Fund center

Risk Disclosure

- The Fund is a passively-managed index-tracking exchange traded fund that aims to track the Markit iBoxx ABF Hong Kong Index. There is no guarantee or assurance of exact replication of the Index. The manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Fund. A fall in the index will result in a similar fall in the net asset value of the Fund.
- The listing of the Fund on the stock exchange in Hong Kong does not guarantee a liquid market and the Fund may be delisted. The Fund's market price on the stock exchange may be different from its net asset value per unit.
- The Fund may invest in financial derivative instruments for investment purpose which may lead to higher volatility to its net asset value.
- The Fund may pay dividends out of capital or gross of expenses. Dividend is not guaranteed and may result in capital erosion and reduction in net asset value.
- Investing in the Fund involves substantial credit, credit rating, currency, debt securities, interest rate, valuation, sovereign debt, geographic concentration, passive investment, termination, trading, volatility and liquidity risks. In the case of turbulent market situation, investors may suffer substantial loss.
- Investors should not invest solely based on factsheet and should read the offering documents for details.

Investment objective

This Fund seeks to provide investment results that correspond closely to the total return of the Markit iBoxx ABF Hong Kong Index, before fees and expenses.

Investment strategy

The investment objective of the Trust is to seek to provide investment results that correspond closely to the total return of the iBoxx ABF Hong Kong Index, before fees and expenses. The Manager will seek to achieve the Trust's investment objective by investing the Trust's assets primarily in Index Securities but also in certain securities other than Index Securities ("non-Index Securities") by adopting a representative sampling strategy or similar strategy. Representative sampling is a strategy investing in a representative sample of securities in the Underlying Index which have a similar investment profile as that of the Underlying Index. Securities selected have aggregate characteristics (such as yield and duration) similar to those of the Underlying Index. The Trust generally will not hold all the securities that are included in the Underlying Index.
