Global Aggregate Bond UCITS ETF

Monthly report 31 March 2025 | Share class HCHKD (HUSD)

Fund center

Risk Disclosure

- The Fund is a passively managed index fund that aims to track the Bloomberg Barclays Global Aggregate Bond Index (total return hedged to USD). There is no guarantee or assurance of exact replication of the Index. The manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Fund. A fall in the index will result in a similar fall in the net asset value of the Fund.
- The Fund is subject to the risk of investing in emerging markets.
- Mortgage backed securities, asset backed securities and Commercial Mortgage Backed Securities may subject to additional risks and volatility.
- The credit rating and/or credit quality of a debt instrument or its issuer may decline. In the event of such decline, the value of the Fund may be adversely affected.
- The Fund may invest in financial derivative instruments for investment purpose which may lead to higher volatility to its net asset value.
- The Fund's investments may involve substantial credit, currency, volatility, liquidity, general debt securities, interest rate, sovereign debt, tax, Eurozone and political risks. Investors may suffer substantial loss of their investments in the Fund.
- Investors should not invest in the Fund solely based on the information provided in this document and should read the offering document of the Fund for details.

Investment objective

The Fund aims to provide regular income and capital growth by tracking as closely as possible the performance of the Bloomberg Global Aggregate Bond Index (total return hedged to US dollars) (the Index).

Investment strategy

The Index is comprised of investment grade bonds (and other similar securities). The Index is multi-currency but is hedged to US dollars (USD). The Index includes treasury, government-related, corporate and securitised fixed-rate bonds from developed and emerging markets issuers. The Fund will be passively managed and will invest in bonds issued by governments, government-related, supranational bodies and companies based in developed and emerging markets; ABS and MBS; and covered bonds, all of which are Index constituents. It uses an investment technique called optimisation, which seeks to minimise the difference in return between the Fund and the Index by considering tracking error (the risk that the Fund return varies from the Index return) and trading costs when constructing a portfolio. The Fund will not necessarily invest in every Index constituent or invest proportionally to each constituents' Index weight and may invest in assets outside of the Index, such as: bonds with a credit rating of Ba1, BB+ and below; as well as cash, money market instruments and funds. The Fund may invest up to 30% in China Interbank Bond market, up to 10% of its assets in funds. The Fund may also invest up to 30% in total return swaps. However, this exposure is not expected to exceed 0%. The credit ratings of the Fund's underlying investments is expected to be at least investment grade. The Fund's primary currency exposure is to USD. See the Prospectus for a full description of the investment objectives and derivative usage.
