The strategic allocation is the portfolio's reference or neutral allocation set by HSBC Asset Management. The management team also adjusts target exposure higher (overweight) or lower (underweight) to an asset type - relative to the strategic asset allocation - depending on the team's current market outlook. Positive values (overweights) in the chart reflect asset types the portfolio management team have a positive outlook on. Negative values (underweights) reflect asset types the portfolio management team have a negative outlook on. The actual exposure is a screen shot of the portfolio at the end of the month based on market value in each asset type.

Past performance does not predict future returns. The figures are calculated in the share class base currency, NAV to NAV basis with dividend reinvested, net of fees. If investment performance is not denominated in HKD or USD, HKD or USD based investors are exposed to exchange rate fluctuations. *The fund may pay dividends out of capital or gross of expenses.
