- Investors should not invest solely based on factsheet and should read the offering documents for details.

### Investment objective

The Fund aims to provide income with moderate capital growth through investment in a diversified portfolio of global assets that form part of sustainable investment strategies (“Sustainable Assets”). Through investment in Sustainable Assets, the Fund aims to invest in a portfolio with a higher weighted average environmental, social and governance (“ESG”) score (“ESG Score”) and lower weighted average carbon intensity ratings (“Carbon Intensity Ratings”) than if it invested in an equivalent portfolio of standard market capitalisation indices (“Sustainability Reference Comparator”).

### Investment strategy

In normal market conditions a minimum of 70% of the Fund’s net asset value will be invested in Sustainable Assets such as equities and equity equivalent securities, fixed income securities, money market and cash instruments and other instruments, such as convertible bonds, asset backed securities, asset-backed commercial papers and mortgage backed securities, related to both developed and emerging markets. The Fund may invest its remaining net asset value in assets similar to the aforementioned but which are not considered Sustainable Assets.
