

HSBC Collective Investment Trust

HSBC India Multi Income Fund

Monthly report 31 March 2025 | Share class AM30-RMB

Fund center

Risk Disclosure

- The fund will be invested in fixed income securities, equities securities, money market and cash instruments and other instruments that are related to India.
- The Fund is subject to the geographic concentration and emerging market risks of investing in a single emerging market, as well as India market risks.
- The Fund may invest in other collective investment schemes, and need to bear the underlying funds' fees and expenses on top of the Fund's own fees and expenses.
- The Fund may pay dividends out of capital or gross of expenses. Dividend is not guaranteed and may result in capital erosion and reduction in net asset value.
- The Fund may invest in financial derivative instruments for investment purpose which may lead to higher volatility to its net asset value.
- The Fund's investments may involve credit, credit rating, currency, volatility, liquidity, general debt securities, non-investment grade and unrated debt securities, general equity market, investment strategy risk on multi-asset income, sovereign debt, risk associated with small/ mid-capitalisation companies, tax and political risks. Investors may suffer substantial loss of their investments in the Fund.
- Base Currency Hedged Share Classes and RMB denominated Class are subject to higher currency and exchange rate risks.
- Investors should not invest solely based on factsheet and should read the offering documents for details.

Investment objective

The Sub-Fund aims to provide income and moderate growth through an active asset allocation in a diversified portfolio of fixed income securities and equity securities, money market and cash instruments and other instruments that are related to India.

Investment strategy

The Manager's approach is to consider the qualitative and quantitative fundamental factors such as economic outlook, market valuations, income (e.g. coupons, interest and dividends) for the different asset classes and use these to decide the Sub-Fund's asset allocation, favouring assets with high income potential and superior long term expected returns. The Manager assesses risk using long term volatilities and correlations between asset classes to forecast the portfolio volatility from different asset allocation mixes with the aim to fit an allocation that is aligned with the Sub-Fund's risk tolerance. The assumptions underlying the asset allocation and expected returns are reviewed continuously to ensure they remain the Manager's best estimates within the overall research framework. The Fund would adopt a flexible approach to asset allocation with a bias towards income-generating securities.
