class AQ-FIX9H-AUD
Class AM-FIX9H-AUD

Annual
Semi-annual
Quarterly
Monthly

E.g. for monthly classes the amount will be $9\% / 12 = 0.75\%$.

| | | |
|--|---|---|
| "A" | Annual Semi-annual Quarterly Monthly | The Class periodically pays out a fixed dividend rate per share, which will be disclosed on the website ³ and in the Product Key Facts Statement of the relevant Sub-Fund. The fixed dividend rate per share will be expressed as a percentage of the net asset value or adjusted net asset value of the announcement day (net of the amount paid out) on an annualized basis. |
| Examples: | | |
| Class AD-FIXA Class AS-FIXA Class AQ-FIXA Class AM-FIXA | | The annualized percentage will be converted to a periodic percentage by simply dividing it by the number of periods. |
| | | E.g. if the annualized percentage is 5%, for monthly classes the amount will be $5\% / 12 = 0.417\%$. |

Flexible Payout Units

Units with a flexible payout may be offered for a Sub-Fund. Such Units pay out an amount using the calculation methodology set out below:

Illustrative example Classes

Calculation methodology

The usual method for calculating payouts is described below. The Manager may decide, at their discretion, to change or amend any of the calculation methodologies at any time.

For illustrative purposes, the below example classes are Class A Units.

Class AD-FLX
Class AS-FLX
Class AQ-FLX
Class AM-FLX

It is intended that the Class of Units will announce a payout with reference to: (i) the long-term expected income and net capital gains (both realised and unrealised) of the relevant Sub-Fund's underlying portfolio ("Expected Return") which is attributable to the Class of Units; and (ii) (for Currency Hedged Unit Classes only) an estimate of the interest rate carry (which could be positive or negative) and which is based upon the interest rate differential between the Sub-Fund's Base Currency and the Class Currency of the Class of Units. A negative interest rate differential will result in a reduction of the payout payment and may result in no payout being paid.

For illustrative purposes, the below example classes are AUD Portfolio Currency Hedged Classes.

Class AD-FLXH-AUD
Class AS-FLXH-AUD
Class AQ-FLXH-AUD
Class AM-FLXH-AUD

The Manager will review the payout rate at least annually. However, the Manager may decide, at its discretion, to make adjustments to the payout rate at any time to reflect changes in Expected Return.

Payouts may be paid gross of fees and expenses* and may be paid gross of taxes.

Important information

This Class of Units deliberately pay out of net capital gains (both realised and unrealised). In addition, this Class of Units will pay out of capital (or effectively out of capital) to the extent that:

- Fees and expenses and taxes are charged to capital;
- Short-medium term market cycles result in performance temporarily falling short of the Expected Return (which is a *long-term* forecast). In this regard, where an investor's investment horizon is shorter than the Expected Return's time horizon, it may lead to them realising their investment during such a period. This would result in the price return of their investment suffering from both (a) the return falling short of the Expected Return; and (b) erosion of capital due to both (i) and (ii); and
- The actual long term performance is less than the Expected Return.

Consequently, this Class of Units may pay out of capital over a prolonged or indefinite period. Paying-out of capital represents a withdrawal of investors' initial investment. **This may result in a substantial erosion of an investor's initial investment over the long term. Over the very long term an investor's initial investment may be nearly, or even completely, exhausted.**

³ Please note that this website has not been reviewed by the SFC.

These Classes of Units may only be available through certain distributors and may only be available to certain investors who meet eligibility criteria as decided by the Manager.

** "Fees and expenses" refers to those described in the sub-section headed "Ongoing charges" in the "Charges and expenses" section.*

Notwithstanding the aforesaid, the Manager may from time to time determine the amount of payout and the payout interval in respect of any Flexible Payout Units of any Sub-Fund by giving notice to the Trustee. The Manager may also determine at its absolute discretion that no payout shall be made in respect of any payout interval and there is no guarantee on regular payouts.

Payments

Unitholders should be aware that payout Units are expected to payout capital gains and/or capital. Payout may therefore impact their tax position and accordingly investors are encouraged to seek appropriate tax advice in relation to investment in the different Classes of Units. Investors should note that the payment of payout out of capital represents a return or withdrawal of part of the amount they originally invested or from any capital gains attributable to the original investment. Investors should be aware of the effect of such payout and pay attention to the relevant risks disclosed under the section headed "General risks". The composition of the latest payout of such Classes (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) (if any) for the last 12 months is available from the Manager on request and on the website www.assetmanagement.hsbc.com/hk⁴.

The payout amount will be periodically announced on a Dealing Day in respect of each fixed payout Unit of the relevant Sub-Fund. The announcement day will also be the ex-payout day meaning that Units subscribed from this day will not be eligible for the forthcoming payout. As of the date of this Explanatory Memorandum, the announcement day shall typically be the last Dealing Day of the month, quarter, semi-annual or annual period. The exact dates for the current calendar year are available on the website www.assetmanagement.hsbc.com/hk⁵. Should a scheduled payout fall on an unanticipated non-Dealing Day of the Sub-Fund (due to a suspension of calculation of the net asset value as set out under the section headed "Suspension of calculation of net asset value") then such payout will be deferred until the next Dealing Day.

Payout of a Class of Units declared, if any, shall be distributed among the Unitholders of the relevant Class of Units ratably in accordance with the number of Units held by them on the record date which is the Business Day prior to the announcement day. Payouts (if any) will only be made in the Class Currency of the relevant Class of Units.

All payouts will be paid in cash and Unitholders do not have the option to automatically re-invest the payouts into the Sub-Fund. In accordance with the "Switching Units" section, Unitholders that no longer wish to receive payouts may want to consider switching their Units to another available Class e.g. a capital-accumulation Class of the same or a different Sub-Fund.

The cost of remittance and other expenses and taxes in relation to the payout payments will be borne by the relevant investors. Please see the sub-section "Payments to unitholders" in the "Taxation" section for further details.

Payment of payouts will normally be made within seven Dealing Days of the announcement date.

If there is a change to the payout policy, prior approval will be sought from the SFC (if required) and affected investors will receive at least one month's prior written notification.

Consolidation of Payout Class Units

In the event that the Issue Price/Redemption Price of a Payout Class is lower than 50% of its initial Issue Price in its Class Currency, if the Manager considers it is in the interests of Unitholders of the relevant Sub-Fund, the Manager may, with the consent of the Trustee, decide to consolidate such Units. This means that a certain number of Units are combined to equal a single Unit with equivalent value.

This will cause a reduction in the number of Units an investor holds and Unitholders will have less votes when conducting resolutions on a poll. Investors should read the "Meetings of Unitholders and voting rights" section for further details on voting.

Unitholders will be given at least one month's written notice prior to any consolidation of Units.

Class Currency

Each Class will have a Class Currency which may or may not be different from the Base Currency of a Sub-Fund. For non-Currency Hedged Unit Classes (see below) the currency of denomination will be indicated by a hyphen and three letter currency code which is in addition to the suffix indicating whether a Class is an accumulation unit, distribution unit or payout unit.

⁴ Please note that this website has not been reviewed by the SFC.

⁵ Please note that this website has not been reviewed by the SFC.

Examples:
AC-USD
AD-HKD
AM1-GBP
AQ2-EUR
AM-FLX-AUD
AM-FIX7-CAD

Currency Hedged Unit Classes

Within a Sub-Fund, separate Portfolio Currency Hedged Unit Classes or Base Currency Hedged Unit Classes may be issued. Both types of Currency Hedged Unit Class seek to minimise the effect of currency fluctuations between the Class Currency of the Unit Class and the Base Currency of the relevant Sub-Fund.

Whether a Sub-Fund offers Portfolio Currency Hedged Unit Classes or Base Currency Hedged Unit Classes depends on the potential currency exposure of a Sub-Fund's underlying assets and its objective, as described below. Investors should be aware that the implementation of Currency Hedged Unit Classes by the Manager (or such other party to be appointed by the Manager from time to time) is separate from the various strategies the Investment Advisers may seek to implement at a Sub-Fund level to manage currency risks within each Sub-Fund.

Movements in currency exchange rates can materially impact investment returns and investors should ensure they fully understand the difference between investment in Portfolio Currency Hedged Unit Classes or Base Currency Hedged Unit Classes versus investment in those Unit Classes which are neither Portfolio Currency Hedged Unit Classes nor Base Currency Hedged Unit Classes.

Currency Hedged Unit Classes are not recommended for investors whose Home Currency is different to the Class Currency of the Currency Hedged Unit Class. Investors who choose to convert their Home Currency to the Class Currency of a Currency Hedged Unit Class and subsequently invest in such a Unit Class should be aware that they may be exposed to higher currency risks and may suffer material losses as a result of exchange rate fluctuations between the Class Currency of the Currency Hedged Unit Class and their Home Currency.

There can be no assurance or guarantee that the Manager (or such other party to be appointed by the Manager from time to time) will be able to successfully implement passive currency hedging for Currency Hedged Unit Classes at any time or at all. Furthermore, investors should note that there may be occasions when a Currency Hedged Unit Class is either under-hedged or over-hedged which may be due to factors which cannot be controlled such as investor trade activity, volatility in the Issue Price/Redemption Price of the Class and/or currency volatility.

Any transaction costs and gains or losses from currency hedging shall be accrued to and therefore reflected in the Issue Price/Redemption Price of the relevant Currency Hedged Unit Class. Currency Hedged Unit Classes will be hedged irrespective of whether the target currency is declining or increasing in value.

Investors should also refer to the section headed "Hedging risks".

Portfolio Currency Hedged Unit Classes and Base Currency Hedged Unit Classes are identifiable as follows:

| Portfolio Currency Hedged Unit Class | Base Currency Hedged Unit Class |
|--|--|
| Suffixed by "H" followed by the standard international currency acronym into which the sub-fund's Base Currency is hedged. | Suffixed by "O" followed by the standard international currency acronym into which the sub-fund's Base Currency is hedged. |
| Example: ACH-EUR means Class A, Capital-Accumulation, Euro Portfolio Currency Hedged Unit Class. | Example: ACO-EUR means Class A, Capital-Accumulation, Euro Base Currency Hedged Unit Class. |

Subscriptions and redemptions are settled only in the Class Currency of the Portfolio Currency Hedged Unit Class or Base Currency Hedged Unit Class.

Portfolio Currency Hedged Unit Classes

Portfolio Currency Hedged Unit Classes are offered for Sub-Funds:

- i. where the underlying portfolio will consist of assets which are wholly, or almost wholly, denominated in the Sub-Fund's Base Currency and/or the underlying portfolio of assets are hedged (either wholly, or almost wholly) to the Sub-Fund's Base Currency; or
- ii. which aims to obtain a return calculated in their Base Currency whilst the underlying assets are denominated in a currency (or currencies) which is (or are) different to the Sub-Fund's Base currency.

Base Currency Hedged Unit Classes

Base Currency Hedged Unit Classes are offered for Sub-Funds which may have (or will have) material exposure to assets which are denominated in a currency (or currencies) which is (or are) different to the Sub-Fund's Base Currency. Subject to the investment objective and policies of a Sub-Fund, such exposure may or may not be material in actuality for prolonged or temporary periods.

Base Currency Hedged Unit Classes seek to provide a return in its Class Currency which is consistent with the return on a Unit Class with a Class Currency which is the same as the Sub-Fund's Base Currency. However, the returns may differ due to various factors including interest rate differentials between the Class Currency of the Base Currency Hedged Unit Class and the Sub-Fund's Base Currency and transaction costs.

Investors in the Base Currency Hedged Unit Classes will be exposed to currency exchange rate movements of the underlying portfolio currencies against the Sub-Fund's Base Currency rather than being exposed to the underlying portfolio currencies against the Class Currency of the Unit Class. Investors should be aware

that investment in Base Currency Hedged Unit Classes may result in the investor taking speculative currency positions, which may be volatile and may have a material impact on an investor's returns.

For example, in the case of a EUR Base Currency Hedged Unit Class of an emerging market local debt sub-fund (which invests in assets denominated in emerging market currencies and operates with a USD Base Currency) where the return to be hedged is the return in USD, the Manager (or such other party to be appointed by the Manager from time to time) will, following a EUR subscription into the EUR Base Currency Hedged Unit Class, convert EUR to USD whilst entering into a USD/EUR currency forward transaction with the aim of creating a Base Currency hedged currency exposure. This means an investor in this Base Currency Hedged Unit Class will be exposed to the movement of the underlying portfolio currencies (emerging market currencies) relative to USD rather than being exposed to the underlying portfolio currencies (emerging market currencies) relative to EUR. There is no guarantee that the underlying portfolio currencies will appreciate against the Sub-Fund's Base Currency and depending upon currency movements, an investor's return may be less than if they had invested in a non-Base Currency Hedged Unit Class.

SECTION B: INVESTMENT MANAGEMENT

Investment objective, policy and strategy

The Investment Objective, Policy and Strategy for each Sub-Fund is disclosed in the section “Appendix 1 – Sub-Fund Details”.

Fund restrictions

1. Investment limitations

No holding of any security may be acquired for or added to a Sub-Fund which would be inconsistent with achieving the investment objective of the Sub-Fund or which would result in:-

- (a) the aggregate value of the Sub-Fund's investments in, or exposure to, any single entity (other than Government and other public securities) through the following exceeding 10% of the latest available net asset value of the relevant Sub-Fund:
 - (i) investments in securities issued by that entity;
 - (ii) exposure to that entity through underlying assets of financial derivative instruments; and
 - (iii) net counterparty exposure to that entity arising from transactions of OTC financial derivative instruments.

For the avoidance of doubt, restrictions and limitations on counterparty as set out in sub-paragraphs 1(a), 1(b) and 3.4(c) of this section “Fund restrictions” will not apply to financial derivative instruments that are:

- (A) transacted on an exchange where the clearing house performs a central counterparty role; and
- (B) marked-to-market daily in the valuation of their financial derivative instrument positions and subject to margining requirements at least on a daily basis.

The requirements under this sub-paragraph 1(a) will also apply in the case of sub-paragraphs 5.2(g) and (h) of this section “Fund restrictions”.

- (b) subject to sub-paragraphs 1(a) and 3.4(c) of this section “Fund restrictions”, the aggregate value of the Sub-Fund's investments in, or exposure to, entities within the same group through the following exceeding 20% of the latest available net asset value of the relevant Sub-Fund:
 - (i) investments in securities issued by those entities;
 - (ii) exposure to those entities through underlying assets of financial derivative instruments; and
 - (iii) net counterparty exposure to those entities arising from transactions of OTC financial derivative instruments.

For the purposes of sub-paragraphs 1(b) and 1(c) of this section “Fund restrictions”, “entities within the same group” means entities which are included in the same group for the purposes of consolidated financial statements prepared in accordance with internationally recognized accounting standards.

The requirements under this sub-paragraph 1(b) will also apply in the case of sub-paragraphs 5.2(g) and (h) of this section “Fund restrictions”.

- (c) the value of the Sub-Fund's cash deposits made with the same entity or entities within the same group exceeding 20% of the latest available net asset value of the relevant Sub-Fund provided that the 20% limit may be exceeded in the following circumstances:
 - (i) cash held before the launch of the Sub-Fund and for a reasonable period thereafter prior to the initial subscription proceeds being fully invested; or
 - (ii) cash proceeds from liquidation of investments prior to the merger or termination of the Sub-Fund, whereby the placing of cash deposits with various financial institutions would not be in the best interests of investors; or
 - (iii) cash proceeds received from subscriptions pending investments and cash held for the settlement of redemption and other payment obligations, whereby the placing of cash deposits with various financial institutions be unduly burdensome and the cash deposits arrangement would not compromise investors' interests.

For the purposes of this sub-paragraph 1(c), "cash deposits" generally refer to those that are repayable on demand or have the right to be withdrawn by the Sub-Fund and not referable to provision of property or services.

- (d) the Sub-Fund's holding of any ordinary shares (when aggregated with all other Sub-Funds' holdings of such ordinary shares) exceeding 10% of any ordinary shares issued by any single entity.
- (e) the value of the Sub-Fund's investment in securities and other financial products or instruments that are neither listed, quoted nor dealt in on a Securities Market, exceeding 15% of the latest available net asset value of such Sub-Fund.
- (f) the value of the Sub-Fund's total holding of Government and other public securities of the same issue exceeding 30% of the latest available net asset value of such Sub-Fund (save that the Sub-Fund may invest all of its assets in Government and other public securities in at least six different issues). For the avoidance of doubt, Government and other public securities will be regarded as being of a different issue if, even though they are issued by the same person, they are issued on different terms whether as to repayment dates, interest rates, the identity of the guarantor, or otherwise.
- (g) (i) the value of the Sub-Fund's investment in Underlying Funds which are non-eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time) and not authorized by the SFC in aggregate exceeding 10% of its latest available net asset value; and
(ii) the value of the Sub-Fund's investment in units or shares in each Underlying Fund which is either an eligible scheme (the list of "eligible schemes" is as specified by the SFC from time to time) or a scheme authorized by the SFC exceeding 30% of its latest available net asset value unless the Underlying Fund is authorized by the SFC, and the name and key investment information of the Underlying Fund are disclosed in this Explanatory Memorandum,

provided that:

- (A) no investment may be made in any Underlying Fund the investment objective of which is to invest primarily in any investment prohibited by Chapter 7 of the Code;
- (B) where an Underlying Fund's objective is to invest primarily in investments restricted by Chapter 7 of the Code, such investments may not be in contravention of the relevant limitation. For the avoidance of doubt, a Sub-Fund may invest in Underlying Fund(s) authorized by the SFC under Chapter 8 of the Code (except for hedge funds under 8.7 of the Code), eligible scheme(s) of which the net derivative exposure does not exceed 100% of its total net asset value, and exchange traded funds satisfying the requirements in the Note under "Investment in other schemes" of Chapter 7 of the Code in compliance with sub-paragraphs 1(g)(i) and (ii) of this section "Fund restrictions";
- (C) the Underlying Fund's objective may not be to invest primarily in other collective investment scheme(s);
- (D) all initial charges and redemption charges on the Underlying Fund(s) must be waived if the Underlying Fund is managed by the Manager or its Connected Persons; and
- (E) the Manager or any person acting on behalf of the Sub-Fund or the Manager may not obtain a rebate on any fees or charges levied by an Underlying Fund or its management company, or any quantifiable monetary benefits in connection with investments in any Underlying Fund.

For the avoidance of doubt:

- (aa) unless otherwise provided under the Code, the diversification requirements under sub-paragraphs 1(a), (b), (d) and (e) of this section "Fund restrictions" do not apply to investments in Underlying Funds by a Sub-Fund;
- (bb) exchange traded funds are considered and treated as collective investment schemes for the purposes of and subject to the requirements in this sub-paragraph 1(g); and the investments by a Sub-Fund in exchange traded funds shall be subject to sub-paragraph 1(e) of this section "Fund restrictions";
- (cc) where investments are made in listed REITs, the requirements under sub-paragraphs 1(a), (b) and (d) apply and where investments are made in unlisted REITs, which are either companies or collective investment schemes, then the requirements under sub-paragraphs 1(e) and (g)(i) apply respectively; and
- (dd) where a Sub-Fund invests in index-based financial derivative instruments, the underlying assets of such financial derivative instruments are not required to be aggregated for the purposes of the investment restrictions or limitations set out in sub-paragraphs 1(a), (b), (c) and (f) of this section "Fund restrictions" provided that the index is in compliance with the requirements under 8.6(e) of the Code.

2. Investment prohibitions

The Manager shall not, unless otherwise specifically provided for in the Code, on behalf of any Sub-Fund:-

- (a) invest in physical commodities unless otherwise approved by the SFC on a case-by-case basis taking into account the liquidity of the physical commodities concerned and availability of sufficient and appropriate additional safeguards where necessary;
- (b) invest in any type of real estate (including buildings) or interests in real estate (including any options or rights but excluding shares in real estate companies and interests in REITs);
- (c) make short sales unless (i) the liability of the relevant Sub-Fund to deliver securities does not exceed 10% of its latest available net asset value; (ii) the security which is to be sold short is actively traded on a Securities Market where short selling activity is permitted; and (iii) the short sales are carried out in accordance with all applicable laws and regulations;
- (d) carry out any naked or uncovered short sale of securities;
- (e) subject to sub-paragraph 1(e) of this section "Fund restrictions", lend, assume, guarantee, endorse or otherwise become directly or contingently liable for or in connection with any obligation or indebtedness of any person. For the avoidance of doubt, Reverse Repurchase Transactions in compliance with the requirements as set out in the Code are not subject to the limitations in this sub-paragraph 2(e);
- (f) acquire any asset or engage in any transaction which involves the assumption of any liability by the relevant Sub-Fund which is unlimited. For the avoidance of doubt, the liability of Unitholders of a Sub-Fund is limited to their investments in that Sub-Fund;
- (g) invest in any security of any class in any company or body if any director or officer of the Manager individually owns more than 0.5%, or collectively they own more than 5%, of the total nominal amount of all the issued securities of that class;
- (h) invest in any security where a call is to be made for any sum unpaid on that security, unless the call could be met in full out of cash or near cash from the Sub-Fund's portfolio whereby such amount of cash or near cash has not been segregated to cover a future or contingent commitment arising from transaction in financial derivative instruments for the purposes of sub-paragraphs 3.5 and 3.6 of this section "Fund restrictions".

3. Derivatives restrictions

3.1 A Sub-Fund may acquire financial derivative instruments for hedging purposes. For the purposes of this sub-paragraph 3.1, financial derivative instruments are generally considered as being acquired for hedging purposes if they meet all the following criteria:

- (a) they are not aimed at generating any investment return;
- (b) they are solely intended for the purpose of limiting, offsetting or eliminating the probability of loss or risks arising from the investments being hedged;
- (c) although they may not necessarily reference to the same underlying assets, they should relate to the same asset class with high correlation in terms of risks and return, and involve taking opposite positions, in respect of the investments being hedged; and
- (d) they exhibit price movements with high negative correlation with the investments being hedged under normal market conditions.

The Manager, where it deems necessary, shall cause hedging arrangement to be adjusted or re-positioned, with due consideration on the fees, expenses and costs, to enable the relevant Sub-Fund to meet its hedging objective in stressed or extreme market conditions.

3.2 A Sub-Fund may also acquire financial derivative instruments for non-hedging purposes ("**investment purposes**") subject to the limit that such Sub-Fund's net exposure relating to these financial derivative instruments ("**net derivative exposure**") does not exceed the amount specified in 6(b) of this section "Fund restrictions" provided that such limit may be exceeded in such circumstances as permitted under the Code, handbook, code and/or guideline issued by the SFC from time to time or permitted by the SFC from time to time. For the avoidance of doubt, financial derivative instruments acquired for hedging purposes under sub-paragraph 3.1 will not be counted towards the limit referred to in this sub-paragraph 3.2 so long as there is no residual derivative exposure arising from such hedging arrangement. Net derivative exposure shall be calculated in accordance with the Code and the requirements and guidance issued by the SFC which may be updated from time to time.

3.3 Subject to sub-paragraphs 3.2 and 3.4, a Sub-Fund may invest in financial derivative instruments provided that the exposure to the underlying assets of the financial derivative instruments, together with the other investments of the Sub-Fund, may not in aggregate exceed the corresponding investment restrictions or limitations applicable to such underlying assets and investments as set out in sub-paragraphs 1(a), (b), (c), (f), (g)(i) and (ii), proviso (A) to (C) to sub-paragraph 1(g) and sub-paragraph 2(b) of this section "Fund restrictions".

3.4 The financial derivative instruments invested by a Sub-Fund shall be either listed/quoted on a stock exchange or dealt in an OTC market and comply with the following provisions:

- (a) the underlying assets consist solely of shares in companies, debt securities, money market instruments, units/shares of collective investment schemes, deposits with Substantial Financial Institutions, Government and other public securities, highly-liquid physical commodities (including gold, silver, platinum and crude oil), financial indices, interest rates, foreign exchange rates, currencies, or other asset classes acceptable to the SFC, in which the Sub-Fund may invest according to its investment objectives and policies;
 - (b) the counterparties to transactions of OTC financial derivative instruments or their guarantors are Substantial Financial Institutions or such other entity acceptable to the SFC;
 - (c) subject to sub-paragraphs 1(a) and (b) of this section "Fund restrictions", a Sub-Fund's net counterparty exposure to a single entity arising from transactions of OTC financial derivative instruments may not exceed 10% of its latest available net asset value provided that the exposure of the Sub-Fund to a counterparty of OTC financial derivative instruments may be lowered by the collateral received (if applicable) by the Sub-Fund and shall be calculated with reference to the value of collateral and positive mark to market value of the OTC financial derivative instruments with that counterparty, if applicable; and
 - (d) the valuation of the financial derivative instruments is marked-to-market daily, subject to regular, reliable and verifiable valuation conducted by the Trustee (or such other valuation agent appointed by the Manager) ("Valuation Agent") independent of the issuer of the financial derivative instruments through such measures as may be established from time to time. In the opinion of the Manager, the financial derivative instruments can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Sub-Fund's initiative. Further, the Manager shall ensure that the Valuation Agent should be adequately equipped with the necessary resources to conduct independent marked-to-market valuation and to verify the valuation of the financial derivative instruments on a regular basis.
- 3.5 A Sub-Fund should at all times be capable of meeting all its payment and delivery obligations incurred under transactions in financial derivative instruments (whether for hedging or for investment purposes). The Manager shall, as part of its risk management process, monitor to ensure that the transactions in financial derivative instruments in respect of a Sub-Fund are adequately covered on an ongoing basis. For the purposes of this sub-paragraph 3.5, assets that are used to cover the Sub-Fund's payment and delivery obligations incurred under transactions in financial derivative instruments shall be free from any liens and encumbrances, exclude any cash or near cash for the purpose of meeting a call on any sum unpaid on a security, and cannot be applied for any other purposes.
- 3.6 Subject to sub-paragraph 3.5, a transaction in financial derivative instruments which gives rise to a future commitment or contingent commitment of a Sub-Fund shall be covered as follows:
- (a) in the case of financial derivative instruments transactions which will, or may at the Sub-Fund's discretion, be cash settled, the Sub-Fund shall at all times hold sufficient assets that can be liquidated within a short timeframe to meet the payment obligation; and
 - (b) in the case of financial derivative instruments transactions which will, or may at the counterparty's discretion, require physical delivery of the underlying assets, the Sub-Fund shall hold the underlying assets in sufficient quantity at all times to meet the delivery obligation. If the Manager considers the underlying assets to be liquid and tradable, the Sub-Fund may hold other alternative assets in sufficient quantity as cover, provided that such assets may be readily converted into the underlying assets at any time to meet the delivery obligation provided further that the Sub-Fund shall apply safeguard measures such as to apply haircut where appropriate to ensure that such alternative assets held are sufficient to meet its future obligations.
- 3.7 The requirements under sub-paragraphs 3.1 to 3.6 of this section "Fund restrictions" shall apply to embedded financial derivative. For the purposes of this Explanatory Memorandum, an "**embedded financial derivative**" is a financial derivative instrument that is embedded in another security.

4. Securities Financing Transactions restrictions and policy

4.1 A Sub-Fund may engage in Securities Financing Transactions, provided that they are in the best interests of Unitholders of such Sub-Fund to do so and the associated risks have been properly mitigated and addressed, and provided further that the counterparties to the Securities Financing Transactions are financial institutions which are subject to ongoing prudential regulation and supervision.

4.2 Where it is disclosed in the "Appendix 1 – Sub-Fund Details", a Sub-Fund may engage in Securities Lending transactions subject to the maximum limit disclosed in the investment policy of the Sub-Fund. Under a Securities Lending transaction, a Sub-Fund lends its securities to a security-borrowing counterparty for an agreed fee subject to a commitment from that counterparty that it will return equivalent securities on a specified future date or when requested to do so by the relevant Sub-Fund. The types of assets that may be subject to Securities Lending transactions include equity securities, fixed income securities, collective investment schemes and money market instruments.

A Sub-Fund is expected to retain the rights of beneficial ownership as to the loaned securities, including voting rights and rights to interest or other distributions, and will generally have the right to regain record ownership of loaned securities to exercise such beneficial rights.

4.2 A Sub-Fund shall have at least 100% collateralization in respect of the Securities Financing Transaction(s) into which it enters to ensure there is no uncollateralized counterparty risk exposure arising from these transactions.

4.3 All revenues arising from Securities Financing Transactions, net of direct and indirect expenses as reasonable and normal compensation for the services rendered in the context of the Securities Financing Transactions, shall be returned to the relevant Sub-Fund. Such direct and indirect expenses shall include fees and expenses payable to Securities Lending agents engaged for the relevant Sub-Fund from time to time and also the Manager for its oversight work. Currently, in respect of Securities Lending transactions, the Securities Lending agents may receive 15% of the gross revenue from the Securities Lending transactions for its services related to Securities Lending transactions and the Manager may receive up to 10% of the gross revenue from the Securities Lending transactions as compensation for the oversight work undertaken in relation to Securities Lending transactions. The remainder of the gross revenue from the Securities Lending transactions is received by the relevant Sub-Fund taking part in the Securities Lending transactions. The Securities Lending agents engaged for a Sub-Fund may be connected persons of the Manager, the Investment Advisers, the Sub-Investment Advisers or the Sub-Delegates, and their fees and expenses will be at normal commercial rates and will be borne by the relevant Sub-Fund in respect of which the relevant party has been engaged.

Information on the revenues generated under such transactions shall be disclosed in the annual and interim financial reports of the relevant Sub-Fund, along with entities to whom direct and indirect operational costs and fees relating to such transactions are paid. These entities may include the Manager, the Investment Advisers, the Sub-Investment Advisers, the Sub-Delegates or any of their connected persons.

4.4 A Sub-Fund shall only enter into a Securities Financing Transaction if the terms of such Securities Financing Transaction include the power for the Sub-Fund at any time to recall the securities or the full amount of cash (as the case may be) subject to the Securities Financing Transaction or terminate the Securities Financing Transaction(s) into which it has entered.

5. Counterparty policy and collateral policy

5.1. Counterparty policy

When transacting in OTC financial derivative instruments (or Securities Financing Transactions), the Manager has counterparty selection policies and control measures to manage the credit risks of counterparties which shall include amongst other considerations, fundamental creditworthiness (e.g. ownership structure, financial strength) and commercial reputation of specific legal entities in conjunction with the nature and structure of proposed trading activities, external credit ratings of the counterparty, the regulatory supervision applied to the relevant counterparty, country of origin of the counterparty and legal status of the counterparty.

The counterparties will be entities with legal personality typically located in OECD jurisdictions (but may also be located outside such jurisdictions). The counterparties to OTC financial derivative instruments will be Substantial Financial Institutions. Whereas the counterparties to Securities Financing Transactions will be financial institutions which are subject to ongoing prudential regulation and supervision.

The counterparties must have a minimum credit rating of Baa1 or BBB+ or equivalent, or must be deemed by the Manager to have an implied rating of Baa1 or BBB+ or equivalent assigned by an internationally recognised credit agency (e.g. Standard & Poor's or Moody's). Alternatively an unrated counterparty will be acceptable where the Manager is indemnified or guaranteed against losses suffered as a result of a failure by the counterparty, by an entity which has and maintains a rating of Baa1 or BBB+ or equivalent assigned by an internationally recognised credit agency (e.g. Standard & Poor's or Moody's).

Transactions in OTC derivative transactions or Securities Financing Transactions will at all times be governed by approved HSBC Group standard documentation such as a legally enforceable bilateral International Swaps and Derivatives Association ("ISDA") (and an accompanying Credit Support Annex ("CSA")) where it has been agreed that collateral will form part of the transaction).

5.2. Collateral policy

Under the investment advisory agreements, the Investment Adviser, discretionary Sub-Investment Adviser (if any) and Sub-Delegates (if any) have the authority to manage the investment and reinvestment of the assets of a Sub-Fund, including but not limited to agree the terms for collateral arrangements, duly advising the Manager of what arrangements have been made, for purposes of managing counterparty risk where transactions in OTC financial derivative instruments or Securities Financing Transactions have been executed. The Manager, Investment Adviser, discretionary Sub-Investment Adviser (if any) and Sub-Delegates (if any) have appropriate systems, operational capabilities and legal expertise for proper collateral management.

As of the date of this Explanatory Memorandum, the Sub-Funds may receive both non-cash collateral or cash collateral. However, the criteria set out below applies to all assets received by a Sub-Fund as collateral including the reinvestment of cash collateral:

- (a) **Nature:** Collateral may include both cash and non-cash collateral. Cash collateral may include cash and cash equivalents. Non-cash collateral may comprise of money market instruments, government or corporate bonds whether long/short term bonds, listed or traded in any regulated markets.

Collateral does not include (i) structured products whose payouts rely on embedded financial derivatives or synthetic instruments; (ii) securities issued by special purpose vehicles, special investment vehicles or similar entities; (iii) securitized products; or (iv) unlisted collective investment schemes.

- (b) **Credit quality:** the collateral is of high credit quality (i.e. at least rated A3 or A- or equivalent by an internationally recognised credit agency (e.g. Standard & Poor's or Moody's)). In the event the credit quality of the collateral or the issuer of the asset being used as collateral has deteriorated to such a degree that the Manager reasonably believes would undermine the effectiveness of the collateral, the Manager will take all practical steps to require the counterparty to replace such collateral as soon as practicable.
- (c) **Liquidity:** any collateral received other than cash should be highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a robust price that is close to pre-sale valuation.
- (d) **Valuation:** collateral is valued daily by an entity that is independent from the counterparty on a mark-to-market basis.
- (e) **Haircut policy:** the collateral is subject to a prudent haircut policy. Haircuts will take into account the characteristics of the assets such as the credit standing or the price volatility. Assets that exhibit high price volatility will not be accepted by a Sub-Fund as collateral unless suitably conservative haircuts are in place. Haircuts are reviewed by the Manager on an ongoing basis to ensure that they remain appropriate for eligible collateral taking into account collateral quality, liquidity and price volatility.
- (f) **Correlation:** collateral received by the Sub-Fund is issued by an entity that is independent from the counterparty and is one that is expected not to display a high correlation with the performance of the counterparty such that the effectiveness of the collateral would be undermined.
- (g) **Diversification:** collateral must be sufficiently diversified so as to avoid concentrated exposure to any single entity and/or entities within the same group. The exposures of a Sub-Fund to the collateral issuers are monitored in accordance with the relevant restrictions on exposure to a single entity and/or entities within the same group as set out in the sub-section "Fund restrictions".
- (h) **Reinvestment of collateral:** Non-cash collateral will not be sold, reinvested or pledged. Cash collateral may be reinvested. Reinvested cash collateral will remain sufficiently diversified subject to the applicable restrictions in respect of collateral set out in the "Fund restrictions" section and shall comply with the requirements set out in 8.2(f) and 8.2(n) of the Code.

Reinvested cash collateral may only be placed on short-term deposit, invested in high quality money market instruments and money market funds authorized under 8.2 of the UT Code or regulated in a manner generally comparable with the requirements of the SFC and acceptable to the SFC and subject to corresponding investment restrictions or limitations applicable to such investments or exposure as set out in this sub-section "Fund restrictions". For this purpose, money market instruments refer to securities normally dealt in on the money markets, including government bills, certificates of deposit, commercial papers, short-term notes and bankers' acceptances, etc. In assessing whether a money market instrument is of high quality, the Manager will take into account the credit quality, the liquidity profile of the money market instruments and such other factors as the Manager considers relevant;

Cash collateral received is not allowed to be further engaged in any securities financing transactions. Further, when the cash collateral received is reinvested into other investments, such investments are not allowed to be engaged in any securities financing transactions.

- (i) **Encumbrances and Enforceability:** the collateral is free of prior encumbrances and collateral (subject to any net-off or set-off, if applicable) is capable of being fully enforced by the Manager / Sub-Fund at any time without further recourse to the counterparty.
- (j) **Safe-keeping of collateral:** Any non-cash assets received by a Sub-Fund from a counterparty on a title transfer basis should be held by the Trustee or a Correspondent. This is not applicable in the event that there is no title transfer in which case the collateral will be held by a third party custodian which is unrelated to the provider of the collateral. A description of collateral holdings of each Sub-Fund will be disclosed in its semi-annual and annual reports as required under Appendix E of the Code. Assets provided by a Sub-Fund on a title transfer basis shall no longer belong to the Sub-Fund. The counterparty may use those assets at its absolute discretion. Assets provided to a counterparty other than on a title transfer basis shall be held by the Trustee or a Correspondent.

6. Borrowing and leverage restrictions

The expected maximum level of leverage of each Sub-Fund is as follows:

a) Cash borrowing

No borrowing shall be made in respect of a Sub-Fund which would result in the principal amount for the time being of all borrowings made pursuant to the Trust Deed for the account of the relevant Sub-Fund exceeding an amount equal to 10% of the net asset value of the relevant Sub-Fund provided always that back-to-back loans

do not count as borrowing. For the avoidance of doubt, Securities Lending transactions and Repurchase Transactions in compliance with the requirements as set out in the Code are not borrowings for the purpose of, and are not subject to the limitations in this paragraph.

The Trustee shall be entitled on the instruction of the Manager to charge or pledge in any manner all or any part of a Sub-Fund for the purposes of securing any borrowing and interest and expenses thereof.

b) Leverage from the use of financial derivative instruments

A Sub-Fund may also be leveraged through the use of financial derivative instruments and its expected maximum level of leverage through the use of financial derivative instruments (i.e. expected maximum net derivative exposure) may be up to 50% of the Sub-Fund's latest available net asset value.

In calculating the net derivative exposure, derivatives acquired for investment purposes that would generate incremental leverage at the portfolio level of the relevant Sub-Fund are converted into their equivalent positions in their underlying assets. The net derivative exposure is calculated in accordance with the requirements and guidance by the SFC which may be updated from time to time.

The actual level of leverage may be higher than such expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

7. Sub-Fund specific restrictions

Additional restrictions specific to a Sub-Fund may be disclosed in the section "Appendix 1 – Sub-Fund Details".

8. Breaches

In the event that any of the above restrictions is breached, the Manager shall as a priority objective take all steps as may be necessary to remedy such breach within a reasonable period of time, taking due account of the interests of Unitholders.

Liquidity risk management

The Manager has established a liquidity risk management policy with the aim to enable it to identify, monitor, manage and mitigate the liquidity risks of a Sub-Fund and to ensure that the liquidity profile of the investments of a Sub-Fund will facilitate compliance with a Sub-Fund's obligation to meet redemption requests. Such policy, combined with the governance framework in place and the liquidity management tools of the Manager, also seeks to achieve fair treatment of Unitholders and safeguard the interests of remaining or existing Unitholders in case of sizeable redemptions or subscriptions.

The Manager's liquidity risk management policy takes into account the investment strategy; the dealing frequency; the underlying assets' liquidity (and whether they are priced at fair value); and the ability to enforce redemption limitations of a Sub-Fund.

The liquidity risk management policy involves monitoring the profile of investments held by a Sub-Fund on an ongoing basis with the aim to ensure that such investments are appropriate to the redemption policy as stated under the section headed "Redemptions", and will facilitate compliance with a Sub-Fund's obligation to meet redemption requests. Further, the liquidity management policy includes details on periodic stress testing carried out by the Manager to manage the liquidity risk of a Sub-Fund in times of exceptional market conditions.

The Manager's risk management function is independent from the investment portfolio management function and is responsible for performing monitoring of a Sub-Fund's liquidity risk in accordance with the Manager's liquidity risk management policy. Exceptions on liquidity risk related issues are escalated to the Manager's Risk Management Committee with appropriate actions properly documented.

The Manager may employ one or more tools to manage liquidity risks including, but not limited to:

- the Manager is entitled, with the approval of the Trustee, to limit the number of Units redeemed on any Dealing Day to 10% of the total net asset value of the relevant Sub-Fund (subject to the conditions under the heading entitled "Restrictions on redemptions");
- the Manager may, if it considers it in the interest of Unitholders, when the net subscription or redemption requests in the Sub-Fund exceed a predefined threshold, require the Trustee to adjust the Issue Price/Redemption Price in order to mitigate the effects of transaction costs, in particular but not limited to, bid-offer spreads, brokerage, taxes and government charges (for further details see the section headed "Anti-dilution"); and/or
- the Manager may suspend, with the prior approval of the Trustee, the redemption of Units and/or delay the payment of redemption proceeds during any period in which the determination of the net asset value of a Sub-Fund is suspended (for further details see the section headed "Suspension of calculation of net asset value").

Transactions with Connected Persons

All transactions carried out by or on behalf of the Fund or a Sub-Fund must be executed at arm's length and in the best interest of the Unitholders of the relevant Sub-Fund. In particular, any transactions between a Sub-Fund and the Manager, the Investment Adviser, the Sub-Investment Adviser (if any), the Sub-Delegates (if any) or any of their Connected Persons as principal may only be made with the prior written consent of the Trustee. All such transactions

will be disclosed in the annual and semi-annual report and accounts of the Fund and/or the relevant Sub-Fund. In transacting with brokers or dealers connected to the Manager, the Investment Adviser, the Sub-Investment Adviser (if any), the Sub-Delegates (if any) or any of their Connected Persons, the Manager must ensure that:

- such transactions are on arm's length terms;
- it uses due care in the selection of such brokers or dealers and ensures that they are suitably qualified in the circumstances;
- transaction execution must be consistent with applicable best execution standards;
- the fee or commission paid to any such broker or dealer in respect of a transaction must not be greater than that which is payable at the prevailing market rate for a transaction of that size and nature;
- it monitors such transactions to ensure compliance with its obligations; and
- the nature of such transactions and the total commissions and other quantifiable benefits received by such broker or dealer shall be disclosed in the annual and semi-annual report and accounts of the Fund and/or the relevant Sub-Fund.

Cash rebates and soft commissions

A Sub-Fund will generally pay brokerage at customary institutional full service brokerage rates. Transactions of a Sub-Fund may be entered into through Connected Persons of the Manager. The Manager and its Connected Persons will not receive cash or other rebates from brokers or dealers in respect of transactions from a Sub-Fund.

The Manager may enter into soft commission arrangements for the provision to the Manager or Connected Persons of goods and services which are of demonstrable benefit to the Unitholders provided that (i) the brokerage rates do not exceed customary institutional full service brokerage rates and the execution of transactions for a Sub-Fund is consistent with best execution standards, (ii) periodic disclosure is made in the annual report of the Fund or the relevant Sub-Fund in the form of a statement describing the soft dollar policies and practices of the Manager, including a description of goods and services received by it, and (iii) the availability of soft dollar arrangements is not the sole or primary purpose to perform or arrange transaction with such broker or dealer.

For the avoidance of doubt (and without prejudice to the generality of the foregoing) the following goods and services may be considered as of such benefit to Unitholders: research and advisory services; economic and political analysis; portfolio analysis (including valuation and performance measurement); market analysis, data and quotation services; computer hardware and software incidental to the above goods and services; clearing and custodian services; and investment-related publications.

SECTION C: INVESTING IN A SUB-FUND

Valuation and prices

Valuation policy of Sub-Funds

The net asset value of the Sub-Fund will be determined as at the Valuation Point in accordance with the Trust Deed.

For the purposes of valuation, the Trust Deed provides (inter alia) that:

- a. except in the case of any interest in an Underlying Fund to which paragraph (c) applies and subject as provided in paragraph (g) below, all calculations based on the value of investments quoted, listed, traded or normally dealt in on any Securities Market shall be made by reference to the last traded price on the principal Securities Market or (if no last traded price is available) midway between the latest available market dealing offer price and the latest available market dealing bid price on the market on which the investment is quoted, listed, traded or normally dealt in for such investments as the Manager may consider in the circumstances to provide a fair criterion, provided that (1) if the Manager in consultation with the Trustee consider that the prices ruling on a Securities Market other than the principal Securities Market provide in all the circumstances a fairer criterion of value in relation to any such investment, they may adopt such prices, (2) if an investment is quoted, listed or normally dealt in on more than one Securities Market, the Manager shall adopt the price or, as the case may be, middle quotation on the Securities Market which, in its opinion, provides the principal market for such investment; (3) where only a single external pricing source is available, the price shall be obtained independently for that source as the Manager may, subject to the Trustee's consent, deem appropriate;
- b. in the case of any investment which is quoted, listed or normally dealt in on a market but in respect of which, for any reason, prices on that market may not be available at any relevant time, the value thereof shall be certified by such firm or institution making a market in such investment as may be appointed for such purpose by the Manager after consultation with the Trustee;
- c. subject as provided in paragraphs (d) and (e) below, the value of each interest in any Underlying Fund shall be the last published net asset value per unit or share in such Underlying Fund (where available) or (if the same is not available) the latest available bid price for such a unit, share or other interest;
- d. if no net asset value, bid and offer prices or price quotations are available as provided in paragraph (c) above, the value of the relevant investment shall be determined from time to time in such manner as the Manager shall determine after consultation with the Trustee;
- e. the value of any investment which is not quoted, listed or normally dealt in on a Securities Market shall be the initial value thereof equal to the amount expended out of the Sub-Fund in the acquisition of such investment (including in each case the amount of stamp duties, commissions and other acquisition expenses) provided that the Manager may with the approval of the Trustee and shall at the request of the Trustee cause a revaluation to be made by a professional person approved by the Trustee as qualified to value such investments;
- f. cash, deposits and similar investments shall be valued at their face value (together with accrued interest) unless, in the opinion of the Manager after consultation with the Trustee, any adjustment should be made to reflect the value thereof;
- g. notwithstanding the foregoing, the Manager may in consultation with the Trustee adjust the value of any investment if, having regard to currency, applicable rate of interest, maturity, marketability and other considerations they deem relevant, they consider that such adjustment is required to reflect the fair value of the investment; and
- h. the value of any investment (whether of a borrowing or other liability or an investment or cash) otherwise than in the Base Currency of the Sub-Fund shall be converted into the Base Currency of the Sub-Fund at the rate (whether official or otherwise) which the Manager or the Trustee shall deem appropriate in the circumstances having regard to any premium or discount which may be relevant and to costs of exchange.

The term 'last traded price' referred to in paragraph (a) above, refers to the last traded price reported on the exchange for the day, commonly referred to in the market as the 'settlement' or 'exchange price', and represents a price at which members of the exchange settle between them for their outstanding positions. Where a security has not traded then the last traded price will represent the 'exchange close' price as calculated and published by that exchange in accordance with its local rules and customs.

Where there is no stock exchange, commodities exchange, futures exchange or OTC market all calculations based on the value of investments quoted by any person, firm or institution making a market in that investment (and if there shall be more than one such market maker then such particular market maker as the Manager in consultation with the Trustee may determine) shall be made by reference to the mean of the latest bid and ask price quoted.

The Trustee, in calculating the net asset value of the Sub-Fund, may rely without further enquiry upon prices and valuation supplied to it (including through electronic price feeds) in accordance with the foregoing and shall have no liability to the Sub-Fund, any Unitholder or any other person in respect of such reliance.

For the purpose of calculating the net asset value of the Sub-Fund, the provision for taxes (if any) which may be payable by the Sub-Fund shall be determined or estimated by making reference to the tax advice received for the Sub-Fund and the taxes required to be made by the Sub-Fund shall be deducted or withheld from assets of the Sub-Fund.

The net asset value is rounded to 3 decimal places.

Unit prices

The net asset value of a Class of Units of a Sub-Fund as at any Valuation Point shall be determined as follows:

- (a) by calculating the net asset value of the Sub-Fund as at that time excluding any assets or liabilities which are specifically attributable to any particular Class of Units related to such Sub-Fund;
- (b) by apportioning the resulting amount between the Classes of Units related to such Sub-Fund by reference to the respective net asset values of each such Class immediately prior to the relevant Valuation Point; and
- (c) by deducting the liabilities and adding any assets specifically attributable to the relevant Class of Units.

The net asset value of a Class will be calculated in the Base Currency of the Sub-Fund and converted to the relevant Class Currency at a rate determined as the Trustee and the Manager may agree.

The Issue Price/ Redemption Price of each Class of Units for any relevant Dealing Day will, subject as provided below in the "Anti-dilution" section, be determined by dividing the net asset value of such Class of Units as at the Valuation Point relating to that Dealing Day by the number of Units of such Class then in issue. The resulting amount will be rounded to 3 decimal places (in such manner as determined by the Manager) for the Issue Price/Redemption Price.

Class B Units are available to investors in mainland China only and will not be offered in Hong Kong. Details in relation to the prices at which such Units are issued and redeemed will be set out in a separate document.

Anti-dilution

If the Manager considers it is in the interest of Unitholders, it may, when the net subscription or redemption requests in a Sub-Fund exceed a predefined threshold, require the Trustee to temporarily adjust the Issue Price or Redemption Price ("**Swing Pricing**") in order to mitigate the effects of transaction costs caused by subscriptions/redemptions of Units, in particular but not limited to, bid-offer spreads, brokerage, taxes and government charges. The management fee and trustee fee will continue to be calculated on the basis of the unadjusted net asset value of the Sub-Fund.

Adopting the Swing Pricing mechanism means if on a particular Dealing Day the net subscription (redemption) exceeds the predefined threshold, the net asset value will have upward (downward) adjustment to protect existing Unitholders. All transactions on that Dealing Day will adopt the adjusted net asset value. If the Issue Price/Redemption Price is adjusted upward (downward), subscribing (redeeming) investors will pay more (receive less) for each Unit.

Under normal market conditions, the Manager expects that the Swing Pricing adjustment will not exceed 2%. However, the Swing Pricing rate may be significantly higher in special circumstances, for example, when a tax or levy higher than in normal rates is imposed on the Sub-Fund by a regulator or tax authority or where market spreads widen due to a financial crisis.

Further, the Manager may, with the approval of the Trustee, arrange for a revaluation of the Issue Price or Redemption Price of a Unit of any Class if it considers that the Issue Price or Redemption Price calculated in relation to any Dealing Day does not accurately reflect the true value of the Units.

Publication of prices

The Issue Price/Redemption Price of each Class that is offered to retail investors in Hong Kong will be published daily on the website www.assetmanagement.hsbc.com/hk⁶. The Issue Price/Redemption Price of each Class can be obtained from the Manager.

Suspension of calculation of net asset value

The Manager or the Trustee may, after consultation with the other party, having regard to the best interests of Unitholders, declare a suspension of the determination of the net asset value of a Sub-Fund for the whole or any part of any period during which: -

- a. there is a closure of or the restriction or suspension of trading on any commodities market or Securities Market on which a substantial part of the investments of a Sub-Fund is normally traded or a breakdown in any of the means normally employed by the Manager in ascertaining the prices of investments or the net asset value of the Sub-Fund or the Issue Price/Redemption Price; or
- b. for any other reason the prices of a substantial part of the investments held or contracted for by the Manager for the account of a Sub-Fund cannot, in the opinion of the Manager after consultation with the Trustee, reasonably, promptly or fairly be ascertained; or
- c. circumstances exist as a result of which, in the opinion of the Manager or the Trustee after consultation with the other party, it is not reasonably practicable to realise any investments held or contracted for the account of

⁶ Please note that this website has not been reviewed by the SFC.

a Sub-Fund or it is not possible to do so without seriously prejudicing the interests of Unitholders of a Sub-Fund; or

- d. the remittance or repatriation of funds which will or may be involved in the redemption of, or in the payment for, the investments of a Sub-Fund or the issue or redemption of Units is delayed or cannot, in the opinion of the Manager or the Trustee after consultation with the other party, be carried out promptly at normal rates of exchange; or
- e. when a breakdown in the systems and/or means of communication usually employed in ascertaining the value of a substantial part of the investments or other assets of a Sub-Fund or the net asset value of a Sub-Fund or the Issue Price/Redemption Price takes place or when for any other reason the value of a substantial part of the investments or other assets of a Sub-Fund or the net asset value of a Sub-Fund or the Issue Price/Redemption Price cannot in the opinion of the Manager reasonably or fairly be ascertained or cannot be ascertained in a prompt or accurate manner; or
- f. when, in the opinion of the Manager, such suspension is required by law or applicable legal process; or
- g. where a Sub-Fund is invested in one or more Underlying Funds and the realisation of interests in any relevant Underlying Fund(s) (representing a substantial portion of the assets of a Sub-Fund) is suspended or restricted; or
- h. when the business operations of the Manager, the Trustee or the Registrar or any of their delegates in relation to the operations of a Sub-Fund are substantially interrupted or closed as a result of or arising from pestilence, acts of war, terrorism, insurrection, revolution, civil unrest, riot, strikes or acts of God; or
- i. when the Unitholders or the Manager have resolved or given notice to terminate a Sub-Fund.

Such suspension shall take effect forthwith upon the declaration thereof and thereafter there shall be no determination of the net asset value of a Sub-Fund until the Manager or the Trustee shall declare the suspension at an end, except that the suspension shall terminate in any event on the day following the first Business Day on which (i) the condition giving rise to the suspension shall have ceased to exist and (ii) no other condition under which suspension is authorised shall exist.

Whenever the Manager or the Trustee declares such a suspension it shall immediately notify the SFC of the suspension and immediately after any such declaration and at least once a month during the period of such suspension, publish a notice on the Manager's website www.assetmanagement.hsbc.com/hk (the website has not been reviewed by the SFC) and/or notify Unitholders and all those (whether Unitholders or not) whose applications to subscribe for or redeem Units shall have been affected by such suspension stating that such declaration has been made.

No Units in an affected Sub-Fund may be created, issued or redeemed during such a period of suspension.

Prevention of market timing and other unitholder protection mechanisms

The Fund and the Sub-Funds do not knowingly allow investments which are associated with market timing practices as such practices may adversely affect the interests of all Unitholders.

In general, market timing refers to the investment behaviour of an individual or company or a group of individuals or companies buying, selling or exchanging shares or other securities on the basis of predetermined market indicators by taking advantage of time differences and/or imperfections or deficiencies in the method of determination of the net asset value. Market timers may also include individuals or groups of individuals whose securities transactions seem to follow a timing pattern or are characterised by frequent or large exchanges. Market timers may disrupt the Sub-Fund's investment strategies, may increase expenses and may adversely affect investment returns for all Unitholders.

Accordingly, the Manager reserves the right to reject any application for switching and/or subscription of Units from investors whom the former considers market timers.

Unit dealing

Subscriptions

Units of a Sub-Fund or a Class in a Sub-Fund may be offered for the first time during an Initial Offer Period. Where an Initial Offer Period applies it is specified in the relevant Appendix. After such Initial Offer Period, subscription applications will be dealt with on each Dealing Day.

In order for subscription applications to be dealt with, the relevant subscription application must be received in a manner satisfactory to the Manager or the Trustee and in accordance with the application and payment procedures set out below.

Applications for units may be made by such means (including electronic means) with the required information and supporting documents as from time to time determined by the Manager and/or the Trustee. Investors should be reminded that if they choose to send application forms by facsimile or other electronic means, they bear their own risk of the forms being illegible or not being received. Investors should therefore for their own benefit confirm with the Manager the receipt of the forms. Neither the Manager nor the Trustee shall be responsible to a Unitholder or an investor for any loss resulting from non-receipt or illegibility of any orders sent by facsimile or other electronic means, or for any loss caused in respect of any action taken as a consequence of such application believed in good faith to have originated from properly authorised persons. This is notwithstanding the fact that a transmission report produced by the originator of such transmission discloses that such transmission was sent.

The minimum value of Units of any Class of any Sub-Fund that a Unitholder may apply for an initial investment must meet or exceed the minimum holding as detailed under the "Description of classes" section. Any subsequent subscription to the same Class of Units by the Unitholder must meet or exceed the minimum subsequent subscription as detailed under the "Description of classes" section. The Manager may in its discretion agree to accept a lesser amount from time to time than either the minimum holding or minimum subsequent subscription, whether generally or in a particular case.

The Manager shall have absolute discretion to accept or reject in whole or in part any application for Units. No interest will accrue on subscription monies received. If an application is rejected by the Manager, the subscription monies will be refunded to the applicant without interest by telegraphic transfer to the bank account from which the moneys originated at the risk and expense of the applicants or in such other manner as the Manager may from time to time determine.

Each applicant whose application is accepted will be sent a contract note confirming details of the purchase of Units.

All holdings will be in registered form and certificates will not be issued. Evidence of title will be the entry on the Register of Unitholders. Unitholders should therefore be aware of the importance of ensuring that the Manager is informed of any change to the registered details. Fractions of Units rounded to 3 decimal places, or otherwise determined by the Manager after consulting the Trustee, will be issued. Application monies representing smaller fractions of a Unit will be retained by the Sub-Fund.

A maximum of 4 persons may be registered as joint Unitholders.

All subscription applications must be signed by Unitholders except for those sent via electronic means, as determined by the Manager and/or the Trustee.

Cut-off

During the Initial Offer Period (if applicable), subscription applications should be made on, and in accordance with the instructions on the application form and be received by the Manager or the Trustee by 4:00 p.m. (Hong Kong time) on the last day of the Initial Offer Period (or such other time as the Manager may from time to time determine).

Following the close of the Initial Offer Period or where no Initial Offer Period applies, subscription applications should be made on, and in accordance with the instructions on the application form and be received by the Manager or the Trustee by 4:00 p.m. (Hong Kong time) on a Dealing Day (or such other time as the Manager may from time to time determine) if they are to be dealt on that Dealing Day. Subscription applications received after that time will be dealt with on the next Dealing Day.

Subscription applications may also be sent through distributors appointed specifically for the purpose of distributing the Sub-Fund. Different distributors may have different cut-off times and investors should contact such distributors for details. Such distributors may also have the discretion to decide which Sub-Fund(s) and/or Classes of Units are available for subscription by investors through the relevant distributors, and whether applications for such subscription can be accepted by the relevant distributors on a Dealing Day on which severe weather conditions persist. Investors should pay attention to the arrangements of the distributors concerned.

Price

Units of a Class will be issued at the Issue Price on the applicable Dealing Day, as calculated in the manner set out in the section headed "Unit prices" above.

Investors will pay the Issue Price of such Units on the applicable Dealing Day. An initial charge may be charged when issuing Units. Further details of the initial charge are given in the section headed "Charges and expenses".

Settlement

During the Initial Offer Period (if applicable), payment for Units issued for cash shall be due and subscription monies in cleared funds must be received by 4:00 p.m. (Hong Kong time) on the last day of the Initial Offer Period (or such other time as the Manager may from time to time determine). The Manager has discretion to accept subscription moneys received after close of the Initial Offer Period. If payment is not cleared within the above timeframe, or such

other time as the Manager shall determine and notify the relevant applicant, the Manager reserves the right to cancel the transaction.

Following the close of the Initial Offer Period or where no Initial Offer Period applies, payment for Units issued for cash shall be due and subscription monies in cleared funds must be received forthwith upon submitting the subscription application, unless otherwise agreed by the Manager. In any event, if payment is not cleared within 4 Business Days following the relevant Dealing Day (except for HSBC All China Bond Fund which is 3 Business Days), or such other time as the Manager shall determine and notify the relevant applicant, the Manager reserves the right to cancel the transaction.

Upon such cancellation, the relevant Units shall be deemed never to have been issued and the applicant therefore shall have no right to claim in respect thereof against the Manager, the Trustee or their respective delegates, provided that no previous valuations of the Sub-Fund shall be re-opened or invalidated as a result of the cancellation of such Units. Pursuant to the Trust Deed, the Manager and the Trustee will be entitled to charge the relevant applicant (and retain for the account of the Sub-Fund) a cancellation fee to represent the administrative costs involved in processing the application and require the applicant to pay to the Trustee for the account of the Sub-Fund in respect of each Unit so cancelled the amount (if any) by which the Issue Price of each such Unit exceeds the Redemption Price (had such Unit been redeemed) on the date of cancellation together with interest on such amount until receipt of such payment by the Trustee.

Subscription monies should typically be paid in the Class Currency of the Class of Units being subscribed for. Subject to the agreement of the Trustee or the Manager and to applicable limits on foreign exchange, and unless otherwise specified in this Explanatory Memorandum, subscription monies may be accepted in currencies other than the Class Currency. Such subscription monies will be converted into the Class Currency and all bank charges and other conversion costs will be deducted from the application moneys prior to investment in Units. Currency conversion will be subject to availability of the currency concerned. Such currency conversion will be effected on a timely basis by the Trustee upon receipt of subscription monies. The Manager, the Trustee or their respective delegates will not be liable to any Unitholder for any loss suffered by such Unitholder arising from the said currency conversion.

All application moneys must originate from an account held in the name of the subscriber. No third party payments shall be accepted.

All payments can be paid either by direct transfer or telegraphic transfer to the relevant accounts as set out in the application form. It should be noted that there may be delay in receipt of cleared funds if payment is made by cheques (if applicable) compared to payment by telegraphic transfer. Any costs of transfer of application monies to the Sub-Fund will be payable by the applicant.

No money should be paid to any intermediary in Hong Kong who is not licensed or registered to carry on Type 1 regulated activity under Part V of the Securities and Futures Ordinance.

Restrictions on subscriptions

At the discretion of the Manager (and subject to the requirement of relevant regulations such as QFI regulations), the Fund, a Sub-Fund or Class(es) may be closed to new subscriptions without any prior notice from the Manager. However, Unitholders may continue to redeem their holdings in accordance with the procedures below, even when the Fund, Sub-Fund or Class is closed to new subscriptions. Furthermore, at the discretion of the Manager, the Fund, Sub-Fund or Class which was previously closed to new subscription may be re-opened for new subscriptions without any prior notice to existing Unitholders.

In addition, Units may not be issued during any period in which the determination of the net asset value of the Sub-Fund is suspended (for details see the section headed "Suspension of calculation of net asset value").

Redemptions

Redemption notices will be dealt with on each Dealing Day.

In order for redemption notices to be dealt with, the relevant redemption notice form (available from the Manager) must be received in a manner satisfactory to the Manager or the Trustee and in accordance with the redemption procedures set out below.

A redemption request may be made by such means (including electronic means) with the required information and supporting documents as from time to time determined by the Manager and/or the Trustee. Investors should be reminded that if they choose to send redemption forms by facsimile or other electronic means, they bear their own risk of the redemption forms being illegible or not being received. Investors should therefore for their own benefit confirm with the Manager the receipt of the redemption forms. Neither the Manager nor the Trustee shall be responsible to a Unitholder or an investor for any loss resulting from non-receipt or illegibility of any orders sent by facsimile or other electronic means, or for any loss caused in respect of any action taken as a consequence of such application believed in good faith to have originated from properly authorised persons. This is notwithstanding the fact that a transmission report produced by the originator of such transmission discloses that such transmission was sent.

The minimum value of units of any class of any Sub-Fund that a Unitholder may request a partial redemption must meet or exceed the minimum partial redemption (as detailed under the "Description of classes" section). The Manager may in its discretion agree to redeem a lesser amount from time to time than the minimum partial redemption, whether generally or in a particular case.

If a request for redemption will result in a Unitholder holding Units of a Class less than the minimum holding amount for that Class (as detailed under the "Description of classes" section), the Manager may deem such request to have been made in respect of all Units of the relevant Class held by that Unitholder.

All redemption notices must be signed by Unitholders except for those sent via electronic means, as determined by the Manager and/or the Trustee.

Cut-off

Redemption notices should be made on, and in accordance with the instructions on the redemption notice form and be received by the Manager or the Trustee by 4:00 p.m. (Hong Kong time) on a Dealing Day (or such other time as the Manager may from time to time determine) if they are to be dealt on that Dealing Day. Redemption notices received after that time will be dealt with on the next Dealing Day.

Redemption notices may also be sent through distributors appointed specifically for the purpose of distributing the Sub-Fund. Different distributors may have different cut-off times and investors should contact such distributors for details. Such distributors may also have the discretion as to whether redemption notices can be accepted by the relevant distributors on a Dealing Day on which severe weather conditions persist. Investors should pay attention to the arrangements of the distributors concerned.

Price

Units of a Class will be redeemed at the Redemption Price on the applicable Dealing Day, as calculated in the manner set out in the section headed "Unit prices" above.

While the Trust Deed provides that the Manager may charge a redemption charge not exceeding 3.0% of the Redemption Price per Unit, there is currently no redemption charge.

Settlement

Redemption proceeds will not be paid to any redeeming Unitholder until (a) the written redemption request has been received by the Trustee, (b) the signature of the Unitholder (or each joint Unitholder) has been verified to the satisfaction of the Trustee and (c) receipt of all required documents by the Trustee for the purpose of verification of identity and the source of funds. Redemption proceeds will be paid to the registered Unitholder requesting such redemption only and will not be paid to third parties. Please also see the section headed "Anti-money laundering regulations".

Redemption monies are normally remitted by bank transfer or telegraphic transfer or in such other manner as may be agreed by the Manager within 7 Business Days after the relevant Dealing Day upon receipt of all properly completed documentation. In any event, the maximum interval between the receipt of a properly documented request for redemption and the payment of the redemption money may not exceed one calendar month, unless the market(s) in which a substantial portion of investments is made is subject to legal or regulatory requirements (such as foreign currency controls) thus rendering the payment of the redemption money within the aforesaid time period not applicable. In such case, the extended timeframe for the payment of the redemption money shall reflect the additional time needed in light of the specific circumstances in the relevant market(s).

Redemption proceeds will be paid in the Class Currency of the Class of Units being redeemed. Subject to the agreement of the Trustee or the Manager and to applicable limits on foreign exchange, arrangements can be made for Unitholders who wish to redeem their Units to receive payment in other major currencies. The cost of currency conversion where payment is to be other than in the Class Currency of the Units redeemed will be payable by the Unitholder and will be deducted from the redemption proceeds to be paid to the Unitholder.

A request for redemption once given cannot be revoked without the consent of the Manager.

Restrictions on redemptions

The Manager may suspend, with the prior approval of the Trustee, the redemption of Units and/or delay the payment of redemption proceeds during any period in which the determination of the net asset value of the Sub-Fund is suspended (for details see the section headed "Suspension of calculation of net asset value").

With a view to protecting the interests of Unitholders, the Manager is entitled, with the approval of the Trustee, to limit the number of Units redeemed on any Dealing Day (whether by sale to the Manager or by cancellation by the Trustee) to 10% of the total net asset value of the relevant Sub-Fund. In this event, the limitation will apply pro rata so that all Unitholders wishing to redeem their Units on that Dealing Day will redeem the same proportion of such Units and Units not redeemed (but which would otherwise have been redeemed) will be carried forward for redemption, subject to the same limitation, on the next Dealing Day without prejudice to the right of the Unitholders to revoke any part of the redemption requests not effected on the relevant Dealing Day. If requests for redemption are so carried forward, the Manager will within 7 days of such Dealing Day inform the Unitholders concerned. Any part of a redemption request to which effect is not given by reason of the exercise of this power will be treated as if the request had been made with priority in respect of the next Dealing Day and all following Dealing Days (in relation to which the Manager have the same power) until the original request has been satisfied in full.

Compulsory redemption

The Manager may impose such restrictions as it may think necessary or desirable for the purpose of ensuring that no Units are acquired or held directly, indirectly or beneficially by any person or persons (each a "Restricted Person"):

- (i) who is an "Ineligible Investor" (i.e. any person, corporation, or other entity to whom Units of the Fund may not be offered or sold, as disclosed under the section "Important information");
- (ii) in circumstances (whether directly or indirectly affecting such person or persons and whether taken alone or in conjunction with any other persons, connected or not, or any other circumstances appearing to be relevant) which might result in the Manager, the Trustee, the Fund, a Sub-Fund or any Class of Units incurring or suffering any liability to taxation or suffering any other potential or actual pecuniary disadvantage or would subject the

Manager, the Trustee, the Fund, a Sub-Fund or any Class of Units to any additional regulation which they or any of them might not otherwise have incurred or suffered or been subject to; or

- (iii) in breach of any applicable law or applicable requirements of any country/region or governmental authority.

If it comes to the notice of the Manager or the Trustee that Units are owned directly or beneficially by any Restricted Person, the Manager or the Trustee may give a request for the transfer or the redemption of such Units. If the request is not complied with, the Manager or the Trustee may require the Units held to be compulsorily redeemed in accordance with the provisions of the Trust Deed. The Manager or the Trustee shall observe relevant legal requirements (as applicable) and shall act in good faith and on reasonable grounds in exercising such power of compulsory redemption.

Switching Units

Unitholders have the right (subject to any suspension in the determination of the net asset value of a Sub-Fund) to switch all or part of their Units of a certain Class of a Sub-Fund into Units of any other Class (whether in the same Sub-Fund or another Sub-Fund by giving notice to the Manager or the Trustee in writing or through such other means (including electronic means) as determined by the Manager and/or the Trustee, provided that such Class of a Sub-Fund or other Sub-Fund is open for new subscription and available for switching).

Switching is subject to limitations as the Manager may from time to time impose (including but not limited to the minimum holding requirement and investor eligibility requirement of the relevant Class of the Sub-Fund as detailed under the "Description of classes" section). No switching will be made if as a result thereof a Unitholder would hold less than the minimum holding requirement. Subscribers should contact the relevant intermediary or the Manager before making an application for switching. When dealing through an intermediary, investors also need to follow the terms of the intermediary.

Unitholders should be reminded that if they choose to send the notices by facsimile or other electronic means, they bear their own risk of the notices being illegible or not being received. Unitholders should therefore for their own benefit confirm with the Manager the receipt of the notices. Neither the Manager nor the Trustee shall be responsible to a Unitholder or an investor for any loss resulting from non-receipt or illegibility of any notices sent by facsimile or other electronic means, or for any loss caused in respect of any action taken as a consequence of such application believed in good faith to have originated from properly authorised persons. This is notwithstanding the fact that a transmission report produced by the originator of such transmission discloses that such transmission was sent.

All switching notices must be signed by Unitholders except for those sent via electronic means, as determined by the Manager and/or the Trustee.

Cut-off

Switching notices should be received by the Manager or the Trustee by 4:00 p.m. (Hong Kong time) on a Dealing Day (or such other time as the Manager may from time to time determine) if they are to be dealt on that Dealing Day. Switching notices received after that time will be dealt with on the next Dealing Day.

Switching notices may also be sent through distributors appointed specifically for the purpose of distributing the Sub-Fund. Different distributors may have different cut-off times and investors should contact such distributors for details. Such distributors may also have the discretion as to whether switching notices can be accepted by the relevant distributors on a Dealing Day on which severe weather conditions persist. Investors should pay attention to the arrangements of the distributors concerned.

Switching rate

The rate at which the whole or any part of a holding of Units in any class (the "**Existing Class**") will be switched on any Dealing Day into Units of another class (the "**New Class**") will be determined in accordance with the following formula:-

$$N = \frac{(E \times R \times F - SF)}{S}$$

where:-

- | | | |
|----|---|---|
| N | = | the number of Units in the New Class to be issued; |
| E | = | the number of Units in the Existing Class to be switched; |
| F | = | the currency conversion factor determined as representing the effective rate of exchange between the Class Currency of the Existing Class and the Class Currency of the New Class |
| R | = | the Redemption Price of the Existing Class on the relevant Dealing Day; |
| S | = | the Issue Price of the New Class on the relevant Dealing Day; and |
| SF | = | a switching fee (as described in the section headed "Charges and expenses"). |

Settlement

Investors should note that in switching, subject to the valuation time of each Sub-Fund and the time required to remit the switching money between different Sub-Funds, the day on which the investments are switched into the New Class may be later than the day on which the investments in the Existing Class are switched out or the day on which the switching instructions are given.

Transferring Units

Units may be transferred by an instrument in writing in common form signed by (or, in the case of a body corporate, signed on behalf of or sealed by) the transferor and the transferee. The transferor will be deemed to remain the holder of the Units transferred until the name of the transferee is entered in the Register of Unitholders in respect of such Units.

Anti-money laundering regulations

A Sub-Fund, its service providers and other members of the HSBC Group (including but not limited to the Manager, the Trustee and their respective delegates) are required to act in accordance with the laws, regulations and requests of public and regulatory authorities operating in various jurisdictions which relate to, amongst other things, the prevention of money laundering, terrorist financing and the provision of financial and other services to any persons or entities which may be subject to sanctions. A Sub-Fund, any of its service providers or any member of the HSBC Group may take any action which in their sole and absolute discretion consider appropriate to take in accordance with all such laws, regulations and requests.

Such action may include but is not limited to: the interception and investigation of any payment messages and other information or communications sent to or by an investor or on behalf of such investor via the systems of a Sub-Fund, any service provider of a Sub-Fund or any member of the HSBC Group; and making further enquiries as to whether a name which might refer to a sanctioned person or entity actually refers to that person or entity.

A Sub-Fund, its service providers and other members of the HSBC Group shall not be liable for loss (whether direct or consequential and including, without limitation, loss of profit or interest) or damage suffered by any party arising out of:

- (a) any delay or failure of a Sub-Fund, any of its service providers or any member of the HSBC Group in processing any such payment messages or other information or communications, or in performing any of their duties or other obligations in connection with any accounts or the provision of any services to an investor, caused in whole or in part by any steps which a Sub-Fund, any of its service providers or any member of the HSBC Group, in their sole and absolute discretion, consider appropriate to take in accordance with all such laws, regulations and requests; or
- (b) the exercise of any of the rights of a Sub-Fund, its service providers and other members of the HSBC Group under this section.

In certain circumstances, the action which a Sub-Fund, any of its service providers or any member of the HSBC Group may take may prevent or cause a delay in the processing of certain information. Therefore, a Sub-Fund, its service providers and other members of the HSBC Group do not warrant that any information on their systems relating to any payment messages or other information and communications which are the subject of any action taken pursuant to this section is accurate, current or up-to-date at the time it is accessed, whilst such action is being taken.

In order to comply with regulations aimed at the prevention of money laundering in any applicable jurisdictions, the Manager, the Trustee, the Registrar and their respective delegates may require prospective investors to provide evidence to verify their identity and the source of payment of subscription monies. Accordingly, each of the Manager, the Trustee, and Registrar and their respective delegates reserves the right to request such information as it considers necessary to verify the identity of a prospective investor and the source of payment of subscription monies. The Manager, the Trustee, Registrar and/or their respective delegates may refuse to accept any subscription application if a prospective investor delays in producing or fails to produce any information required by the Manager, the Trustee, Registrar and/or their respective delegates, for the purpose of verification and, in that event, any funds received will be returned without interest to the account from which the monies were originally debited. Each of the Manager, the Trustee, Registrar and their respective delegates may also refuse to process any redemption request or delay payment of redemption proceeds if a Unitholder requesting for redemption delays in producing or fails to produce any information required by the Manager, the Trustee, the Registrar and/or their respective delegates. Neither the Manager, the Trustee, the Registrar nor their respective delegates shall be liable to any prospective investor or Unitholder (as the case may be) for any loss suffered by the prospective investor or Unitholder (as the case may be) as a result of the rejection of any subscription or redemption request or delay of subscription or payment of redemption proceeds.

Charges and expenses

Charges and expenses apply to the Sub-Funds and their Unit Classes where appropriate, for their investment management, distribution and for the operating services required.

There are three types of charges and expenses:

1. Initial charge and switching fee
2. Ongoing charges
3. Other charges

Initial charge and switching fee

The Manager (or its authorised distributors) is entitled to deduct an initial charge from the total subscription amount and then issue Units based on the net subscription amount (i.e. the total subscription amount less the initial charge). The Manager currently charges an initial charge as follows:

| Sub-Fund | % of the total subscription amount |
|---|---|
| Equity Fund | Up to 4.50% |
| Applies to: | |
| <ul style="list-style-type: none">• HSBC Asia Pacific ex Japan Equity Volatility Focused Fund• HSBC Evolving Asia Equity Fund• HSBC US Dynamic Opportunities Equity Fund | |
| Bond Fund | Up to 3.00% |
| Applies to: | |
| <ul style="list-style-type: none">• HSBC Asia High Income Bond Fund• HSBC All China Bond Fund | |
| Multi-Asset Fund | Up to 3.00% |
| Applies to: | |
| <ul style="list-style-type: none">• HSBC China Multi-Asset Income Fund• HSBC European Multi-Asset Income Fund• HSBC Asia Multi-Asset High Income Fund• HSBC Global Sustainable Multi-Asset Income Fund• HSBC Global Diversified Real Return Fund• HSBC India Multi Income Fund• HSBC Post Retirement Multi-Asset Fund | |

Under the Trust Deed, the maximum rate of the initial charge is up to 6% of either (i) the Issue Price or (ii) the total subscription amount.

Currently, the Manager is not retaining the initial charge and has shared the initial charge with its authorised distributors who will retain the full initial charge.

Under the Trust Deed, the Manager may charge a redemption fee not exceeding 3.0% of the Redemption Price per Unit. Currently, the redemption fee is nil.

Under the Trust Deed, the Manager may charge a switching fee not exceeding 2.0% of the Issue Price of the New Class (which is equivalent to 1.96% of the switch-out proceeds). Currently, the switching fee is up to 1.0% of the switch-out proceeds. The Manager is currently not retaining the switching fee and has shared the switching fee with its authorised distributors who will retain the full switching fee.

Ongoing charges

Ongoing charges consist of:

- Management fee
- Trustee fee
- Other ongoing expenses
- Costs of investing in units or shares of Underlying Funds
- Amortised establishment costs
- Operating currency hedging fees

Ongoing charges may vary over time. Retail investors in Hong Kong can consult the Product Key Fact Statement of the relevant Sub-Fund for a list of classes currently available to them alongside the ongoing charges figure (calculated on such basis as disclosed in the relevant Product Key Fact Statement).

Management fee

The current management fee for each Sub-Fund and its Classes of Units is disclosed in the section “Appendix 1 – Sub-Fund Details” and stated as an annualised percentage of the net asset value of a Class. The management fee is accrued as at each Valuation Day and payable monthly in arrears.

Currently, no performance fee is charged by the Manager.

The Manager will give one month's prior notice to Unitholders should there be any increase of the management fee from the current level up to the maximum level of 2.5% per annum of the net asset value of a Class of Units.

The Manager may share any amounts it is entitled to retain as manager of the Sub-Fund with any persons who distribute or otherwise procure subscriptions to the Sub-Fund.

Trustee fee

The current trustee fee for each Sub-Fund is disclosed in the section “Appendix 1 – Sub-Fund Details” and stated as an annualised percentage of the net asset value of a Sub-Fund. The trustee fee is accrued as at each Valuation Day and payable monthly in arrears.

The Trustee will give one month's prior notice to Unitholders should there be any increase of the trustee fee from the current level up to the maximum level of 2.5% per annum of the net asset value of a Sub-Fund.

In addition, the Trustee is also entitled to various transaction and processing fees and to be reimbursed for all out of pocket expenses (including transfer agency fees, sub-custody fees and expenses) properly incurred by it in the performance of its duties.

Other ongoing expenses

Each Sub-Fund will bear the cost of:

- a. transaction fees of the Trustee, custodian or sub-custodian and proxy fees and expenses, collection fees and expenses, insurance and security costs;
- b. the fees and expenses of the Auditors and the Registrar;
- c. fees charged by the Trustee in connection with valuing the assets of the Sub-Fund or any part thereof, calculating the Issue Price/Redemption Price of Units of the Sub-Fund and preparing financial statements;
- d. all legal and professional fees and charges incurred by the Manager and/or the Trustee in connection with the Sub-Fund (including the fees and charges of the legal counsel, and fees and charges incurred in conducting legal proceedings or applying to any court for any purposes related to the Sub-Fund) and other professional fees and charges (including any professional fees and charges in relation to agreeing and/or contesting taxation liabilities or recoveries to be paid out of or into the Sub-Fund, or preparation or issuance of any accounts, statements or reports in relation to the Sub-Fund or any income, revenue, expenses, assets and/or liabilities of the Sub-Fund, or any costs of using benchmark or fees charged by rating agencies);
- e. out-of-pocket expenses incurred by the Trustee wholly and exclusively in the performance of its duties;
- f. the expenses of or incidental to the preparation of deeds supplemental to the Trust Deed;
- g. the expenses of holding meetings of Unitholders and of giving notices to Unitholders;
- h. the costs and expenses of obtaining and maintaining a listing for the Units of the Sub-Fund on any stock exchange or exchanges selected by the Manager and approved by the Trustee and/or in obtaining and maintaining any approval or authorisation of the Sub-Fund or in complying with any undertaking given, or agreement entered into in connection with, or any rules governing such listing, approval or authorisation; and
- i. without prejudice to the generality of the foregoing, all costs incurred in publishing the Issue Price/Redemption Price of Units of the Sub-Fund, all costs of preparing, printing and distributing all statements, accounts and reports pursuant to the provisions of the Trust Deed (including the Auditors' fees and Trustee's fee), the expenses of preparing and printing any offering document, and any other expenses, deemed by the Manager, after consulting the Trustee, to have been incurred in compliance with or in connection with any change in or introduction of any law or regulation or directive (whether or not having the force of law) of any governmental or other regulatory authority or with the provisions of any code relating to unit trusts.

Costs of investing in units or shares of Underlying Funds

These are the costs associated with a Sub-Fund holding units or shares of Underlying Funds - including their ongoing charges and any one-off costs (if permitted under applicable regulations).

The payment of these costs will be taken in accordance with each specific Underlying Funds' payment schedule as articulated in their prospectus as permitted by applicable regulations.

If a Sub-Fund's aggregate investments in all Underlying Fund(s) is less than 20% of the investing Sub-Fund's net asset value, then the costs of investing in units or shares of Underlying Funds may not be included in the published ongoing charges figure of the Sub-Fund.

Amortised establishment costs

The cost of establishment of a Sub-Fund may be amortised over the first five financial years of the Sub-Fund commencing from the first Valuation Day, unless otherwise determined by the Manager with the approval of the Trustee.

If the Sub-Fund is wound-up prior to the expenses being fully amortised, such unamortised amount will be borne by the Sub-Fund prior to its termination.

As at the date of this Explanatory Memorandum the following establishment costs have not yet been fully amortised:

| Sub-Fund | Approximate establishment cost |
|---|---------------------------------------|
| HSBC Asia Multi-Asset High Income Fund | USD 90,000 |
| HSBC Evolving Asia Equity Fund | USD 60,000 |
| HSBC Global Sustainable Multi-Asset Income Fund | USD 60,000 |
| HSBC Global Diversified Real Return Fund | USD 37,000 |
| HSBC India Multi Income Fund | USD 46,000 |
| HSBC Post Retirement Multi-Asset Fund | USD 49,000 |
| HSBC US Dynamic Opportunities Equity Fund | <u>USD 49,000</u> |

It should be noted that the above policy relating to amortisation of establishment expenses is not strictly in accordance with the Hong Kong Financial Reporting Standards ("HKFRS"), which requires establishment expenses to be expended as incurred. The Manager believes that such treatment is more equitable to the initial investors than expending the entire amount as they are incurred and is of the opinion that the departure is unlikely to be material to a Sub-Fund's overall financial statements.

Operating currency hedging fees

The Manager will charge the Currency Hedged Unit Class(es) a fee of up to 0.10% per annum of the net asset value of the relevant Class in relation to the administration of the hedge. This does not include the transaction costs incurred when entering into hedging contracts.

Other charges and expenses

Other charges and expenses may not be included in the published ongoing charges figure but are borne by the Fund or the relevant Sub-Fund. They include:

- a. all stamp and other duties, taxes and governmental charges (including withholding tax and capital gains tax);
- b. brokerages, commissions, exchange costs and commissions, bank charges, transfer fees and expenses, registration fees and expenses, and any other costs, charges or expenses payable in respect of the acquisition, holding and realisation of any investment or other property or any cash, deposit or loan (including the claiming or collection of income or other rights in respect thereof and including any fees or expenses charged or incurred by the Trustee or the Manager or any Connected Person in the event of the Trustee or the Manager or such Connected Person rendering services or effecting transactions giving rise to such fees or expenses);
- c. costs incurred for the holding of financial derivative instruments e.g. margin calls, costs incurred from swap transactions; and
- d. value of goods or services received by the management company or any connected person in exchange for placing of dealing orders e.g. soft commissions or similar arrangement.

Taxation

The following statements regarding taxation are based on advice received by the Fund regarding the law and practice in force in the relevant jurisdictions at the date of this Explanatory Memorandum. Investors should be aware that levels and bases of taxation are subject to change and that the value of any relief from taxation depends upon the individual circumstances of the taxpayer.

Taxes on Unitholders and Unitholder tax disclosures

Investors should consult their professional advisers on the consequences to them of acquiring, holding, redeeming, transferring or selling units under the relevant laws of the jurisdictions to which they are subject, including the tax consequences and any exchange control requirements. These consequences, including the availability of, and the value of, tax relief to investors will vary with the law and practice of the investors' country/region of citizenship, residence, domicile or incorporation and their personal circumstances.

Hong Kong

Under present Hong Kong law and practice:-

- a) No tax will be payable by Unitholders in Hong Kong in respect of dividends/payouts or other income payments of a Sub-Fund or in respect of any gains arising on a sale, redemption or other disposal of Units of a Sub-Fund, except that Hong Kong profits tax may arise where such transactions form part of a trade, profession or business carried on in Hong Kong and the gains are Hong Kong sourced and not otherwise of capital nature. Ascertaining the source and the classification of a gain as revenue or capital will depend on the particular facts and circumstances of the Unitholders.
- b) No Hong Kong stamp duty is payable by Unitholders in relation to the issuance of Units, the redemption of Units or the sale or transfer of the Unit effected by extinguishing the Units or the sale or transfer is to the Manager who subsequently re-sells the Units within two months thereof. Other types of sales or purchases or transfers of the Units by Unitholders should be liable to Hong Kong Stamp Duty of 0.1% (borne by each of the buyer and

seller) on the higher of the consideration amount or market value. In addition, a fixed duty of HK\$5.00 is currently payable on instrument of transfer of Units, unless being specifically exempt.

Payments to unitholders

Before making any distribution or other payment in respect of any Unit, the Trustee and/or the Manager may make any such deductions or withholdings (if any) as, by any applicable law of Hong Kong or elsewhere, or by any applicable regulation, direction, or guidance, or by any agreement with any tax or fiscal authority (whether within or outside Hong Kong), they are required or entitled by any applicable law to make in respect of any income, interest or other taxes, charges or assessments whatsoever. In such event, the Manager and/or the Trustee shall act in good faith and on reasonable grounds in making such deductions or withholdings.

The Trustee and the Manager may also deduct the amount of any stamp duties or other governmental taxes, charges or assessments payable by it or them in respect of any distribution/payout made.

Automatic exchange of information

Automatic exchange of information (“**AEOI**”) is an umbrella term covering a number of inter-governmental and multi-lateral agreements concerning information sharing between states (or regions) to promote tax transparency.

Investors should consult their own tax advisors regarding AEOI requirements with respect to their own situation. In particular, investors who hold their units through intermediaries should confirm the AEOI compliance status of those intermediaries.

Foreign Account Tax Compliance Act

The US Foreign Account Tax Compliance Act (“**FATCA**”) requires non-U.S. (foreign) financial institutions (“**FFI**”) to report certain investor information to the US authorities. Under sections 1471 through 1474 of the U.S. Internal Revenue Code if an FFI is not compliant with FATCA then a 30% withholding tax may be imposed on certain payments to FFIs. Currently this withholding tax only applies to payments that constitute interest, dividends and other types of income from U.S. sources (such as dividends paid by a U.S. corporation).

Hong Kong has signed an Intergovernmental Agreement (“**IGA**”) Model 2 with the U.S. and the Fund and the Sub-Funds intend to comply with the terms of the IGA and local implementing regulations.

As an IGA has been signed between Hong Kong and the U.S., FFIs in Hong Kong (such as the Fund and the Sub-Funds) complying with the FFI Agreement (i) will generally not be subject to the above described 30% withholding tax; and (ii) will not be required to withhold tax on payments to non-consenting accounts (i.e. accounts of which the holders do not consent to FATCA reporting and disclosure to the U.S. IRS) or close those non-consenting accounts (provided that information regarding such non-consenting account holders is reported to the U.S. IRS).

As at the date of this Explanatory Memorandum, the Fund and the Sub-Funds are treated as a “Non-reporting IGA FFIs” under IGA Model 2 with the U.S. This means that the Manager will act as “FATCA sponsoring entity” and carry out FATCA obligations on behalf of the Fund and the Sub-Funds.

Common Reporting Standard

Hong Kong's Inland Revenue (Amendment) (No.3) Ordinance (the “**Ordinance**”) and any subsequent legislative amendments set the legislative framework for the implementation in Hong Kong of the OECD Standard for Automatic Exchange of Financial Account Information – Common Reporting Standard (the “**CRS**”).

The CRS rules as implemented by Hong Kong require the Fund and the Sub-Funds to, amongst other things: (i) register the Fund and the Sub-Funds' status as a “Reporting Financial Institution” with the IRD; (ii) conduct due diligence on its accounts (i.e., investors' accounts) to identify whether any such accounts are considered “Reportable Accounts” for CRS purposes; and (iii) report certain account and tax information of such Reportable Accounts to the IRD. Broadly, CRS contemplates that Hong Kong FIs should report on: (i) individuals or entities that are tax resident in a reportable jurisdiction and (ii) certain entities controlled by individuals who are tax resident in such a reportable jurisdiction. Under the Ordinance, details of investors, including but not limited to their name, address, jurisdiction of residence, tax identification number, date and place of birth, account number, account balance/value, distribution income and sale/redemption proceeds, may be reported to the IRD and subsequently exchanged with tax authorities in the relevant jurisdictions of tax residence.

The investor agrees to provide the Manager with any financial or account information or documentation to enable the Manager to comply with the requirements and obligations imposed on the Manager pursuant to the regulatory requirements (including FATCA and AEOI legislation). To the extent required by the Manager, the investor hereby consents to the disclosure and reporting of any tax related information to any local or foreign regulatory or tax authority (“**Tax Authority**”) where the provision of that information to such person or regulatory authority is required to ensure compliance by the Fund manager with its obligations under the regulatory requirements (including FATCA and the AEOI legislation) or to avoid being subject to withholding tax or other liabilities under the regulatory requirements (including FATCA and AEOI legislation). Upon request by the Manager, the investor hereby agrees to obtain a written waiver or consent from the “substantial owners” or “controlling persons” and to provide those consents to the Manager to permit it to disclose and report relevant information to any local or foreign Tax Authority pursuant to the regulatory requirements (including FATCA and AEOI legislation). The terms “substantial owners” and “controlling persons” shall have the meaning as defined under local or foreign tax laws, regulatory guidance or intergovernmental cooperation agreements. The potential consequences for failure to comply with requests for the requested information, failure to respond to requests for waivers or consents for tax information disclosure, the provision of information that is in any way misleading, and/or failure to respond to requests to obtain waivers or consents from substantial owners or controlling persons, include, but are not limited to: (i) the Manager's right to take whatever actions that are necessary to comply with the local or foreign tax reporting obligations and the regulatory requirements (including FATCA and AEOI legislation); (ii) the Manager's ability to withhold an amount from certain payments made to the investor's account that is sufficient to discharge any liabilities, costs, expenses, taxes, withholdings or deductions incurred or suffered by the Manager due to the representations, actions or inactions (directly or indirectly) by the investor; (iii) the Manager's right

to pay relevant taxes to the appropriate tax authority; (iv) the Manager's right to refuse to provide certain services; and (v) the Manager's right, to the extent permitted by applicable laws and the Fund's and Sub-Funds' constitutional documents, to compulsorily redeem or withdraw the investor concerned. The Manager shall at all times observe relevant legal requirements and shall act in good faith and on reasonable grounds. The investor agrees to inform, or respond to any request from, the Manager, if there are any changes to tax information previously provided.

Taxes on the Fund / Sub-Funds

Hong Kong

During such period that a Sub-Fund is authorised by the SFC pursuant to section 104 of the Securities and Futures Ordinance then, under present Hong Kong law and practice a Sub-Fund is not expected to be subject to Hong Kong profits tax in respect of any of its authorised activities.

India

The Income Tax Act, 1961 ("ITA") introduced the General Anti Avoidance Rule ("GAAR") which has been effective since 1 April 2017. Under the GAAR, the Indian tax authorities have been given the power to re-characterise or disregard any arrangement which qualifies as an "impermissible avoidance arrangement" ("IAA"). This means an arrangement, the main purpose of which is to obtain a "tax benefit" (i.e. a reduction or avoidance of tax that would be payable under the ITA), and, amongst other things, which "lacks" or is "deemed to lack" commercial substance in whole or in part. The Income Tax Rules further clarify that an FPI making investments in securities in the Indian market and availing any benefits under the double taxation avoidance agreement ("DTAA") could fall within the purview of GAAR. Accordingly, there is a risk that Indian tax authorities could deny tax exemption or relief claimed as per the provisions of the DTAA by invoking provisions of the GAAR. The Income Tax Rules also provide that investments made up to 31 March 2017 will be protected from the application of the GAAR.

For tax disclosures on investment in Indian securities, please refer to the risk factor headed "Risk associated with Indian securities" in the section headed "Sub-Fund specific risks".

Mainland China

Under mainland China Corporate Income Tax ("CIT") law, if a Sub-Fund is considered mainland China tax resident, it will be subject to CIT at 25% on its worldwide taxable income. If a Sub-Fund is considered non-mainland China resident but has a permanent establishment ("PE") in mainland China, the profits attributable to that PE would be subject to mainland China CIT at 25%. If the Fund/Sub-Funds are non-mainland China resident without PE in mainland China, mainland China-sourced income derived by them from the investment in mainland China Securities would in general be subject to 10% mainland China CIT withholding in mainland China, unless exempt or reduced under specific tax circulars or relevant tax treaty.

It is the intention of the Manager that the affairs of the Sub-Funds (and the QFI Holder, if applicable) will be such that they are not mainland China tax resident enterprises and have no PE in mainland China for mainland China CIT purposes, although this cannot be guaranteed. Any mainland China CIT imposed on a QFI Holder (if applicable) in respect of mainland China Securities invested by a Sub-Fund will be passed on to a Sub-Fund and the asset value of a Sub-Fund will be reduced accordingly.

For tax disclosures on investment in mainland China Securities, please refer to the sub-section headed "Mainland China" of the below section on "Taxes related to a Sub-Fund's assets".

Taxes related to a Sub-Fund's assets

In many markets a Sub-Fund as a foreign investment fund, may be subject to non-recoverable tax, levies, duties or charges imposed by the authorities in such market on income and gains (either by withholding or direct assessment) in relation to the investment returns it realises from its holdings of shares and securities in those markets. Where practicable a Sub-Fund will make claims under the relevant double tax treaties and the domestic law of the countries/regions concerned in order to minimise the impact of local taxation on the investment return and to obtain the best return for its Unitholders. Those claims will be made on the basis of the understanding of the validity of such claims given the information available from the Fund's/Sub-Funds' depositaries, external advisers and other sources as to the interpretation and application of the relevant legal provisions by the tax authorities in the country/region concerned.

The Manager may, upon taking tax advice, at its discretion, arrange with the Trustee to provide for potential tax liabilities in respect of the Sub-Funds' investments for the purpose of meeting the Sub-Funds' tax liabilities.

Investors should note that any tax provision, if made, may be excessive or inadequate to meet actual tax liabilities on investments made by the Sub-Fund. In the event that it is satisfied (based on tax advice) that part of the tax provisions are not required, the Manager will arrange with the Trustee to release such provisions back into the Sub-Fund, forming part of the Sub-Fund's assets. On the other hand, any amount by which the tax provisions fall short of the tax liability incurred or is expected to be incurred by the Sub-Fund shall be debited and deducted from the Sub-Fund's assets which will adversely affect the net asset value of a Sub-Fund. For details of the tax provision policy for investment in mainland China related securities (if any) of a Sub-Fund, please refer to the sub-section "Tax provisions – mainland China CIT and VAT" in this section.

Any tax provision, if made, will be reflected in the net asset value of a Sub-Fund at the time of debit or release of such provision and thus will only impact on Units which remain in a Sub-Fund at the time of debit or release of such provision. Units which are redeemed prior to the time of debit of such provision will not be affected by reason of any

insufficiency of the tax provision. Likewise, such Units and the Unitholders who have redeemed will not benefit from any release of excess tax provisions.

Investors may be advantaged or disadvantaged depending upon the final tax outcome as and when they subscribed and/or redeemed the Units of a Sub-Fund. Investors should note that no Unitholders who have redeemed their Units in a Sub-Fund before the release of any excess tax provision shall be entitled to claim in whatsoever form any part of the tax provision or withholding amounts released to a Sub-Fund, which amount will be reflected in the value of Units in a Sub-Fund.

A Sub-Fund will seek to claim concessionary tax treatment and account for tax on a reasonable efforts basis, given the tax law and practice at that date. Any change in tax law or practice in any country/region where a Sub-Fund is registered, marketed and invested could affect the value of a Sub-Fund's investments in the affected country/region. In particular, where retrospective changes to tax law or practice are applied by the legislature or tax authorities in a particular country/region these may result in a loss for current Unitholders in the affected Sub-Fund. The Fund/Sub-Funds does not offer any warranty as to the tax position of returns from investments held in a particular market nor of the risk of a retrospective assessment to tax in a particular market or country/region. This risk is particularly pertinent when a Sub-Fund invests in emerging markets such as mainland China. Investors and potential investors should refer to the "Emerging and less developed markets securities risk" and "Mainland China tax risks" sections as well as the section below related to Mainland China.

Mainland China

By investing in China A-shares, B-shares, H-shares, Bank Deposits and RMB denominated fixed income securities (including corporate and government bonds) issued inside or outside mainland China as well as equivalents such as CAAPs and QFI Underlying Funds investing in such ("**mainland China Securities**"), a Sub-Fund may be subject to taxes imposed by mainland China.

CIT

If a Sub-Fund is a non-mainland China resident without PE in mainland China (i.e. foreign investor), the mainland China-sourced income derived by it from the investment in mainland China Securities would in general be subject to 10% mainland China CIT withholding in mainland China, unless exempt or reduced under specific tax circulars or relevant tax treaty.

Bank deposits

Interest derived by foreign investors from bank deposits in mainland China is subject to 10% mainland China CIT by way of withholding which may be reduced under applicable tax treaty subject to agreement by the in-charge mainland China tax authority.

Fixed income investments

Interest derived from mainland China debt securities other than government bonds⁷ (including those issued by foreign enterprises but deemed as mainland China tax residents⁸) by a foreign investor is subject to 10% mainland China CIT by way of withholding unless the rate is reduced under applicable tax treaty subject to agreement by the in-charge mainland China tax authority.

In November 2018, the Ministry of Finance ("**MOF**") and the State Taxation Administration of the People's Republic of China ("**STA**") jointly issued [Caishui [2018] No. 108] ("**Circular 108**") which provides that foreign institutional investors are exempted from mainland China CIT in respect of bond interest income received from 7 November 2018 to 6 November 2021 ("**Tax Exempt Period**") from investments in the mainland China onshore bond market. According to the Public Notice no. 34 ("**Public Notice no. 34**") issued by MOF and STA in November 2021, the Tax Exempt Period has been further extended to 31 December 2025. Such exemption does not apply to interest income derived by a permanent establishment of the foreign institutional investors in mainland China. There is still lack of clear guidance in respect of CIT applicable to interest income derived by the Sub-Funds from mainland China onshore debt securities, in particular, whether interest income received before 7 November 2018 is subject to CIT and whether the tax exemption under Circular 108 and Public Notice no. 34 will continue to be available upon expiry.

There are no specific rules governing mainland China CIT on capital gains derived by foreign investors from the trading of debt securities in mainland China. Based on current interpretation of the STA and professional tax advice, the Manager does not intend to provide for any mainland China CIT in respect of the capital gains derived by a Sub-Fund from disposal of debt securities in mainland China.

In light of the uncertainty on the CIT treatment on capital gains on debt securities trading in mainland China and for the purpose of meeting this potential tax liability of a Sub-Fund for capital gains from debt securities in mainland China, the Manager reserves the right to provide for CIT on such gains or income and withhold the tax from the account of a Sub-Fund based on new developments and interpretation of the relevant regulations (after taking professional tax advice).

Equity investments

In respect of equity interest investments such as China A-shares, the Ministry of Finance, the STA and the CSRC have promulgated circulars in 2014 to clarify the relevant CIT liabilities:-

⁷ Interest from government bonds are generally exempt from mainland China CIT. These only refer to government bonds issued by the mainland China Ministry of Finance, or State Council approved local government bonds issued in 2009 or subsequent years.

⁸ A company is regarded as mainland China tax resident company if it is incorporated in mainland China or effectively managed in mainland China. "Effective management" is defined as the overall management and control over the operation, business, personnel, accounting and assets of a company.

- (i) Pursuant to *Circular Concerning the Temporary Exemption of Corporate Income Tax for Gains Derived by Qualified Foreign Institutional Investor ("QFII") and RMB Qualified Foreign Institutional Investor ("RQFII") from Transfer of Domestic Shares and Other Equity Interest Investment in China*:

- CIT shall be temporarily exempted on the gains derived by QFIIs and RQFIIs from the transfer of domestic shares and other equity interest investment in mainland China with effect from 17 November 2014; and
- CIT shall be imposed on such gains derived by QFIIs and RQFIIs before 17 November 2014 in accordance with the tax laws.

This circular is applicable to QFIIs and RQFIIs without any establishment or place in mainland China or the income derived by the QFIIs and RQFIIs are not effectively connected with their establishment or place in mainland China.

Pursuant to *Circular of State Taxation Administration of the People's Republic of China on Issues Concerning the Withholding and Payment of Corporate Income Tax on Dividends and Interests Paid to QFII by PRC Resident Enterprise*, mainland China-sourced dividends derived by QFII is subject to 10% CIT withholding. The CIT shall be withheld and paid by the enterprise that pays the dividends.

Pursuant to the *Official Reply of the State Taxation Administration of the People's Republic of China on Issues Concerning Levying Corporate Income Tax on Dividends of B Shares and Other Shares Derived by Non-resident Enterprises*, where mainland China resident enterprises that have shares (A-shares, B-shares and overseas shares) publicly issued and listed in and outside of mainland China pay dividends to non-resident enterprise shareholders, CIT at the rate of 10% shall be withheld and paid on dividends from 2008 onwards.

- (ii) Pursuant to Circular on the Taxation Policy of the Pilot Programme for the Mutual Stock Market Access between Shanghai/Shenzhen and Hong Kong Stock Markets, in respect of trading through the Stock Connect:

- CIT shall be temporarily exempted on the gains derived by Hong Kong market investors (including corporate investors) from the transfer of China A-shares listed on the Shanghai/Shenzhen Stock Exchange; and
- Hong Kong market corporate investors are required to pay tax on dividends of China A-shares at a rate of 10%, which will be withheld and paid to the relevant mainland China tax authority by the respective listed companies.

VAT

On 23 March 2016, the MOF and the STA jointly released *Circular Notice on Overall Implementation of Transforming Business Tax to Value-added Tax on a Pilot Basis ("Circular 36")* on the full transformation of Business Tax to VAT (the "**B2V Reform**"). Circular 36 took effect on 1 May 2016 and officially transforms the financial services industry from Business Tax to VAT. After the issuance of Circular 36, the MOF and STA issued various supplementary circulars, including Circular Caishui [2016] No. 140, Circular Caishui [2017] No. 2 and Circular Caishui [2017] No. 56 which specifically address the VAT treatment of asset management products.

Interest income

Based on the interpretation of the relevant tax regulations and circulars upon seeking tax advice, coupon interest derived by a Sub-Fund from mainland China onshore non-government bonds and offshore bonds issued by mainland China tax resident companies ("**relevant bonds**") should be subject to VAT at 6% plus local surcharges (if applicable) from 1 May 2016.

Circular 108 provides that foreign institutional investors are exempted from mainland China VAT in respect of bond interest income received from 7 November 2018 to 6 November 2021 from investments in the mainland China onshore bond market. According to the Public Notice no. 34, the Tax Exempt Period has been further extended to 31 December 2025. Such exemption does not apply to interest income derived by a permanent establishment of the foreign institutional investors in mainland China.

There is still lack of clear guidance in respect of VAT applicable to interest income derived by the Sub-Funds from mainland China onshore debt securities, in particular, whether interest income received before 7 November 2018 is subject to VAT and whether the tax exemption under Circular 108 and Public Notice no. 34 will continue to be available upon expiry.

Interest income from bank deposit in mainland China is not subject to mainland China VAT.

Dividends or profits

Dividends or profits distributed on equity investment are not subject to mainland China VAT.

Capital gains

Pursuant to Circular 36, gains realised from the trading of marketable securities in mainland China would generally be subject to VAT at 6% plus surcharge (if applicable), unless specifically exempted. Circular 36 provides VAT exemption on gains derived by QFIIs from the trading of mainland China Securities. Pursuant to Caishui [2016] No. 70, which is a supplementary notice to Circular 36, gains realised by institutional investors outside mainland China recognized by the PBOC from the investment in the interbank local currency market and gains derived by RQFIIs from the trading of mainland China Securities are exempt from VAT. In addition, pursuant to Circular 36 and Caishui

[2016] 127 (tax circular on Shenzhen-Hong Kong stock connect), VAT shall be exempted on the gains derived by Hong Kong market investors (including corporate and individual investors) from the trading of China A-shares through the Stock Connect.

Surcharges (if applicable)

If VAT is payable on interest and/or capital gains, there may be also surcharges (which include City Construction and Maintenance Tax, Education Surcharge, Local Education Surcharge) to be charged on top of the 6% VAT payable. There may also be other levies imposed in some locations.

Stamp duty

Stamp duty under mainland China laws generally applies to the conclusion and receipt of dutiable documents listed in mainland China Provisional Rules on Stamp Duty. Stamp duty is payable at 0.1%, which has been reduced to 0.05% since 28 August 2023, by the transferor of China A-shares and B-shares.

Under *Circulars on the Taxation Policy of the Pilot Programme for the Mutual Stock Market Access between Shanghai and Hong Kong Stock Markets*, Hong Kong market investors trading through Shanghai-Hong Kong Stock Connect are required to pay stamp duty arising from the sale and purchase of China A-shares and the transfer of China A-shares by way of succession and gift in accordance with the prevailing mainland China taxation regulations. The same rules apply to Hong Kong market investors trading through Shenzhen-Hong Kong Stock Connect. In addition, Caishui [2016] 127 provides temporary stamp duty exemption on stock borrowing and returning related to covered short selling of stocks by Hong Kong market investors through the Stock Connect.

Tax provisions – mainland China CIT and VAT

In view of the foregoing, the Manager, after taking professional tax advice, has decided that:

- a Sub-Fund will make a CIT provision of 10% on interest from its investments in debt securities issued by mainland China tax resident enterprises, if it was not withheld at source nor borne by the bond issuers (except (i) interests from investments in mainland China onshore bonds received during the Tax Exempt Period and (ii) interest from mainland China government bonds and local government bonds);
- a Sub-Fund will not withhold any amount of realised or unrealised capital gains derived from the disposal of or investment in mainland China debt securities;
- a Sub-Fund will not withhold any amount for interest derived from Bank Deposits in mainland China as CIT provision because CIT is withheld at source;
- a Sub-Fund will not withhold (or will not request the CAAP issuers to withhold) any amount of realised or unrealised gains on its investments in CAAPs as tax provisions;
- a Sub-Fund will not withhold any amount of realised or unrealised gains on its investments in China A-shares through the Stock Connect as tax provisions; and
- a Sub-Fund will make a VAT provision at 6% plus surcharge (if applicable) on interest from its investment in the relevant bonds provided that such VAT is not borne by the bond issuers (except (i) interests from investments in mainland China onshore bonds received during the Tax Exempt Period and (ii) interest from mainland China government bonds and local government bonds).

The Manager may, upon taking professional tax advice, at its discretion, arrange with the Trustee to change the tax provisions in regard to potential mainland China tax liabilities in respect of a Sub-Fund's investments in mainland China based on new developments and interpretation of the relevant regulations from time to time, for the purpose of meeting a Sub-Fund's tax liabilities in respect of or arising out of any mainland China taxes, charges and duties set out above.

There is a possibility that the current tax laws, rules, regulations and practice in mainland China and/or the current interpretation or understanding thereof may be changed with retrospective effect in the future. Such changes may impact the tax provisioning policy and tax position of a Sub-Fund and could have a material adverse impact on the net asset value of a Sub-Fund, thereby causing significant losses to investors. Investors should seek their own tax advice on their mainland China tax position with regard to their investment in a Sub-Fund.

Investors should refer to the risk factor headed "Mainland China market risks" in the section headed "Sub-Fund specific risks" for further risk disclosures in mainland China taxation.

APPENDIX 1 – SUB-FUND DETAILS

HSBC Asia High Income Bond Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Base Currency

USD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to invest in fixed income securities which provide higher yield compared to their peers and the potential for capital appreciation over the medium to long term.

Investment policy

A minimum of 70% of the Sub-Fund's net asset value will be invested in a diversified portfolio of fixed income securities issued or guaranteed by government, government agencies or supranational bodies in Asia, or issued by companies which are domiciled in, based in or carry out the larger part of their business in Asia.

The Sub-Fund's primary currency exposure is to the US dollar through, including but not limited to, direct holding of fixed income securities, use of financial derivative instruments (e.g. FX forwards), cash and/or deposits. The Sub-Fund may also have exposure to non-US dollar currencies including Asian currencies (up to 30% of its net asset value) through, including but not limited to, direct holding of fixed income securities, use of financial derivative instruments (e.g. FX forwards), cash and/or deposits.

For the avoidance of doubt, the Sub-Fund may only invest up to 10% of its net asset value in cash, deposits or money market instruments for liquidity purposes.

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. Investment grade fixed income securities are rated at least Baa3 / BBB- by Moody's, Standard & Poor's, or any other internationally recognised credit rating agency.

The aggregate investment in securities that are:-

1. rated below investment grade as defined above;
2. rated AA or below (in case where the credit rating is designated / assigned by a mainland China local credit rating agency); or
3. unrated (i.e. a bond for which neither the bond itself nor its issuer has a credit rating)

is up to 45% of the Sub-Fund's net asset value.

The Sub-Fund may invest up to 20% of its net asset value in bonds traded on the CIBM in mainland China via the CIBM Initiative and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Sub-Fund may also invest in offshore fixed income securities denominated in any currencies and issued outside of mainland China by mainland China government or mainland China companies.

The Sub-Fund will not invest more than 10% of its net asset value in debt securities issued and / or guaranteed by any single sovereign issuer (including its government, public or local authority) which is below investment grade (by an internationally recognised credit rating agency).

The Sub-Fund may invest up to 10% of its net asset value in convertible bonds (excluding contingent convertible securities).

The Sub-Fund may invest less than 30% of its net asset value in debt instruments with loss-absorption features (e.g. contingent convertible debt securities). The Sub-Fund may invest up to 10% of its net asset value in contingent convertible securities; however such investment is not expected to exceed 5%.

The Sub-Fund may also invest up to 10% of its net asset value in collateralised and/or securities products such as asset backed securities, mortgage backed securities and asset backed commercial papers.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Investors should note the following: (a) the reference to "high income" in the name of the Sub-Fund is to indicate that the Sub-Fund aims to invest in fixed income securities which provide higher yield compared to their peers; (b) it does

not indicate that investors will receive a high level of income or otherwise; (c) this strategy does not mean that the Sub-Fund itself will make distributions in all circumstances; (d) the reference to “high income” is not indicative of the Sub-Fund’s performance or returns; (e) the Sub-Fund does not have any guarantees; and (f) the Sub-Fund may not achieve such a desired result under all circumstances and/or market conditions.

Investment strategy

The Manager’s investment process combines qualitative top down analysis of macroeconomic and market dynamics, with structured bottom up research into individual bond issuers and fixed income securities. In order to achieve the objective of investing in fixed income securities which generate higher yield compared with their peers, the Manager aims to invest in fixed income securities which provide higher yield compared to bonds of the same type or in the same category.

Reference performance benchmark

65% J.P. Morgan Asia Credit Investment Grade Index; and
35% J.P. Morgan Asia Credit Non-Investment Grade Index

Management fee and trustee fee

| Class of Units | A | I | Z |
|---------------------------|----------|----------|----------|
| Management fee (%) | 1.15 | 0.575 | 0.00 |
| Trustee fee (%) | 0.07 | 0.07 | 0.07 |

Each Class may incur additional fees and expenses which are not disclosed in the above table. Further details are provided in the “Charges and expenses” section.

Applicable risks

- All risks described in full in the “General risks” section.
- All risks described in full in the “Fixed income risks”, “Derivatives risks”, “Risks relating to Securities Lending transactions” and “Collateral management and re-investment of cash collateral risks” sub-sections in the “Asset class risks” section.
- The following risks described in full in the “Sub-Fund specific risks” section:
 - Concentration risks
 - Emerging and less developed markets securities risks
 - Mainland China market risks
 - RMB currency risks
 - China Interbank Bond Market risks
 - Convertible bonds risks
 - Risks associated with investments in debt instruments with loss-absorption features
 - Sovereign debt risks
 - Collateralised and/or securitised products risks (such as asset-backed securities and mortgage-backed securities)

Suitability

The Manager considers the Sub-Fund to be a “non-complex” product. The Sub-Fund may be suitable for investor types that can afford the risks involved, including retail investors (subject to each investor’s individual circumstances) with a medium to long term investment horizon.

Investors should consult an authorised distributor of the Sub-Fund to determine if the Sub-Fund is suitable for their individual circumstances. Potential investors should review this Explanatory Memorandum in its entirety prior to making a decision to invest.

HSBC China Multi-Asset Income Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Base Currency

HKD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide income and moderate capital growth, through an active asset allocation in a diversified portfolio of a minimum of 70% of its net asset value in fixed income and equity securities as well as money market and cash instruments that are related to mainland China.

Investment policy

For the equity portion of the Sub-Fund, the Sub-Fund seeks to invest in China A-shares and B-shares listed on stock exchanges in mainland China, H-shares listed on The Hong Kong Stock Exchange (“**SEHK**”) and other mainland China-related shares or securities listed on the above exchanges as well as on other exchanges outside mainland China, Hong Kong and Macau (“other mainland China-related listed securities”). For other mainland China-related listed securities, the Sub-Fund will invest in securities of companies which carry out or possess a preponderant part of their business activities in or are related to mainland China.

The Sub-Fund may directly invest up to 80% of its net asset value in China A-shares through the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect (collectively, the “**Stock Connect**”) and up to 30% of its net asset value in China A-shares access products (CAAPs) including equity linked notes and other similar equity linked securities and instruments issued by institutions that have obtained the QFI status. The Sub-Fund's exposure to China A-Shares (through the Stock Connect or CAAPs), B-Shares, H-Shares and other mainland China-related listed securities will be at least 20% but not more than 80% of its net asset value.

There are no capitalisation restrictions for stocks in which the Sub-Fund may invest, and the Sub-Fund will normally invest across a range of market capitalisation.

The Sub-Fund will invest up to 80% of its Net Asset Value in offshore mainland China fixed income securities (including but not limited to bonds and notes) as well as money market instruments. The Sub-Fund currently may invest in instruments denominated and/or settled in RMB or other currencies including but not limited to USD / HKD, such as fixed income or debt instruments issued or guaranteed by the government or government agencies of mainland China and companies which have their registered office in mainland China or which carry out a preponderant part of their business activities in mainland China, and RMB denominated and/or settled fixed income or debt instruments issued or guaranteed by other governments, government agencies and companies. These fixed income or debt instruments include, but are not limited to, corporate bonds, government bonds, commercial papers, medium term notes, floating rate notes, bankers acceptances, money market instruments, certificates of deposits, bank deposits and negotiated term deposits issued, distributed or dealt outside mainland China. The Sub-Fund may also invest in convertible bonds issued, distributed or dealt outside mainland China.

The Sub-Fund may also invest up to 80% of its net asset value in onshore mainland China fixed income securities denominated in RMB, issued within mainland China and traded on the China Interbank Bond Market (“CIBM”) through Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Sub-Fund may invest up to 30% of its net asset value in urban investment bonds. Urban investment bonds are debt instruments issued by local government financing vehicles (“LGFVs”) and traded in the CIBM and the listed bond markets in mainland China. These LGFVs are separate legal entities established by local governments and / or their affiliates to raise financing for local development, public welfare investment and infrastructure projects.

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. Investment grade fixed income securities are rated at least Baa3 by Moody's or BBB- by Standard & Poor's or equivalent by any other internationally recognised credit rating agency.

The aggregate investment in securities that are:-

1. rated below investment grade as defined above;
2. rated AA or below (in the case where the credit rating is designated / assigned by a mainland China local credit rating agency); or
3. unrated (i.e. a bond for which neither the bond itself nor its issuer has a credit rating),

is up to 50% of the Sub-Fund's net asset value.

The Sub-Fund may invest in asset-backed securities (including asset-backed commercial papers) for up to 10% of its net asset value.

The Sub-Fund may invest less than 30% of its net asset value in debt instruments with loss-absorption features (e.g. contingent convertible debt securities). The Sub-Fund may invest up to 10% of its net asset value in offshore contingent convertible securities; however such investment is not expected to exceed 5%.

The Sub-Fund may invest up to 100% of its net asset value in units or shares of other mainland China related Underlying Funds authorised by the SFC (including other sub-fund(s) of the Fund), for example QFI Underlying Funds authorised by the SFC, or eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time) whether authorised by the SFC or not, except that not more than 10% of its net assets may be invested in non-eligible schemes not authorised by the SFC. Investment in QFI Underlying Funds will be up to 30% of the Sub-Fund's net asset value. The Sub-Fund will not invest in securities investment funds that are offered within mainland China.

The Sub-Fund may invest less than 20% of its net asset value in Underlying Funds which may use financial derivative instruments extensively for investment purposes.

The Sub-Fund may invest up to 10% of its net asset value in commodities, mainly through exchange-traded commodities securities, Underlying Funds and/or financial derivative instruments such as derivatives on commodities. The Sub-Fund will not invest directly in commodities.

The Sub-Fund may invest up to 10% of its net asset value in liquid alternative investment strategies, mainly through Underlying funds.

The Sub-Fund may invest in cash, deposits and money market instruments for liquidity purposes. The asset allocation may change over time depending on the Manager's view on market opportunities.

The Sub-Fund will normally be exposed to RMB, HKD and USD. Depending on the asset allocation of the Manager, the Sub-Fund's exposure to different currencies may vary over time, and it may from time to time have substantial exposure to RMB denominated assets.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

Save as mentioned above, the Sub-Fund will not invest in other structured deposits or products.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Indicative allocation and classification of the Sub-Fund's investment:

| Type of Asset Classes* | Indicative percentage (as a percentage of the Sub-Fund's net asset value) |
|--|--|
| mainland China related equities (comprising one or more of the following): | 20 - 80% |
| <ul style="list-style-type: none"> China A-shares B-shares H-shares and other mainland China-related listed securities | |
| mainland China related offshore fixed income instruments including bonds, money market instruments, convertible bonds, other fixed income instruments denominated in RMB and other currencies and cash | 0 - 80% |
| Onshore mainland China fixed income securities denominated in RMB, issued within mainland China and traded on the China Interbank Bond Market | 0 - 80% |
| Onshore urban investment bonds | 0 - 30% |
| mainland China related Underlying Funds authorised by the SFC or eligible schemes (the list of 'eligible schemes' is as specified by the SFC from time to time) | 0 - 100% |
| Non-mainland China related equities and fixed income instruments including bonds, money market instruments and convertible bonds denominated in RMB and other currencies | 0 - 30% |
| Asset-backed securities | 0 - 10% |
| Commodities, mainly through exchange-traded commodities securities, Underlying Funds and/or financial derivative instruments such as derivatives on commodities | 0 - 10% |
| Underlying Funds which adopt liquid alternative investment strategies | 0 - 10% |
| Debt instruments with loss-absorption features (including offshore contingent convertible securities in which the Sub-Fund may invest up to 10%) | Less than 30% |

* Exposure to mainland China related equities, mainland China related fixed income instruments and asset-backed securities may be achieved through direct investments and/or investment in units or shares or Underlying Funds.

Investment strategy

The Manager's approach is to carefully forecast long term expected returns for the different asset classes, and use these to decide the Sub-Fund's asset allocation, favouring assets with the best long term expected returns.

Risk also needs to be taken into account, and this will affect the asset mix chosen for the Sub-Fund. The Manager assesses risk using long term volatilities and correlations between asset classes. Then it uses these to forecast what the portfolio volatility will be for any asset allocation, so that the allocation fits with the Sub-Fund's risk tolerance.

The assumptions underlying the expected returns are reviewed continuously to ensure they remain the Manager's best estimates for the future.

HSBC European Multi-Asset Income Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Sub-Investment Adviser

HSBC Global Asset Management (France)

Sub-Delegate

HSBC Global Asset Management (Deutschland) GmbH

Base Currency

EUR

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide income and moderate capital growth through a diversified portfolio of European equities, fixed income securities as well as money market instruments, cash instruments and Underlying Funds that invest in European securities.

Investment policy

European securities are issued by companies which have their registered office in, and with an official listing on a major stock exchange or other regulated market of any European countries. Whilst there are no capitalization restrictions, it is anticipated that the Sub-Fund will seek to invest primarily in larger, established companies. The Sub-Fund is not subject to any limitation on the portion of its net asset value that may be invested in any one country.

The Sub-Fund may invest, directly or indirectly through Underlying Funds, at least 70% of its net asset value in European fixed income instruments and/or European equity securities, particularly those that offer above average income and/or the potential for sustainable income growth.

The Sub-Fund may invest up to 50% of its net asset value in units or shares of other Europe related Underlying Funds authorised by the SFC, or in eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time) whether authorised by the SFC or not, provided that investment in any one of such schemes may not exceed 30% of the Sub-Fund's net asset value. The Sub-Fund may also invest not more than 10% of its net assets in non-eligible schemes not authorised by the SFC.

The Sub-Fund may invest in asset-backed securities (including asset-backed commercial papers) for up to 10% of its net asset value.

The Sub-Fund will not invest more than 10% of its net assets value in convertible bonds.

The Sub-Fund may invest less than 30% of its net asset value in debt instruments with loss-absorption features (e.g. contingent convertible debt securities). The Sub-Fund may invest up to 10% of its net assets in contingent convertible securities; however such investment is not expected to exceed 5%.

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold, directly or indirectly. It may also invest in unrated securities (i.e. securities for which no credit rating is assigned by any internationally recognised credit rating agency). The aggregate investment in securities that are (i) unrated; or (ii) rated non-investment grade by an internationally recognised credit rating agency (i.e. rated below Baa3 by Moody's or BBB- by Standard & Poor's or equivalent by a rating agency) is up to 20% of the Sub-Fund's net asset value. The Sub-Fund does not contemplate to invest more than 10% of its net asset value in securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated non-investment grade (by an internationally recognised credit rating agency).

The Sub-Fund may invest up to 10% of its net assets in real estate investment trusts ("**REITs**").

Up to 10% of the Sub-Fund's net asset value may be invested in cash, deposits or money market instruments for liquidity purposes.

The Sub Fund may be exposed to non Euro currency exposures up to 35% of the portfolio net asset value.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Indicative allocation and classification of the Sub-Fund's investment:

| Type of Asset Classes* | Indicative percentage (as a percentage of the Sub-Fund's net asset value) |
|---|--|
| European equities | 0 – 70% |
| European fixed income instruments | 0 – 70% |
| Europe related Underlying Funds authorised by the SFC or eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time) | 0 – 50% |
| Asset-backed securities | 0 – 10% |
| Convertible bonds | 0 – 10% |
| Debt instruments with loss-absorption features (including contingent convertible securities in which the Sub-Fund may invest up to 10%) | Less than 30% |
| REITs | 0 – 10% |
| Cash, deposits and money market instruments | 0 – 10% |

* Exposure to European equities, European fixed income instruments and asset-backed securities may be achieved through direct investments and/or investment in units or shares of Underlying Funds.

By currency exposure

| | |
|---------------------------|------------|
| Euro | 65% - 100% |
| Other non-euro currencies | 0 - 35% |

Investment strategy

To maximize the Sub-Fund's risk-adjusted yield and total return, the Manager allocates the Sub-Fund's assets across different income oriented assets. Exposure to each asset class is determined based on its level of expected yield premium (i.e. its yield above cash rate), risk and liquidity. In principle, the higher the risk-adjusted yield premium, the higher the exposure to such asset classes.

Asset allocation varies over market cycles as both the yield and risks of different asset classes evolve. The Sub-Fund remains diversified among different asset classes to maintain a balance between risk, return and income. Within each asset class, the Investment Adviser seeks to add further value through security selection.

The Manager may also employ investment strategies using financial derivative instruments to enhance return and/or income including, but not limited to, writing (selling) call options on selected equities held by the Sub-Fund ("Covered Call Options") or indices of equities that the Sub-Fund is exposed to.

Reference performance benchmark

Suitability

The Manager considers the Sub-Fund to be a “non-complex” product. The Sub-Fund may be suitable for investor types that can afford the risks involved, including retail investors (subject to each investor’s individual circumstances) with a medium to long term investment horizon.

Investors should consult an authorised distributor of the Sub-Fund to determine if the Sub-Fund is suitable for their individual circumstances. Potential investors should review this Explanatory Memorandum in its entirety prior to making a decision to invest.

HSBC All China Bond Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Base Currency

RMB

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to invest for total return (i.e. via both income and capital appreciation), through investments primarily in a portfolio of onshore and offshore mainland Chinese fixed income securities.

The Sub-Fund invests primarily in fixed income securities including:

- offshore fixed income securities denominated in any currencies and issued outside mainland China by the mainland China government or mainland China companies;
- offshore RMB denominated fixed income securities issued outside mainland China by non-mainland China entities;
- onshore fixed income securities denominated in RMB, issued within mainland China and traded on the China Interbank Bond Market ("CIBM") through Bond Connect, the QFI status of the Investment Adviser and/or other means as may be permitted by the relevant regulations from time to time;
- onshore exchange traded fixed income securities issued within mainland China and traded on the stock exchanges in mainland China through the QFI status of the Investment Adviser.

Investment policy

The Sub-Fund may invest up to 100% of its net asset value in offshore fixed income and other similar securities (including, but not limited to, bonds and certificate of deposits) which are either issued or guaranteed by governments, government agencies and supranational bodies or by companies.

The Sub-Fund may invest up to 100% of its net asset value in onshore fixed income securities traded on the CIBM and / or the stock exchanges in mainland China (for example, bonds issued by the mainland China central government, quasi-central government organisations and central government agencies in mainland China and supranational bodies, municipal and local governments, companies and policy banks and urban investment bonds). Urban Investment Bonds are debt instruments issued by local government financing vehicles ("LGFVs") and traded in the CIBM and the listed bond markets in mainland China. These LGFVs are separate legal entities established by local governments and/or their affiliates to raise financing for local development, public welfare investment and infrastructure projects.

The Sub-Fund may invest in convertible bonds in the offshore and onshore markets for up to 10% of its net asset value.

The Sub-Fund may invest less than 30% of its net asset value in debt instruments with loss-absorption features (e.g. contingent convertible debt securities). The Sub-Fund may invest up to 10% of its net asset value in contingent convertible securities; however such investment is not expected to exceed 5%.

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. Investment grade fixed income securities are rated at least Baa3 / BBB- by Moody's, Standard & Poor's, or any other internationally recognised credit rating agency.

The aggregate investment in securities that are:-

1. rated below investment grade as defined above;
2. rated AA or below (in case where the credit rating is designated / assigned by a mainland China local credit rating agency); or
3. unrated (i.e. a bond for which neither the bond itself nor its issuer has a credit rating.)

is up to 45% of the Sub-Fund's net asset value.

Notwithstanding the foregoing, the Sub-Fund will not invest more than 10% of its net asset value in the onshore securities which are rated AA or below (assigned by a mainland China local credit rating agency) or unrated.

The Sub-Fund may also invest in Underlying Funds (including but not limited to the Underlying Funds which are authorised by the CSRC for investment by the retail public in mainland China) which primarily invest in fixed income securities or money market instruments, including exchange traded funds. Such investment will not in aggregate exceed 10% of the Sub-Fund's net asset value.

The Sub-Fund's primary currency exposure is to the RMB but may also have exposure to non-RMB currencies through direct holding of fixed income securities, cash and/or deposits. The Manager will hedge back such non-RMB positions so that the non-RMB exposure of the Sub-Fund will be up to 30% of its net asset value. For the avoidance of doubt, the Sub-Fund may also invest up to 10% of its net asset value in cash, money market instruments and bank deposits within or outside mainland China for liquidity purposes.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund will not invest in equity securities.

The Sub-Fund will not acquire any asset backed securities including asset backed commercial papers.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Indicative allocation and classification of the Sub-Fund's investment:

| By type of instrument | Indicative percentage (as a percentage of the Sub-Fund's net asset value) |
|---|--|
| Onshore fixed income securities including: | 0 - 100% |
| (i) municipal / local government bonds | |
| (ii) corporate and enterprises bonds | |
| (iii) policy bank bonds | |
| (iv) fixed income securities issued or guaranteed by the mainland China central government, quasi-central government organizations and central government agencies in mainland China and supranational bodies | |
| Onshore Urban Investment Bonds | 0 - 100% |
| Offshore fixed income securities issued by the mainland China government or mainland China companies | 0 - 100% |
| Offshore RMB denominated fixed income securities by non-mainland China entities | 0 - 100% |
| Convertible bonds (onshore or offshore) | 0 - 10% |
| Debt instruments with loss-absorption features (including contingent convertible securities in which the Sub-Fund may invest up to 10%) | Less than 30% |
| Underlying Funds authorised by the CSRC for investment by the retail public in mainland China or other eligible offshore Underlying Funds | 0 - 10% |
| Cash, money market instruments and bank deposits (onshore or offshore) for liquidity purposes | 0 - 10% |
| By currency exposure | |
| RMB | 70 - 100% |
| USD, HKD or other currencies | 0 - 30% |

Investment strategy

The Manager seeks to achieve investment returns through active management of duration, term structure, sector allocation and credit selection where applicable:

- **Duration strategy**

The Sub-Fund will adjust the duration risk profile of the investment portfolio based on expectations of global and mainland China's economic cycle, fiscal policy and monetary policy. For example, if RMB bond yield is expected to fall, the Sub-Fund may increase the average duration of the investment portfolio with an aim to take advantage of the capital gain potential from lower yield, and vice versa.

- **Term structure strategy**

The Sub-Fund will adjust the allocation of short-term, medium-term and long-term securities based on the expected changes in the shape of the RMB yield curve term structure. The Sub-Fund may adopt, based on the expected changes in the shape of the RMB yield curve term structure, bullet-type (an investment strategy that involves purchasing a number of bonds and debt securities with similar maturity dates), barbell-type (an investment strategy that involves purchasing both short-term and long-term but not intermediate-term bonds and debt securities) or ladder-type (an investment strategy that involves allocating the portfolio evenly among bonds and debt securities that mature at regular intervals) strategy. The choices of strategy may be adjusted dynamically.

- **Sector allocation strategy**

The Sub-Fund will adjust the allocation of investment among different sectors (such as governments, government agencies, local government, quasi-government organizations, supra-national organizations, multinational organizations, financial institutions and other corporations; and private sector issuers of different industry and sector background) with an aim to seek better tax-adjusted and risk-adjusted returns.

- *Credit selection strategy*

Through extensive research on the fundamentals of different issuers, the Sub-Fund seeks to invest in issues that offer expected excess return with regard to credit ratings and fundamentals. The Sub-Fund, however, does not have explicit restrictions on the minimum credit ratings of the investments it holds and may invest substantially in lower rated and unrated instruments.

- *Strategy in relation to Urban Investment Bonds issued by Local Government Financing Vehicles (LGFVs)*

The Manager adopts a top-down approach by considering (1) the geographical region's economic strength, (2) the LGFV's credit quality and (3) the LGFV's financial position. The Manager then selects an individual LGFV bonds by applying qualitative and quantitative methods.

Firstly, the Manager will analyse the targeted geographical regions and look at the financial, economic and debt situations of the relevant local governments.

Secondly, the Manager examines the individual LGFV bonds' quality and characteristics and studies the business in which the LGFV is engaged. Further, a LGFV will be assessed on its own business characteristics (e.g. uniqueness and exclusivity of its business).

Quantitatively, the Manager looks at the issuer's financial situation and other quantitative factors, e.g. financial indicators relating to solvency and scale.

Investment in securities of LGFV carries a degree of risk. Investor should refer to the disclosures under the heading "Urban Investment Bonds risks" in the "Sub-Fund specific risks" section.

QFI overview

The following disclosures applies to investments through QFI:

QFI Holder

The Investment Adviser (i.e. HSBC Global Asset Management (Hong Kong) Limited) will assume dual roles as discretionary investment adviser of the Sub-Fund and the holder of QFI status ('**QFI Holder**') for the Sub-Fund. The Investment Adviser will be responsible for ensuring that all transactions and dealings will be dealt with in compliance with the Trust Deed (where applicable) as well as the relevant laws and regulations applicable to the Investment Adviser as a QFI. If any conflicts of interest arise, the Investment Adviser will have regard in such event to its obligations to the Sub-Fund and will endeavour to ensure that such conflicts are resolved fairly.

QFI Custodian

Bank of Communications Co., Ltd.

Address: Bank of Communications Co., Ltd., 188, Yin Cheng Zhong Road Shanghai 200120, The People's Republic of China

The Investment Adviser, in its capacity as QFI Holder, has appointed Bank of Communications Co., Ltd. as the QFI Custodian in respect of the Sub-Fund's assets in mainland China pursuant to relevant laws and regulations.

Bank of Communications Co., Ltd. founded in 1908, is a joint stock company incorporated in mainland China with limited liability and is a licensed bank in mainland China. It was listed on the Hong Kong Stock Exchange in June 2005 and on the Shanghai Stock Exchange in May 2007. Bank of Communications Co., Ltd. has set up various regional/overseas institutions, comprising of branches in Hong Kong, New York, London, Tokyo, Singapore, Taipei, Seoul, Frankfurt, Macau and Ho Chi Minh City and Sydney. Bank of Communications Co., Ltd. has extensive experience in custody of different kinds of financial products, and being the primary and/or secondary custodian for various large securities firms and fund houses in mainland China and other regions/countries.

QFI regime

Under the prevailing QFI regulations in mainland China, foreign institutional investors who wish to invest directly in the mainland China domestic securities market may apply for a QFI licence. The Investment Adviser has obtained a QFI licence in mainland China. Currently, it is intended that the Sub-Fund will obtain exposure to securities and instruments issued within mainland China by using the QFI status of the Investment Adviser.

The QFI regime is governed by rules and regulations as promulgated by the relevant authorities in mainland China, i.e., the CSRC, the SAFE and the PBOC. Such rules and regulations may be amended from time to time and include (but are not limited to):

- (i) The Measures for the Administration of Domestic Securities and Futures Investment by Qualified Foreign Institutional Investors and RMB Qualified Foreign Institutional Investors jointly issued by the CSRC, the PBOC and the SAFE on 25 September 2020 and effective from 1 November 2020 (《合格境外機構投資者和人民幣合格境外機構投資者境內證券期貨投資管理辦法》);
- (ii) the Provisions on Issues Concerning the Implementation of the Measures for the Administration of Domestic Securities and Futures Investment by Qualified Foreign Institutional Investors and RMB Qualified Foreign Institutional Investors jointly issued by the CSRC, the PBOC and the SAFE on 25 September 2020 and effective from 1 November 2020 (關於實施《合格境外機構投資者和人民幣合格境外機構投資者境內證券期貨投資管理辦法》有關問題的規定);

- (iii) the “Regulations on Funds of Securities and Futures Investment by Foreign Institutional Investors” issued by the PBOC and the SAFE on 7 May 2020 and effective from 6 June 2020 (《境外機構投資者境內證券期貨投資資金管理規定》); and
- (iv) other applicable regulations promulgated by the relevant authorities.

The Sub-Fund may invest in fixed income securities traded on the CIBM and the exchange markets in mainland China. Where such securities are acquired via QFI, they will be maintained by the QFI Custodian pursuant to mainland China regulations through securities account(s) with the China Securities Depository and Clearing Corporation Limited (“CSDCCL”) and/or the China Central Depository & Clearing Co. Ltd (“CCDC”) and/or the Shanghai Clearing House Co., Ltd. and such other relevant depositories in such name as may be permitted or required in accordance with mainland China law. For the Sub-Fund’s investment in securities investment funds (i.e. Underlying Funds authorised by the CSRC for investment by the retail public in mainland China), the QFI Custodian will open and maintain accounts with the relevant fund management companies in mainland China in accordance with mainland China law. The accounts with the relevant fund management companies will be opened in the joint names of the Investment Adviser (as QFI Holder) and the Sub-Fund and to the order of the Trustee. The holdings in such securities investment funds will be registered by the fund management companies (or such other service providers appointed by the fund management companies) as required by the mainland China Securities Investment Funds Law.

Investors should pay attention to the sections headed “QFI risks” under the “Sub-Fund specific risks” section for risks associated with investment in the QFI regime.

On behalf of the Sub-Fund, the Manager has obtained a legal opinion from mainland China legal counsel to the effect that, as a matter of mainland China laws:

- (a) securities account(s) with the relevant depositories and RMB special deposit account(s) with the QFI Custodian (respectively, the “securities account(s)” and the “cash account(s)”) shall be opened in the joint names of the Investment Adviser (as QFI Holder) and the Sub-Fund for the sole benefit and use of the Sub-Fund in accordance with all applicable laws and regulations of mainland China and with approval from all competent authorities in mainland China;
- (b) the assets held/credited in the securities account(s) (i) belong solely to the Sub-Fund, and (ii) are segregated and independent from the proprietary assets of the Manager, the Investment Adviser (as QFI Holder), the QFI Custodian and any mainland China Broker(s) and from the assets of other clients of the Manager, the Investment Adviser (as QFI Holder), the QFI Custodian and any mainland China Broker(s);
- (c) the assets held/credited in the cash account(s) (i) become an unsecured debt owing from the QFI Custodian to the Sub-Fund, and (ii) are segregated and independent from the proprietary assets of the Manager, the Investment Adviser (as QFI Holder) and any mainland China Broker(s), and from the assets of other clients of the Manager, the Investment Adviser (as QFI Holder) and any mainland China Broker(s);
- (d) the Trustee, for and on behalf of the Sub-Fund is the only entity which has a valid claim of ownership over the assets in the securities account(s) and the debt in the amount deposited in the cash account(s) of the Sub-Fund;
- (e) if the Manager, the Investment Adviser or any mainland China Broker is liquidated, the assets contained in the securities account(s) and cash account(s) of the Sub-Fund will not form part of the liquidation assets of the Manager, the Investment Adviser or such mainland China Broker(s) in liquidation in mainland China; and
- (f) if the QFI Custodian is liquidated, (i) the assets contained in the securities account(s) of the Sub-Fund will not form part of the liquidation assets of the QFI Custodian in liquidation in mainland China, and (ii) the assets contained in the cash account(s) of the Sub-Fund will form part of the liquidation assets of the QFI Custodian in liquidation in mainland China and the Sub-Fund will become an unsecured creditor for the amount deposited in the cash account(s).

The mainland China Securities Investment Funds Law stipulates that the assets of a securities investment fund (including the cash and securities held under the custody of the relevant fund custodian) are independent of the assets of the fund management company and the fund custodian, and accordingly such assets do not form part of the liquidation assets of the fund management company and the fund custodian.

Pursuant to the participation agreement between the QFI Custodian, the Manager, the Investment Adviser (as the QFI Holder) and the Trustee, as may be amended from time to time, referred to hereafter as the “Participation Agreement”) and in respect of the Sub-Fund which invests directly into the securities markets in mainland China pursuant to the QFI regime, the Trustee has put in place proper arrangements to ensure that:

- (i) the Trustee takes into its custody or under its control the assets of the Sub-Fund, including onshore mainland China assets of the Sub-Fund acquired by the Sub-Fund through the QFI status of the Investment Adviser (as the QFI Holder) and such mainland China assets will be maintained by the QFI Custodian in electronic form via a securities account(s) with the CSDCCL, the CCDC and the Shanghai Clearing House Co. Ltd.; interests in securities investment funds will be registered in account(s) opened and maintained by the QFI Custodian with securities investment fund management companies in mainland China and/or with the CSDCCL (as the case may be) and cash will be held in cash account(s) with the QFI Custodian (“**Onshore mainland China Assets**”); and the Trustee holds the assets of the Sub-Fund in trust for the Unitholders;
- (ii) cash and registrable assets of the Sub-Fund, including Onshore mainland China Assets are registered in the name of or held to the order of the Trustee; and

- (iii) the QFI Custodian will look to the Trustee for instructions and solely act in accordance with such instructions as provided under the Participation Agreement, save as otherwise required under applicable regulations.

Management fee and Trustee fee

| Class of Units | A | I | Z |
|---------------------------|-------------------|--------------------|----------|
| Management fee (%) | 1.10 [^] | 0.55 ^{^^} | 0.00 |
| Trustee fee* (%) | 0.07 | 0.07 | 0.07 |

[^] The management fee applicable to Class A is temporarily reduced to 0.75% for the period from 21 February 2020 to 20 February 2021 and 0.95% for the period from 21 February 2021 to 20 February 2022.

^{^^} The management fee applicable to Class I is temporarily reduced to 0.30% for the period from 21 February 2020 to 20 February 2021 and 0.475% for the period from 21 February 2021 to 20 February 2022.

* The above Trustee Fee does not include the fees payable to the QFI Custodian. These fees charged by the QFI Custodian (inclusive of a custody fee and transaction charges at customary market rates) will be paid by the Sub-Fund directly. The QFI Custodian will also be entitled to reimbursement by the Sub-Fund for any out-of-pocket expenses incurred in the course of its duties wholly and exclusively in respect of the Sub-Fund.

Each Class may incur additional fees and expenses which are not disclosed in the above table. Further details are provided in the "Charges and expenses" section.

Applicable Risks

- All risks described in full in the "General risks" section.
- All risks described in full in the "Fixed income risks", the "Derivatives risks", "Risks relating to Securities Lending transactions" and "Collateral management and re-investment of cash collateral risks" sub-sections in the "Asset class risks" section.
- The following risks described in full in the "Sub-Fund specific risks" section:
 - Concentration risks
 - Emerging and less developed markets securities risks
 - Mainland China market risks
 - RMB currency risks
 - China Interbank Bond Market risks
 - Convertible bonds risks
 - Risks associated with investments in debt instruments with loss-absorption features
 - Sovereign debt risks
 - QFI risks
 - Urban Investment Bonds risks
 - "Dim Sum" bond risks

Suitability

The Manager considers the Sub-Fund to be a "non-complex" product. The Sub-Fund may be suitable for investor types that can afford the risks involved, including retail investors (subject to each investor's individual circumstances) with a medium to long term investment horizon.

Investors should consult an authorised distributor of the Sub-Fund to determine if the Sub-Fund is suitable for their individual circumstances. Potential investors should review this Explanatory Memorandum in its entirety prior to making a decision to invest.

Base Currency

USD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide income through investment in a diversified portfolio of equities, fixed income securities, money market and cash instruments and other instruments that are related to the Asia Pacific region.

Investment policy

In normal market conditions a minimum of 70% of the Sub-Fund's net asset value will be invested (directly and/or indirectly through financial derivative instruments and/or investment in Underlying Funds) in equities (including REITs) and equity equivalent securities (including, but not limited to, American Depositary Receipts, Global Depositary Receipts and financial derivative instruments used for market access or exposure replication purposes), fixed income securities, money market and cash instruments and other instruments, such as convertible bonds, asset backed securities, asset-backed commercial papers and mortgage backed securities, related to the Asia Pacific region. The Sub-Fund may invest its remaining net asset value in assets similar to the aforementioned but which are unrelated to the Asia Pacific region.

The Sub-Fund does not have explicit restrictions on currency exposure and will be exposed to currencies of the Asia Pacific region as well as other emerging and developed market currencies.

The Sub-Fund invests in equities and equity equivalent securities of companies which are domiciled in, based in, or carry out the larger part of their business activities in the Asia Pacific region. The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction.

The Sub-Fund may invest in the onshore mainland China equity market by (a) investing in China A-Shares directly through Stock Connect; (b) investing in China A-Shares indirectly through CAAPs; and/or (c) investing in China B-shares directly on stock exchanges in mainland China. When investing in CAAPs, the Sub-Fund will not invest more than 10% of its net asset value in CAAPs issued by any single issuer of CAAPs.

The Sub-Fund may also invest in shares and securities of companies which are listed on exchanges or traded outside of mainland China and which carry out a preponderant part of their business activities in, or are related to, mainland China (e.g. H shares listed on the Hong Kong Stock Exchange, American Depositary Receipts listed or traded in the US, etc).

The Sub-Fund may invest less than 30% of its net asset value in listed/unlisted REITs.

The Sub-Fund invests in investment grade rated, non-investment grade rated and unrated fixed income (e.g. bonds) and other similar securities either issued by companies which are domiciled in, based in or carry out the larger part of their business activities in the Asia Pacific region, or which are issued or guaranteed by governments, government agencies or supranational bodies in the Asia Pacific region.

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. Investment grade fixed income securities are rated at least Baa3 / BBB- by Moody's, Standard & Poor's or any other internationally recognised credit rating agency.

The aggregate investment in securities that are:-

1. rated below investment grade as defined above;
2. rated AA or below (in case where the credit rating is designated / assigned by a mainland China local credit rating agency); or
3. unrated (i.e. a bond for which neither the bond itself nor its issuer has a credit rating)

will be less than 30% of the Sub-Fund's net asset value.

The Sub-Fund may invest in onshore mainland China bonds traded on the China Interbank Bond Market ("CIBM") via CIBM Initiative and/or Bond Connect.

The Sub-Fund's total exposure to onshore mainland China securities (including China A-Shares, CAAPs, B-Shares and CIBM) will be less than 20% of its net asset value.

The Sub-Fund will not invest more than 10% of its net asset value in securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated non-investment grade (by an internationally recognised credit rating agency).

The Sub-Fund may invest up to 30% of its net asset value in money market and cash instruments for liquidity purposes.

The Sub-Fund may invest less than 30% of its net asset value in debt instruments with loss-absorption features including, but not limited to, contingent convertible securities; additional tier 1 or tier 2 capital instruments; total loss-absorbing capacity eligible instruments; and certain senior non preferred debt. The Sub-Fund may invest up to 10% of its net asset value in contingent convertible securities; however such investment is not expected to exceed 5%.

The Sub-Fund may invest less than 30% of its net asset value in convertible bonds (excluding contingent convertible securities).

The Sub-Fund may invest less than 30% of its net asset value in collateralised and/or securitised products such as asset backed securities, asset-backed commercial papers and mortgage backed securities.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund may invest up to 30% of its net asset value in units or shares of Underlying Funds which are authorised by the SFC or eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time which includes, but is not limited to, schemes domiciled in Luxembourg, Ireland and the United Kingdom) whether authorised by the SFC or not. The Sub-Fund may also invest not more than 10% of its net asset value in non-eligible schemes not authorised by the SFC. The Sub-Fund will invest in HSBC sponsored and/or managed Underlying Funds unless an appropriate fund is not available.

The Sub-Fund may invest less than 20% of its net asset value in Underlying Funds which may use financial derivative instruments extensively for investment purposes.

The Sub-Fund may invest up to 10% of its net asset value in commodities, mainly through exchange-traded commodities securities, Underlying Funds and/or financial derivative instruments such as derivatives on commodities. The Sub-Fund will not invest directly in commodities.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Investment strategy

The Manager's asset allocation strategy is to forecast long term expected returns and consider the income for the different asset classes, and use these to decide the Sub-Fund's asset allocation, favouring assets with the best income and long term expected returns. The Manager assesses risk using long term volatilities and correlations between asset classes. Then it uses these to forecast what the portfolio volatility will be for any asset allocation, so that the allocation fits with the Sub-Fund's risk tolerance.

The Manager may also employ investment strategies using financial derivative instruments to enhance return and/or income including, but not limited to, writing (selling) call options on selected equities held by the Sub-Fund ("**Covered Call Options**") or indices of equities that the Sub-Fund is exposed to.

Subscriptions

Initial Offer Period

The Initial Offer Period and the expected first Dealing Day of the Classes of Units of the Sub-Fund subject to the Initial Offer Period are available in the Sub-Fund's Product Key Facts Statement when such information is available. If investors have any enquiries about such information, they may contact the Manager or its authorised distributors. Units will be initially issued at 10.000 in the currency of denomination of the class or such other price as determined by the Manager. An initial charge may be deducted from the total subscription amount prior to investment. Further details of the initial charge are given in the section headed "Charges and expenses".

In the event that no subscription applications have been made in respect of any Classes during the Initial Offer Period, the Manager may, at its absolute discretion, offer such Classes of Units after the close of the Initial Offer Period at such prices, which may be denominated in different currencies, as may be determined by the Manager at its absolute discretion.

The Manager reserves the right not to issue any Units and to return the application monies received (without interest and after deduction of out-of-pocket fees and charges incurred by the Manager and the Trustee) to investors no later

than 14 Business Days after the close of the Initial Offer Period if (a) less than USD50 million is raised during the Initial Offer Period, or (b) the Manager is of the opinion that it is not in the commercial interest of investors or not feasible, as a result of adverse market conditions or otherwise, to proceed with the Sub-Fund. In such event application monies shall be returned by telegraphic transfer to the bank account from which the moneys originated at the risk and expense of the applicant or in such other manner as the Manager may from time to time determine. The Sub-Fund shall be deemed not to have commenced.

To subscribe for Units during the Initial Offer Period, investors should further refer to the relevant application and payment procedures set out in detail under the “Subscription” section.

Management fee and trustee fee

| Class of Units | A | I | Z |
|---------------------------|----------|----------|----------|
| Management fee (%) | 1.25 | 0.625 | 0.00 |
| Trustee fee (%) | 0.07 | 0.07 | 0.07 |

Each Class may incur additional fees and expenses which are not disclosed in the above table. Further details are provided in the “Charges and expenses” section.

Applicable risks

HSBC Asia Pacific ex Japan Equity Volatility Focused Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Base Currency

USD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide long term total return by investing in a portfolio of equities.

Investment policy

The Sub-Fund aims to provide long term total return by investing in a portfolio of equities.

The Sub-Fund invests (normally a minimum 90% of its net assets) in equities and equity equivalent securities of companies which have their registered office in, and with an official listing on a major stock exchange or other regulated market of any Asia Pacific region (excluding Japan) as well as companies which carry out a preponderant part of their economic activities in the Asia Pacific region (excluding Japan). The Sub-Fund may invest the remaining assets in money market instruments, cash instruments and cash.

The Sub-Fund aims to deliver lower portfolio volatility relative to the MSCI AC Asia Pacific ex Japan USD Net Index through portfolio optimisation to lower overall portfolio volatility by selecting a combination of lower volatility stocks and higher volatility stocks that are less correlated and thereby diversifying the portfolio. There is no guarantee that such an approach will always produce a portfolio of lower volatility than the relevant index. The Sub-Fund may rely on researches and quantitative analysis to identify individual stock opportunities and corresponding volatilities, as well as intra-stock correlation as part of its portfolio optimisation process.

The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction.

The Sub-Fund will not invest more than 10% of its net assets in convertible bonds.

The Sub-Fund may invest in China A-Shares and B-Shares listed on stock exchanges in mainland China, H-Shares listed on the Hong Kong Stock Exchange ("SEHK") and other mainland China-related shares or securities listed on the above exchanges as well as on other exchanges outside of mainland China, Hong Kong and Macau ("other mainland China-related listed securities"). For other mainland China-related listed securities, the Sub-Fund will invest in securities of companies which carry out or possess a preponderant part of their business activities in or are related to mainland China.

The Sub-Fund may directly access China A-Shares through the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect or indirectly access China A-Shares through China A-Shares Access Products ("CAAPs"). The Sub-Fund's total exposure to China A-Shares and B-Shares will be less than 20% of its net asset value.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

The Sub-Fund will normally be exposed to currencies of Asia Pacific (excluding Japan) as well as other emerging and developed market currencies.

Investment strategy

The Sub-Fund aims to deliver lower portfolio volatility relative to the MSCI AC Asia Pacific ex Japan USD Net Index through portfolio optimisation to lower overall portfolio volatility by selecting a combination of lower volatility stocks and higher volatility stocks that are less correlated and thereby diversifying the portfolio. There is no guarantee that such an approach will always produce a portfolio of lower volatility than the relevant index. The Sub-Fund may rely on market research and quantitative analysis to estimate individual stock volatility and intra-stock correlation as part of its portfolio optimisation process.

Management fee and trustee fee

| Class of Units | A | I | Z |
|---------------------------|----------|----------|----------|
| Management fee (%) | 1.75 | 0.875 | 0.00 |
| Trustee fee (%) | 0.07 | 0.07 | 0.07 |

Each Class may incur additional fees and expenses which are not disclosed in the above table. Further details are provided in the "Charges and expenses" section.

Applicable risks

- All risks described in full in the "General risks" section.
- All risks described in full in the "Equity risks", "Derivatives risks", "Risks relating to Securities Lending transactions" and "Collateral management and re-investment of cash collateral risks" sub-sections in the "Asset class risks" section.
- The following risks described in full in the "Sub-Fund specific risks" section:
 - Concentration risks
 - Emerging and less developed markets securities risks
 - Investment strategy risk: lower volatility
 - Mainland China market risks
 - RMB currency risks
 - China A-shares access products risks
 - China A-shares and B-shares risks
 - Stock Connect risks
 - Risks associated with the ChiNext Board and/or the Science and Technology Innovation Board
 - Convertible bonds risks
 - Real estate risks

Suitability

The Manager considers the Sub-Fund to be a "non-complex" product. The Sub-Fund may be suitable for investor types that can afford the risks involved, including retail investors (subject to each investor's individual circumstances) with a medium to long term investment horizon.

Investors should consult an authorised distributor of the Sub-Fund to determine if the Sub-Fund is suitable for their individual circumstances. Potential investors should review this Explanatory Memorandum in its entirety prior to making a decision to invest.

HSBC Evolving Asia Equity Fund

Investment Adviser

HSBC Global Asset Management (Singapore) Limited

Base Currency

USD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide long term total return by investing in a portfolio of equities.

Investment strategy

The Sub-Fund aims to deliver its investment objective by gaining exposure to companies positioned to benefit from one or more themes (the "Themes"). Such Themes will be derived from three mega trends (aging population, technological innovation and societal change) that have the capacity to change the social, economic and political landscape in the Asia Pacific region (excluding Japan) over the long term.

Themes may be interconnected and may include, but are not limited to, internet of things, medical innovation, digital access etc. Themes are proprietary to HSBC and subject to ongoing research and may change over time as new Themes are identified.

The Investment Adviser aims to identify companies that have exposure to such Themes and will have full discretion to identify such companies using its own analysis and proprietary research. There is no guarantee that the Investment Adviser will always successfully identify companies exposed to the Themes and that such companies will benefit from exposure to the Themes.

Investment policy

The Sub-Fund invests, in normal market conditions, at least 70% of its net asset value in equities (including REITs) and equity equivalent securities (including, but not limited to, American Depositary Receipts, Global Depositary Receipts and financial derivative instruments used for market access or exposure replication purposes) of companies which have their registered office in, or with an official listing on a major stock exchange or other regulated market of, the Asia Pacific region (excluding Japan) as well as companies which carry out a preponderant part of their economic activities in the Asia Pacific region (excluding Japan). The Sub-Fund may invest its remaining net asset value in other assets including equities and equity equivalent securities of other companies, convertible bonds, money market instruments, cash instruments, cash and Underlying Funds (including unlisted REITs).

Although the Sub-Fund has a primary investment universe in the Asia Pacific region (excluding Japan), the securities selected for investment based on the investment strategy, as described above, may at times result in a portfolio that is concentrated in certain geographical area(s), for example, mainland China.

The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction.

The Sub-Fund may invest in the onshore mainland China market by (a) investing in China A-Shares directly through Stock Connect; (b) investing in China A-Shares indirectly through CAAPs; and/or (c) investing in China B-shares directly on stock exchanges in mainland China. The Sub-Fund's total exposure to the onshore mainland China market will be less than 70% of its net asset value.

The Sub-Fund will invest less than 70% of its net asset value in stocks listed on the ChiNext Board of the Shenzhen Stock Exchange and/or the STAR Board of the Shanghai Stock Exchange.

The Sub-Fund may also invest in shares and securities of companies which are listed on exchanges or traded outside of mainland China and which carry out a preponderant part of their business activities in, or are related to, mainland China (e.g. H shares listed on the Hong Kong Stock Exchange, American Depositary Receipts listed or traded in the US, etc).

The Sub-Fund will invest less than 30% of its net asset value in listed/unlisted REITs.

The Sub-Fund will invest less than 30% of its net asset value in convertible bonds.

The Sub-Fund may invest up to 10% of its net asset value in units or shares of Underlying Funds (including unlisted REITs).

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

The Sub-Fund will normally be exposed to currencies of Asia Pacific (excluding Japan) as well as other emerging and developed market currencies.

HSBC Global Sustainable Multi-Asset Income Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Sub-Investment Adviser

None

Base Currency

USD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide income with moderate capital growth through investment in a diversified portfolio of global assets that form part of sustainable investment strategies, as further described below ("Sustainable Assets"). Through investment in Sustainable Assets, the Sub-Fund aims to invest in a portfolio with a higher weighted average environmental, social and governance ("ESG") score ("ESG Score") and lower weighted average carbon intensity ratings ("Carbon Intensity Ratings") than if it invested in an equivalent portfolio of standard market capitalisation indices ("Sustainability Reference Comparator", further details set out below).

Investment strategy

The Manager's asset allocation strategy is to forecast long term expected returns and consider the income (e.g. coupons, interest and dividends) for the different Sustainable Asset classes, and use these to decide the Sub-Fund's asset allocation, favouring Sustainable Asset classes with the best income and long term expected returns. The Manager assesses risk using long term volatilities and correlations between Sustainable Asset classes. Then it uses these to forecast what the portfolio volatility will be for any asset allocation, so that the allocation fits with the Sub-Fund's risk tolerance.

The Manager may also employ investment strategies using financial derivative instruments to enhance return and/or income including, but not limited to, writing (selling) call options on selected equities held by the Sub-Fund or indices of equities that the Sub-Fund is exposed to ("Covered Call Options").

Investment policy

In normal market conditions a minimum of 70% of the Sub-Fund's net asset value will be invested in Sustainable Assets (directly, indirectly through investment in sustainable underlying funds which are collective investment schemes that are sponsored and/or managed by HSBC and employ a sustainable investment strategy as further described below ("Sustainable Underlying Funds"), and/or indirectly through financial derivative instruments used for market access or exposure replication purposes) such as equities (including REITs) and equity equivalent securities (including, but not limited to, American Depositary Receipts and Global Depositary Receipts), fixed income securities, money market and cash instruments and other instruments, such as convertible bonds, asset backed securities, asset-backed commercial papers and mortgage backed securities, related to both developed and emerging markets. The Sub-Fund may invest its remaining net asset value in assets similar to the aforementioned but which are not considered Sustainable Assets.

The Sub-Fund may invest up to 100% of its net asset value in units or shares of collective investment schemes ("Underlying Funds") (including Sustainable Underlying Funds) as long as the overall portfolio is aligned with the investment objective, policy and strategy of the Sub-Fund. Such Underlying Funds will comprise (a) Underlying Funds which are authorised by the SFC; and/or (b) Underlying Funds which are eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time which includes, but is not limited to, schemes domiciled in Luxembourg, Ireland and the United Kingdom) whether authorised by the SFC or not; and/or (c) up to a maximum of 10% of its net asset value in Underlying Funds which are non-eligible schemes not authorised by the SFC. The Sub-Fund will invest in HSBC sponsored and/or managed Underlying Funds unless an appropriate fund is not available.

Sustainable Assets are those that form part of a sustainable investment strategy (a "Sustainable Investment Strategy"). Sustainable Investment Strategies will invest according to both (a) HSBC Asset Management's responsible investing policies¹⁰; and (b) at least one or more of the following strategies:

- **ESG Enhanced strategies** – covers the following strategies that intentionally invest in companies based on relative ESG performance or momentum:
 - Strategies that aim to invest in ESG improving companies (e.g. companies with an improving Carbon Intensity Rating or improving overall ESG Scores); or
 - Strategies that aim to deliver a specified outcome (e.g. having a better ESG Score than a benchmark) by focusing on investments with a high ESG Score; or
 - Strategies that aim, through positive screening (best-in-class screening), to invest in sectors, companies or projects that are relatively more advanced in managing ESG risks/opportunities

¹⁰ Available at: <https://www.assetmanagement.hsbc.com.hk/en/intermediary/about-us/responsible-investing/policies>

(e.g. investing in companies with top performing ESG Scores for their sector or in the investment universe).

- **Thematic** – covers strategies investing in ESG related growth areas and trends, by seeking out companies or sectors that align with specific sustainable outcomes (e.g. climate change, clean energy, or demographics). This may include themes aligned with one or more United Nations Sustainable Development Goals and, depending on the theme, may be identified based on revenues that are generated from products or services related to such theme.
- **Impact investing** – direct investing into companies, organisations and funds with the intention to deliver a direct, positive and measurable impact on society and/or the environment (e.g. green bonds, social impact bonds).

In accordance with HSBC Asset Management's responsible investing policies, Sustainable Investment Strategies will not invest in companies considered to be involved in weapons banned by international convention (e.g. Anti-Personnel Mines, Chemical weapons, Cluster munitions).

To identify eligible investments, pursuant to a Sustainable Investment Strategy, the investment adviser of the Sub-Fund and the Sustainable Underlying Funds may rely on expertise, research and information provided by well-established financial data providers (when available) and/or its own proprietary research.

Sustainable investments is an evolving theme and the range of Sustainable Investment Strategies the Sub-Fund invests in may change in future. There may be periods where all of the Sustainable Investment Strategies have been represented in the Sub-Fund and other times where this is not the case.

To demonstrate the performance of the Sub-Fund against its sustainable investment aim, the ESG Scores and Carbon Intensity Ratings of the Sub-Fund are compared to the scores/ratings of a Sustainability Reference Comparator and such comparison is available from the Manager on request and on the website www.assetmanagement.hsbc.com/hk (the website has not been reviewed by the SFC). ESG Scores are a recognised way of measuring the level of sustainability in a company, market or investment fund. Carbon intensity considers how much a company or market contributes to global carbon emissions relative to its size. When comparing the Sub-Fund's ESG Scores and Carbon Intensity Ratings against the Sustainability Reference Comparator, the Investment Adviser may rely on expertise, research and information provided by well-established financial data providers (when available) and/or the proprietary research of the Investment Adviser.

The Sustainability Reference Comparator represents the ESG Scores and Carbon Intensity Ratings the Sub-Fund might have achieved if it did not have a sustainable investment aim. The Sustainability Reference Comparator is a combination of indices that represent the asset classes held by the Sub-Fund and in the same proportions (weighting) as the Sub-Fund. As at the date of this document the indices used are shown below:

| Asset class | Index |
|--|-------------------------------------|
| Global equities (developed markets) | MSCI World |
| Global equities (emerging markets) | MSCI Emerging Markets |
| Global equities (both developed and emerging market) | MSCI ACWI High Dividend Yield |
| Global high yield bonds | BofAML Global HY BB-B Constrained |
| Global emerging market debt local currency | JPM GBI EM Global Diversified |
| Global emerging market debt hard currency | JPM EMBI Global Diversified |
| Global government bonds | FTSE World Government Bond Index |
| Global corporate Bonds | Barclays Global Aggregate Corporate |
| Global property | FTSE EPRA/NAREIT Developed |

The composition of the Sustainability Reference Comparator varies over time in line with the asset classes and proportions held by the Sub-Fund. In addition, over time the Investment Adviser may decide to add or remove asset classes in line with the Sub-Fund's investment policy and/or the Investment Adviser may decide to replace a Sustainability Reference Comparator index if, in the Investment Adviser's opinion, a better index to represent an asset class is available. Any such change may be made at any time and subsequently reflected in the investment policy and notified to investors.

The Sub-Fund does not have explicit restrictions on currency exposure and will be exposed to both emerging and developed market currencies.

The Sub-Fund invests in equities and equity equivalent securities of companies which are domiciled in, based in, or carry out the larger part of their business activities in emerging or developed markets. The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction.

The Sub-Fund may invest in the onshore mainland China equity market by (a) investing in China A-Shares directly through Stock Connect; (b) investing in China A-Shares indirectly through CAAPs; and/or (c) investing in China B-shares directly on stock exchanges in mainland China. When investing in CAAPs, the Sub-Fund will not invest more than 10% of its net asset value in CAAPs issued by any single issuer of CAAPs.

The Sub-Fund will invest less than 20% of its net asset value in stocks listed on the ChiNext Board of the Shenzhen Stock Exchange and/or the STAR Board of the Shanghai Stock Exchange.

The Sub-Fund may also invest in shares and securities of companies which are listed on exchanges or traded outside of mainland China and which carry out a preponderant part of their business activities in, or are related to, mainland

China (e.g. H shares listed on the Hong Kong Stock Exchange, American Depositary Receipts listed or traded in the US, etc).

The Sub-Fund may invest less than 30% of its net asset value in listed/unlisted REITs.

The Sub-Fund invests in investment grade rated, non-investment grade rated and unrated fixed income (e.g. bonds) and other similar securities either issued by companies in any country including both developed and emerging markets, or which are issued or guaranteed by governments, government agencies or supranational bodies in any country including both developed and emerging markets. The Sub-Fund will not invest more than 10% of its net asset value in securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated non-investment grade (by an internationally recognised credit rating agency).

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. Investment grade fixed income securities are rated at least Baa3 / BBB- by Moody's, Standard & Poor's or any other internationally recognised credit rating agency.

The aggregate investment in securities that are:-

1. rated below investment grade (i.e. rated below Baa3 / BBB- by Moody's, Standard & Poor's or any other internationally recognised credit rating agency);
2. rated AA or below (in case where the credit rating is designated / assigned by a mainland China local credit rating agency); or
3. unrated (i.e. a bond for which neither the bond itself nor its issuer has a credit rating)

will be less than 45% of the Sub-Fund's net asset value.

The Sub-Fund may invest in onshore mainland China bonds, including Urban Investment Bonds, traded on the China Interbank Bond Market ("CIBM") via CIBM Initiative and/or Bond Connect.

The Sub-Fund's total exposure to onshore mainland China securities (including China A-Shares, CAAPs, B-Shares and CIBM) will be less than 20% of its net asset value.

The Sub-Fund may invest up to 20% of its net asset value in urban investment bonds.

The Sub-Fund may invest up to 30% of its net asset value in money market and cash instruments for liquidity purposes.

The Sub-Fund will invest less than 30% of its net asset value in debt instruments with loss-absorption features including, but not limited to, contingent convertible securities; additional tier 1 or tier 2 capital instruments; total loss-absorbing capacity eligible instruments; and certain senior non preferred debt. The Sub-Fund may invest up to 10% of its net asset value in contingent convertible securities; however such investment is not expected to exceed 5%.

The Sub-Fund will invest less than 30% of its net asset value in convertible bonds (excluding contingent convertible securities).

The Sub-Fund will invest less than 30% of its net asset value in collateralised and/or securitised products such as asset backed securities, asset-backed commercial papers and mortgage backed securities.

The Sub-Fund may invest less than 20% of its net asset value in Underlying Funds which may use financial derivative instruments extensively for investment purposes.

The Sub-Fund may invest up to 10% of its net asset value in commodities, mainly through exchange-traded commodities securities, Underlying Funds and/or financial derivative instruments such as derivatives on commodities. The Sub-Fund will not invest directly in commodities.

The Sub-Fund may invest up to 10% of its net asset value in liquid alternative investment strategies, mainly through Underlying funds.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Subscriptions

Initial Offer Period

The Initial Offer Period and the expected first Dealing Day of the Classes of Units of the Sub-Fund subject to the Initial Offer Period are available in the Sub-Fund's Product Key Facts Statement when such information is available. If investors have any enquiries about such information, they may contact the Manager or its authorised distributors. Units will be initially issued at 10.000 in the currency of denomination of the class or such other price as determined by the Manager. An initial charge may be deducted from the total subscription amount prior to investment. Further details of the initial charge are given in the section headed "Charges and expenses".

In the event that no subscription applications have been made in respect of any Classes during the Initial Offer Period, the Manager may, at its absolute discretion, offer such Classes of Units after the close of the Initial Offer Period at such prices, which may be denominated in different currencies, as may be determined by the Manager at its absolute discretion.

The Manager reserves the right not to issue any Units and to return the application monies received (without interest and after deduction of out-of-pocket fees and charges incurred by the Manager and the Trustee) to investors no later than 14 Business Days after the close of the Initial Offer Period if (a) less than USD200 million is raised during the Initial Offer Period, or (b) the Manager is of the opinion that it is not in the commercial interest of investors or not feasible, as a result of adverse market conditions or otherwise, to proceed with the Sub-Fund. In such event application monies shall be returned by telegraphic transfer to the bank account from which the moneys originated at the risk and expense of the applicant or in such other manner as the Manager may from time to time determine. The Sub-Fund shall be deemed not to have commenced.

To subscribe for Units during the Initial Offer Period, investors should further refer to the relevant application and payment procedures set out in detail under the "Subscription" section.

Management fee and trustee fee

| Class of Units | A | I | Z |
|---------------------------|----------|----------|----------|
| Management fee (%) | 1.25 | 0.625 | 0.00 |
| Trustee fee (%) | 0.07 | 0.07 | 0.07 |

Each Class may incur additional fees and expenses which are not disclosed in the above table. Further details are provided in the "Charges and expenses" section.

Applicable risks

- All risks described in full in the "General risks" section.
- All risks described in full in the "Fixed income risks", "Equity risks", "Derivatives risks", "Risks relating to Securities Lending transactions" and "Collateral management and re-investment of cash collateral risks" sub-sections in the "Asset class risks" section.
- The following risks described in full in the "Sub-Fund specific risks" section:
 - Emerging and less developed markets securities risks
 - Sustainable investment policy risk
 - Investment strategy risk: multi-asset income
 - Investment strategy risk: writing covered call options
 - Mainland China market risks
 - RMB currency risks
 - China A-shares and B-shares risks
 - China A-shares access products risks
 - Stock Connect risks
 - Risks associated with the ChiNext Board and/or the Science and Technology Innovation Board
 - China Interbank Bond Market risks
 - Convertible bonds risks
 - "Dim Sum" bond risks
 - Urban Investment Bonds risks
 - Risks associated with investments in debt instruments with loss-absorption features
 - Sovereign debt risks
 - Collateralised and/or securitised products risks (such as asset-backed securities and mortgage-backed securities)
 - Real estate risks
 - Commodities risk
 - Risk associated with investing in exchange-traded commodities securities

Suitability

The Manager considers the Sub-Fund to be a "non-complex" product. The Sub-Fund may be suitable for investor types that can afford the risks involved, including retail investors (subject to each investor's individual circumstances) with a medium to long term investment horizon.

Investors should consult an authorised distributor of the Sub-Fund to determine if the Sub-Fund is suitable for their individual circumstances. Potential investors should review this Explanatory Memorandum in its entirety prior to making a decision to invest.

HSBC Global Diversified Real Return Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Base Currency

USD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to deliver return that targets to exceed US inflation (Real Return) over the long term through investment in a diversified portfolio of equity and fixed income securities, money market and cash instruments as well as other instruments such as commodities related instruments and collective investment schemes which adopt liquid alternative strategies (e.g. market neutral strategies and momentum strategies).

Investment strategy

The Manager's asset allocation strategy is to forecast long term expected returns for different asset classes and to take into consideration specific behaviours of these asset classes under different economic regimes which include, but not limited to, projected inflationary scenarios and economic growth conditions. The Manager will have a focus on assets that tend to perform in an inflationary environment and tactically adjust asset allocation in response to the changing macroeconomic cycles and market dynamics. The Manager also assesses risk using long term volatilities and correlations between asset classes. Then it uses these to forecast what the portfolio volatility will be for any asset allocation, so that the allocation fits with the Sub-Fund's risk tolerance.

Investment policy

In normal market conditions a minimum of 70% of the Sub-Fund's net asset value will be invested (directly, indirectly through investment in Underlying Funds and/or indirectly through financial derivative instruments used for market access or exposure replication purposes) in equities (including REITs) and equity equivalent securities (including, but not limited to, American Depositary Receipts, Global Depositary Receipts), fixed income securities, money market and cash instruments and other instruments, such as commodities related instruments (mainly through Underlying Funds and/or exchange-traded commodities securities offering exposure to commodities such as gold and other global commodity indices), inflation linked bonds, convertible bonds, asset backed securities, asset-backed commercial papers, mortgage backed securities and Underlying Funds which adopt liquid alternative strategies (e.g. market neutral strategies and momentum strategies) for diversification purposes related to both developed and emerging markets.

The Sub-Fund does not have explicit restrictions on currency exposure and will be exposed to both developed and emerging market currencies.

The Sub-Fund invests in equities and equity equivalent securities of companies which are domiciled in, based in, or carry out the larger part of their business activities in developed or emerging markets. The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction.

The Sub-Fund may invest in the onshore mainland China equity market by (a) investing in China A-Shares directly through Stock Connect; (b) investing in China A-Shares indirectly through CAAPs; and/or (c) investing in China B-shares directly on stock exchanges in mainland China. When investing in CAAPs, the Sub-Fund will not invest more than 10% of its net asset value in CAAPs issued by any single issuer of CAAPs. The Sub-Fund may also invest in shares and securities of companies which are listed on exchanges or traded outside of mainland China and which carry out a preponderant part of their business activities in, or are related to, mainland China (e.g. H shares listed on the Hong Kong Stock Exchange, American Depositary Receipts listed or traded in the US, etc.).

The Sub-Fund will invest less than 20% of its net asset value in stocks listed on the ChiNext Board and/or the STAR Board.

The Sub-Fund may invest less than 40% of its net asset value in REITs, including less than 10% in unlisted REITs.

The Sub-Fund invests in investment grade rated, non-investment grade rated and unrated fixed income (e.g. bonds) and other similar securities either issued by companies in any country including both developed and emerging markets, or which are issued or guaranteed by governments, government agencies or supranational bodies in any country including both developed and emerging markets. The Sub-Fund will not invest more than 10% of its net asset value in securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated non-investment grade (by an internationally recognised credit rating agency).

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. Investment grade fixed income securities are rated at least Baa3 / BBB- by Moody's, Standard & Poor's or any other internationally recognised credit rating agency.

The aggregate investment in securities that are:

1. rated below investment grade, i.e. rated BB+/Ba1 or below by Moody's, Standard & Poor's or any other internationally recognised credit rating agency; or

2. rated AA or below (in case where the credit rating is designated / assigned by a mainland China local credit rating agency); or
 3. unrated (i.e. a bond for which neither the bond itself nor its issuer has a credit rating)
- will be less than 20% of the Sub-Fund's net asset value.

The Sub-Fund may invest in onshore mainland China bonds, including Urban Investment Bonds, traded on the CIBM via CIBM Initiative and/or Bond Connect.

The Sub-Fund may invest up to 20% of its net asset value in urban investment bonds.

The Sub-Fund's total exposure to onshore mainland China securities (including China A-Shares, CAAPs, B-Shares, ChiNext Board, STAR Board and CIBM) will be less than 20% of its net asset value.

The Sub-Fund may invest less than 30% of its net asset value in exchange-traded commodities securities.

The Sub-Fund may invest up to 40% of its net asset value in money market and cash instruments for liquidity or portfolio management purposes.

The Sub-Fund may invest less than 30% of its net asset value in debt instruments with loss-absorption features including, but not limited to, contingent convertible securities; additional tier 1 or tier 2 capital instruments; total loss-absorbing capacity eligible instruments; and certain senior non preferred debt. The Sub-Fund may invest up to 10% of its net asset value in contingent convertible securities; however such investment is not expected to exceed 5%.

The Sub-Fund may invest less than 30% of its net asset value in convertible bonds (excluding contingent convertible securities).

The Sub-Fund may invest less than 30% of its net asset value in collateralised and/or securitised products such as asset-backed securities, asset-backed commercial papers and mortgage-backed securities.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund may invest up to 100% of its net asset value in units or shares of Underlying Funds as long as the overall portfolio is aligned with the investment objective, policy and strategy of the Sub-Fund. Such Underlying Funds will comprise (a) Underlying Funds which are authorised by the SFC; and/or (b) Underlying Funds which are eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time which includes, but is not limited to, schemes domiciled in Luxembourg, Ireland and the United Kingdom) whether authorised by the SFC or not; and/or (c) not more than 10% of its net asset value in Underlying Funds which are non-eligible schemes not authorised by the SFC. The Sub-Fund may invest less than 30% in Underlying Funds which may use financial derivative instruments extensively for investment purposes. The Sub-Fund will invest in HSBC sponsored and/or managed Underlying Funds unless an appropriate fund is not available.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Indicative allocation and classification of the Sub-Fund's investment:

| Asset Classes* | Indicative percentage (as a percentage of the Sub-Fund's net asset value) |
|--|--|
| Equity | 30%-70% |
| Fixed Income | 0%-50% |
| Commodities | 0%-30% |
| Underlying Funds which adopt liquid alternative strategies | 0%-30% |
| Cash, deposits, money market instruments and liquidity funds | 0 – 40% |

* Exposure to these assets classes may be achieved through direct investments, investment in units or shares of Underlying Funds and/or through financial derivative instruments. In addition, exposure to commodities may be achieved through investment in exchange-traded commodities securities.

Initial Offer Period

The Initial Offer Period and the expected first Dealing Day of the Classes of Units of the Sub-Fund subject to the Initial Offer Period are available in the Sub-Fund's Product Key Facts Statement when such information is available. If investors have any enquiries about such information, they may contact the Manager or its authorised distributors. Units will be initially issued at 10.000 in the currency of denomination of the class or such other price as determined by the Manager. An initial charge may be deducted from the total subscription amount prior to investment. Further details of the initial charge are given in the section headed "Charges and expenses".

In the event that no subscription applications have been made in respect of any Classes during the Initial Offer Period, the Manager may, at its absolute discretion, offer such Classes of Units after the close of the Initial Offer Period at such prices, which may be denominated in different currencies, as may be determined by the Manager at its absolute discretion.

The Manager reserves the right not to issue any Units and to return the application monies received (without interest and after deduction of out-of-pocket fees and charges incurred by the Manager and the Trustee) to investors no later than 14 Business Days after the close of the Initial Offer Period if (a) less than USD50 million is raised during the Initial Offer Period, or (b) the Manager is of the opinion that it is not in the commercial interest of investors or not feasible, as a result of adverse market conditions or otherwise, to proceed with the launch of the Sub-Fund or any Classes of the Sub-Fund. In such event application monies shall be returned by telegraphic transfer to the bank account from which the moneys originated at the risk and expense of the applicant or in such other manner as the Manager may from time to time determine. The Sub-Fund or the relevant Classes of the Sub-Fund shall be deemed not to have commenced.

To subscribe for Units during the Initial Offer Period, investors should further refer to the relevant application and payment procedures set out in detail under the "Subscription" section.

Management fee and trustee fee

| Class of Units | A | I | Z |
|---------------------------|----------|----------|----------|
| Management fee (%) | 1.25 | 0.625 | 0.00 |
| Trustee fee (%) | 0.07 | 0.07 | 0.07 |

Each Class may incur additional fees and expenses which are not disclosed in the above table. Further details are provided in the "Charges and expenses" section.

Applicable risks

- All risks described in full in the "General risks" section.
- All risks described in full in the "Fixed income risks", "Equity risks", "Derivatives risks", "Risks relating to Securities Lending transactions" and "Collateral management and re-investment of cash collateral risks" sub-sections in the "Asset class risks" section.
- The following risks described in full in the "Sub-Fund specific risks" section:
 - Emerging and less developed markets securities risks
 - Investment strategy risk: multi-asset real return
 - Mainland China market risks
 - RMB currency risks
 - China A-shares and B-shares risks
 - China A-shares access products risks
 - Stock Connect risks
 - Risks associated with the ChiNext Board and/or the STAR Board
 - China Interbank Bond Market risks
 - Convertible bonds risks
 - "Dim Sum" bond risks
 - Urban Investment Bonds risks
 - Risks associated with investments in debt instruments with loss-absorption features
 - Sovereign debt risks
 - Collateralised and/or securitised products risks (such as asset-backed securities and mortgage-backed securities)
 - Real estate risks
 - Infrastructure industry risk
 - Commodities risk
 - Risk associated with investing in exchange-traded commodities securities

Suitability

The Manager considers the Sub-Fund to be a "non-complex" product. The Sub-Fund may be suitable for investor types that can afford the risks involved, including retail investors (subject to each investor's individual circumstances) with a medium to long term investment horizon.

Investors should consult an authorised distributor of the Sub-Fund to determine if the Sub-Fund is suitable for their individual circumstances. Potential investors should review this Explanatory Memorandum in its entirety prior to making a decision to invest.

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide income and moderate growth through an active asset allocation in a diversified portfolio of fixed income securities and equity securities, money market and cash instruments and other instruments that are related to India.

Investment strategy

The Manager's approach is to consider the qualitative and quantitative fundamental factors such as economic outlook, market valuations, income (e.g. coupons, interest and dividends) for the different asset classes and use these to decide the Sub-Fund's asset allocation, favouring assets with high income potential and superior long term expected returns. The Manager assesses risk using long term volatilities and correlations between asset classes to forecast the portfolio volatility from different asset allocation mixes with the aim to fit an allocation that is aligned with the Sub-Fund's risk tolerance. The assumptions underlying the asset allocation and expected returns are reviewed continuously to ensure they remain the Manager's best estimates within the overall research framework.

The Fund would adopt a flexible approach to asset allocation with a bias towards income-generating securities.

Investment policy

In normal market conditions a minimum of 70% of the Sub-Fund's net asset value will be invested (directly or indirectly through investment in Underlying Funds and/or indirectly through financial derivative instruments used for market access or exposure replication purposes) in India related fixed income securities, equities (including Real Estate Investment Trusts ("REITs")) and equity equivalent securities (including, but not limited to, American Depositary Receipts and Global Depositary Receipts), money market and cash instruments and other instruments such as convertible bonds, asset backed securities, asset-backed commercial papers and mortgage backed securities. The Sub-Fund may invest its remaining net asset value in assets similar to the aforementioned but which are unrelated to India.

The Sub-Fund invests up to 75% of its net asset value in investment grade rated, non-investment grade rated and unrated fixed income securities (e.g. bonds) denominated in Indian Rupee (INR). These securities will be issued or guaranteed by government of India, government agencies of India as well as by companies which have their registered office in India or which carry out the larger part of their business activities in India. The Sub-Fund may invest in other instruments (e.g. structured notes) referencing underlying exposure to INR fixed income securities.

Unless otherwise permitted by the Securities and Exchange Board of India ("SEBI"), to invest in Indian domestic fixed income securities, the Sub-Fund will use a Foreign Portfolio Investor (FPI) license which will be obtained from and authorised by the SEBI and the Sub-Fund will be subject to the available FPI quota on fixed income investments. Investors should be aware that the availability of the FPI quota can be unpredictable and, as a result, the Sub-Fund may, at times, have substantial exposure to non-INR denominated investments which are related to India but are non-domestic fixed income securities.

The Sub-Fund may invest up to 55% of its net asset value in investment grade rated, non-investment grade rated and unrated fixed income and other similar securities denominated in other currencies (e.g. United States Dollars). These securities will be issued or guaranteed by the government of India, government agencies of India as well as by companies which have their registered office in India or which carry out the larger part of their business activities in India. When the Sub-Fund invests in these assets which are neither INR denominated or referenced, the Sub-Fund may achieve INR exposure using financial derivative instruments.

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. Investment grade fixed income securities are rated at least Baa3 / BBB- by Moody's, Standard & Poor's or any other internationally recognised credit rating agency.

The Sub-Fund may invest up to 100% of its net asset value in securities that are rated below investment grade (i.e. rated BB+/Ba1 or below by Moody's, Standard & Poor's or any other internationally recognised credit rating agency) or unrated (i.e. a bond for which neither the bond itself nor its issuer has a credit rating).

As at the date hereof, Indian sovereign debt is rated investment grade (by internationally recognised credit rating agencies). In the event that Indian sovereign debt is downgraded to below investment grade by any of these internationally recognised credit rating agencies, the Sub-Fund may invest up to 75% in securities issued and/or guaranteed by the government of India.

The Sub-Fund invests in equities and equity equivalent securities of companies which are domiciled in, based in, or carry out the larger part of their business activities in India. The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction. The Sub-Fund may also invest no more than 10% of its net asset value in eligible closed-ended REITs.

The Sub-Fund may invest up to 30% of its net assets in fixed income and equity securities, which are not issued by India related issuers. These securities are denominated either in US Dollars, other developed market currencies or emerging market currencies.

The Sub-Fund may invest up to 30% of its net asset value in other asset classes including, but not limited to, real estate, commodities related instruments, asset backed securities ("ABS"), mortgage backed securities ("MBS") and liquid alternative investment strategies (e.g. market neutral strategies and momentum strategies).

The Sub-Fund may invest up to 20% of its net asset value in money market and cash instruments for liquidity or portfolio management purposes.

The Sub-Fund may invest up to 100% of its net asset value in units or shares of Underlying Funds as long as the overall portfolio is aligned with the investment objective, policy and strategy of the Sub-Fund. Such Underlying Funds will comprise (a) Underlying Funds which are authorised by the SFC; and/or (b) Underlying Funds which are eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time which includes, but is not limited to, schemes domiciled in Luxembourg, Ireland and the United Kingdom) whether authorised by the SFC or not; and/or (c) not more than 10% of its net asset value in Underlying Funds which are non-eligible schemes not authorised by the SFC. The Sub-Fund will invest in HSBC sponsored and/or managed Underlying Funds unless an appropriate fund is not available.

The Sub-Fund may invest up to 90% of its net asset value in shares of HSBC Global Investment Funds - India Fixed Income, which is authorised by the SFC. The investment objective of HSBC Global Investment Funds - India Fixed Income is to provide long term total return by investing in a portfolio of Indian bonds and other similar fixed income securities.

The Sub-Fund may invest up to 50% of its net asset value in shares of HSBC Global Investment Funds - Indian Equity, which is authorised by the SFC. The investment objective of HSBC Global Investment Funds - Indian Equity is to provide long-term total return by investing in a portfolio of Indian equities.

SFC authorisation of the above Underlying Funds is not a recommendation or endorsement of the Underlying Funds nor does it guarantee the commercial merits of the Underlying Funds or the performance of the Underlying Funds. It does not mean that the Underlying Funds are suitable for all investors nor is it an endorsement of the Underlying Funds' suitability for any particular investor or class of investors.

The Sub-Fund may invest less than 10% of its net asset value in debt instruments with loss-absorption features including, but not limited to, contingent convertible securities; additional tier 1 or tier 2 capital instruments; total loss-absorbing capacity eligible instruments; and certain senior non preferred debt. The Sub-Fund may invest less than 10% of its net asset value in contingent convertible securities; however such investment is not expected to exceed 5%.

The Sub-Fund will not invest more than 10% of its net assets in a combination of participation notes and convertible securities.

The Sub-Fund may invest up to 10% of its net asset value in commodities related instruments, mainly through exchange-traded commodities securities, Underlying Funds and/or financial derivative instruments such as derivatives on commodities. The Sub-Fund will not invest directly in commodities.

The Sub-Fund may invest up to 10% of its net assets in ABS and MBS.

The Sub-Fund may invest up to 10% of its net asset value in liquid alternative investment strategies, mainly through Underlying funds. The Sub-Fund may invest less than 10% of its net asset value in Underlying Funds which may use financial derivative instruments extensively for investment purposes.

The Sub-Fund's primary currency exposure is to the Indian Rupee. The Manager may actively manage the Sub-Fund's currency exposure.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Indicative allocation and classification of the Sub-Fund's investment:

| Asset Classes* | Indicative percentage (as a percentage of the Sub-Fund's net asset value) |
|---|--|
| Fixed Income | 50% - 100% |
| Equities | 0% - 50% |
| Other asset classes such as real estate, commodities related instruments, ABS, MBS and liquid alternative investment strategies | 0 – 30% |
| Cash, deposits, money market instruments and liquidity funds | 0 – 20% |

* Exposure to these assets classes may be achieved through direct investments, investment in units or shares of Underlying Funds and/or through financial derivative instruments.

Initial Offer Period

The Initial Offer Period and the expected first Dealing Day of the Classes of Units of the Sub-Fund subject to the Initial Offer Period are available in the Sub-Fund's Product Key Facts Statement when such information is available. If investors have any enquiries about such information, they may contact the Manager or its authorised distributors. Units will be initially issued at 10.000 in the currency of denomination of the class or such other price as determined by the Manager. An initial charge may be deducted from the total subscription amount prior to investment. Further details of the initial charge are given in the section headed "Charges and expenses".

In the event that no subscription applications have been made in respect of any Classes during the Initial Offer Period, the Manager may, at its absolute discretion, offer such Classes of Units after the close of the Initial Offer Period at such prices, which may be denominated in different currencies, as may be determined by the Manager at its absolute discretion.

The Manager reserves the right not to issue any Units and to return the application monies received (without interest and after deduction of out-of-pocket fees and charges incurred by the Manager and the Trustee) to investors no later than 14 Business Days after the close of the Initial Offer Period if (a) less than USD50 million is raised during the Initial Offer Period, or (b) the Manager is of the opinion that it is not in the commercial interest of investors or not feasible, as a result of adverse market conditions or otherwise, to proceed with the launch of the Sub-Fund or any Classes of the Sub-Fund. In such event application monies shall be returned by telegraphic transfer to the bank account from which the moneys originated at the risk and expense of the applicant or in such other manner as the Manager may from time to time determine. The Sub-Fund or the relevant Classes of the Sub-Fund shall be deemed not to have commenced.

To subscribe for Units during the Initial Offer Period, investors should further refer to the relevant application and payment procedures set out in detail under the "Subscription" section.

Management fee and trustee fee

| Class of Units | A | I | Z |
|---------------------------|----------|----------|----------|
| Management fee (%) | 1.60 | 0.80 | 0.00 |
| Trustee fee (%) | 0.07 | 0.07 | 0.07 |

Each Class may incur additional fees and expenses which are not disclosed in the above table. Further details are provided in the "Charges and expenses" section.

Applicable risks

- All risks described in full in the "General risks" section.

- The following risks described in full in the "Sub-Fund specific risks" section:
 - Risk associated with Indian securities

- Concentration risks
- Emerging and less developed markets securities risks
- Investment strategy risk: multi-asset income
- Sovereign debt risks
- Convertible bonds risks
- Risks associated with investments in debt instruments with loss-absorption features
- Real estate risks
- Commodities risk
- Risk associated with investing in exchange-traded commodities securities
- Collateralised and/or securitised products risks (such as asset-backed securities and mortgage-backed securities)

Suitability

The Manager considers the Sub-Fund to be a “non-complex” product. The Sub-Fund may be suitable for investor types that can afford the risks involved, including retail investors (subject to each investor’s individual circumstances) with a medium to long term investment horizon.

Investors should consult an authorised distributor of the Sub-Fund to determine if the Sub-Fund is suitable for their individual circumstances. Potential investors should review this Explanatory Memorandum in its entirety prior to making a decision to invest.

HSBC Post Retirement Multi-Asset Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Base Currency

USD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide long term total return through an active asset allocation in a diversified portfolio of fixed income securities and equity securities, money market and cash instruments and offers distribution classes which aim to deliver regular and predictable payouts (which may be paid out of capital) to address income needs in retirement.

Investment strategy

The Manager's asset allocation strategy is to forecast long term expected returns for the different global asset classes and use these to decide the Sub-Fund's neutral asset allocation, favouring the asset classes with superior long term expected returns. The Manager assesses risk using long term volatilities and correlations between asset classes to forecast the portfolio volatility from different asset allocation mixes with the aim to fit an allocation that is aligned with the Sub-Fund's risk tolerance. Both qualitative and quantitative factors are considered by the Manager to determine the active asset allocation around the neutral asset allocation.

Investment policy

In normal market conditions a minimum of 70% of the Sub-Fund's net asset value will be invested (directly or indirectly through investment in Underlying Funds and/or indirectly through financial derivative instruments used for market access or exposure replication purposes) in fixed income securities, equities and equity equivalent securities (including, but not limited to, American Depositary Receipts and Global Depositary Receipts), money market and cash instruments, other instruments such as inflation linked bonds, convertible bonds, asset backed securities ("ABS"), asset-backed commercial papers ("ABCP"), mortgage backed securities ("MBS") and other asset classes including, but not limited to, real estate, liquid alternative investment strategies (e.g. market neutral strategies and momentum strategies) and commodities for diversification purposes, related to both developed and emerging markets.

The Sub-Fund invests in investment grade rated, non-investment grade rated and unrated fixed income (e.g. bonds) and other similar securities either issued or guaranteed by governments, government agencies or supranational bodies and/or by companies in any country including both developed and emerging markets. The Sub-Fund will not invest more than 10% of its net asset value in securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated non-investment grade (by an internationally recognised credit rating agency).

The Sub-Fund does not have explicit restrictions on the minimum credit ratings of securities it may hold. Investment grade fixed income securities are rated at least Baa3 / BBB- by Moody's, Standard & Poor's or any other internationally recognised credit rating agency. The aggregate investment in securities that are rated below investment grade, i.e. rated BB+/Ba1 or below by Moody's, Standard & Poor's or any other internationally recognised credit rating agency; rated AA or below (in case where the credit rating is designated / assigned by a mainland China local credit rating agency); or unrated (i.e. a bond for which neither the bond itself nor its issuer has a credit rating) will be less than 20% of the Sub-Fund's net asset value.

The Sub-Fund may invest less than 30% of its net asset value in debt instruments with loss-absorption features including, but not limited to, contingent convertible securities; additional tier 1 or tier 2 capital instruments; total loss-absorbing capacity eligible instruments; and certain senior non preferred debt.

The Sub-Fund may invest in onshore mainland China bonds, including Urban Investment Bonds, traded on the China Interbank Bond Market ("CIBM") via CIBM Initiative and/or Bond Connect. The Sub-Fund will invest less than 20% of its net asset value in urban investment bonds. The urban investment bonds are issued by Mainland local government financing vehicles (LGFVs), which are separate legal entities established by local governments and / or their affiliates to raise financing for public welfare investment or infrastructure projects.

The Sub-Fund may invest up to 100% of its net asset value in units or shares of Underlying Funds as long as the overall portfolio is aligned with the investment objective, policy and strategy of the Sub-Fund. Such Underlying Funds will comprise (a) Underlying Funds which are authorised by the SFC; and/or (b) Underlying Funds which are eligible schemes (the list of "eligible schemes" is as specified by the SFC from time to time which includes, but is not limited to, schemes domiciled in Luxembourg, Ireland and the United Kingdom) whether authorised by the SFC or not; and/or (c) not more than 10% of its net asset value in Underlying Funds which are non-eligible schemes not authorised by the SFC. The Sub-Fund will invest in HSBC sponsored and/or managed Underlying Funds unless an appropriate fund is not available. The Sub-Fund may invest less than 25% of its net asset value in Underlying Funds which may use financial derivative instruments extensively for investment purposes.

The Sub-Fund may invest up to 65% of its net asset value in shares of HSBC Global Investment Funds - Global Government Bond, which is authorised by the SFC. The investment objective of HSBC Global Investment Funds -

Global Government Bond is to provide long term total return by investing in a portfolio of government bonds. HSBC Global Investment Funds - Global Government Bond invests (normally a minimum of 70% of its net assets) in investment grade rated fixed income and other similar securities which are issued or guaranteed by governments, government agencies and supranational bodies in both developed markets and emerging markets. These securities are denominated in developed market and emerging market currencies.

The Sub-Fund invests in equities and equity equivalent securities of companies which are domiciled in, based in, or carry out the larger part of their business activities in developed or emerging markets. The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction.

The Sub-Fund may invest in the onshore mainland China equity market by (a) investing in China A-Shares directly through Stock Connect; (b) investing in China A-Shares indirectly through CAAPs; and/or (c) investing in China B-shares directly on stock exchanges in mainland China. When investing in CAAPs, the Sub-Fund will not invest more than 10% of its net asset value in CAAPs issued by any single issuer of CAAPs.

The Sub-Fund will invest less than 20% of its net asset value in stocks listed on the ChiNext Board of the Shenzhen Stock Exchange and/or the STAR Board of the Shanghai Stock Exchange.

The Sub-Fund may also invest in shares and securities of companies which are listed on exchanges or traded outside of mainland China and which carry out a preponderant part of their business activities in, or are related to, mainland China (e.g. H shares listed on the Hong Kong Stock Exchange, American Depositary Receipts listed or traded in the US, etc).

The Sub-Fund's total exposure to onshore mainland China securities (including China A-Shares, CAAPs, B-Shares and CIBM) will be less than 30% of its net asset value.

The Sub-Fund may invest up to 25% of its net asset value in other asset classes including, but not limited to, real estate, liquid alternative investment strategies (e.g. market neutral strategies and momentum strategies) and commodities.

The Sub-Fund may invest up to 25% of its net asset value in liquid alternative investment strategies, mainly through Underlying Funds.

The Sub-Fund may invest up to 20% of its net asset value in money market and cash instruments and/or money market funds for liquidity or portfolio management purposes.

The Sub-Fund may invest up to 10% of its net asset value in ABS, ABCP and MBS.

The Sub-Fund may also invest not more than 10% of its net asset value in eligible closed-ended Real Estate Investment Trusts ("REITs").

The Sub-Fund may invest up to 10% of its net asset value in commodities, mainly through exchange-traded commodities securities offering exposure to commodities such as gold and other global commodity indices, Underlying Funds and/or financial derivative instruments such as derivatives on commodities. The Sub-Fund will not invest directly in commodities.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the applicable investment restrictions.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

The Sub-Fund's primary currency exposure is to the US Dollar. The Sub-Fund may be exposed to different currencies and may hedge these non-USD currency exposures into USD.

Indicative allocation and classification of the Sub-Fund's investment:

| Asset Classes* | Indicative percentage (as a percentage of the Sub-Fund's net asset value) |
|---|---|
| Fixed Income | 0% - 100% |
| Equities | 0% - 50% |
| Other asset classes such as real estate, liquid alternative investment strategies and commodities | 0% - 25% |
| Cash, deposits, money market instruments and liquidity funds | 0 - 20% |

* Exposure to these asset classes may be achieved through direct investments, investment in units or shares of Underlying Funds and/or through financial derivative instruments. In addition, exposure to commodities may be achieved through investment in exchange-traded commodities securities.

 - Risk associated with investing in exchange-traded commodities securities
 - Collateralised and/or securitised products risks (such as asset-backed securities and mortgage-backed securities)
 - Risks in relation to fixed payout classes

Suitability

The Manager considers the Sub-Fund to be a “non-complex” product. The Sub-Fund may be suitable for investor types that can afford the risks involved, including retail investors (subject to each investor’s individual circumstances) with a medium to long term investment horizon. The Sub-Fund is particularly designed for retirees, who have a low to medium risk profile, and, for this purpose, the Sub-Fund offers distribution classes which aim to deliver regular and predictable payouts, comprised of income, capital gains and return of capital to address income needs in retirement.

Investors should consult an authorised distributor of the Sub-Fund to determine if the Sub-Fund is suitable for their individual circumstances. Potential investors should review this Explanatory Memorandum in its entirety prior to making a decision to invest.

HSBC US Dynamic Opportunities Equity Fund

Investment Adviser

HSBC Global Asset Management (Hong Kong) Limited

Base Currency

USD

Investment objective, policy and strategy

Investment objective

The Sub-Fund aims to provide long term total return by investing in a portfolio of equities.

Investment policy

The Sub-Fund will invest, in normal market conditions, at least 70% of its net asset value in equity securities or equity equivalent securities (including, but not limited to, American Depositary Receipts, Global Depositary Receipts and non-voting depositary receipts which will not embed a derivative and/or be leveraged) of companies incorporated in the US, or with official listing on a stock exchange in the US, as well as companies which carry out a preponderant part of their economic activities in the US. The Sub-Fund may invest its remaining net asset value in other assets including equities and equity equivalent securities of other companies, bonds, money market instruments, cash instruments, cash and Underlying Funds (including unlisted REITs).

The Sub-Fund normally invests across a range of market capitalisations without any capitalisation restriction.

The Sub-Fund will invest less than 20% of its net asset value in listed/unlisted REITs.

The Sub-Fund may also invest in financial derivative instruments (including embedded financial derivatives) for investment and hedging purposes, subject to the provisions set out under the section "Fund Restrictions".

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Manager will not enter into Repurchase Transactions or Reverse Repurchase Transactions or similar OTC transactions in respect of the Sub-Fund.

Investment strategy

The Investment Adviser uses systematic investment process to identify equity securities based on a variety of attributes which are considered to contribute positively to return, such as: valuation, risk level, overall quality, size, price trends, market trends, corporate earnings and corporate actions.

The attributes are proprietary to the Investment Adviser and subject to ongoing research and may change over time as new attributes are identified.

The Investment Adviser then constructs a portfolio using identified equity securities with such attributes to maximise the portfolio's aggregate exposure to these attributes whilst aiming to minimise unrewarded or under-rewarded risk.
