

HSBC Collective Investment Trust

HSBC Global Diversified Real Return Fund

Monthly report 30 April 2025 | Share class AMFLXO-EUR

Fund center

Risk Disclosure

- The Fund invests mainly in equities, bonds and other related investments such as commodities and liquid alternative funds. The Fund aims to deliver return that targets to exceed US inflation (Real Return) over the long term.
- To achieve its investment objective, the Fund may focus on assets that tend to perform in an inflationary environment. There is a possibility that the Fund may not achieve the desired results under all circumstances and market conditions.
- The investments of the Fund may be periodically rebalanced and therefore the Fund may incur greater transaction costs than a fund employing a buy-and-hold allocation strategy.
- The Fund may invest in financial derivative instruments for investment purpose which may lead to higher volatility to its net asset value.
- The Fund may pay dividends out of capital or gross of expenses. Dividend is not guaranteed and may result in capital erosion and reduction in net asset value.
- The Fund's investments may involve substantial credit, credit rating, currency, volatility, liquidity, interest rate, valuation, emerging markets, tax and political risks and risks related to general equity market, general debt securities, sovereign debt, mainland China market, convertible securities, real estate, infrastructure industry, commodities, small/mid-capitalisation companies, and investment in other collective investment schemes and risks associated with flexible pay-out share class. Investors may suffer substantial loss of their investments in the Fund.
- Base Currency Hedged Share Classes or RMB denominated class are subject to higher currency and exchange rate risks.
- Investors should not invest solely based on factsheet and should read the offering documents for details.

Investment objective

The Sub-Fund aims to deliver return that targets to exceed US inflation (Real Return) over the long term through investment in a diversified portfolio of equity and fixed income securities, money market and cash instruments as well as other instruments such as commodities related instruments and collective investment schemes which adopt liquid alternative strategies (e.g. market neutral strategies and momentum strategies).

Investment strategy

The Manager's asset allocation strategy is to forecast long term expected returns for different asset classes and to take into consideration specific behaviours of these asset classes under different economic regimes which include, but not limited to, projected inflationary scenarios and economic growth conditions. The Manager will have a focus on assets that tend to perform in an inflationary environment and tactically adjust asset allocation in response to the changing macroeconomic cycles and market dynamics. The Manager also assesses risk using long term volatilities and correlations between asset classes. Then it uses these to forecast what the portfolio volatility will be for any asset allocation, so that the allocation fits with the Sub-Fund's risk tolerance.
