Directors' Report

Directors' Comments

The Board of Directors presents the Audited Annual Report and Accounts for HSBC Global Investment Funds (the "Company") for the year ending 31 March 2023.

The Company

The Company is a variable capital investment company, incorporated under the laws of the Grand Duchy of Luxembourg and is organized as an "umbrella" with a number of sub-funds, each of which has their own investment policies and restrictions. At present, the Company has issued shares in 78 sub-funds. During the year, the total net assets of the Company decreased from USD 35.67 billion to USD 30.66 billion at year end.

The Company qualifies as an Undertaking for Collective Investment in Transferable Securities under the amended Directive 2009/65/EC of 13 July 2009 and may therefore be offered for sale in European Union Member States, subject to registration in countries other than the Grand Duchy of Luxembourg. In addition, applications to register the Company and its sub-funds may be made in other non-European countries. The Company and its sub-funds are currently registered for offer and distribution in the Grand Duchy of Luxembourg and in the following jurisdictions: Austria, Bahrain, Belgium, Brunei, Chile, Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, Jersey, Korea, Lebanon, Macau, Malaysia, Malta, Netherlands, Norway, Oman, Poland, Portugal, Qatar, Saudi Arabia, Singapore, Spain, Sweden, Switzerland, Taiwan, United Arab Emirates and United Kingdom.

Responsibility of the Directors

The responsibility of the directors of the Company (the "Directors") is governed exclusively by Luxembourg law. With respect to these financial statements, the duties of the Directors are governed by general corporate law and the law of 19 December 2002 on, inter alia, the accounting and annual accounts of undertakings, as amended, and by the law of 17 December 2010 relating to undertakings for collective investment, as amended (the "2010 Law"). Since 1 July 2011, the Company is governed by Part I of the 2010 Law implementing the Directive 2009/65/EC into Luxembourg Law.

Remuneration Policy

HSBC Investment Funds (Luxembourg) S.A. ("HIFL") has implemented a remuneration policy pursuant to Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards to depositary functions, remuneration policies and sanctions (the "UCITS V Directive"), which was transposed into Luxembourg law on 1 June 2016 by way of the Luxembourg law of 10 May 2016.

The remuneration policy, which has been approved by HIFL's board of directors, includes measures to avoid conflicts of interest and seeks to promote sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profile and articles of incorporation of the Company nor impair compliance with HIFL's duty to act in the best interest of the Company.

The remuneration policy, which describes how remuneration and benefits are determined, is available at www.global.assetmanagement.hsbc.com/about-us/governance-structure, or on request from HIFL.

Total amount of remuneration paid by HIFL to all staff and paid by the investment advisers to their identified staff * during the 12 months period ending 31 March 2023 is as follows:

Fixed remuneration	USD 8,645,623
Variable remuneration	USD 4,575,788
Number of beneficiaries	55

of which, the disclosure of the fixed and variable remuneration of senior management within HIFL and of identified staff * of the investment advisers is:

Fixed remuneration	USD 7,028,269
Variable remuneration	USD 4,348,779
Number of beneficiaries	39

* identified staff are defined as members of staff whose actions have a material impact on the risk profile of the Company.

Directors' Report (continued)

Remuneration Policy (continued)

The annual review of the remuneration policy, including a review of the existing remuneration structure as well as implementation of the regulatory requirements and compliance with them, was completed during the year and no irregularities were identified. Furthermore, there were no material changes made to the remuneration policy in the past financial year.

Withdrawal of the UK from the EU

Following the end of the transition period all cross-border passporting rights to the UK for EU funds have ceased however, the UK's introduction of a Temporary Marketing Permissions Regime enables all funds that have registered into the regime to continue to be distributed in the UK and purchased by UK domiciled investors. The UK Government has brought forward domestic legislation to streamline the process to allow overseas (including EU) investment funds to be sold in the UK post-Brexit.

It is becoming increasingly clear that there will be more divergence between UK and EU regulations which may limit the cross-border activities that can take place. As at the date of the Financial Statements, the sub-funds continue to be recognised by the FCA and can be marketed to UK investors. The UK is continuing to consider regulatory changes post-Brexit. The nature and extent of such changes still remains uncertain, but may be significant.

Impact of Pandemics

Pandemics can impact global markets in several ways, including: (i) adding ongoing uncertainty to global markets as there is no clarity as to how long a pandemic will continue (ii) impeding regular business operations across many different businesses, including manufacturers and service providers; and (iii) slowing down or stopping international, national, and local travel. By way of an example, all of these factors and more have been seen in recent years with the global outbreak of COVID-19. Notwithstanding that COVID-19 cases are again on the rise coupled with a risk of new variants, the initial impact on global markets on certain industries has started to lessen however, the financial impact of the outbreak to date, and whether or not any new variant will give rise to further challenges, cannot be estimated reliably. The Board continues to monitor the situation and receives regular updates from the Management Company. As at 31 March 2023, to our knowledge, the impact of COVID-19 has not affected the Investment Managers' ability to execute the investment strategy of the sub-funds, nor has there been interruption to key service providers engaged by the Company.

Russia's invasion of Ukraine

Russia's invasion of Ukraine has had, and could continue to have, severe adverse effects on regional and global economic markets for securities and commodities. Following Russia's actions, various governments have issued broad-ranging economic sanctions against Russia including, among other actions:

- a prohibition on doing business with certain Russian companies, large financial institutions, officials and oligarchs;
- the removal by certain countries and the European Union of selected Russian banks from the Society for Worldwide Interbank Financial Telecommunications ("SWIFT"), the electronic banking network that connects banks globally; and
- restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions.

The current events, including sanctions and the potential for future sanctions, which include (but not limited to) those impacting Russia's energy sector, and other actions, and Russia's retaliatory responses to those sanctions and actions, could continue to have, an adverse effect on global markets performance and liquidity, thereby negatively affecting the value of the sub-funds' investments beyond any direct exposure to Russian issuers. They also give rise to material uncertainty and risk with respect to markets globally and the performance of the sub-funds and their investments or operations could be negatively impacted. Investors should be aware that the duration of the ongoing hostilities and the vast array of sanctions and related events cannot be predicted.

Impact of Ukraine/Russia crisis

The Board of Directors decided to suspend the HGIF Russia Equity sub-fund on 1 March 2022 until further notice. The situation continues to be monitored by the Board. Any subsequent decision that changes this status will be communicated to the investors as and when required.

Directors' Report (continued)

Impact of Ukraine/Russia crisis (continued)

The Board of Directors in conjunction with the Management Company continue to monitor the situation. Since 2 March 2022, all RUB denominated Russian Government Bonds and any associated coupons held in HGIF Global Emerging Markets Local Debt, HGIF Global Emerging Markets ESG Local Debt and HGIF Global Emerging Market Multi-Asset Income have been written down to 0.

Since 3 March 2022, all Russian equities held in HGIF Global Emerging Markets Multi-Asset Income, HGIF Global Equity Volatility Focused, HGIF BRIC Markets Equity and HGIF BRIC Equity have been marked down by 90%. For ADR/GDR, if the market price dropped by more than 90%, the stock was valued using the latest market price. Since 10 March 2022, all RUB denominated Russian equities held in HGIF Global Emerging Markets Multi-Asset Income, HGIF Global Equity Volatility Focused, HGIF BRIC Markets Equity and HGIF BRIC Equity, have been written down to 0.

The security Yandex denominated in USD and listed in the US stock exchange has been priced at 0 since 11 March 2022. This security is held by HGIF BRIC Markets Equity and HGIF BRIC Equity. The securities of Sberbank PJSC ADR, Rosneft IIGDR, and Severstal PJSC GDR have been priced at 0 since 2 June 2022. These securities are held by HSBC GIF Russia Equity and HSBC GIF BRIC Markets Equity.

The securities of Gazprom PJSC ADR, Lukoil PJSC, and Novatek PJSC GDR have been priced at 0 since 1 July 2022. These securities are held by HSBC GIF Russia Equity.

Due to further sanctions, Magnit PJSC GDR was also written down to 0, held in the HGIF Global Equity Volatility Focused, since 7 December 2022.

Last, due to further sanctions, the following securities held in HGIF Russia Equity were fair valued to 0: MMC Norilsk Nickel PJSC ADR(V0.1 Ord), Novolipetsk Steel PJSC GDR(V10 Ord) Reg S, TCS Group Holding PLC USD0.01 GDR (V1 Ord), Tatneft Sponsored ADR(V6 Ord) and X5 Retail Group NV GDR V.25

Corporate Governance Statement

The Board of Directors confirms its adoption of the ALFI (Association of the Luxembourg Fund Industry) Code of Conduct for Luxembourg Investment Funds (the "Code") and confirms its adherence to the principles of the Code at all times during the period.

Annual General Meeting

The next Annual General Meeting of the Company will be held on 29 September 2023.

Investment Advisers' Report

Market overview: 1 April 2022 to 31 March 2023

Global equities

Global equities fell over the year to 31 March in what proved to be a challenging and volatile period for investors. The pound's weakness meant that sterling returns were considerably better than returns in US dollars. While developed world markets rose in aggregate, emerging markets fell. Soaring inflation levels, tightening monetary policy, weakening economic growth and the situation in Ukraine all weighed on sentiment and caused markets to sell off. Russia's foray into Ukraine in late February triggered the fall in equities, with markets plummeting during the spring of 2022 as it became clearer that this tense situation was likely to drag on for some time. Markets recovered some of their returns in the final quarter of the year as they rallied on hopes that rising interest rates would peak at some stage in 2023. The rally continued into early 2023 until it was stopped in its tracks by turmoil in the banking sector, which featured the bankruptcy of two sizeable US regional banks and financial distress at Credit Suisse, which was finally taken over by UBS.

Rising inflation was perhaps the overriding factor that grabbed investors' attention throughout the period. It shot up through the year, rising to decade-high levels in many countries. In the US, it hit a 40-year high of 9.1% by June, before declining thereafter, while in the UK, it rose even further to 11.1% in October, a 41-year high. In the eurozone, it touched an all-time high of 10.6% in October.

The world's central banks began to tighten monetary policy. The US Federal Reserve (Fed) raised interest rates for the first time this cycle in March 2022, as widely expected, before increasing them to a 15-year peak of 5.0% by 31 March. This included four consecutive 75 basis point (bp) increases for the first time in the Fed's history. The Bank of England (BoE) raised interest rates at every policy meeting through 2022, taking interest rates from 0.75% to 4.25% over the period. Its 25 bp increase in March was its eleventh consecutive hike. Meanwhile, the European Central Bank (ECB) appeared initially reluctant to raise rates, concerned about the economic effects. However, it did duly hike rates in July, and did so again a further four times, taking the benchmark rate to 3.5%.

The ongoing situation in Ukraine, rising inflation and the cost-of-living pressures on consumers meant that the outlook for economic growth deteriorated. In the US, fears that the country might fall into recession came to pass with the confirmation of a further fall in GDP in the second quarter of 0.6%, following a 1.6% contraction in the first quarter. GDP recovered in the third and fourth quarters. Growth remained meagre and gradually weakened in the UK, the eurozone, Japan and Mainland China, with the risk of a potential recession a constant threat.

US equities

The US market fell over the period, affected by the deteriorating global economic outlook, the surge in inflation – and the Fed's response to it – and Russia's approach to Ukraine. The market followed a similar pattern to other global markets: it fell through much of 2022 on inflation and rising rate concerns and as tensions between Russia and Ukraine escalated; it recovered from the autumn and into early 2023 on growing hopes that the pace of the Fed's interest rate hikes might ease; and it fell again as a mini-banking crisis emerged that saw two regional banks, SVB Financial and Signature Bank, go bankrupt.

Regarding Ukraine, the US moved quickly to implement sanctions against Russia and soon banned all imports of Russian oil. US relations with Mainland China were also tense, given the latter's support for Russia and threats towards Taiwan. The S&P 500 Index slumped into bear-market territory (a fall in excess of 20% from peak), in US dollar terms, in the first half of 2022, marking its steepest first-half decline since 1970. The sharp sell-off in stocks also reflected growing fears that the US economy was headed for recession.

Investment Advisers' Report (continued)

US equities (continued)

Rising inflation was another key factor influencing the market. The hope that higher inflation was just a temporary factor soon dissipated as the headline figure rate rose to a 40-year high of 9.1% in June 2022, before moderating thereafter, falling in the eight successive months to 6.0% in February. The rise in inflation largely reflected spiralling energy costs, especially gasoline. Inflationary pressures prompted the Fed to raise interest rates to a 15-year high of 5.0% by the end of the period, including four successive 75 bp rises for the first time in the Fed's history. Fed officials indicated that the central bank would need to continue to increase interest rates to stamp out inflation, even at the expense of causing economic contraction. However, in 2023, there were growing hopes among investors that the Fed would ease back on its monetary tightening, encouraged by a softening in the tone of statements emanating from the central bank, even though Fed Chairman Jerome Powell insisted that rates would likely stay higher for longer and would not be lowered during 2023.

The economy fell into recession in the first half of the year as a first-quarter annualised fall of 1.6% was followed by one of 0.6% in the second quarter. However, it recovered in the third and fourth quarters, growing by 3.2% and 2.6%, respectively. Job creation remained relatively robust, and the unemployment rate stayed close to generational lows. The US dollar surged to an over 20-year high in September following the Fed's monetary policy tightening but fell back thereafter.

Europe ex-UK equities

European ex UK equities rose over the period, materially outperforming other world markets in aggregate. European markets fell early in the period for similar reasons to other world markets, namely soaring inflation levels, the consequent tightening of monetary policy by the ECB, economic weakness and rising geopolitical concerns, notably the situation in Ukraine. Equities rallied strongly in the final weeks of 2022 and early 2023 as hopes rose that central banks, particularly the Fed and the ECB, might slow the pace of their monetary tightening. Growing financial turmoil among banks and the demise of Credit Suisse – forcibly sold to UBS to avoid bankruptcy – caused a sell-off in February, before markets again recovered in March on the belief that the turmoil in banks was unlikely to grow into a full-scale financial crisis.

Within Europe, Denmark was the strongest performer over the period, while Italy, Spain and Ireland all notably outperformed. Norway was the weakest market and fell materially. Switzerland and Sweden were flat and underperformed.

Rising inflationary pressures were another key concern for markets. Annual consumer inflation continued to break new record-high levels, rising to an all-time high of 10.6% in October, mainly due to steeply surging energy prices. Thereafter, inflation fell over the following five months, hitting 6.9% in March as energy prices eased. The ECB had initially kept monetary policy relatively loose, even as inflation levels surged ahead of its 2% mid-term target level, as it judged the risks to growth from the pandemic were greater than the risks from inflation. However, the central bank became more hawkish through the summer months as it acknowledged the growing risk that inflation was becoming entrenched. Expectations grew that the ECB would raise rates in July, which it duly did for the first time in several years. It proceeded to raise rates a further four times, taking the benchmark interest rate to 3.5% from zero. The euro recovered in the second half of the period as the ECB tightened its policy. It had fallen below parity against the dollar in the late summer but rebounded thereafter.

Economic growth remained relatively meagre. GDP grew by 0.9% quarter on quarter in the second quarter of 2022 but fell to 0.4% in the third quarter and saw zero growth in the fourth quarter as consumer spending weakened. Unemployment gently declined through the year, with the rate dropping to 6.6% – a record low – in January. Consumer and business confidence indicators in the eurozone deteriorated for much of the period, reflecting growing pessimism about the outlook for the economy and the squeeze on consumers and businesses from rising costs. However, by the end of the period, they were showing signs of recovery.

Investment Advisers' Report (continued)

UK equities

The UK market produced a positive return and outperformed other global markets over the period, although they underperformed Europe ex-UK equities. Nevertheless, it faced many of the same issues as other countries, such as rising inflation and interest rates, slowing economic growth and rising geopolitical concerns, most pertinently Russia's foray into Ukraine. As with other world markets, UK equities dropped significantly early in the period as tensions between Russia and Ukraine escalated.

Much political and economic focus in the UK was on the growing cost-of-living crisis, with substantial increases expected in home energy prices along with the proposed national insurance hike. This produced huge uncertainty and concern among consumers and unsettled the market.

Annual inflation rose sharply, reaching 11.1% in October, marking the highest level for over 40 years. As inflation rose and appeared to become more entrenched, the BoE became more hawkish. It raised interest rates at every policy meeting through 2022, taking interest rates from 0.75% to 4.25% over the period. Its 25 bp increase in March was its eleventh consecutive hike. At one point, the central bank suggested that inflation could rise to more than 13% by the end of 2022. However, it fell mildly, touching 10.1% in January before rising again to 10.4% in February as food price inflation escalated.

Economic conditions continued to worsen over the period. The economy barely grew on a quarterly basis in the final three quarters of the year. However, there were mild signs of recovery towards the end of the period and increased optimism that the UK could avoid a recession in 2023 – one that had been predicted by the BoE and the IMF. Unemployment declined through the period, falling to 3.5% in the three months to September – the lowest rate since 1974 – before finishing the period at 3.7%.

What was wholly unique to the UK was the extraordinary political drama in late September, as UK assets and sterling were undermined by Liz Truss's mini budget. Truss was forced to resign, becoming the shortest-serving prime minister in history. This followed the resignation of Prime Minister Boris Johnson, who was forced out despite surviving a no-confidence vote among Tory MPs. Truss was replaced by Rishi Sunak, who set about reversing most of Truss's tax-cutting proposals. UK Chancellor Jeremy Hunt produced a public services cost-cutting and tax-raising budget that sought to re-establish the UK's tarnished reputation for fiscal prudence. By the end of the period, sterling had recovered from its all-time low of near-parity against the US dollar at the end of September, and bond yields had declined from their recent highs.

Japan equities

Japanese equities eked out a positive return over the period due to a recovery in the first three months of 2023. Covid-19-related lockdowns had largely ended by the summer months of 2022, bringing relief to the country. However, Russia's foray into Ukraine saw the market drop, especially as commodity prices surged, with Japan being heavily dependent on imported commodities. As Japan is a large importer of energy, the huge rise in wholesale energy costs, notably oil, combined with the weakness in the yen caused the country's habitual trade surplus to fall into deficit. Japanese equities had a better second half of 2022, recovering along with other world markets on the hope that the pace of global interest rate hikes overseas might slacken into 2023, and that the Japanese economy might begin to break out of its long-standing deflationary period as inflation rates began to rise to generational highs. Equities rallied in the final weeks of the period as hopes grew that the mini-banking crisis in the US and Europe would not evolve into a full-blown global financial crisis.

However, while inflation began to pick up, it never climbed to the elevated rates seen in many other developed countries, and the Bank of Japan (BoJ) did not radically alter its loose monetary policy stance. Consumer inflation rose steadily over the year and exceeded the BoJ's mid-term target of 2%. From 1.2% in March 2022, it hit a 41-year high of 4.3% in January. While allowing the upper limit of its previously targeted 0% for 10-year government bonds to rise to 0.25%, the BoJ attempted to limit any unwelcome rise in bond yields above that level. However, near the end of 2022, the BoJ loosened the bands further, allowing yields to rise to 0.5%. The market took this as a sign that the BoJ was seriously considering altering its monetary policy stance, which had been ultra-easy for several years.

Investment Advisers' Report (continued)

Japan equities (continued)

The economy remained fragile. While GDP rose by 4.7% in the second quarter, on an annualised basis, it fell by 1.1% in the third quarter. The economy avoided recession in the final quarter of 2022 as GDP rose by 0.1%, although this was revised lower from an initial figure of 0.6% growth. The BoJ's Tankan survey – a quarterly indicator of economic sentiment across the economy – weakened during the period. The headline large manufacturing diffusion index had fallen from a recent peak of +18 in the third quarter of 2021 to +7 in the fourth quarter of 2022.

The protracted weakness in the yen against the US dollar, reflecting the BoJ's easy monetary stance, which saw it fall to below 150 – a level not seen for over 30 years – helped to boost the overseas earnings of many of Japan's largest companies. However, the yen had recovered to close at around the 133 level by 31 March.

Asia ex-Japan equities

Asian ex-Japan equities weakened over the year to 31 March. Economic and earnings growth generally slowed, while inflationary worries escalated and central banks in the region tightened their monetary policies. The strength in the US dollar was a further headwind for markets, while there were also concerns about renewed geopolitical tensions.

Of the major markets in the region, South Korea and Taiwan were the weakest, as geopolitical tensions with North Korea and Mainland China, respectively, unsettled investors. The deterioration in the global economic outlook was a further headwind to both of these export-gearred countries. India was also weaker despite signs of peaking inflation. Mainland China produced a mildly positive return as the country eased its tight Covid-19-related restrictions towards the end of 2022. Indonesia and Thailand were relatively strong and outperformed the region.

Central banks across the region tightened their monetary policy in the face of pronounced inflationary pressures. Although less directly impacted by the tensions between Russia and Ukraine, a key concern for several markets was the surge in energy prices as a result of the western sanctions imposed on Russia. As with western countries, inflation rates hit decade-high levels in several Asian economies. The main exception was Mainland China, where the annual consumer inflation rate dropped to just 1.0% in February, having peaked at 2.8% in September, as both food and non-food prices moderated. Owing to these minimal price pressures and weaker economic trends, the People's Bank of China (PBoC) kept liquidity abundant in the money markets over the period. The growing difficulties in the property market saw the PBoC continuing to pump large amounts of liquidity into the system and cutting loan rates on certain maturities.

Mainland China's economy showed signs of slowing as bottlenecks across many industries and rising energy prices negatively impacted the economy. GDP rose by just 3% in 2022, the weakest rate for 50 years bar one year (1976). The market was also disappointed by the government's official target of just 5% for 2023. India was an exception to most other economies over the period as growth accelerated between the first and second quarters, rising by 4.1% year on year in the first quarter and by 13.5% in the second quarter, before slowing in the third and fourth quarters of 2022.

Emerging market equities

Emerging markets weakened over the period and underperformed developed world markets as worries about still-high levels of Covid-19 in certain countries, stalling economic recovery, higher inflation, the strong US dollar and the gradual tightening in monetary policy caused market volatility and weakened investor sentiment.

In Asia, South Korea and Taiwan were weak as geopolitical tensions with North Korea and Mainland China, respectively, caused unrest. The deterioration in the global economic outlook was a further headwind to both of these export-gearred countries. India was also weaker despite signs of peaking inflation. Mainland China produced a mildly positive return as the country eased its tight Covid-19-related restrictions towards the end of 2022. Indonesia and Thailand were relatively strong and outperformed the region. Latin American markets underperformed Asian ones, largely due to the weakness in Brazil as socialist President Lula da Silva's presidential victory was taken badly by investors, who fretted about his policies. Argentina and Mexico were strong. Eastern European markets recovered from the shock of Russia's foray into Ukraine and produced a positive return in aggregate. Turkey was by far the strongest emerging market in 2022, as the central bank cut interest rates despite surging inflation that had topped 85% in October but fell to 55% in February.

Investment Advisers' Report (continued)

Emerging market equities (continued)

Inflation escalated as global energy costs soared and were exacerbated by the strength in the US dollar. The dollar strength created a further headwind for markets, although its decline in the final months of the period brought relief to most emerging markets and they rallied in aggregate.

Mainland China's economy showed signs of slowing as bottlenecks across many industries and rising energy prices negatively impacted the economy. GDP rose by just 3% in 2022, the weakest rate for 50 years bar one year (1976). The market was disappointed by the government's official target of just 5% for 2023. India was an exception to most other economies over the period as growth accelerated between the first and second quarters, rising by 4.1% year on year in the first quarter and by 13.5% in the second quarter, before slowing in the third and fourth quarters of 2022. Brazil's economy grew by 0.9% quarter on quarter in the second quarter, but eased thereafter, rising by 0.3% in the third, before falling by 0.2% in the final quarter of the year as the manufacturing sector slumped and high interest rates took their toll.

UK bonds

UK bonds fell substantially over the year to 31 March 2023 as inflation rose and the BoE responded with a series of consecutive interest rate hikes. The UK gilt market markedly underperformed other global government bond markets as gilt yields rose relatively more, reflecting higher inflation levels in the UK and a volatile political backdrop that featured a double change in prime minister in a very short period. UK corporate bonds also fell but did relatively better than government bonds as investors became more risk tolerant in the second half of the period.

Annual inflation rose sharply, reaching 11.1% in October, marking the highest level for over 40 years. As inflation rose and appeared to become more entrenched, the BoE became more hawkish. The central bank raised interest rates at every policy meeting through 2022, taking interest rates from 0.75% to 4.25% over the period. Its 25 bp increase in March was its eleventh consecutive hike. The BoE suggested that inflation could rise to more than 13% by year-end – although it had fallen back to 10.1% in January, before rising to 10.4% in February as food price inflation escalated – while forecasting an economic recession from late 2022 until early 2024.

Economic conditions continued to worsen over the period. The economy barely grew on a quarterly basis in the final three quarters of the year. However, there were mild signs of recovery towards the end of the period and increased optimism that the UK could avoid a recession in 2023, one that had been predicted by the BoE and the IMF in the second half of 2022. Unemployment declined through the period, falling to 3.5% in the three months to September – the lowest rate since 1974 – before finishing the period at 3.7%. Wages rose in nominal terms but were down in real terms.

The 10-year yield rose to over 4.4% in the autumn, marking its highest level in 14 years. This was up from approximately 1.7% at the beginning of the period. By the end of the period, the yield had fallen back to approximately 3.5%. The yield spread between two-year and 10-year gilts inverted in the late summer. The inversion expanded to a negative spread of almost 30 bps in February but had recovered to marginally positive by the end of the period. An inverted yield curve is often seen as an indicator of economic recession.

Investment Advisers' Report (continued)

Global bonds

Global bond markets fell over the period, despite stabilising in the first quarter of 2023. For 2022 as a whole, bond markets experienced their worst year in decades (under some measures), as inflation rose and global central banks began to materially adjust their monetary policy stances. Nearly all sectors of the bond market declined.

Rising inflation was the key factor behind the weakness in government bond markets. It shot up through the year, rising to decade-high levels in many countries. In the US, it hit a 40-year high of 9.1% by June, before declining thereafter. In the UK, it rose even further to 11.1% in October, a 41-year high. In the eurozone, it touched an all-time high of 10.6% in October.

The world's central banks began to tighten monetary policy. The Fed raised interest rates for the first time this cycle in March 2022, as widely expected, before increasing them to a 15-year peak of 5.0% by 31 March. This included four consecutive 75 bp increases for the first time in the Fed's history. The BoE raised interest rates at every policy meeting through 2022, taking interest rates from 0.75% to 4.25% over the period. Its 25 bp increase in March was its eleventh consecutive hike. Meanwhile, the ECB appeared initially reluctant to raise rates, concerned about the economic effects. However, it did duly raise rates in July, and did so again a further four times, taking the benchmark rate to 3.5%.

The US 10-year Treasury yield climbed to over 4.2% in October, its highest level for 15 years. It declined thereafter, finishing the period at around 3.5%, although it remained volatile as hawkish sentiment vied with dovish sentiment, and investors seemed to hang upon every word coming from the Fed. Short rates soared even more, hitting 5% in early March (double their level at the beginning of the period), before dropping precipitously to end March at around 4%. The yield curve became inverted from July – most significantly between two-year and 10-year Treasuries – which is often seen as a precursor to a recession. The inversion, which had grown to 100 bps in March, was the widest seen in the US government bond market since the early 1980s, although it had contracted somewhat by the end of the period. Eurozone government bond markets underperformed the US. The German 10-year bund yield turned positive early in 2022 for the first time since May 2019 and had risen to nearly 2.8% in March, a 15-year high, before declining in the final weeks of the period. Ten-year gilts followed a similar pattern but underperformed eurozone bond markets. The 10-year yield rose to over 4.4% in the autumn, marking its highest level in 14 years. This was up from approximately 1.7% at the beginning of the period. By the end of the period, the yield had fallen back to approximately 3.5%. The yield spread between two-year and 10-year gilts inverted in the late summer. The inversion fell to a negative spread of almost 30 bps in February but had recovered to marginally positive by the end of the period.

Audit report

To the Shareholders of
HSBC Global Investment Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of HSBC Global Investment Funds (the “Fund”) and of each of its sub-funds as at 31 March 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 March 2023;
 - the combined statement of operations and changes in net assets for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended;
 - the portfolio of investments and other net assets as at 31 March 2023; and
 - the notes to the financial statements, which include a summary of significant accounting policies.
-

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu*

*Cabinet de révision agréé, Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d'entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Global Credit Floating Rate Fixed Term Bond 2023 - 1 that was put into liquidation on 5 July 2023 and Mexico Equity where an intention to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

*** Dealing and Official Net Asset Value calculation of Russia Equity sub-fund have been suspended since 25 February 2022 following the closure of Moscow Stock Exchange. An indicative Net Asset Value as at 31 March 2023 has been calculated for presentation purpose in the financial statements only. The Pricing Committee and Management Company have agreed and instructed to write down to zero all the local RUB-denominated Russian equities held in the Portfolio of Investments.

All Net Asset Values per share are disclosed in sub-fund currency.

Statement of Derivatives

as at 31 March 2023 (continued)

Futures

During the course of the financial year ended 31 March 2023, the Company has entered into financial futures contracts. Upon entering into a contract the Company deposits and maintains cash as collateral. The cash margin calls needed to cover the required contract margins are adjusted daily in the Company cash accounts, and results on open positions are considered as realised at that point in time. The margin is calculated as the difference between the value of the contract at previous valuation day and the financial future value at the valuation day. The cash held in margin accounts is included in Cash at Bank in the statement of net assets.

As at 31 March 2023, the Company has the following open futures positions:

Notes to the Financial Statements

for the year ended 31 March 2023

1. Basis of presentation

HSBC Global Investment Funds (the "Company") is incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable capital (Société d'Investissement à Capital Variable or "SICAV"). The capital comprises various separate portfolios (a "sub-fund") consisting of securities, cash and other sundry assets and liabilities and each sub-fund may comprise various classes of shares being distinct from the other due to their fee structure, distribution policy and target investors. The accompanying financial statements present the assets and liabilities and the statement of operations and changes in net assets of the individual sub-funds and of the Company taken as a whole. The financial statements of each individual sub-fund are expressed in the currency designated in the Prospectus for that particular sub-fund and the combined financial statements of the Company are expressed in United States Dollars (USD). The financial statements have been prepared in accordance with the format prescribed by the Luxembourg authorities for Luxembourg investment companies under the going concern basis of accounting except for the sub-funds Global Credit Floating Rate Fixed Term Bond 2022 – 1 and Euro Convertible Bond. The two sub-funds were put into liquidation respectively on 10 January 2023 and 23 March 2023. As such, the financial statements for these sub-funds have been prepared on a non-going concern basis.

For the sub-funds for which the financial statements have been prepared on a non-going concern basis, the following accounting policies differ from those described in the following notes:

- Expected liquidation expenses (if any) will be covered as part of the Operating, Administrative and Servicing Fees;
- Any remaining formation expenses have been fully expensed;
- The valuation of the sub-funds' investments are based on their net realizable value.

The application of the non-going concern basis of accounting has not led to adjustments to the sub-funds' published net asset value.

The combined financial statements of the Company are expressed in USD.

The combined statement of net assets and the combined statement of operations and changes in net assets are the sum of the statements of each sub-fund.

The Company is an officially registered investment fund under part I of the amended 2010 Law and qualifies as a UCITS fund under the European Directive 2009/65/EC.

Certain sub-funds of the Company are authorised by the Hong Kong Securities and Futures Commission under Section 104 of the "Securities and Futures Ordinance".

In the Prospectus and in the various reports, the short names of the sub-funds are used. The complete name of each sub-fund consists of "HSBC Global Investment Funds" plus the short name of the sub-fund.

From 1 April 2022 to 31 March 2023:

a) The following sub-funds have been closed:

- ▶ Global Credit Floating Rate Fixed Term Bond 2022 – 1 on 10 January 2023
- ▶ Euro Convertible Bond on 23 March 2023

b) The following sub-funds have been launched:

- ▶ Global Sustainable Equity Income on 18 May 2022
- ▶ Global Equity Circular Economy on 17 June 2022
- ▶ Global Sustainable Long Term Equity on 2 September 2022
- ▶ Global Emerging Markets Corporate Sustainable Bond on 27 September 2022
- ▶ ESG Short Duration Credit Bond on 30 January 2023

2. Accounting policies

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the Company's financial statements.

a) Accounting convention

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds.

Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

2. Accounting policies (continued)

b) Assets and portfolio securities valuation

Portfolio securities and/or financial derivative instruments which are listed on an official stock exchange are valued at the last available price on the principal market on which such securities are traded. Securities traded on other organised markets are valued at the last available price or yield equivalents obtained from one or more dealers in such organised markets at the time of valuation.

If such prices are not representative of their fair value, all such securities and all other permitted assets shall be valued at their fair value at which it is expected they may be resold as determined in good faith by or under the direction of the Board of Directors.

The assets of the sub-funds are valued using prices available at different times during the day of 31 March 2023, being the last business day of the reporting period.

The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are valued in accordance with market practice as follows:

Options

Outstanding options traded on a regulated market are valued based on the intraday price or the last available market price of the instruments.

OTC options are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty.

The market value of options is included in the statement of net assets under the headings "Unrealised Gain/(Loss) on Options".

The realised gains/(losses) and change in unrealised appreciation/(depreciation) on options are disclosed in the statement of operations and changes in net assets respectively under the headings "Realised Profit/(Loss) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

Futures Contracts

Upon entering into a futures contract, the Company is required to deposit with the broker, cash or securities in an amount equal to a certain percentage of the contract amount which is referred to as the initial margin account. Subsequent payments, referred to as variation margin, are made or received by each sub-fund periodically and are based on changes in the market value of open futures contracts.

The unrealised appreciation/(depreciation) on futures contracts is disclosed in the statement of net assets under "Unrealised Gain on Futures" and "Unrealised Loss on Futures". Changes in the market value of open futures contracts are recorded as unrealised appreciation/(depreciation) in the statement of operations and changes in net assets under "Change in Unrealised Appreciation/(Depreciation) on Derivatives". Realised gains or losses, representing the difference between the value of the contract at the time it was opened and the value at the time it was closed, are reported at the closing or expiration of futures contracts in the statement of operations and changes in net assets under "Realised Profit/(Loss) on Derivatives". Securities deposited as initial margin account are designated in the Portfolio of investments and other Net Assets and cash deposited is recorded in the statement of net assets in "Cash at bank". A receivable and/or a payable to brokers for the daily variation margin is also recorded in the statement of net assets under caption Cash at Bank or Bank Overdraft.

Forward Foreign Exchange Contracts

The values of the Forward Foreign Exchange Contracts are adjusted daily based on the applicable forward exchange rate of the underlying currency for the remaining period, until maturity. Changes in the value of these contracts are recorded as unrealised appreciation or depreciation until the contract settlement date. When the forward contract is closed, the sub-fund records a realised gain or loss equal to the difference between the value at the time the contract was opened and the value at the time it was closed.

Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

2. Accounting policies (continued)

b) Assets and portfolio securities valuation (continued)

Forward Foreign Exchange Contracts (continued)

The unrealised appreciation/(depreciation) on Forward Foreign Exchange Contracts is disclosed in the statement of net assets under "Unrealised Gain on Forward Foreign Exchange Contracts" and "Unrealised Loss on Forward Foreign Exchange Contracts". Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under "Realised Profit/(Loss) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

Interest Rate Swaps

Interest rate swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised Gain on Swaps" and "Unrealised Loss on Swaps". Realised gains/(losses) and changes in unrealised appreciation/(depreciation) as a result thereof are included in the statement of operations and changes in net assets respectively under "Realised Profit/(Loss) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

Credit Default Swaps

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party (the protection buyer) pays the other (the protection seller) a fixed periodic coupon for the specified life of the agreement in return for a payment contingent on a credit event related to the underlying reference obligation.

If a credit event occurs, the protection seller would be obliged to make a payment, which may be either: (i) a net cash settlement equal to the notional amount of the swap less the auction value of the reference obligation or (ii) the notional amount of the swap in exchange for the delivery of the reference obligation. Selling protection effectively adds leverage to a Company's portfolio up to the notional amount of swap agreements.

Credit default swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised Gain on Swaps" and "Unrealised Loss on Swaps". Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Realised Profit/(Loss) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives."

Total Return Swaps

A total return swap is a bilateral agreement in which each party agrees to exchange payments based on the performance of an underlying instrument represented by a security, commodity, basket or index thereof for a fixed or variable rate. One party pays out the total return of a specific reference asset, and in return, receives a regular stream of payments. The total performance will include gains and losses on the underlying, as well as any interest or dividends during the contract period according to the type of underlying. The cash flows to be exchanged are calculated by reference to an agreed upon notional amount or quantity. To the extent the total return of the reference asset underlying the transaction exceeds or falls short of the offsetting payment, the Company will receive a payment from or make a payment to the counterparty.

Total return swaps are marked to market at each NAV calculation date. The estimated market value is based on the valuation elements laid down in the contract, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised Gain on Swaps" and "Unrealised Loss on Swaps". Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Realised Profit/(Loss) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

Collective Investment Schemes

Shares or units in underlying open-ended investment sub-funds are valued at their last available Net Asset Value reduced by any applicable charges.

Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

2. Accounting policies (continued)

b) Assets and portfolio securities valuation (continued)

Money Market Investments

The Company uses the amortized cost method of valuation in valuing its portfolio of financial instruments in the form of short term debt (such as commercial paper, certificate of deposit, treasury bills). In addition, in the rare circumstances where a fixed income instrument with a time to maturity exceeding 90 days becomes stale, the Company will effectively value it at amortised cost until such date when it is either sold or its market becomes active again.

Mortgage related securities - To Be Announced securities (TBAs)

TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of the purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of the purchase, the principal value has not been finalised. TBA positions are disclosed in the portfolio of investments and other net assets. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Payable on Investment Purchase" in the statement of net assets. Negative positions in the portfolio of investments and other net assets reflect the Fund's sale commitments of TBAs. The amount corresponding to the receivable due when the transaction is settled, is disclosed under "Receivable on Investment Sold" in the statement of net assets. The realised gains/(losses) on TBAs and changes in unrealised appreciation/(depreciation) are disclosed in the statement of operations and changes in net assets respectively under the headings "Realised Profit/(Loss) on Investments" and "Change in Unrealised Appreciation/(Depreciation) on Investments".

c) Income and expenses

Dividends are accounted for on an ex-dividend basis. Dividends are reflected in the statement of operations and changes in net assets, net of withholding taxes, under the caption "Investment Income, net".

Interest income on debt securities is accrued on a day-to-day basis. In the case of debt securities issued at discount or premium to maturity value, the total income arising on such securities, taking into account the amortisation of such discount or premium on an effective interest rate basis, is spread over the life of the security. Interest income on bonds are accounted for using the effective interest rate ("EIR") method. Interest income on debt securities are reflected in the statement of operations and changes in net assets under the caption "Investment Income, net".

The interest income / expense on interest rate swap contracts (IRS) are accrued on a day-to-day basis. The net interest income / expense on interest rate swap contracts (IRS) are reflected in the statement of operations and changes in net assets under the caption "Investment Income, net".

d) Foreign exchange

The cost of investments, income and expenses in currencies other than the sub-funds' relevant reporting currency have been recorded at the rate of exchange ruling at the time of the transaction. The market value of investments and other assets and liabilities in currencies other than the relevant reporting currency have been converted at the rates of exchange ruling at 31 March 2023.

e) Realised profit/(loss) on sale of investments

Realised profit/(loss) on sale of investments is the difference between the historical average cost of the investment and the sale proceeds (excluding any transaction expenses as further explained in Note 5).

f) Foreign currency translation

The reference currency of the Fund is USD and the combined statements are expressed in that currency.

The books and records of each sub-fund are denominated in the reference currency of the corresponding sub-fund.

Income and expenses, assets and liabilities expressed in currencies other than the reference currency of the Fund are converted at exchange rate prevailing at year-end.

Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

2. Accounting policies (continued)

f) Foreign currency translation (continued)

Here are the main exchange rates applied at year-end.

1 USD = EUR 0.920429

SGD 1.32955

g) Segregated liability

The Company has segregated liability between its sub-funds; meaning, the assets of a sub-fund are exclusively available to satisfy the rights of shareholders in relation to that sub-fund and the rights of creditors whose claims have arisen in connection with the creation, operation and liquidation of that sub-fund.

h) Securities lending

The Company may enter into Securities Lending transactions by which a counterparty transfers securities subject to a commitment that the borrower will return equivalent securities at a future date or when requested to do so by the transferor, that transaction being considered as securities lending for the counterparty transferring the securities and being considered as securities borrowing for the counterparty to which they are transferred.

The Company will ensure that it is able at any time to recall any securities that has been lent out or terminate any Securities Lending agreement into which it has entered

All revenues (less transaction costs) from Securities Lending transactions are accrued to the relevant sub-fund based on information confirmed by the Lending Agent.

Detail on Security Lending transaction is disclosed in Note 12 of the current report.

To guarantee this transaction, the relevant sub-fund receives collateral. Securities on loan are delivered to a third party broker, the assets lent continue to be valued as part of the portfolio of the relevant sub-fund. Upon termination of a loan, the relevant sub-fund is required to return to the borrower the posted collateral. This remuneration is accounted for in the statement of operations and changes in net assets under "Investment income, net".

i) Spot foreign currency transactions

Unsettled spot foreign currency transactions as at 31 March 2023 are recorded under "Receivable on Unsettled Spot Foreign Currency Transactions" and "Payable on Unsettled Spot Foreign Currency Transactions" in the statement of net assets.

j) Trailer fees and rebates

The Company pays management fees to the Management Company. Trailer fees are either taken out of the management fees or the Management Company may instruct the Company to pay a portion of the management fees directly out of the assets of a sub-fund to a recognised intermediary. In both cases, the management fees due are reduced accordingly.

3. Share capital

The Company has issued either A, B, E, F, I, J, K, L, M, N, P, R, S, SP, U, W, X, Y, YP, Z and ZP Shares to investors in one or several sub-funds as detailed below.

Within each Share Class of a sub-fund, the Company shall be entitled to create different sub-classes, distinguished by their distribution policy (Capital Accumulation (C) and Distribution (D) Shares), their reference currency, their hedging activity (H) and/or by any other criteria stipulated by the Board of Directors.

All share classes are available as both "Capital Accumulation" and "Distribution" shares.

Class	Description	Minimum Initial Investment Minimum Holding (in US Dollar or equivalent amount in a major currency)
		5,000

Class Z	Z Shares are available to investors who have entered into a discretionary management agreement with an HSBC Group entity and to investors subscribing via distributors selected by the Global Distributor provided that such investors qualify as institutional investors within the meaning of article 174 of the 2010 Law.	USD 1,000,000
Class ZP*	ZP Shares are available to investors who have entered into a discretionary management agreement with an HSBC Group entity and to investors subscribing via Distributors selected by the Global Distributor provided that such investors qualify as institutional investors within the meaning of article 174 of the 2010 Law.	USD 1,000,000

* Successive J, L, M, R, YP and ZP Share Classes in a given sub-fund may be numbered 1, 2, 3... and would be referred to as J1, J2, J3 (...), L1, L2, L3 (...), M1, M2, M3 (...), N1, N2, N3 (...), R1, R2, R3 (...), YP1, YP2, YP3 (...) and ZP1, ZP2, ZP3 (...).

** Successive S Share Classes will be issued in one or different sub-funds, numbered 1, 2, 3 etc. and named S1, S2, S3 etc. for the first, second and third S Class launched respectively.

The Board of Directors of the Company is authorised to issue different Classes of Shares in one or more sub-funds. Details of the characteristics of such Share Classes offered shall be determined at the sole discretion of the Board of Directors. In case of the creation of any additional Classes of Shares, the Prospectus shall be updated.

The subscription proceeds of all Shares in a sub-fund are invested in one common underlying portfolio of investments. All Shares of the same Class have equal rights and privileges. Each Share is, upon issue, entitled to participate equally in assets of the relevant class of the sub-fund to which it relates on liquidation and in dividends and other distributions as declared for such sub-fund. The Shares shall carry no preferential or pre-emptive rights and each whole Share shall be entitled to one vote at all meetings of shareholders.

The Board of Directors may suspend the right to vote of any shareholder who does not comply with his/her/its obligations set out in the Articles of Incorporation and/or any document (including any application form) stating his/her/its obligations towards the Company and/or the other shareholders. In case the voting rights of one or more shareholders are suspended in accordance with the above paragraph, such shareholders shall be sent the convening notice for any general meeting and may attend the general meeting but their Shares shall not be taken into account for determining whether the quorum and majority requirements are satisfied. Any shareholder may undertake (personally) not to exercise his/her/its voting rights in respect of all or part of his/her/its Shares, temporarily or indefinitely.

The minimum initial investment amount may be waived or reduced at the discretion of the Board of Directors of the Company.

Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

3. Share capital (continued)

Share Class Denominations and Successive Classes:

The Share Classes issued in the different sub-funds are designated by their class name, followed by their distribution characteristics and, if applicable, their specific hedging policy and the currency into which the Base Currency is hedged. This means that for example Shares issued in Class A which are distributing income and applying a hedging policy to Euro, as defined above, would be identified as ADHEUR whereas Class I Shares accumulating income would be identified as IC.

Distribution Shares are identifiable by a "D" following the sub-fund and Class names (e.g.: Class AD), with the exception of Monthly Distribution Shares which are identifiable by a "M" following the sub-fund and Class names (e.g.: Class AM), Bi-Monthly Distribution Shares which are identifiable by a "B" following the sub-fund and Class names (e.g.: Class AB), Quarterly Distribution Shares which are identified by a "Q" following the sub-fund and Class names (e.g. Class AQ) and Semi-Annual Distribution Shares which are identified by a "S" following the sub-fund and Class names (e.g. Class AS).

Within each Share Class of a sub-fund, separate currency hedged classes may be issued (suffixed by "H" or "O" and the currency into which the Base Currency is hedged or the currency into which the sub-fund total assets are primarily invested in, is hedged. These currency hedged share classes shall be named: "ACHEUR" or "ACOEUR" for a Capital-Accumulation Share Class hedged into Euro). Any fees of the Administrator or other appointed parties relating to the execution of the currency hedging policy shall be borne by the relevant currency hedged class. These fees are in addition to the operating, administrative and servicing expenses detailed below. Any gains or losses shall also accrue to the relevant currency hedged class.

4. Charges and expenses

a) Explanation of the charging structure

Investment in the Company is generally offered via charging structures, as represented by the A, B, E, F, I, J, K, L, M, N, P, R, S, SP, U, W, X, Y, YP, Z and ZP Classes of Shares.

HSBC Investment Funds (Luxembourg) S.A. (the "Management Company") is entitled, in respect of each Class of Shares, to a management fee to cover all investment management, investment advisory and distribution services provided in relation to the relevant class (see paragraph (b) headed "Management Fee" below).

In addition, the Company pays to the Management Company a fee to cover operating, administrative and servicing expenses. To safeguard shareholders from fluctuations in a sub-fund's operating, administrative and servicing expenses, the Company has agreed with the Management Company that the fee charged to cover such operating, administrative and servicing expenses is fixed at an annual rate.

The potential excess of such expenses above such annual rate shall be borne directly by the Management Company (see paragraph (e) headed "Operating, Administrative and Servicing Expenses/Operating Currency Hedged Share Class Fees" below).

b) Management fee

The Company pays to the Management Company an annual management fee calculated as a percentage of the Net Asset Value of each sub-fund or share class ("Management Fee"). The Management Fee is accrued daily and payable monthly in arrears at the rates specified in the following table.

Sub-fund	Class A	Class B	Class E	Class F	Class I	Class J	Class K	Class L	Class M	Class N	Class P	Class R	Class S	Class SP	Class U	Class W	Class X	Class Y	Class Z	Class ZP

^{##}Reduced fee of 0.5% rate applied until 31 August 2022. Since 1 September 2022, a rate of 0.75% has been applied.

The maximum rate for Class E, I, J, L, M and N Shares is 3.500%.

The maximum rate for Class A, B, P, R, S, SP, X, Y, Z and ZP Shares is as stated in the Prospectus.

No Management Fee is currently charged for Class W Shares.

The Management Fee covers investment management, investment advisory and distribution services provided in relation to the relevant sub-fund of the Company by the Management Company, the Investment Advisers and the Distributors. The Management Company is responsible for paying, out of such fee, the fees of the Investment Advisers and the Distributors and may pay part of such fee to recognised intermediaries or such other person as the Management Company may determine, at its discretion.

The Management Company may instruct the Company to pay a portion of the Management Fee directly out of the assets of the Company to any of such service providers or identified persons. In such case, the Management Fee due to the Management Company is reduced accordingly. If the Company invests in shares or units of UCITS (including other sub-funds of the Company) and other eligible UCIs that are managed directly or indirectly by the Management Company itself or a company with which it is linked by way of common management or control or by way of a direct or indirect stake of more than 10% of the capital or votes, then there will be no duplication of management, subscription or repurchase fees between the Company and the UCIs into which the Company invests.

c) Directors' fees, expenses and interests

A Director may be a party to, or otherwise interested in, any transaction or arrangement with the Company or in which the Company is interested, provided that he has disclosed to the other Directors, prior to the conclusion of any such transaction or arrangement, the nature and extent of any interest of his therein. Subject to approval of the Board, a Director may vote in respect of any contract or arrangement or any proposal whatsoever in which he has an interest, having first disclosed such interest. He shall not be disqualified by his office from contracting with the Company. If a Director declares his interest in any contract which the Company is considering entering into, he may be counted in the quorum of any meeting to consider the contract and may vote on any resolution to enter into such contract, provided that the decision to be taken by the Board of Directors relates to the current operations entered into under normal conditions.

The Company pays an annual fee to each of the Independent Directors amounting to EUR 55,000. This amount is paid by the Management Company through the operating, administrative and servicing expenses paid by the Company. The amount of Operating, Administrative and Servicing Expenses is accrued with every net asset value calculation and paid quarterly in arrears. For the year-end as at 31 March 2023, a total of EUR 165,000 has been charged as Independent Directors' fees.

Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

4. Charges and expenses (continued)

d) Operating, Administrative and Servicing Expenses / Operating Currency Hedged Share Class Fees

The Company pays to the Management Company fees to cover certain Operating, Administrative and Servicing expenses and the execution of the currency hedging policy. The Management Company is responsible for discharging out of this fee, the expenses described below, inter alia, payable to the Depositary Bank, the Administration Agent and the Registrar and Transfer Agent or any other appointed entity. If the total actual expenses described below exceeds the total of Operating, Administrative and Services Expenses and the Operating Currency Hedged Share Class Fee set for each sub-fund and Share class, the excess of such expenses above such annual percentage will be borne directly by the Management Company or its affiliates, and equally the Management Company or its affiliates may retain any surplus.

- (i) Operating, Administrative and Servicing Expenses cover the ongoing custody/depositary fees and safekeeping charges payable to the Depositary Bank and its correspondent banks, fees for Fund accounting and administration services (including domiciliary services) payable to the Administration Agent and transfer agency fees for registrar and transfer agency services payable to the Registrar and Transfer Agent.

Operating, Administrative and Servicing Expenses also cover expenses relating to the creation of new sub-funds; the costs of the Subsidiaries (see paragraph (6) below); the Luxembourg asset-based *taxe d'abonnement*, at the rate referred to under Section "Taxation" of the Company's Prospectus; fees and reasonable out-of-pocket expenses incurred by the Board of Directors; legal and auditing fees and expenses; ongoing registration and listing fees, including translation expenses; the costs and expenses of preparing, printing, and distributing the Company's Prospectus, Key Investor Information Documents, financial reports, statements and other documents made available directly or through intermediaries to its shareholders.

This fee is set, for each sub-fund and/or Class, at a fixed percentage of the Net Asset Value of the relevant sub-fund or Class specified in the Company's Prospectus dated January 2023 (as specified in the table on page 72 and following). Such fee is accrued daily and payable monthly in arrears.

No Operating, Administrative and Servicing Expenses shall be charged to Class W Shares. All the fees and charges allocated to such Class of Shares shall be paid directly by a member or an affiliated entity of HSBC Group.

- (ii) Operating Currency Hedging Fees cover the fees of the Administration Agent or other appointed parties relating to the execution of the currency Hedged Share Class policy for the Currency Hedged Share Classes as described in "Profile of the Typical Investor Categories".

The maximum rate for (i) and (ii) together for Class A, B, E, F, I, J, K, L, M, N, P, R, S, SP, U, X, Y, YP, Z and ZP Shares is 1.0%. However, the Board of Directors reserves the right to amend the levels of the above fees applicable to each Class of Shares. In the event of an increase of such expenses, the concerned shareholders will be given at least one-month prior notice, of such increase. During this notice period, such shareholders may request the redemption of their Shares, free of charge.

The Management Company may instruct the Company to pay a portion of the aforesaid fees directly out of the assets of the Company to any of the aforementioned service providers. In such case the fee due to the Management Company is reduced accordingly.

## 5. Transaction expenses and extraordinary expenses

Transaction expenses linked to security dealing are included with the cost of investments purchased and deducted from the proceeds received on sales of investments and are included in the statement of operations and changes in net assets under the heading "Transaction Fees".

Each sub-fund bears the costs and expenses of buying and selling portfolio securities and financial instruments, brokerage fees and commissions, interest or taxes payable, and other transaction related expenses. These transaction fees are accounted for on a cash basis and are paid when incurred or invoiced from the net assets of the sub-fund to which they are attributable. Transaction fees are allocated across each sub-fund's Share Classes.

The Company bears any extraordinary expenses including, without limitation, litigation expenses and the full amount of any tax, levy, duty or similar charge and any unforeseen charges imposed on the Company or its assets.

For debt securities and derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

## 6. Indian Equity and Global Emerging Markets Equity (the "sub-funds")

Some investments of the sub-funds Indian Equity and Global Emerging Markets Equity in India were made through HSBC GIF Mauritius Limited and HSBC GIF Mauritius No.2 Limited (the "Subsidiaries") respectively, which are wholly owned by the Company.

As part of this investment structure and in accordance with their investment objectives, the Indian Equity and Global Emerging Markets Equity sub-funds invested part of the net proceeds of the issue of their Shares in the Subsidiaries, with their registered offices at HSBC Centre, 18 Cyber City, Ebene, Mauritius and net proceeds allocated to the Subsidiaries were invested substantially in Indian equities and equity equivalent securities of companies which have their registered office in, and with an official listing on a major stock exchange or other Regulated Market of India.

All Income, expenses, receivables, payables and investments of the "Subsidiaries", are consolidated into the Statement of Net Assets and the Statement of Operations and Changes in Net Assets of the sub-funds.

# Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

## 6. Indian Equity and Global Emerging Markets Equity (the “sub-funds”) (continued)

Securities owned by the Subsidiaries are individually disclosed in the Portfolio of Investments of the sub-funds. Intercompany balances are eliminated on consolidation. The use of the Mauritius Subsidiaries and the tax treatment it is afforded is based on the law and practice currently in force in the relevant countries as understood by the Board of Directors. It is subject to any future changes and such changes may adversely affect the returns of the sub-funds. This includes any circumstances where the India Mauritius Double Taxation Treaty may not be applied or ceases to be applied, resulting from, inter alia, any future ruling by the Indian tax authorities.

In order to ensure the certainty of future tax treatment, the Board of Directors took the decision to no longer invest in India through the Subsidiaries and eventually to liquidate the latter as this will provide a more efficient and clearer investment management structure in the future.

During a transitional period, which was completed on 31 October 2016, the Indian Equity and Global Emerging Markets Equity sub-funds divested their holdings in the Subsidiaries and reinvested their assets in financial instruments directly in accordance with their investment objectives. This was undertaken in a number of tranches in order to minimise market impact and limit any risks. Following completion of the asset transition, the Board of Directors of the Subsidiaries appointed a liquidator on 13 December 2016 to oversee the liquidation of the Subsidiaries. The liquidation of HSBC GIF Mauritius No.2 Limited has been closed. The liquidation of HSBC GIF Mauritius Limited was finalised on 7 June 2022.

There are liquidation costs associated with liquidating the Subsidiaries which will be borne by HSBC Global Asset Management. In addition, there is the possibility that a retrospective tax assessment could be levied on the Subsidiaries for which the sub-funds will be liable. This liability will have to be borne out of the assets of the sub-funds which may have a negative impact on the sub-funds' NAV.

## 7. Taxation of the Company

The following is based on the Company's understanding of the law and practice currently in force in the Grand Duchy of Luxembourg and is subject to changes therein.

The Company is not liable to any Luxembourg tax on profits or income. The Company is however liable in Luxembourg to a tax of 0.05% per annum of its Net Asset Value, such tax being payable quarterly on the basis of the value of the net assets of the Company at the end of the relevant calendar quarter. The tax rate is reduced to 0.01% per annum for the Euro Reserve sub-fund and Classes J, L, S, W, X and Z Shares in the relevant sub-funds. No stamp duty or other tax is payable in Luxembourg on the issue of shares.

The classes/sub-funds may be exempted from this 0.01% tax if they comply with the requirements of the articles 174 and 175 of the 2010 Law which include: (i) the shares of the class/sub-fund must be reserved to institutional investors; (ii) the exclusive object of the class/sub-fund's portfolio must be the investment in money market instruments and/or deposits with credit institutions; (iii) the remaining average maturity of the class/sub-fund's portfolio must be less than 90 days; and (iv) the class/sub-fund must benefit from the highest possible rating of a recognized rating agency.

Following are also exempt from this tax:

- a) Any sub-funds only held by pension funds and assimilated vehicles;
- b) sub-funds whose main objective is the investment in microfinance institutions;
- c) sub-funds/Classes of Shares (i) whose Shares are listed or traded on at least one stock exchange or another regulated market operating regularly, recognised and open to the public and (ii) whose exclusive object is to replicate the performance of one or more indices. If several Share Classes are in issue in the relevant sub-fund meeting (ii) above, only those Share Classes meeting (i) above will benefit from this exemption;
- d) The portion of any sub-fund's assets (prorata) invested in a Luxembourg investment fund or any of its sub-funds to the extent it is subject to the subscription tax;

Also exempt from the tax are the value of assets represented by units/shares held in other eligible UCIs provided that such units/shares have already been subject of this tax provided for by Article 174 of the 2010 Law as amended or by Article 68 of the law of 13 February 2007 as amended.

No Luxembourg tax is payable on the realised or unrealised capital appreciation of the assets of the Company.

# Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

## 7. Taxation of the Company (continued)

### Other Taxes

Under applicable foreign tax laws, withholding taxes may be deducted from interest and dividends and capital gains taxes may be payable at various rates. For the summary of foreign tax laws and practices, refer to Appendix I.

### General

In many markets the Company, as a foreign investment fund, may be subject to non-recoverable tax on income and gains (either by withholding or direct assessment) in relation to the investment returns it realizes from its holdings of shares and securities in those markets. Where practicable the Company shall make claims under the relevant double tax treaties and domestic law of the countries concerned in order to minimize the impact of local taxation on the investment return and to obtain the best return for its shareholders. Those claims shall be made on the basis of the Company's understanding of the validity of such claims given the information available from the Company's depositaries, external advisers and other sources as to the interpretation and application of the relevant legal provisions by the tax authorities in the country concerned.

The Company shall seek to provide for tax on capital gains where it considers that it is more likely than not that the tax shall be payable, given the advice and information available to the Company at the date concerned. However, any provision held may be insufficient to cover, or be in excess of, any final liability.

The Company shall seek to claim concessionary tax treatment and account for tax on a best efforts basis, given the tax law and practice at that date. Any change in tax law or practice in any country where the Company is registered, marketed or invested could affect the value of the Company's investments in the affected country. In particular, where retrospective changes to tax law or practice are applied by the legislature or tax authorities in a particular country these may result in a loss for current Shareholders in the affected sub-fund. The Company does not offer any warranty as to the tax position of returns from investments held in a particular market nor of the risk of a retrospective assessment to tax in a particular market or country.

## 8. Net asset value disclosures

### a) Closing prices

The assets of the sub-funds are valued using prices available at different times during the day of 31 March 2023, being the last business day of the reporting year.

The following sub-funds are valued using prices available at different dates, prior to 31 March 2023.

| Sub-fund                                  | Valuation date |
|-------------------------------------------|----------------|
| Frontier Markets                          | 30 March 2023  |
| Global High Yield Securitised Credit Bond | 27 March 2023  |
| Global Securitised Credit Bond            | 27 March 2023  |

If the Company had calculated the Net Asset Values solely with a view to publication, the market prices used to value the net assets would have been the closing prices on 31 March 2023. However, these Net Asset Values would not have been significantly different from those shown in these financial statements except the following sub funds:

| Sub-fund                       | Currency | % difference<br>(in % of NAV) |
|--------------------------------|----------|-------------------------------|
| Brazil Equity                  | USD      | (1.21)                        |
| Global Securitised Credit Bond | USD      | 0.66                          |

# Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

## 10. Dividends

Most distributing fund share classes in issue as at 31 March 2023 have had UK Reporting Fund status, either from 1 April 2010 or from the launch of the fund share class concerned. All Distributing and Accumulating Share Classes have UK Reporting Fund status from 1 April 2013. As and when new fund share classes are launched, UK Reporting Fund applications shall be made to HM Revenue & Customs accordingly. Details of the share classes that have UK Reporting Fund status can be found on the HM Revenue & Customs' website ([www.hmrc.gov.uk](http://www.hmrc.gov.uk)).

At the date of this report, the status can be found at <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>

The Company publishes annual reportable income information that shareholders require for their UK tax returns at [www.kpmgreportingfunds.co.uk](http://www.kpmgreportingfunds.co.uk). If investors do not have access to the internet they can apply in writing at the registered office of the Company.

The Company paid the following per share dividends (ex-date) during the year ended 31 March 2023:

\* The dividend rates disclosed in the note are reported in Sub-fund currency by using the exchange rate as at record dates of the distributions.

## 11. Other Income

Other income mainly consists of dilution levy (refer to Note 15).

## 12. Security Lending

Each sub-fund may for the purpose of generating additional capital or income (either through the fee paid by the borrowers or the reinvestment of the cash collateral) or for reducing costs participate in Securities Lending subject to complying with the provisions set forth in Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse ("SFTR"), ESMA's Guidelines of 1 August 2014 on ETFs and other UCITS issues (ESMA/2014/937EN) (the "ESMA Guidelines on ETFs and other UCITS issues"), CSSF Circular 08/356 relating to the rules applicable to undertakings for collective investment when they use certain techniques and instruments relating to transferable securities and money market instruments and CSSF Circular 14/592 relating to the ESMA Guidelines on ETFs and other UCITS issues (the "CSSF Circular 14/592") and any other applicable laws, regulations, circulars or CSSF positions as may be amended or replaced.

The Board of Directors has delegated the implementation, management and day to day oversight of a Securities Lending Programme to the Management Company. The Management Company may decide which sub-fund should participate in a Securities Lending programme in which securities are transferred temporarily to approved borrowers by the Management Company in exchange for collateral. Any of the transferable securities or money market instruments belonging to a sub-fund may be subject to Securities Lending. The Management Company report regularly to the board on the Securities Lending activity and remain subject to the ongoing supervision and control of the board in relation to the Securities Lending Programme.

The aim is to use Securities Lending on a continuous basis. The proportion of a sub-fund's net assets subject to Securities Lending transactions is intended to be around 25%.

The Lending Agent, shall receive a fee of 15% of the gross revenue for its services related to Securities Lending and the Management Company a fee of 10% of the gross revenue for the oversight work undertaken in relation to Securities Lending. The remainder (75%) of the gross revenue is received by the relevant sub-funds taking part in the Securities Lending program. The detail of return and cost for each sub-fund are disclosed on Appendix VII (Unaudited Additional Disclosures) – Securities Financing Transactions Regulation ("SFTR") from page 536 to page 561.

The approval and selection process for counterparties to Securities Lending is a dynamic assessment of counterparties based on various criteria. Criteria used for approval of counterparties may include, but are not limited to, a counterparty's minimum credit rating, country or origin, accessibility, execution of specialized trade and regulatory risk profile.

# Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

## 12. Security Lending (continued)

| Sub-funds                                            | Currency | Market value of securities lent | Market value of collateral received | Securities lending income (Net)* |
|------------------------------------------------------|----------|---------------------------------|-------------------------------------|----------------------------------|
| Asia ex Japan Equity                                 | USD      | 12,943,923                      | 15,917,356                          | 271,359                          |

# Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

## 13. Transactions with connected persons and brokerage commission paid per sub-fund (continued)

### (b) Investment transactions with related parties (continued)

No soft commission arrangements are in place, except commission sharing arrangements as specifically detailed below.

In some locations, the investment adviser and its connected persons have entered into commission sharing arrangements (related solely to research services, defined as soft commissions by the Hong Kong Securities and Futures Commission, that are utilized by the Fund) with certain brokers, for which goods and services used to support the investment decision making process were received by it or its connected persons.

The investment adviser or its connected persons do not make direct payment for these services, but transact and agree an amount of business with brokers on behalf of the sub-funds concerned. All transactions were entered into in the ordinary course of business and on normal commercial terms.

Commissions were paid by the Company on these transactions. The goods and services utilized for the Company include the following: research and advisory services, economic and political analysis, portfolio analysis, market analysis and investment related publications.

## 14. List of movements in the investment portfolio

The detailed list of movements in the investment portfolio can be obtained free of charge upon request at the registered office of the Company.

## 15. Anti-Dilution Mechanisms

When investors buy or sell shares in a sub-fund, the Investment Adviser may need to buy or sell the underlying investments within the sub-fund. Without an anti-dilution mechanism to take account of these transactions, all shareholders in the sub-fund would pay the associated costs of buying and selling these underlying investments. These transaction costs can include, but are not limited to, bid-offer spreads, brokerage and taxes on transactions.

There are two anti-dilution mechanisms available to each sub-fund, a pricing adjustment and an anti-dilution levy, both mechanisms aim to protect shareholders in a sub-fund.

There is an adjustment of the Net Asset Value per Share for a pricing adjustment and no adjustment of the Net Asset Value per Share for an anti-dilution mechanism.

Each mechanism has three main components:

1. A threshold rate
2. A buy rate
3. A sell rate

These components may be different for each sub-fund.

Details of which anti-dilution mechanism is in operation on a particular sub-fund can be obtained from the Management Company.

Should the Company decide to change the anti-dilution mechanism in operation for a particular sub-fund (i.e. from a pricing adjustment to an anti-dilution levy or vice versa), prior approval will be sought from relevant regulators (where required) and affected investors will receive at least one month's prior written notification.

# Notes to the Financial Statements

for the year ended 31 March 2023 (continued)

## 15. Anti-Dilution Mechanisms (continued)

### *Anti-Dilution Levy*

The anti-dilution levy aims to mitigate the effect of transactions costs on the Net Asset Value of a sub-fund incurred by net subscriptions or redemptions.

The anti-dilution levy is triggered when the difference between subscriptions and redemptions, as a percentage of the sub-fund's Net Asset Value, exceeds the threshold on any particular Dealing Day. In the case of net capital inflows, the anti-dilution levy will be deducted from each subscription amount and accordingly reduce the number of Shares received by an investor or, in the case of net capital outflows, will be deducted from each redemption amount and accordingly reduce the redemption proceeds received by an investor.

The amount of the anti-dilution levy may be reduced or waived at the discretion of the Board of Directors. The amount of the anti-dilution levy may be reduced or waived at the discretion of the Board of Directors.

Investors should note that sub-distributors may levy the sales charge (if any) on an investor's full subscription and may not take into account the application of an anti-dilution levy.

### *Pricing Adjustment*

The pricing adjustment aims to mitigate the effect of transactions costs on the Net Asset Value per Shares of a sub-fund incurred by significant net subscriptions or redemptions.

The Company uses a partial swing pricing adjustment which means that the pricing adjustment is triggered when the difference between subscriptions and redemptions, as a percentage of the sub-fund's Net Asset Value, exceeds the threshold on any particular Dealing Day. The Net Asset Value of the sub-fund will be adjusted up or down using the adjustment rates (buy adjustment rate for net subscriptions or sell adjustment rate for net redemptions).

The adjustment of the Net Asset Value per Share will apply equally to each Share Class in a specific sub-fund on any particular Dealing Day. The pricing adjustment is applied to the capital activity at the level of a sub-fund and does therefore not address the specific circumstances of each individual investor transaction. These components may be different for each sub-fund.

If it is in the interests of shareholders, when the net capital inflows or outflows in a sub-fund exceeds a predefined threshold agreed from time to time by the Board of Directors, the Net Asset Value per Share may be adjusted by a maximum rate, as disclosed in the latest prospectus available, in order to mitigate the effects of transaction costs.

Under normal market conditions, this adjustment will not exceed 2%. However, it may be significantly higher during exceptional market conditions such as periods of high volatility, reduced asset liquidity and market stress. The current adjustment rates for each sub-fund are available on HSBC Global Asset Management's website in the Fund Centre at [www.assetmanagement.hsbc.com](http://www.assetmanagement.hsbc.com).

The pricing adjustment rates are reviewed on at least a quarterly basis by the relevant investment management team and agreed with the local risk team. The swing threshold rates are reviewed on at least a yearly basis. Recommendations to adjust the pricing adjustment rates and thresholds are made through the respective Pricing/Valuation committee and submitted to the Management Company for consideration and review.

In the event that the proposal is accepted, the Management Company will implement the changes at the next available opportunity. Changes to the swing threshold rates require additional approval from the Board of Directors before implementation.

Until the threshold rate is triggered, no anti-dilution levy or pricing adjustment is applied and the transaction costs will be borne by the sub-fund. This will result in a dilution (reduction in the Net Asset Value per Share) to existing shareholders.

Investors should note that sub-distributors may levy the sales charge (if any) on an investor's full subscription and may not take into account the application of an anti-dilution levy.

For the avoidance of doubt, it is clarified that fees other than the sales charge will continue to be calculated on the basis of the unadjusted Net Asset Value for pricing adjustment.

A list of the sub-funds that have applied the mechanism of pricing adjustment (whether the NAV has swung or not) during the financial year is available at <https://www.assetmanagement.hsbc.co.uk/en/intermediary/fund-centre>.

## 16. Total expense ratio

The Total Expense Ratio ("TER") has been computed by the Administrator as required per the AMAS (Asset Management Association Switzerland) guidelines on the calculation and disclosure of the TER of collective investment schemes. The actual expenses incurred during the year are annualised and calculated as a percentage of the average Assets Under Management of the share class for the year. The TER also includes the percentage corresponding to passive hedging fees.

Synthetic TER is applicable for each sub-fund that invests at least 10% of its net assets as a fund of funds in other collective investment schemes (target funds) which publish a TER within the meaning of the present guidelines. A composite (synthetic) TER of the fund of funds is to be calculated by the administrator, as of the closing date of the financial year or the end of the financial year.

## 17. Liquidation of sub-funds

The following sub-funds have been closed during the year or during previous periods. As at 31 March 2023, the following cash positions are still held by the "Depository Bank" of the following liquidated sub-funds:

|                |                                                                                                        |                                                                              |                                                                          |                                                                                     |

## 18. Significant Events

### Russia's invasion of Ukraine

Russia's invasion of Ukraine has had, and could continue to have, severe adverse effects on regional and global economic markets for securities and commodities. Following Russia's actions, various governments have issued broad-ranging economic sanctions against Russia including, among other actions:

- a prohibition on doing business with certain Russian companies, large financial institutions, officials and oligarchs;
- the removal by certain countries and the European Union of selected Russian banks from the Society for Worldwide Interbank Financial Telecommunications ("SWIFT"), the electronic banking network that connects banks globally; and
- restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions.

The current events, including sanctions and the potential for future sanctions, which include (but not limited to) those impacting Russia's energy sector, and other actions, and Russia's retaliatory responses to those sanctions and actions, could continue to have, an adverse effect on global markets performance and liquidity, thereby negatively affecting the value of the sub-funds' investments beyond any direct exposure to Russian issuers. They also give rise to material uncertainty and risk with respect to markets globally and the performance of the sub-funds and their investments or operations could be negatively impacted. Investors should be aware that the duration of the ongoing hostilities and the vast array of sanctions and related events cannot be predicted.

### Impact of Ukraine/Russia crisis

The Board of Directors decided to suspend the HGIF Russia Equity sub-fund on 1 March 2022 until further notice. The situation continue to be monitored by the Board. Any subsequent decision that changes this status will be communicated to the investors as and when required.

The Board of Directors in conjunction with the Management Company continue to monitor the situation. Since 2 March 2022, all RUB denominated Russian Government Bonds and any associated coupons held in HGIF Global Emerging Markets Local Debt, HGIF Global Emerging Markets ESG Local Debt and HGIF Global Emerging Market Multi-Asset Income have been written down to 0.

Since 3 March 2022, all Russian equities held in HGIF Global Emerging Markets Multi-Asset Income, HGIF Global Equity Volatility Focused, HGIF BRIC Markets Equity and HGIF BRIC Equity have been marked down by 90%. For ADR/GDR, if the market price dropped by more than 90%, the stock was valued using the latest market price. Since 10 March 2022, all RUB denominated Russian equities held in HGIF Global Emerging Markets Multi-Asset Income, HGIF Global Equity Volatility Focused, HGIF BRIC Markets Equity and HGIF BRIC Equity, have been written down to 0.

- ▶ Mexico Equity was closed as at 28 July 2023;
- ▶ The name of Global Short Duration High Yield Bond will change into US Short Duration High Yield Bond as at 3 July 2023.

# Appendix I (Unaudited Additional Disclosures) – Taxation of the Company (foreign countries)

The following summary is based on the Company's understanding of the law and practice currently in force in the in other jurisdictions and is subject to changes therein.

## *Belgium*

The Belgian government has enacted a law which charges an annual Net Asset Value tax on foreign investment funds registered with the FSMA (Financial Services and Markets Authority). An annual tax of 0.0925% is charged on the net outstanding amounts of sub-funds placed in Belgium through Belgian financial intermediaries on 31 December of the preceding year.

To date as the amounts are small, the Management Company has paid this tax cost on behalf of the Company out of the Operating, Administrative and Servicing Expenses it receives. However, should the cost become substantial or long term, the Management Company may require the sub-funds concerned to bear that tax charge for future periods.

## *China*

Where the Company invests in shares and securities issued by companies tax resident (or with their primary activity) in the People's Republic of China ("PRC"), securities issued by government agencies in the PRC or other permissible PRC investments, the Company may be subject to Corporate Income Tax ("CIT") withholding and other taxes imposed in the PRC. Pursuant to circular Caishui [2014] No.79, capital gain realized after 17 November 2014 by QFII/RQFII from transfer of equity investment assets is temporarily exempt from PRC Corporate Income Tax ("CIT"). Pursuant to Guoshuifa[2009]47, dividends, coupon or interest received by QFII is subject to 10% CIT withholding. The same practice applied to RQFII then. On 30 August 2018, MOF and SAT jointly issued Caishui[2018]108 which provided temporary 3 year CIT exemption on coupon income received by Overseas Institutional Investors in China bond market from 7 November 2018 to 6 November 2021. Pursuant to circular Caishui [2014] No.81 and Caishui [2016] No.127, Hong Kong investors realized capital gain through the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect from A shares trading is temporarily exempt from CIT withholding. Dividends income received by Hong Kong investors currently is subject to 10% CIT withholding by the issuer. However the treaty relief may be applied if applicable. The seller of A shares and transferor of A shares by way of succession or gift should pay Stamp Duty at 0.1% of the consideration/value. The Stamp Duty is deducted by the Stock Exchange from the Settlement Amount. Hong Kong market investors are temporarily exempt from stamp duty on stock borrowing and returning from covered short selling of stocks through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.

On 23 March 2016, the Ministry of Finance and SAT jointly issued a notice Caishui [2016] No.36 which provides the detail implementation guidance on the further rollout of the Value-Added Tax ("VAT") reform. From 1 May 2016 VAT has replaced PRC Business Tax ("BT") to cover all sectors that used to fall under the PRC BT. Under Notice No.36, capital gain realized by QFII from securities trading through entrusted onshore company within China and capital gain realized by Hong Kong investors through the Shanghai-Hong Kong Stock Connect from A shares trading are exempt from PRC VAT. Circular Caishui [2016] No. 127 provides VAT exemption on capital gain realized by Hong Kong investors through the Shenzhen-Hong Kong Stock connect from A shares trading.

On 30 June 2016, the Ministry of Finance and State Administration for Taxation ("SAT") jointly issued a supplementary circular Caishui [2016] No.70, which provides Value-Added Tax ("VAT") exemption for capital gain realized by RQFII from securities trading through entrusted onshore company in China and capital gain realized by overseas institutions approved by the People's Bank of China to make investment into the interbank local currency market.

On 30 August 2018, MOF and SAT jointly issued Caishui[2018]108 which provided temporary 3 year VAT exemption on coupon income received by Overseas Institutional Investors in China bond market from 7 November 2018 to 6 November 2021.

# Appendix I (Unaudited Additional Disclosures) – Taxation of the Company (foreign countries) (continued)

## Germany

The sub-funds listed below will seek to continuously invest a minimum percentage of their net assets in equity assets as defined in sec. 2 para 8 German Investment Tax Act 2018:

| % of Sub-fund's Net Assets | Sub-funds                                                                                                                   |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| More than 50%              | All Equity Sub-Funds other than Russia Equity<br>All Shariah Compliant Sub-Funds<br>Managed Solutions - Asia Focused Growth |
| At least 25%               | Russia Equity<br>Managed Solutions - Asia Focused Income                                                                    |

## Hong Kong

The Company may be subject to Hong Kong profits tax in relation to a particular sub-fund if it is treated as carrying on a trade or business in Hong Kong either on its own account or through the agency of the investment adviser of that sub-fund. If the Company is treated as carrying on business in Hong Kong, a liability to profits tax, the rate of which is currently 16.5%, shall only exist in respect of any profits of the relevant sub-funds which arise in or are derived from Hong Kong from that trade or business, and which are not capital in nature.

Under Hong Kong tax law and practice, funds resident outside Hong Kong ("Offshore Funds") are exempted from Hong Kong profits tax providing certain conditions are met. It is intended that affairs of the Company shall be conducted as far as possible to comply with the conditions for exemption from profits tax. However, the Company can offer no warranty that such exemption will be obtained in every instance.

## India

Indian General Anti-Avoidance Rules ("GAAR") is effective from 1 April 2017. The GAAR gives considerable discretion to the tax authorities and may be used to seek to deny treaty benefits to foreign investors. Such actions could result in a significant financial cost for investors, as capital gains even if not liable to tax under a tax treaty could become taxable in India. The GAAR is a new piece of legislation and therefore there is little guidance in terms of best practice over its application.

Post amendment effective from 1 April 2018, applicable capital gains tax rate to Foreign Portfolio Investors (FPIs) are as follows:

- Listed equity shares (sale transaction through stock exchange on which securities transaction tax has been paid):
  - Long term capital gains (asset held for more than 12 months prior to sale) - 10%
  - Short term capital gains (asset held for 12 months or less prior to sale) - 15%
- Other than equity shares:
  - Long term capital gains (asset held for more than 36 months prior to sale) - 10%
  - Short term capital gains (asset held for 36 months or less prior to sale) - 30%

The above tax rates are subject to applicable surcharge and cess.

Interest income arising from Indian securities are subject to income tax at the rate of 20% on gross interest (plus applicable surcharge and education cess). Interest income earned during the period 1 July 2017 to 30 June 2023 by FPI on specified securities (government bonds and Rupee denominated bonds of an Indian company) is liable to a concessional tax rate of 5% (plus applicable surcharge and education cess). Further, the 5% (plus applicable surcharge and education cess) concessional tax rate has also been extended to interest income earned during period 1 April 2020 to 30 June 2023 on Municipal debt securities.

With effect from 1 April 2020, dividend income earned by FPIs from an Indian domestic company is liable to tax at the rate of 20% (plus applicable surcharge and education cess)

The above tax rates are under domestic tax law and are subject to beneficial rates, if any, available under a double taxation treaty.

# Appendix I (Unaudited Additional Disclosures) – Taxation of the Company (foreign countries) (continued)

## United Kingdom

It is the intention of the Board of Directors to conduct the affairs of the Company so that it does not become resident in the United Kingdom. On the basis that the Company is not resident in the United Kingdom for tax purposes it should not be subject to United Kingdom corporation tax on its income and capital gains.

## France

Currently applies to Euroland Value, Euroland Equity Smaller Companies and Euroland Growth.

### “Plan d’Epargne en Actions”.

In order for a sub-fund to claim eligibility to the French “Plan d’Epargne en Actions” and as long as they are registered with the *Autorité des Marchés Financiers* in France, the following additional investment restriction applies :

The total amount invested in equity or equity equivalent securities (as defined by art. L-221-31 of the French Monetary and Financial Code, § I-1°, a), b) and c)), which have their registered office in a country member of:

- the EU ; or
- the European Economic Area (provided that the said country has concluded with France a bilateral tax cooperation agreement with a clause of administrative assistance aiming at fighting against tax fraud or evasion).

must not be less than 75% of the total assets of the relevant sub-fund at any point of time.

The definition given by art. L- 221-31 of the French Monetary and Financial Code, § I-1°, a), b) and c), excludes equities or equity equivalent securities issued by corporates which are not subject to corporate tax at the normal rate applying in their home country, and which in particular excludes shares of listed real estate corporates (“SIC” - “sociétés d’investissements immobiliers cotées”).

The following sub-funds are eligible as from 1 April 2007:

|                                   | <b>% of holdings in shares</b> |
|-----------------------------------|--------------------------------|
| Euroland Equity Smaller Companies | 99.00                          |
| Euroland Growth                   | 97.54                          |
| Euroland Value                    | 95.79                          |

### Article 150-0D of the tax General Regulation.

In order for a sub-fund to claim under Article 150-0D 1ter of the Tax General Regulation, the total amount invested in equity or equity equivalent securities must not be less than 75% of the total assets of the relevant sub-fund at any point of time.

The following sub-funds are eligible as from 1 April 2007:

|                                   | <b>% of holdings in shares</b> |
|-----------------------------------|--------------------------------|
| Euroland Equity Smaller Companies | 99.39                          |
| Euroland Value                    | 98.15                          |
| Europe Value                      | 99.11                          |

# Appendix II (Unaudited Additional Disclosures) – UK SORP Disclosure

## Investment Risk

Information in relation to certain investment risks are disclosed for selected sub-funds as follows:

### Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as market prices, foreign exchange rates and interest rates. It comprises of three major types of risks i.e. currency risk, interest rate risk and other price risk.

As invested in equities and fixed income securities, the Fund is exposed to the risk that the equity and fixed income markets decline. This risk is monitored in absolute by the equity exposure and relative to the benchmark by the calculation of the ex-ante tracking-error.

#### (i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in foreign exchange rates.

The below table summarises the following sub-funds' exposure to currency risks.

| Sub-fund                                                              | Currency | Net currency exposure in sub-fund currency |
|-----------------------------------------------------------------------|----------|--------------------------------------------|
| China A-shares Equity                                                 | CNY      | 20,860,425                                 |
| Global Emerging Markets Equity                                        | CNY      | 33,414,937                                 |
|                                                                       | HKD      | 106,825,166                                |
|                                                                       | INR      | 43,807,243                                 |

## Investment Risk (continued)

### Market risk (continued)

#### (ii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market interest rates.

The following table details the below sub-funds' exposure to interest rate risks:

|                         | China A-shares<br>Equity<br>USD | Global Emerging Markets<br>Equity<br>USD | Global Equity Climate<br>Change<br>USD | Global Equity Sustainable<br>Healthcare<br>USD |

Credit risk arising on bonds is mitigated by investing in government bonds where the credit risk is minimal, or corporate bonds which are rated at least investment grade. The sub-funds also invests in high yield and emerging market bonds which are non-investment grade. The sub-fund manages the associated credit risk by requesting the investment manager to diversify the portfolio to minimise the impact of default by any one issuer.

# Appendix II (Unaudited Additional Disclosures) – UK SORP Disclosure (continued)

## Investment Risk (continued)

### Market risk (continued)

#### (iv) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Other price risk arises principally in relation to the sub-fund's return seeking portfolio which includes shares, depositary receipts, warrants/equity linked securities, preferred shares and collective investment scheme.

The sub-fund manages this exposure to other price risk by constructing a diverse portfolio of investments across various markets.

At the year end, the sub-fund's exposure to investments subject to other price risk was:

## Investment Risk (continued)

### Fair value hierarchy

The fair value of financial instruments has been determined using the following fair value hierarchy:

Category (a) The quoted price for an identical asset in an active market.

Category (b) When quoted prices are unavailable, the price of a recent transaction for an identical asset adjusted if necessary.

Category (c) Where a quoted price is not available and recent transactions of an identical asset on their own are not a good estimate of fair value, the fair value is determined by using a valuation technique which uses:

- c(i) observable market data; or
- c(ii) non-observable data.

The sub-fund's investment assets and liabilities have been fair valued using the above hierarchy categories as follows:

| Sub-fund                                                                              | Currency | Category (a)  | Category (b) | Category c(i) | Category c(ii) | Total         |
|---------------------------------------------------------------------------------------|----------|---------------|--------------|---------------|----------------|---------------|
| China A-shares Equity                                                                 | USD      | 20,861,584    | -            | -             | -              | 20,861,584    |
| Global Emerging Markets Equity                                                        | USD      | 381,704,679   | -            | -             | -              | 381,704,679   |

## Appendix III (Unaudited Additional Disclosures) – Dealing Days of the Fund

Dealing for Shares in the Company will take place on any Business Day (other than days during a period of suspension of dealing in Shares) and which is also for each Sub-fund, a day where stock exchanges and regulated markets in countries where the sub-fund is materially invested are open for normal trading.

The Business Days which are not Dealing Days will be listed in the annual report and semi-annual reports and available at the registered office of the Company. Any amendments to such lists are also available at the registered office of the Company.

Shareholders who deal through the Company's local distributor or representative should note that there will be no dealing for the Shares of the Company in the jurisdiction in which such distributor or representative operates on a day which is not a Business Day in such jurisdiction. Shareholders in such jurisdictions can however deal via the Transfer Agent in Luxembourg.

The Company will determine the dealing/non-dealing calendar according to the latest market information obtained by the Company from time to time. Shareholders can obtain the latest dealing/non-dealing calendar of the Company from the registered office of the Company or from the Company's local distributor or representative.

HSBC Investment Funds (Hong Kong) Limited has been appointed by the Company as its Representative and Share Distributor in Hong Kong. There shall be no dealing for the shares of the Company in Hong Kong on a day which is a public or bank holiday in Hong Kong.

# Appendix IV (Unaudited Additional Disclosures) – Fund Holiday Calendar for 2023

NOTE: THIS CALENDAR IS INDICATIVE AS DATES IN SOME COUNTRIES ARE SUBJECT TO CHANGE.

All HGIF sub-fund will have no NAV calculated on the following days:

- all Saturdays and Sundays

In addition, the following sub-funds will have no NAV calculated on the following dates:

## ASEAN Equity (transition from Thai Equity Fund effective 1<sup>st</sup> August 2023)

(Indonesia, Luxembourg, Malaysia, Singapore, Thailand)

\* Other – dates on which other individual markets, which when amalgamated represent a material portion of the fund's underlying exposure, are closed.

\*\* The NYSE and Nasdaq are open on Columbus Day (9th October) therefore equity sub-funds listing the US as a material market will not have a holiday on this date. Bond markets will be closed to trading on this date and bond sub-funds listing the US as a material market will be closed.

\*\*\* NAV is calculated weekly on Monday (or on the immediately following business day if the relevant Monday is not a business day).

\*\*\*\* Dealing and Net Asset Value calculation of Russia equity sub-fund has been suspended since 25 February 2022 following the closure of Moscow stock exchange.

\*\*\*\*\* Effective 3 July 2023 the sub fund will be renamed US Short Duration High Yield Bond.

# Appendix V (Unaudited Additional Disclosures) – Investment Advisers

The Board of Directors of HSBC Global Investment Funds is responsible for the overall investment policy, objectives and management of HSBC Global Investment Funds and its sub-funds.

The Board of Directors has appointed HSBC Investment Funds (Luxembourg) S.A. as Management Company to be responsible, on a day-to-day basis under the supervision of the Board of Directors, for providing investment management in respect of all sub-funds.

The Management Company has delegated the investment management services to Investment Advisers.

The table below lists the Investment Adviser – and also where applicable the Sub-Investment Adviser(s) of each sub-fund.

| Sub-Fund                                                               | Investment Adviser                        | Sub-Investment Adviser                    |

# Appendix VI (Unaudited Additional Disclosures) – Risk Management

## General

HSBC Investment Funds (Luxembourg) S.A. (the “Management Company”) uses a risk management process that monitors the risk of the portfolio positions and their share of the overall risk profile of the portfolios on the managed funds at any time. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier (“CSSF”), the Management Company reports to the CSSF on a regular basis on the risk management process. The Management Company assures on the basis of appropriate and reasonable methods that the overall risk associated with derivatives does not exceed the Net Asset Value of the portfolio. The Management Company uses the following methods:

### Commitment Approach

The “Commitment Approach” is based on the positions of Financial Derivative Instruments (“FDI”) converted into their corresponding underlying equivalents using the delta approach. Netting and hedging might be considered for FDI and their underlying assets provided that the approach complies with the regulations. The sum of these underlying equivalents must not exceed the Net Asset Value of the Fund.

**Value-at-Risk (“VaR”)** is a mathematical approach used to estimate the potential loss of a portfolio over a specified holding period within a given confidence level. VaR can be calculated on either an absolute or a relative basis.

#### Absolute VaR approach

In the absolute VaR approach the VaR (99% confidence level, 20-day holding period) of the Fund cannot exceed 20% of the Fund net assets.

#### Relative VaR approach

Relative VaR is calculated in relation to a suitable benchmark or reference portfolio. Using this approach, the relative VaR cannot exceed the VaR of a reference portfolio by more than a maximum of twice (200%). The reference portfolio is a matching portfolio in comparison to the Fund's investment policy.

The UK Risk Team of HSBC Asset Management Limited is responsible for specifying, maintaining and running the APT risk model, and ensuring that appropriate analysis and reports are available for the local risk teams to consume. The local risk teams (AMUS, AMFR, AMHK and UK Risk Team) are responsible for reviewing and validating the results, applying Management Action Trigger levels (“MATs”), following up with fund managers, and reporting as required to the Management Company.

The calculation of the VaR is done accordingly to the following calculation standards and in line with the standards defined in ESMA guidelines 10/788 Box 15 and CSSF CR 11/512:

- a) Confidence interval: 99%
- b) Simulation horizon: 4 weeks.
- c) Model estimation window of 180 weeks (3.5 years) used to calibrate the correlation structure of the model.
- d) Daily VaR calculation with daily data sets updates

Currently the risk team use the APT Parametric VaR approach. Since 1<sup>st</sup> January 2023, the Monte-Carlo VaR model is used for the monitoring of Multi-Asset Style Factors fund.

The VaR utilization (lowest, highest and average) of the sub-fund is calculated by dividing the realized (lower, highest and average during the period) daily VaR by the VaR Regulatory limit (20% for the Absolute VaR and 200% for the Relative VaR sub-funds).

# Appendix VI (Unaudited Additional Disclosures) – Risk Management (continued)

| Sub-fund                                                        | Entity in charge of Commitment / VaR monitoring | Starting period | Ending period | Market Risk Calculation | Lowest fund VaR utilisation | Highest fund VaR utilisation | Average fund VaR utilisation | VaR Regulatory Limit | Reference Portfolio (if any)          |
|-----------------------------------------------------------------|-------------------------------------------------|-----------------|---------------|-------------------------|-----------------------------|------------------------------|------------------------------|----------------------|---------------------------------------|

# Appendix VI (Unaudited Additional Disclosures) – Risk Management (continued)

## Leverage

For sub-funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company has delegated the leverage monitoring to the respective sub-funds' Investment Advisers who determine the sum of the notional values of all the relevant FDI and estimate in this regard a degree of the expected average value (leverage). This level of leverage can, depending on the respective market conditions, derive from the actual value at the reporting date. Furthermore, the published expected/ level of leverage is explicitly not understood as an investment limit.

For the sub-funds using the Value at Risk method, the leverage has been calculated using the sum of notionals for the entire period.

| Sub-fund                                                                         | Starting Period | Ending Period | Leverage Methodology | Expected Level of Leverage | Realised Average Level of Leverage |

# Appendix VII (Unaudited Additional Disclosures) – Securities Financing Transactions Regulation (“SFTR”)

Securities Financing Transactions Regulation (“SFTR”) introduces reporting requirements for Securities Lending and Total Return Swaps.

A Securities Financing Transactions (SFT) is defined as per Article 3 of Regulation (EU) 2015/2365(11) of the SFTR as:

- a repurchase/reverse repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transactions or sell-buy back transactions;
- a margin lending transaction.

During the year ending as at 31 March 2023, several sub-funds have engaged in Securities Lending transactions and one sub-fund has invested into Total Return Swap contract under the scope of the SFT.

## Global Data

*Amount of assets engaged in Securities Lending transactions.*

The amount of assets engaged in Securities Lending, including their proportion to the sub-fund Total Net Assets and total lendable assets\* are as follow:

| Sub-funds                                  | Currency | Type of Asset      | Market Value of Securities Lent (in Sub-Funds |                       |                            |
|--------------------------------------------|----------|--------------------|-----------------------------------------------|-----------------------|----------------------------|

### Article 8 framework

To have qualified as an SFDR Article 8 sub-fund, each sub-fund had to promote one or more social or environmental characteristics. HSBC Asset Management’s position is that the vast majority of assets should exhibit strong and improving characteristics. In addition, as a Sustainability Indicator, all Article 8 sub-funds have actively considered all mandatory Principle Adverse Impacts (PAIs) in their investment decision making process and actively take into consideration all relevant PAIs.

### Article 9 framework

To have qualified as an SFDR Article 9 sub-fund, each sub-fund had specifically sustainable goals or a reduction in carbon emissions as their objective. HSBC Asset Management’s position is that the vast majority of assets should exhibit strong and improving characteristics. In addition, an Article 9 sub-fund is required to assess the sub-fund’s portfolio against the principle of “do no significant harm” by considering the PAIs, and incorporating considerations of the minimum social safeguards specified in the Taxonomy Regulation (Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment.

# Appendix IX (Unaudited Additional Disclosures) – Sustainable Finance Disclosure Regulation (“SFDR”) (continued)

## Consideration of company’s ESG credentials

The sub-funds included the identification and analysis of a company’s ESG credentials (“ESG Credentials”) as an integral part of the investment decision-making process to reduce risk and enhance returns.

ESG Credentials have included, but were not limited to:

- ▶ Environmental and social factors including, but not limited to, physical risks of climate change and human capital management that may have had a material impact on a security issuer’s financial performance and valuation.
- ▶ Corporate governance practices that protected minority-investor interests and promoted long-term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified. The inclusion of a company in the sub-fund’s investment universe was at the discretion of the Investment Adviser. Issuers with improving ESG Credentials may have been included when their credentials were still limited.

## Excluded Activities

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified. Notwithstanding the Excluded Activities as detailed below, the inclusion of an issuer in a SFDR Article 8 sub-fund investment universe is at the discretion of the Investment Adviser. Issuers with improving ESG Credentials may be included when their credentials are still limited. Similarly, when issuers have deteriorating ESG Credentials, HSBC could include them in the exclusion lists and dispose of the assets.

SFDR Article 8 sub-funds will not invest in securities issued by issuers with specified involvement in specific excluded activities (“Excluded Activities”). Excluded Activities and specified involvement are proprietary to HSBC and include, but are not limited to

- ▶ Companies involved in the production of controversial weapons or their key components. Controversial weapons include, but are not limited to, anti-personnel mines, depleted uranium weapons and white phosphorus when used for military purposes. This exclusion is in addition to HSBC Asset Management’s banned weapons policy.
- ▶ Companies involved in the production of tobacco.
- ▶ Companies with more than 10% revenue generated from thermal coal extraction and do not have a clearly defined and credible plan to reduce exposure to below 10%.
- ▶ Companies with more than 10% revenue generated from coal-fired power generation and do not have a clearly defined and credible plan to reduce exposure to below 10%.

HSBC Asset Management generally conduct enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by the HSBC’s proprietary ESG ratings. Therefore, none of the above sub-funds intentionally invest in companies that made serious violations of the UN Global Compact Principles as determined by HSBC’s assessment of proven breaches. If determined to have made serious violations post purchase, these issuers were subsequently exited.

ESG Credentials, Excluded Activities and the need for enhanced due diligence was identified and analysed by using, but not exclusively, HSBCs proprietary ESG Materiality Framework and ratings, fundamental qualitative research and corporate engagement. The Investment Advisers also relied on expertise, research and information provided by financial and non-financial data providers.

Certain individual sub-funds had additional exclusions, which are detailed in the Prospectus, which can be found at [www.assetmanagement.hsbc.com](http://www.assetmanagement.hsbc.com).

# Appendix IX (Unaudited Additional Disclosures) – Sustainable Finance Disclosure Regulation (“SFDR”) (continued)

## Taxonomy

The Taxonomy Regulation was established to provide an EU-wide classification system which provides investors and investee companies with a common language to identify whether certain economic activities could be considered environmentally sustainable.

Under the Taxonomy Regulation, an economic activity was considered to be environmentally sustainable where it:

- ▶ contributed substantially to one or more defined environmental objectives;
- ▶ did not significantly harm any of the environmental objectives;
- ▶ complied with certain minimum social safeguards; and
- ▶ complied with specified performance thresholds known as technical screening criteria.

For points 1 and 2 above, the Taxonomy Regulation defines the environmental objectives into six areas:

- ▶ climate change mitigation;
- ▶ climate change adaptation;
- ▶ sustainable use and protection of water and marine resources;
- ▶ transition to a circular economy;
- ▶ pollution prevention and control; and
- ▶ protection and restoration of biodiversity and ecosystems.

Until 1 January 2022, the Taxonomy Regulation has been limited in its application only to the first two environmental objectives – climate change mitigation and climate change adaptation, as defined under the Taxonomy Regulation. The remaining four environmental objectives has been applied from 1 January 2023. Based on available data on the reporting date, 0% of the sub-funds' investments were invested in economic activities that qualified as environmentally sustainable under the Taxonomy Regulation.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark was used to measure the sub-fund's carbon intensity and ESG rating, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - J.P. Morgan ESG Asia Credit Index

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction and made an improvement of the overall ESG score, relative to the benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and  
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having breached one of the ten principles of the UNGC were subject to enhanced due diligence to evaluate whether the breach was valid, and if so would be excluded from the universe. The sub-fund also conducted enhanced due diligence on companies that were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of the investee companies (Scope 1 & Scope 2)

### What were the top investments of this financial product?

| Large Investments                                              | Sector     | % Assets | Country   |
|----------------------------------------------------------------|------------|----------|-----------|
| Oversea-chinese Banking Corporation Limited 1.832% 10-sep-2030 | Financials | 2.22%    | Singapore |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

|                                                                         |                        |       |           |

Cash and derivatives were excluded

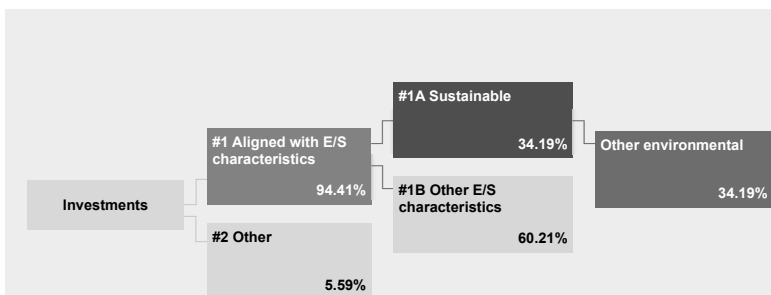

## What was the proportion of sustainability-related investments?

34.19% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 32.17%   |
| Other                  | 17.82%   |
| Real Estate            | 12.52%   |
| Government             | 11.08%   |
| Industrials            | 6.27%    |
| Utilities              | 4.88%    |
| Consumer Discretionary | 4.69%    |
| Information Technology | 3.57%    |
| Communication Services | 3.37%    |
| Energy                 | 2.25%    |
| Consumer Staples       | 0.82%    |
| Materials              | 0.56%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

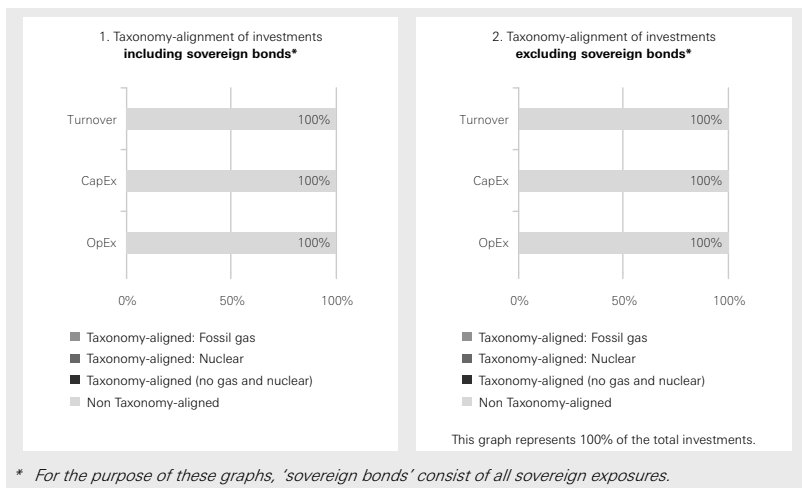

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>4</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

34.19%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long-term total return by investing in a portfolio of Asian bonds, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund invested in Investment Grade, Non-Investment Grade rated and unrated fixed income and other similar securities which were either issued or guaranteed by governments, government agencies and supranational bodies in Asia or by companies which were domiciled in, based in, or carried out the larger part of their business in Asia.

It may also have invested in Investment Grade and Non-Investment Grade rated fixed income and other similar securities issued by issuers meeting certain ESG rating and lower carbon intensity criteria ("ESG and Lower Carbon Criteria") as described below.

After identifying the eligible investment universe, the Investment Adviser aimed to construct a portfolio with a higher ESG rating and lower carbon intensity, calculated as a weighted average of the ESG ratings and carbon intensities of the sub-fund's investments, against the weighted average of the constituents of the Reference Benchmark. When assessing issuers' ESG rating and carbon intensity, The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the reference benchmark, JP Morgan ESG Asia Credit.

The ESG and Lower Carbon Criteria, which is explained further below, are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified.

The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 7.36            | 6.66                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 104.49          | 101.71                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           | 0.12%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |
| 15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)                                                                           | 136.90          | 150.89                     |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Bloomberg Euro Aggregate

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund identified and analysed a company's ESG credentials as an integral part of the investment decision made process to reduce sustainability risks and enhance returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and  
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

Principal Adverse Impacts also considered by the sub-fund were:

- Greenhouse gas intensity for sovereign issues
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)

### What were the top investments of this financial product?

| Large Investments                      | Sector     | % Assets | Country |
|----------------------------------------|------------|----------|---------|
| Government Of Italy 1.5% 01-jun-2025   | Government | 5.87%    | Italy   |
| Government Of France 4.75% 25-apr-2035 | Government | 4.79%    | France  |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

|                                                    |            |       |               |
|----------------------------------------------------|------------|-------|---------------|
| Government Of France 1.5% 25-may-2031              | Government | 2.98% | France        |
| Axa Home Loan Sfh 0.01% 16-oct-2029                | Financials | 2.91% | France        |
| Kfw 0.625% 07-jan-2028                             | Government | 2.90% | Germany       |
| Kfw 0.01% 05-may-2027                              | Government | 2.86% | Germany       |

| Government Of Spain 1.85% 30-jul-2035              | Government | 1.60% | Spain         |
| Government Of Germany 0.0% 15-aug-2050             | Government | 1.59% | Germany       |

Cash and derivatives were excluded

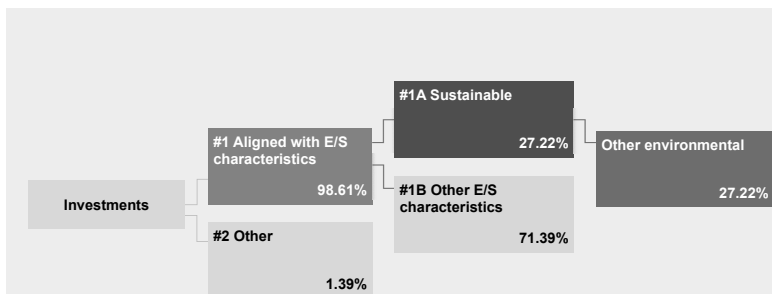

## What was the proportion of sustainability-related investments?

27.22% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Government             | 58.33%   |
| Financials             | 16.48%   |
| Other                  | 7.73%    |
| Utilities              | 6.83%    |
| Health Care            | 2.04%    |
| Consumer Discretionary | 1.85%    |
| Communication Services | 1.65%    |
| Real Estate            | 1.34%    |
| Information Technology | 1.19%    |
| Energy                 | 1.13%    |
| Consumer Staples       | 0.96%    |
| Industrials            | 0.46%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

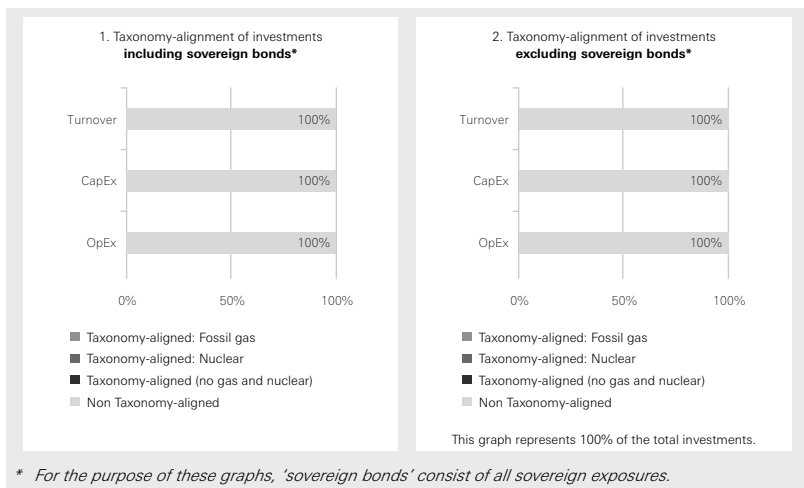

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>4</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

27.22%

● **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of Euro denominated bonds while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund aimed to do this with a higher ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments, than the weighted average of the constituents of the Bloomberg Euro Aggregate (the "Reference Benchmark").

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark.

The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***  
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                  |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but was not designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 8.09            | 7.38                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 88.00           | 124.07                     |

| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - iBoxx € Corporates

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process to reduce sustainability risk and enhance returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could have adversely impacted the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where potential material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aiming, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested were expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by the HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas of investee companies (Scope 1 & Scope 2)

How Principal Adverse Impacts were considered will be included in the sub-fund's year-end report and accounts.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

| Large Investments                                      | Sector      | % Assets | Country                  |
|--------------------------------------------------------|-------------|----------|--------------------------|
| European Investment Bank 1.5% 15-jun-2032              | Government  | 3.48%    | SUPRANATIONAL            |
| Government Of Germany 2.5% 13-mar-2025                 | Government  | 2.99%    | Germany                  |
| Credit Mutuel-cic Home Loan Sfh Sa 0.625% 02-feb-2026  | Other       | 2.58%    | France                   |

Cash and derivatives were excluded

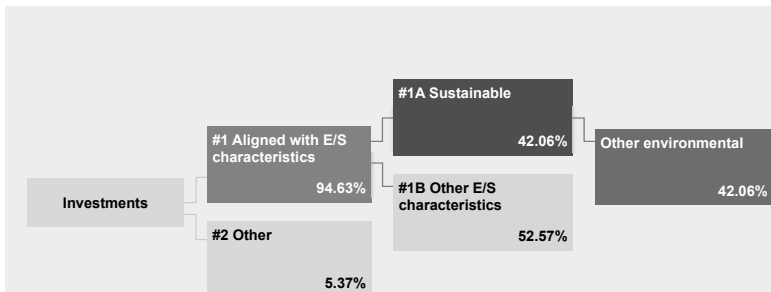

## What was the proportion of sustainability-related investments?

42.06% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 38.09%   |
| Other                  | 16.30%   |
| Utilities              | 13.89%   |
| Industrials            | 9.23%    |
| Government             | 8.25%    |
| Communication Services | 4.77%    |
| Consumer Discretionary | 2.85%    |
| Consumer Staples       | 2.12%    |
| Real Estate            | 1.71%    |
| Health Care            | 1.59%    |
| Information Technology | 1.20%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.  
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.  
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

42.06%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested for total return primarily in a diversified portfolio of Investment Grade rated fixed income (e.g. bonds) and other similar securities, denominated in Euro, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund aimed to have a higher ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark.

The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by the HSBC's proprietary ESG ratings.

ESG Credentials, Excluded Activities and the need for enhanced due diligence were identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, fundamental qualitative research and corporate engagement. The Investment Adviser may have relied on expertise, research and information provided by well-established financial data providers.

### **How did this financial product perform compared to the reference benchmark?**

N/A

#### **● *How does the reference benchmark differ from a broad market index?***

N/A

#### **● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

#### **● *How did this financial product perform compared with the reference benchmark?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - ICE BofA Euro High Yield BB-B Rated Constrained Index

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund identified and analysed a company's ESG credentials as an integral part of the investment decision made process to reduce sustainability risks and enhance returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas of investee companies (Scope 1 & Scope 2)

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

Cash and derivatives were excluded

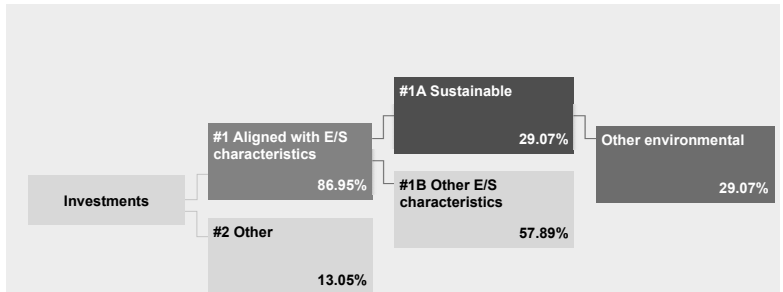

## What was the proportion of sustainability-related investments?

29.07% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

### ● *What was the asset allocation?*

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● *In which economic sectors were the investments made?*

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 24.59%   |
| Other                  | 22.79%   |
| Communication Services | 17.09%   |
| Industrials            | 8.81%    |
| Consumer Discretionary | 7.87%    |
| Materials              | 5.61%    |
| Utilities              | 5.14%    |
| Real Estate            | 3.89%    |
| Consumer Staples       | 2.32%    |
| Health Care            | 1.55%    |
| Information Technology | 0.34%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

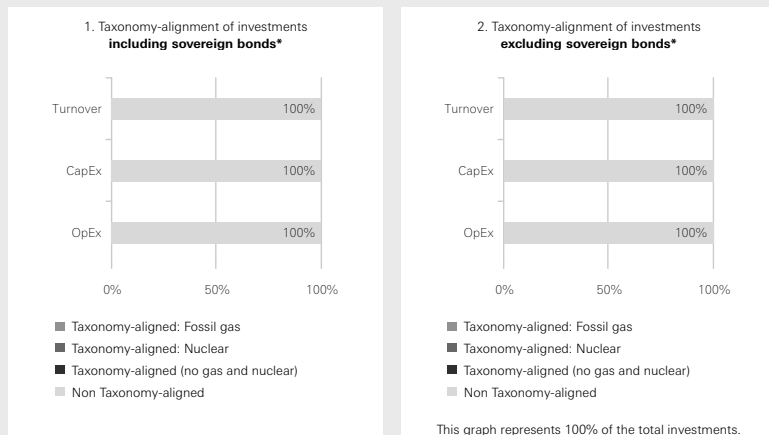

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

29.07%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund aimed to provide long term total return by investing in a portfolio of Euro denominated high yielding bonds, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund aimed to have a higher ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments, than the weighted average of the constituents of the ICE BofA Euro High Yield BB-B Constrained.

The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

## How did this financial product perform compared to the reference benchmark?

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials). Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by this sub-fund were aligned to its environmental characteristics.

The sub-fund aimed to identify and analyse a company's ESG and Lower Carbon credentials as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could have adversely impacted the securities the sub-funds invest in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which include the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hssc/about-us/responsible-investing/policies](http://www.assetmanagement/hssc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested were expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance was also taken into account. As a result of such screens, HSBC did not invest in certain companies and issuers.

Principal Adverse Impacts also considered by the sub-fund were:

- Greenhouse gas intensity of investee companies (scope 1 & scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

| Large Investments                                           | Sector      | % Assets | Country                                              |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

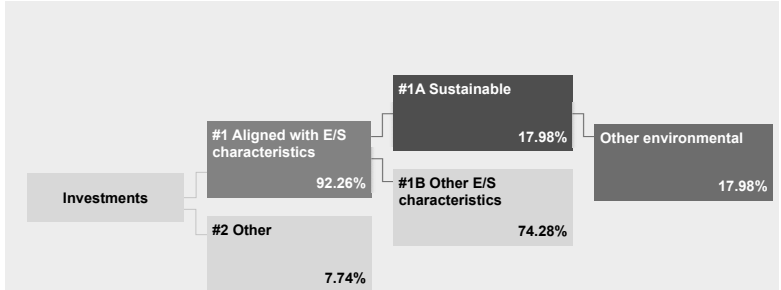

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

17.98% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Other                  | 30.82%   |
| Financials             | 21.09%   |
| Materials              | 16.16%   |
| Health Care            | 5.55%    |
| Industrials            | 5.29%    |
| Real Estate            | 4.78%    |
| Consumer Discretionary | 3.51%    |
| Energy                 | 3.10%    |
| Information Technology | 2.67%    |
| Utilities              | 1.94%    |
| Government             | 1.91%    |
| Communication Services | 1.78%    |
| Consumer Staples       | 1.41%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:
   
 In fossil gas       In nuclear energy
   
 No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

17.98%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may also have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund invested in normal market conditions a minimum of 70% of its net assets in short duration Investment Grade, Non-Investment Grade rated and unrated bonds and similar securities issued or guaranteed by governments, government agencies, quasi-government entities, state sponsored enterprises, local or regional governments (including state, provincial, and municipal governments and governmental entities) and supranational bodies or companies meeting certain ESG rating and lower carbon intensity criteria ("ESG and Lower Carbon Criteria").

The securities in which the sub-fund invested were those issued by issuers meeting certain "ESG and Lower Carbon Criteria" as detailed below.

The ESG and Lower Carbon Criteria are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified. The exclusion or inclusion of an issuer in the sub-fund's investment universe was at the discretion of the Investment Adviser. Issuers with an improving ESG rating and carbon intensity may have been included when their ESG rating was still low or carbon intensity was still high. When assessing issuers' ESG rating and carbon intensity, the Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

More information on HSBC Asset Management's responsible investing policies is available at [www.assetmanagement.hsbc.com/about-us/responsible-investing/policies](http://www.assetmanagement.hsbc.com/about-us/responsible-investing/policies).

## How did this financial product perform compared to the reference benchmark?

N/A

- ***How does the reference benchmark differ from a broad market index?***  
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Bloomberg Global Aggregate

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for an improvement of the overall ESG score of the portfolio relative to benchmark constituents, through portfolio construction.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hbsc/about-us/responsible-investing/policies](http://www.assetmanagement/hbsc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas intensity for sovereign issues
- Greenhouse gas intensity for investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

| Large Investments                                             | Sector     | % Assets | Country                  |
|---------------------------------------------------------------|------------|----------|--------------------------|
| Government Of The United States Of America 2.25% 15-aug-2027  | Government | 7.75%    | United States of America |
| Government Of Germany 0.0% 15-feb-2032                        | Government | 5.65%    | Germany                  |
| Government Of The United States Of America 2.75% 15-aug-2032  | Government | 5.17%    | United States of America |
| Government Of The United States Of America 1.375% 15-aug-2050 | Government | 3.69%    | United States of America |
| Government Of China 3.27% 19-nov-2030                         | Government | 3.37%    | China                    |

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

|                                            |            |                     |
|--------------------------------------------|------------|---------------------|
| Government Of Italy 0.9% 01-apr-2031       | Government | 1.57% Italy         |
| European Investment Bank 2.15% 18-jan-2027 | Government | 1.52% SUPRANATIONAL |
| Government Of Canada 1.5% 01-dec-2031      | Government | 1.44% Canada        |

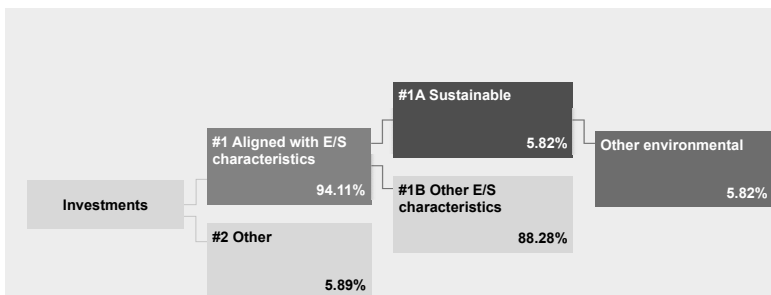

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

5.82% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Government             | 72.17%   |
| Other                  | 16.50%   |
| Financials             | 3.51%    |
| Utilities              | 2.12%    |
| Communication Services | 1.60%    |
| Information Technology | 1.14%    |
| Industrials            | 0.90%    |
| Real Estate            | 0.70%    |
| Materials              | 0.54%    |
| Consumer Discretionary | 0.47%    |
| Energy                 | 0.19%    |
| Health Care            | 0.15%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

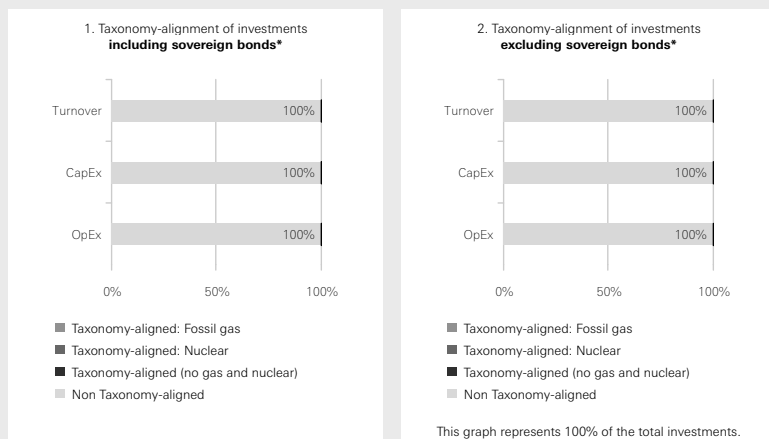

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

5.82%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested for total return primarily in a diversified portfolio of Investment Grade rated fixed income (e.g. bonds) and other similar securities from around the world, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund aimed for a higher ESG rating than the Reference Benchmark through its portfolio construction.

The asset classes that the sub-fund may have invested in, included but were not limited to developed markets sovereigns, developed markets quasi-sovereigns, developed markets investment grade corporate securities, developed markets high yield corporate securities, Emerging Markets sovereign and Emerging Markets corporate securities.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark.

The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

**How did this financial product perform compared to the reference benchmark?**

N/A

● ***How does the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes                                                                                                                                                                                                                                                                                                                                                                                        | <input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was managed without reference to any market index weightings. The sub-fund aimed to have done this with a higher ESG rating, calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the constituents of each of the sub-fund's asset classes. The sub-fund was actively managed and was not constrained by a benchmark, there was no reference benchmark for the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● **How did the sustainability indicators perform?**

| Indicator                                                                                                                                                | Sub-Fund |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| ESG Score                                                                                                                                                | 6.84     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 168.41   |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%    |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%    |
| 15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)                                                                           | 272.72   |

The data in this SFDR Periodic Report are as at 31 March 2023

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for an improvement of the overall ESG score of the portfolio relative to benchmark constituents, through portfolio construction.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hssc/about-us/responsible-investing/policies](http://www.assetmanagement/hssc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas intensity for sovereign issues
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments                                                              | Sector                 | % Assets | Country                                              |
|--------------------------------------------------------------------------------|------------------------|----------|------------------------------------------------------|
| Government Of New Zealand 3.5% 14-apr-2033                                     | Government             | 2.51%    | New Zealand                                          |

Cash and derivatives were excluded

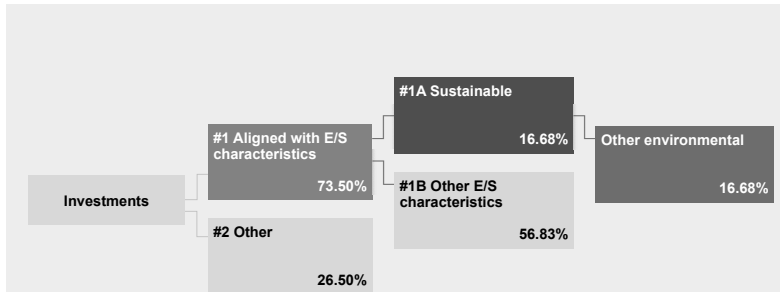

## What was the proportion of sustainability-related investments?

16.68% of the portfolio was invested in sustainable assets.

### ● *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● *In which economic sectors were the investments made?*

| Sector                 | % Assets |
|------------------------|----------|
| Other                  | 28.04%   |
| Financials             | 22.27%   |
| Government             | 10.80%   |
| Communication Services | 6.89%    |
| Industrials            | 6.19%    |
| Utilities              | 5.82%    |
| Real Estate            | 5.23%    |
| Information Technology | 4.36%    |
| Materials              | 4.23%    |
| Consumer Discretionary | 2.96%    |
| Energy                 | 1.84%    |
| Consumer Staples       | 0.74%    |
| Health Care            | 0.64%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● *To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?*

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?*

 Yes: In fossil gas In nuclear energy No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

16.68%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund aimed to provide long term total return by investing in a portfolio allocated across global bonds and other similar securities or instruments, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund aimed to do this with a higher ESG rating, calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the constituents of each of the sub-fund's asset classes.

The sub-fund included the identification and analysis of an issuer's ESG credentials and Excluded Activities were described below.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified. Notwithstanding the Excluded Activities as detailed below, the inclusion of an issuer in the sub-fund's investment universe was at the discretion of the Investment Adviser. Issuers with improving ESG Credentials may have been included when their credentials were still limited. The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers. More information on HSBC Asset Management's responsible investing policies is available at [www.assetmanagement.hsbc.com/about-us/responsible-investing/policies](http://www.assetmanagement.hsbc.com/about-us/responsible-investing/policies).

The Total Return strategy aimed to capture the majority of the upside in the global bond universe while limiting the downside risk. The Total Return strategy had a flexible allocation across the full spectrum of global bonds and currency markets. Returns were generated through duration management, yield curve positioning, currency positioning and the selection of individual securities within the investment universe. By seeking multiple sources of return, the Total Return strategy aimed to provide over an investment cycle risk-adjusted returned above the investment universe of the sub-fund without reference to a benchmark index. However the Total Return strategy did not imply there was any protection of capital or guarantee of a positive return over time. The sub-fund was subject to market risks at any time.

## How did this financial product perform compared to the reference benchmark?

N/A

- ***How does the reference benchmark differ from a broad market index?***  
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark. The Reference Benchmark had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 7.01            | 6.98                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 115.22          | 188.40                     |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Global Aggregate Corporates AWS Index

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hbsc/about-us/responsible-investing/policies](http://www.assetmanagement/hbsc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?  
Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provides the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

### What were the top investments of this financial product?

| Large Investments                                           | Sector                 | % Assets | Country                  |
|-------------------------------------------------------------|------------------------|----------|--------------------------|
| Government Of The United States Of America 3.0% 15-aug-2025 | Government             | 1.38%    | United States of America |
| Commonwealth Bank Of Australia Frn 13-mar-2026              | Financials             | 1.33%    | Australia                |
| U.s. Bancorp 2.491% 03-nov-2036                             | Financials             | 1.20%    | United States of America |
| Colgate-palmolive Company 4.6% 01-mar-2033                  | Consumer Staples       | 1.04%    | United States of America |

| Southern Gas Networks Plc 2.5% 03-feb-2025  | Utilities              | 0.71% | United Kingdom of Great Britain and Northern Ireland |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

24.65% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 39.87%   |
| Other                  | 18.46%   |
| Communication Services | 6.72%    |
| Industrials            | 5.69%    |
| Government             | 5.20%    |
| Consumer Discretionary | 4.03%    |
| Consumer Staples       | 3.78%    |
| Information Technology | 3.69%    |
| Utilities              | 3.56%    |
| Real Estate            | 2.97%    |
| Health Care            | 2.82%    |
| Energy                 | 1.97%    |
| Materials              | 1.24%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.  
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.  
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

24.65%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of corporate bonds, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund was invested, in normal market conditions in:

- Investment Grade rated fixed income and other similar securities which were issued by companies in any country including both developed markets and Emerging Markets. These securities were denominated in developed market and Emerging Market currencies.
- Asset Backed Securities ("ABS") and Mortgage Backed Securities ("MBS") up to a maximum of 20% of the sub-fund's net assets.

The sub-fund included the identification and analysis of an issuers' ESG credentials, as set out above, as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

The sub-fund was not invested in bonds issued by issuers with specified involvement in specific excluded activities.

ESG Credentials, Excluded Activities and the need for enhanced due diligence might have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser might have relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The sub-fund has an internal or external target to outperform the Reference Benchmark.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund actively considered low carbon intensity investments.
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark may have been used for market comparison purposes, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - J.P.Morgan ESG EMBI Global Diversified

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG and Lower Carbon credentials as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hssc/about-us/responsible-investing/policies](http://www.assetmanagement/hssc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

| Large Investments                                              | Sector     | % Assets | Country                  |
|----------------------------------------------------------------|------------|----------|--------------------------|
| Government Of Panama 6.4% 14-feb-2035                          | Government | 2.02%    | Panama                   |
| Government Of The United States Of America 4.125% 15-nov-2032  | Government | 1.94%    | United States of America |
| Government Of The Dominican Republic 5.5% 22-feb-2029          | Government | 1.91%    | Dominican Republic       |
| Government Of Peru 3.0% 15-jan-2034                            | Government | 1.74%    | Peru                     |
| Government Of Costa Rica 4.375% 30-apr-2025                    | Government | 1.61%    | Costa Rica               |
| Government Of Uruguay 4.375% 23-jan-2031                       | Government | 1.50%    | Uruguay                  |
| Government Of Uruguay 5.1% 18-jun-2050                         | Government | 1.49%    | Uruguay                  |
| Government Of Uruguay 5.75% 28-oct-2034                        | Government | 1.36%    | Uruguay                  |
| Ecopetrol S.a. 8.875% 13-jan-2033                              | Energy     | 1.29%    | Colombia                 |
| Government Of Hungary 6.75% 25-sep-2052                        | Government | 1.26%    | Hungary                  |
| Government Of Turkey 9.375% 14-mar-2029                        | Government | 1.24%    | Turkey                   |
| Government Of The United States Of America 4.0% 15-nov-2052    | Government | 1.20%    | United States of America |
| Government Of The United States Of America 2.875% 15-may-2032  | Government | 1.12%    | United States of America |
| Emirate Of Abu Dhabi (United Arab Emirates) 3.125% 30-sep-2049 | Government | 1.06%    | United Arab Emirates     |

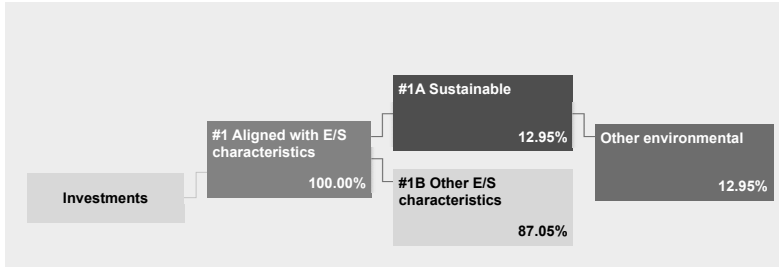

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

12.95% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Government             | 77.78%   |
| Other                  | 9.16%    |
| Energy                 | 5.29%    |
| Financials             | 2.80%    |
| Materials              | 1.68%    |
| Consumer Discretionary | 1.24%    |
| Utilities              | 0.99%    |
| Industrials            | 0.71%    |
| Health Care            | 0.34%    |
| Total                  | 100.00%  |

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

12.95%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund aimed to provide long term total return by investing in a portfolio of Investment Grade and Non-Investment Grade rated fixed income (e.g. bonds) and other similar securities either issued by companies which had their registered office in Emerging Markets around the world or which were issued or guaranteed by governments, government agencies, quasi government entities, state sponsored enterprises, local or regional governments (including state, provincial, and municipal governments and governmental entities) and supranational bodies of Emerging Markets, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The securities in which the sub-fund was invested were those issued by issuers meeting certain "ESG and Lower Carbon Criteria" as detailed below.

The ESG and Lower Carbon Criteria are proprietary to HSBC, subject to ongoing research and may have changed over time as new criteria are identified. The exclusion or inclusion of an issuer in the sub-fund's investment universe was at the discretion of the Investment Adviser. Issuers with an improving ESG rating and carbon intensity may have been included when their ESG rating was still low or carbon intensity was still high. When assessing issuers' ESG rating and carbon intensity, the Investment Adviser may have relied on expertise, research and information provided by well-established financial data providers. More information on HSBC Asset Management's responsible investing policies is available at [www.assetmanagement.hsbc.com/about-us/responsible-investing/policies](http://www.assetmanagement.hsbc.com/about-us/responsible-investing/policies).

## How did this financial product perform compared to the reference benchmark?

N/A

- ***How does the reference benchmark differ from a broad market index?***  
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used to measure the sub-fund's carbon intensity and ESG rating, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 5.47            | 4.00                       |

| 15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)                                                                           | 304.05          | 370.30                     |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - JP Morgan EMBI Global Diversified

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction and made an improvement of the overall ESG score, relative to the benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hssc/about-us/responsible-investing/policies](http://www.assetmanagement/hssc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?  
Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that was considered to be non-compliant with the UN Global Compact Principles, or was considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

### What were the top investments of this financial product?

| Large Investments                                           | Sector     | % Assets | Country                  |
|-------------------------------------------------------------|------------|----------|--------------------------|
| Government Of Poland 2.5% 25-jul-2027                       | Government | 3.77%    | Poland                   |
| Government Of The United States Of America 0.0% 09-may-2023 | Government | 3.43%    | United States of America |
| Government Of Thailand 1.585% 17-dec-2035                   | Government | 3.13%    | Thailand                 |
| Government Of Mexico 5.75% 05-mar-2026                      | Government | 2.74%    | Mexico                   |
| Government Of Poland 0.25% 25-oct-2026                      | Government | 2.61%    | Poland                   |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

|                                                             |            |       |                          |
|-------------------------------------------------------------|------------|-------|--------------------------|
| Government Of The United States Of America 0.0% 13-jul-2023 | Government | 2.55% | United States of America |
| Government Of Mexico 7.5% 03-jun-2027                       | Government | 2.52% | Mexico                   |
| Government Of South Africa 9.0% 31-jan-2040                 | Government | 2.40% | South Africa             |
| Government Of Czech Republic 1.75% 23-jun-2032              | Government | 2.40% | Czech Republic           |
| Government Of Colombia 7.0% 26-mar-2031                     | Government | 2.37% | Colombia                 |
| Government Of Mexico 8.5% 18-nov-2038                       | Government | 2.30% | Mexico                   |
| Government Of Poland 2.5% 25-jul-2026                       | Government | 2.30% | Poland                   |
| Government Of The United States Of America 0.0% 20-apr-2023 | Government | 1.99% | United States of America |
| Government Of Brazil 10.0% 01-jan-2025                      | Government | 1.86% | Brazil                   |
| Government Of South Africa 8.5% 31-jan-2037                 | Government | 1.83% | South Africa             |

Cash and derivatives were excluded

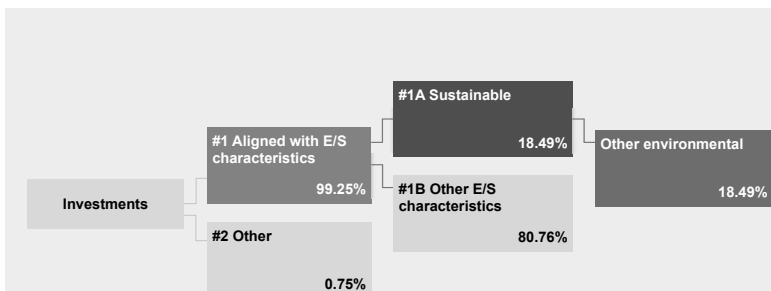

## What was the proportion of sustainability-related investments?

18.49% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector     | % Assets |
|------------|----------|
| Government | 98.83%   |
| Other      | 0.75%    |
| Financials | 0.42%    |
| Total      | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:  In fossil gas  In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.  
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.  
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

18.49%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested for long term total return in a portfolio of Emerging Market local currency bonds, foreign exchange forwards and other similar securities, meeting certain ESG rating and lower carbon intensity criteria ("ESG and Lower Carbon Criteria") as described below, based on each Emerging Market country's ESG and carbon intensity rating. When assessing countries' ESG rating, the Investment Adviser may have relied on expertise, research and information provided by well-established financial data providers.

The fixed income securities were issued or guaranteed by governments, government agencies, quasi-government entities, state sponsored enterprises, local or regional governments (included state, provincial, and municipal governments and governmental entities) or supranational bodies of Emerging Markets or issued by companies which were based in or carried out the larger part of their business activities in Emerging Markets. All instruments were primarily denominated in or linked to Emerging Market currencies.

The sub-fund was given preference to investment in sustainable bonds such as, but not limited to, Sustainability-Linked Bonds, Transition Bonds, Social Bonds and Green Bonds when available.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***  
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used to measure the sub-fund's carbon intensity and ESG rating, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 7.80            | 6.98                       |
| E Pillar                                                                                                                                                 | 7.86            | 7.28                       |
| S Pillar                                                                                                                                                 | 5.39            | 5.02                       |
| G Pillar                                                                                                                                                 | 6.08            | 5.84                       |

The data in this SFDR Periodic Report are as at 31 March 2023

● ***Reference Benchmark - Bloomberg Global Aggregate Corporates Diversified ...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

### **What were the top investments of this financial product?**

| <b>Large Investments</b>                                    | <b>Sector</b> | <b>% Assets</b> | <b>Country</b>                                       |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

28.88% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 41.62%   |
| Other                  | 16.31%   |
| Government             | 5.70%    |
| Communication Services | 5.27%    |
| Health Care            | 4.51%    |
| Industrials            | 4.42%    |
| Consumer Staples       | 4.26%    |
| Information Technology | 4.01%    |
| Utilities              | 3.82%    |
| Real Estate            | 2.95%    |
| Consumer Discretionary | 2.88%    |
| Energy                 | 2.25%    |
| Materials              | 2.00%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

28.88%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments may have been used for efficient portfolio management. This may have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of corporate bonds seeking a higher environmental, social and governance ("ESG") rating and lower carbon intensity, than its reference benchmark Bloomberg Global Aggregate Corporates Diversified Hedged USD (the "Reference Benchmark"), while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund invested in:

- Investment Grade rated fixed income and other similar securities issued by companies meeting certain ESG rating and lower carbon intensity criteria ("ESG and Lower Carbon Criteria"). The sub-fund was invested in developed markets. Investments were primarily denominated in developed market currencies. The sub-fund may have also invested in Emerging Market bonds as well as Asset Backed Securities ("ABS") and Mortgage Backed Securities ("MBS").

The ESG and Lower Carbon Criteria, which was explained further below, were proprietary to HSBC, subject to ongoing research and may have changed over time as new criteria was identified.

After identifying the eligible investment universe, the Investment Adviser aimed to construct a portfolio with a higher ESG rating and lower carbon intensity, calculated as a weighted average of the ESG ratings and carbon intensities of the sub-fund's investments, against the weighted average of the constituents of the Reference Benchmark. When assessing issuers' ESG rating and carbon intensity, the Investment Adviser may have relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The Reference Benchmark was used for sub-fund market comparison purposes.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 6.12            | 6.57                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 160.87          | 0.00                       |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           | 0.00%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |
| 15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)                                                                           | 246.14          | 273.37                     |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - JP Morgan GBI Global ( Bench )

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund identified and analysed a company's ESG credentials as an integral part of the investment decision made process to reducing risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Issuers having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

Principal Adverse Impacts also considered by the sub-fund were:

- Greenhouse gas intensity for sovereign issues
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

| Large Investments                                             | Sector     | % Assets | Country                  |
|---------------------------------------------------------------|------------|----------|--------------------------|
| Government Of The United States Of America 3.0% 15-jul-2025   | Government | 4.94%    | United States of America |
| Government Of The United States Of America 0.375% 31-jan-2026 | Government | 3.34%    | United States of America |

| Government Of Germany 0.0% 15-mar-2024                        | Government | 1.41%    | Germany                  |
| Government Of France 0.0% 25-feb-2025                         | Government | 1.38%    | France                   |

|                                                               |            |       |                          |
|---------------------------------------------------------------|------------|-------|--------------------------|
| Government Of The United States Of America 4.625% 28-feb-2025 | Government | 1.36% | United States of America |
| Government Of The United States Of America 1.875% 28-feb-2027 | Government | 1.33% | United States of America |
| Government Of The United States Of America 2.375% 15-feb-2042 | Government | 1.32% | United States of America |

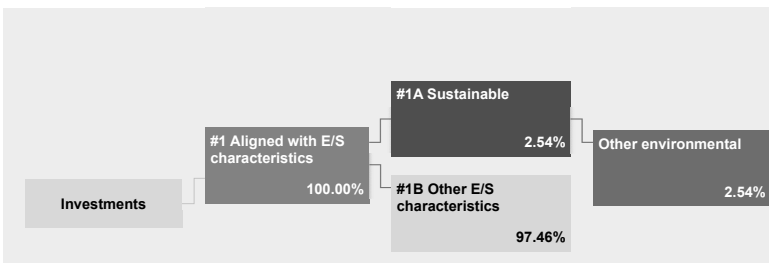

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

2.54% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Government             | 93.64%   |
| Other                  | 4.82%    |
| Financials             | 0.62%    |
| Communication Services | 0.22%    |
| Utilities              | 0.19%    |
| Information Technology | 0.12%    |
| Real Estate            | 0.12%    |
| Materials              | 0.11%    |
| Energy                 | 0.06%    |
| Consumer Discretionary | 0.05%    |
| Industrials            | 0.04%    |
| Consumer Staples       | 0.00%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:  In fossil gas  In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.  
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.  
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

2.54%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of government bonds, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund invested (normally a minimum of 70% of its net assets) in Investment Grade rated fixed income and other similar securities which were issued or guaranteed by governments, government agencies and supranational bodies in both developed markets and Emerging Markets. These securities were denominated in developed market and Emerging Market currencies.

The sub-fund aimed for a higher ESG rating than the Reference Benchmark through its portfolio construction.

The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

### **How did this financial product perform compared to the reference benchmark?**

N/A

#### **● *How does the reference benchmark differ from a broad market index?***

N/A

#### **● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

#### **● *How did this financial product perform compared with the reference benchmark?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                  |

| <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>                              | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>                                                                                                                    |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes, and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Bloomberg Global Green Bond

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction relative to the Reference Benchmark constituents.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:  
31/03/2023

| Large Investments                                                              | Sector     | % Assets | Country       |
|--------------------------------------------------------------------------------|------------|----------|---------------|

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

97.37% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 34.14%   |
| Other                  | 22.88%   |
| Utilities              | 15.24%   |
| Government             | 13.65%   |
| Real Estate            | 6.13%    |
| Communication Services | 4.18%    |
| Consumer Discretionary | 2.30%    |
| Industrials            | 1.06%    |
| Consumer Staples       | 0.41%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas       In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

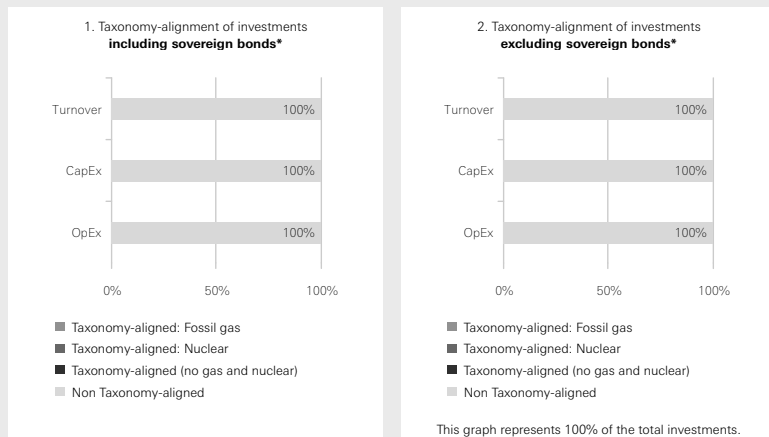

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

97.37%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a concentrated portfolio of bonds that support climate related or environmental projects, as established by the HSBC Green Impact Investment Guidelines, thereby promoting ESG characteristics within the meaning of Article 8 of SFDR. The sub-fund was invested in developed markets and Emerging Markets.

The sub-fund aimed to support climate related and environmental projects through security selection and portfolio construction.

### **How did this financial product perform compared to the reference benchmark?**

The Bloomberg MSCI Global Green Bond USD Hedged was the Reference Benchmark for the sub-fund, it was broadly aligned with the environmental and social characteristics promoted.

- ***How does the reference benchmark differ from a broad market index?***  
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                  |

| <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>                              | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>                                                                                                                    |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund aimed to have done this with a higher ESG rating than the Reference Benchmark, calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the Reference Benchmark constituents. The Reference Benchmark had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Bloomberg Global Aggregate - Corporates

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund identified and analysed a company's ESG credentials as an integral part of the investment decision made process through portfolio construction with the aim of reducing sustainability risks and enhancing returns. By considering the ESG Credentials of potential investments the Investment adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and  
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

### What were the top investments of this financial product?

| Large Investments                                             | Sector     | % Assets | Country                  |
|---------------------------------------------------------------|------------|----------|--------------------------|
| Government Of The United States Of America 2.75% 15-aug-2032  | Government | 1.88%    | United States of America |
| Government Of The United States Of America 4.375% 31-oct-2024 | Government | 1.09%    | United States of America |

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

Cash and derivatives were excluded

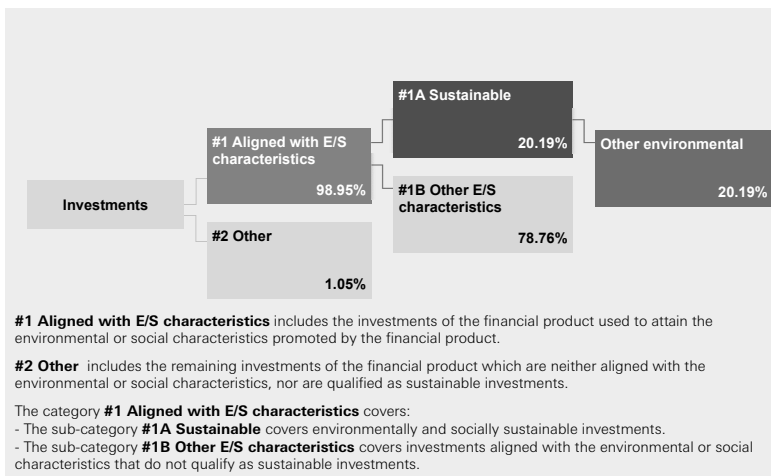

## What was the proportion of sustainability-related investments?

20.19% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 24.89%   |
| Other                  | 21.40%   |
| Government             | 18.24%   |
| Materials              | 6.20%    |
| Energy                 | 6.11%    |
| Communication Services | 5.83%    |
| Consumer Discretionary | 3.88%    |
| Utilities              | 3.63%    |
| Industrials            | 3.13%    |
| Real Estate            | 2.28%    |
| Health Care            | 1.56%    |
| Consumer Staples       | 1.54%    |
| Information Technology | 1.29%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

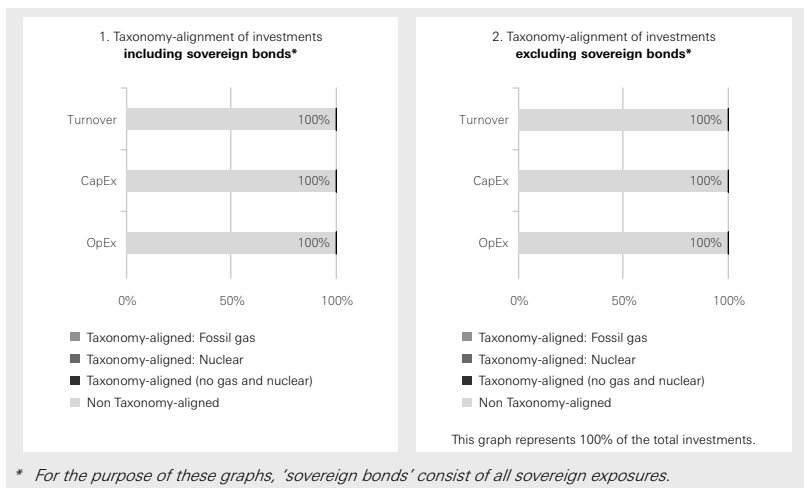

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

20.19%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested for high income primarily in a diversified portfolio of higher yielding fixed income bonds and other similar securities from around the world denominated in a range of currencies, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

Asset classes may have included but were not limited to developed market sovereigns, developed markets investment grade corporate securities, developed markets high yield corporate securities, Emerging Markets sovereigns and Emerging Markets corporate securities.

The sub-fund may have invested in Investment Grade rated bonds, high yield bonds and Asian and Emerging Market debt instruments. Investments in Asset Backed Securities ("ABS") and Mortgage Backed Securities ("MBS") would be limited to a maximum of 20% of the sub-fund net assets.

The sub-fund may have invested in fixed income securities issued or guaranteed by governments, government agencies, quasi government entities, state sponsored enterprises, local or regional governments (including state, provincial, and municipal governments and governmental entities) and supranational bodies of developed or Emerging Markets.

The sub-fund included the identification and analysis of an issuer's ESG credentials ("ESG Credentials") as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns. ESG Credentials were set out above.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified. Notwithstanding the Excluded Activities as detailed below, the inclusion of an issuer in the sub-fund's investment universe was at the discretion of the Investment Adviser. Issuers with improving ESG Credentials may have been included when their credentials were still limited.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBCs proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark, Bloomberg US Aggregate.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark was used to measure the sub-fund's carbon intensity, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 6.35            | 5.39                       |
| E Pillar                                                                                                                                                 | 6.16            | 5.79                       |
| S Pillar                                                                                                                                                 | 5.05            | 4.56                       |
| G Pillar                                                                                                                                                 | 5.99            | 5.35                       |
| 1. GHG Emissions - Metric tons CO2 equivalents                                                                                                           | 2,583.73        | 213,994.49                 |
| 2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)                                                                                     | 69.39           | 118.60                     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 184.14          | 378.77                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           | 3.40%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

● ***Reference Benchmark - ICE BofA Global High Yield BB-B Constrained Index ...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

### **What were the top investments of this financial product?**

| <b>Large Investments</b>                      | <b>Sector</b> | <b>% Assets</b> | <b>Country</b>           |
|-----------------------------------------------|---------------|-----------------|--------------------------|
| Aercap Holdings N.v. 5.875% 10-oct-2079       | Industrials   | 1.45%           | Ireland                  |

| Axalta Coating Systems Llc 4.75% 15-jun-2027            | Materials              | 1.02% | United States of America |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

17.96% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Other                  | 27.11%   |
| Materials              | 12.67%   |
| Consumer Discretionary | 10.42%   |
| Communication Services | 9.93%    |
| Financials             | 7.97%    |
| Health Care            | 7.39%    |
| Industrials            | 6.98%    |
| Energy                 | 5.98%    |
| Utilities              | 4.16%    |
| Consumer Staples       | 3.48%    |
| Real Estate            | 2.02%    |
| Information Technology | 1.88%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

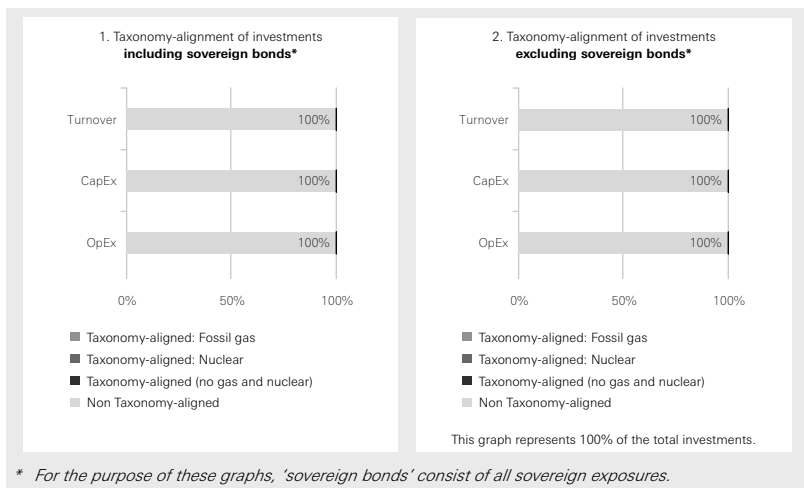

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

***The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>4</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.***

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

17.96%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested for total return primarily in a diversified portfolio of Non-Investment Grade and unrated fixed income securities either issued by companies or issued or guaranteed by governments, and other similar securities meeting certain ESG and Lower Carbon Criteria as described below.

The fixed income securities were issued by companies and either issued or guaranteed by governments, government agencies, quasi-government entities, state sponsored enterprises, local or regional governments (including state, provincial, and municipal governments and governmental entities) and supranational bodies in both developed and Emerging Markets and denominated in or hedged into United States Dollars (USD).

The ESG and Lower Carbon Criteria are proprietary to HSBC, subject to ongoing research and may have changed over time as new criteria are identified. The exclusion or inclusion of an issuer in the sub-fund's investment universe was at the discretion of the Investment Adviser. Issuers with an improving ESG rating and carbon intensity may have been included when their ESG rating was still low or carbon intensity was still high. More information on HSBC Asset Management's responsible investing policies is available at [www.assetmanagement.hsbc.com/about-us/responsible-investing/policies](http://www.assetmanagement.hsbc.com/about-us/responsible-investing/policies).

After identifying the eligible investment universe, the Investment Adviser aimed to construct a portfolio with a higher ESG rating and lower carbon intensity, calculated as a weighted average of the ESG ratings and carbon intensities of the sub-fund's investments, against the weighted average of the constituents of the sub-fund's Reference Benchmark. When assessing issuers' ESG rating and carbon intensity, the Investment Adviser may have relied on expertise, research and information provided by well-established financial data providers.

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and was not constrained by a benchmark. There was no reference benchmark for this sub-fund market and one was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> |

The data in this SFDR Periodic Report are as at 31 March 2023

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of an issuers' ESG credentials ("ESG Credentials") as an integral part of the investment decision making process to reduce risk and enhance returns, through portfolio construction.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments                                                | Sector     | % Assets | Country                                              |

Cash and derivatives were excluded

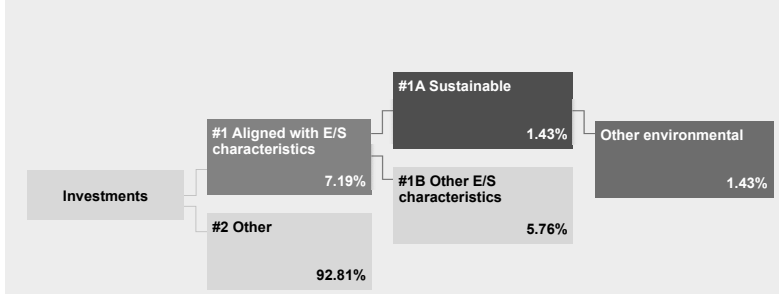

## What was the proportion of sustainability-related investments?

1.43% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector           | % Assets |
|------------------|----------|
| Other            | 80.39%   |
| Financials       | 17.11%   |
| Consumer Staples | 2.04%    |
| Real Estate      | 0.45%    |
| Total            | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:
  In fossil gas
  In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the “greenness” of investee companies today.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

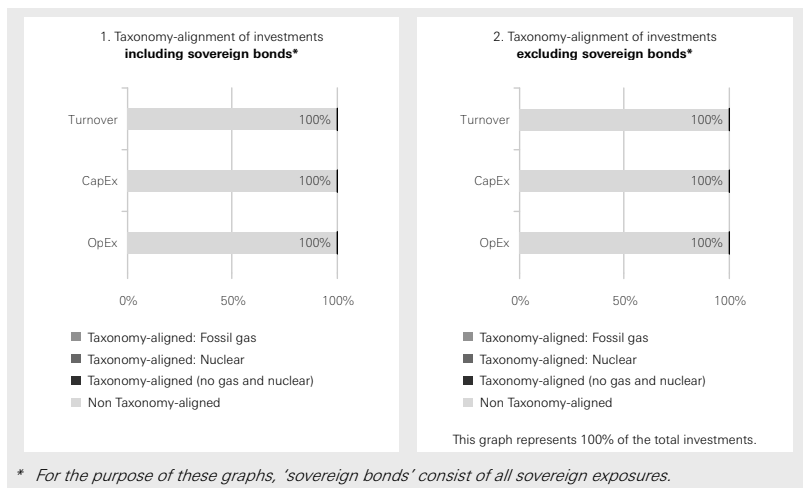

**- capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.

**- operational expenditure (OpEx)** reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

1.43%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of high yield securitised credit ("Securitised Credit"), while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund may have also invested in other fixed income instruments issued globally denominated in a range of currencies, included but not limited to, corporate bonds, securities issued or guaranteed by governments, government agencies and supranational bodies, and cash. Issuers of these securities might be located in any country.

The sub-fund included the identification and analysis of an issuers' ESG credentials, as described below, as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

The sub-fund targeted investment in securities with a low and medium, HSBC proprietary, Securitised Credit ESG risk assessment rating ("ESG Risk Assessment Rating"). A lower ESG Risk Assessment Rating signifies lower ESG driven investment risk. It was determined through a combination of ESG Credentials as mentioned below, ESG factors most relevant to each Securitised Credit subsector and structural features of the specific security.

The sub-fund was actively managed and was not constrained by a benchmark.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund aimed to have a higher ESG rating than the Reference Benchmark, calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the Reference Benchmark constituents. The sub-fund was actively managed and did not track a benchmark. The reference benchmark was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 6.27            | 5.90                       |
| E Pillar                                                                                                                                                 | 4.93            | 4.98                       |

| G Pillar                                                                                                                                                 | 6.76            | 6.21                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 5.55            | 0.00                       |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           | 0.00%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |
| 15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)                                                                           | 218.08          | 230.97                     |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - ICE BofA Global Governments - Inflation-Linked

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for an improvement of the overall ESG score of the portfolio relative to benchmark constituents, through portfolio construction.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hssc/about-us/responsible-investing/policies](http://www.assetmanagement/hssc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Issuers having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas intensity for sovereign issues
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

| Large Investments                                             | Sector     | % Assets | Country                                              |
|---------------------------------------------------------------|------------|----------|------------------------------------------------------|

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

1.44% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector     | % Assets |
|------------|----------|
| Government | 99.78%   |
| Other      | 0.21%    |
| Financials | 0.01%    |
| Total      | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

1.44%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund aimed to provide long term total return by investing in a portfolio of inflation linked bonds, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund invested (normally a minimum of 70% of its net assets) in inflation linked bonds which were issued by companies, agencies or governments in both developed markets and Emerging Markets. These securities were denominated in developed market and Emerging Market currencies.

The sub-fund aimed to do this with a higher ESG rating than the ICE BofA Global Inflation-Linked Government Alternative Weighting Scheme Custom (USD hedged) (the "Reference Benchmark"), calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the Reference Benchmark constituents.

The sub-fund did not invest in bonds issued by issuers with specified involvement in specific excluded activities.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

## How did this financial product perform compared to the reference benchmark?

N/A

- ***How does the reference benchmark differ from a broad market index?***  
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and was not constrained by a benchmark. There was no reference benchmark for this sub-fund market and one was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| ESG Score                                                                                                                                                | 7.81            |

| G Pillar                                                                                                                                                 | 6.42            |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           |

The data in this SFDR Periodic Report are as at 31 March 2023

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of an issuers' ESG credentials ("ESG Credentials") as an integral part of the investment decision made process to reducing risk and enhancing returns, through portfolio construction.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

| Large Investments                                       | Sector     | % Assets | Country                  |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

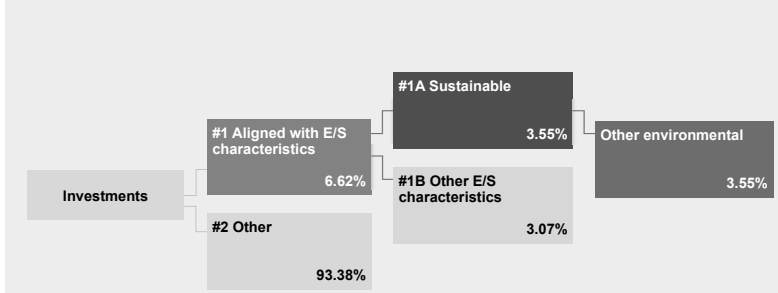

3.55% of the portfolio was invested in sustainable assets.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Other                  | 76.56%   |
| Financials             | 21.84%   |
| Real Estate            | 0.89%    |
| Communication Services | 0.70%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the “greenness” of investee companies today.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

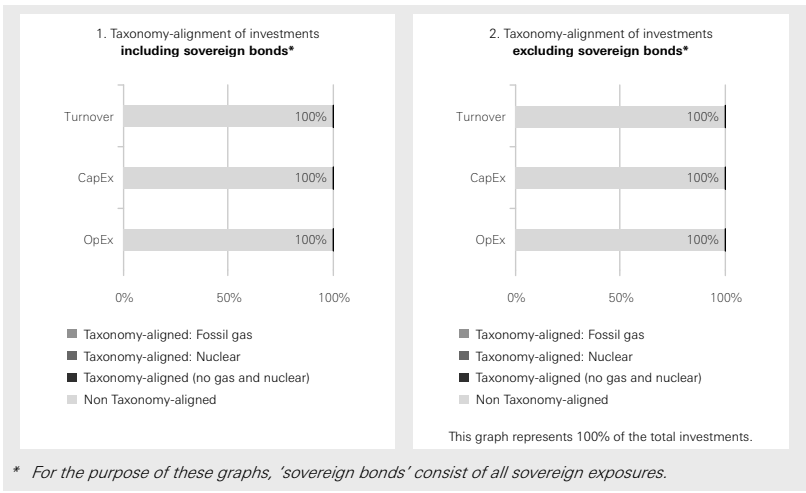

**- capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.

**- operational expenditure (OpEx)** reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**  
N/A - the sub-fund is not investing in transitional or enabling activities.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**  
As this was the first reporting period for the sub-fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

3.55%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of Investment Grade securitised credit ("Securitised Credit"), while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund may have also invested in other fixed income instruments issued globally denominated in a range of currencies, including but not limited to, corporate bonds, securities issued or guaranteed by governments, government agencies and supranational bodies of these securities may be located in any country.

The sub-fund included the identification and analysis of an issuers' ESG credentials ("ESG Credentials" detailed below) as an integral part of the investment decision making process to reduce risk and enhance returns.

The sub-fund targeted investment in securities with a low and medium, HSBC proprietary, Securitised Credit ESG risk assessment rating ("ESG Risk Assessment Rating"). A lower ESG Risk Assessment Rating signified lower ESG driven investment risk. It was determined through a combination of ESG Credentials as mentioned above, ESG factors most relevant to each Securitised Credit subsector and structural features of the specific security.

The sub-fund was actively managed and was not constrained by a benchmark.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark was used to measure the sub-fund's carbon intensity, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Bloomberg Global Aggregate Corporates Diversified

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction in order to have a lower carbon intensity than the benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hbsc/about-us/responsible-investing/policies](http://www.assetmanagement/hbsc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon foot print (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments                                             | Sector                 | % Assets | Country                                              |

Cash and derivatives were excluded

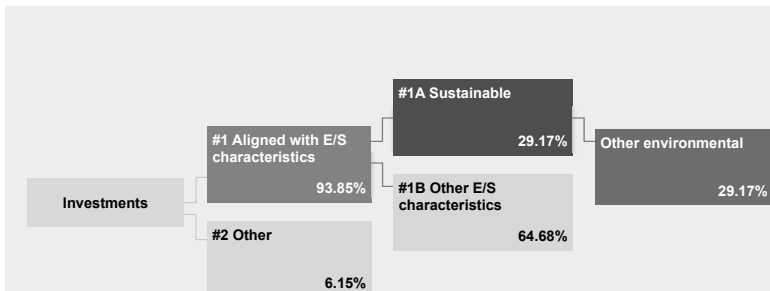

## What was the proportion of sustainability-related investments?

29.17% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 40.14%   |
| Other                  | 17.07%   |
| Government             | 8.91%    |
| Real Estate            | 5.24%    |
| Communication Services | 5.08%    |
| Health Care            | 4.33%    |
| Information Technology | 4.02%    |
| Utilities              | 3.98%    |
| Consumer Discretionary | 3.97%    |
| Industrials            | 3.57%    |
| Consumer Staples       | 3.00%    |
| Materials              | 0.69%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:  In fossil gas  In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

29.17%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of corporate bonds, while promoting ESG characteristics within the meaning of Article 8 of SFDR. The sub-fund aimed to do this with a lower carbon intensity calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Bloomberg Global Aggregate Corporate Diversified Hedged USD (the "Reference Benchmark").

The sub-fund invested (normally a minimum of 70% of its net assets) in Investment Grade and Non-Investment Grade rated fixed income and other similar securities issued by issuers meeting certain lower carbon criteria ("Lower Carbon Criteria"). Lower Carbon Criteria were explained below.

The sub-fund was invested in both developed markets and Emerging Markets. Investments were denominated in developed market and Emerging Market currencies.

After identifying the eligible investment universe, the Investment Adviser aimed to construct a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. When assessing issuers' carbon intensity, The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The Reference Benchmark was used for sub-fund market comparison purposes.

### **How did this financial product perform compared to the reference benchmark?**

N/A

#### **How does the reference benchmark differ from a broad market index?**

N/A

#### **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark was used to measure the sub-fund's carbon intensity, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| ESG Score                                                                                                                                                | 7.36            |

| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           |

The data in this SFDR Periodic Report are as at 31 March 2023

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of an issuers' ESG credentials ("ESG Credentials") as an integral part of the investment decision made process to reducing risk and enhancing returns, through portfolio construction.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

Cash and derivatives were excluded

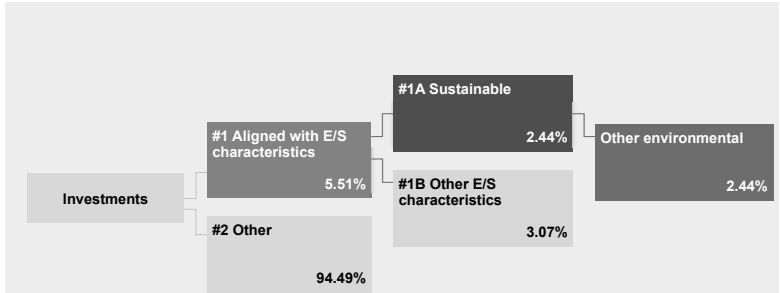

## What was the proportion of sustainability-related investments?

2.44% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Other                  | 73.11%   |
| Financials             | 23.71%   |
| Real Estate            | 1.72%    |
| Communication Services | 1.47%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the “greenness” of investee companies today.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

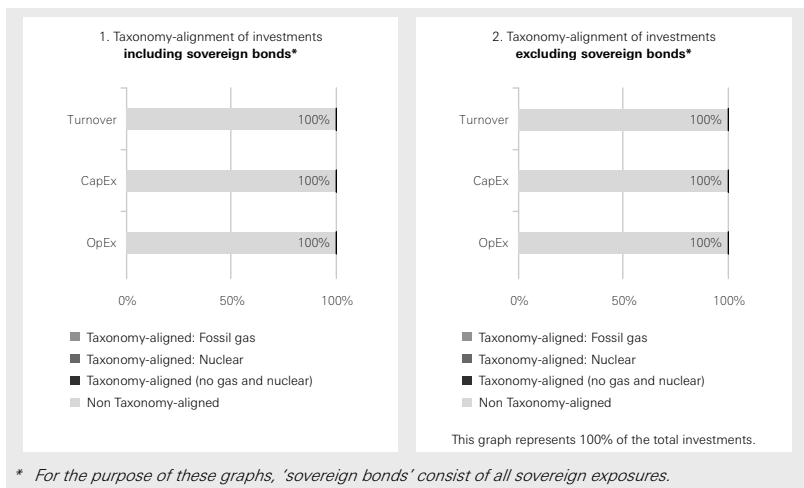

**- capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.

**- operational expenditure (OpEx)** reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

2.44%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio focused on the intersection (the "Crossover") between Investment Grade and Non-Investment Grade rated Securitized Credit, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund may have also invested in other fixed income instruments issued globally denominated in a range of currencies, including but not limited to, corporate bonds, securities issued or guaranteed by governments, government agencies and supranational bodies, and cash. Issuers of these securities may be located in any country.

The sub-fund included the identification and analysis of an issuers' ESG credentials described below as an integral part of the investment decision making process to reduce risk and enhance returns.

The sub-fund targeted investment in securities with a low and medium, HSBC proprietary, Securitised Credit ESG risk assessment rating ("ESG Risk Assessment Rating"). A lower ESG Risk Assessment Rating signified lower ESG driven investment risk. It was determined through a combination of ESG Credentials as mentioned below, ESG factors most relevant to each Securitised Credit subsector and structural features of the specific security.

The sub-fund was actively managed and was not constrained by a benchmark.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

| 15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)                                                                           | 247.58          | 272.13                     |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Bloomberg Global Aggregate (1-3 Y)

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for an improvement of the overall ESG score of the portfolio relative to benchmark constituents, through portfolio construction.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas intensity for sovereign issues
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity for investee companies (Scope 1 & Scope 2)

## What were the top investments of this financial product?

| Large Investments                                             | Sector     | % Assets | Country                  |
|---------------------------------------------------------------|------------|----------|--------------------------|
| Government Of The United States Of America 4.625% 28-feb-2025 | Government | 5.92%    | United States of America |
| Government Of Germany 2.5% 13-mar-2025                        | Government | 5.66%    | Germany                  |
| Government Of The United States Of America 2.125% 30-sep-2024 | Government | 4.59%    | United States of America |
| Government Of The United States Of America 2.75% 15-may-2025  | Government | 4.26%    | United States of America |
| Government Of Germany 2.2% 12-dec-2024                        | Government | 4.23%    | Germany                  |
| Government Of The United States Of America 4.25% 30-sep-2024  | Government | 3.73%    | United States of America |
| Government Of The United States Of America 4.375% 31-oct-2024 | Government | 3.48%    | United States of America |
| Government Of Germany 0.4% 13-sep-2024                        | Government | 3.35%    | Germany                  |
| Government Of The United States Of America 0.625% 15-oct-2024 | Government | 2.91%    | United States of America |
| Government Of Germany 0.0% 18-oct-2024                        | Government | 2.07%    | Germany                  |
| Government Of New Zealand 4.5% 15-apr-2027                    | Government | 1.63%    | New Zealand              |
| Export-import Bank Of China 3.33% 22-feb-2026                 | Government | 1.26%    | China                    |

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

|                                                        |            |       |                                                         |
|--------------------------------------------------------|------------|-------|---------------------------------------------------------|
| Thames Water Utilities Finance Plc<br>4.0% 18-apr-2027 | Utilities  | 1.14% | United Kingdom of Great<br>Britain and Northern Ireland |
| Export-import Bank Of China 3.18%<br>05-sep-2026       | Government | 0.99% | China                                                   |
| Export-import Bank Of China 3.22%<br>14-may-2026       | Government | 0.99% | China                                                   |

Cash and derivatives were excluded

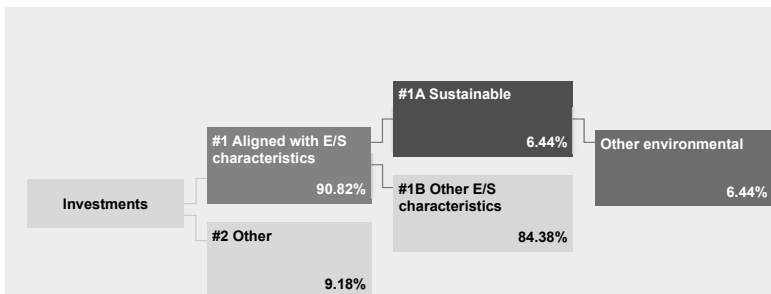

## What was the proportion of sustainability-related investments?

6.44% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Government             | 50.42%   |
| Other                  | 19.43%   |
| Financials             | 17.39%   |
| Utilities              | 3.08%    |
| Industrials            | 1.67%    |
| Consumer Discretionary | 1.59%    |
| Communication Services | 1.59%    |
| Real Estate            | 1.21%    |
| Information Technology | 1.05%    |
| Energy                 | 0.91%    |
| Materials              | 0.87%    |
| Health Care            | 0.80%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.  
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.  
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

6.44%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of bonds with an average duration expected to be between 6 months and 3 years, while promoting ESG characteristics within the meaning of Article 8 of SFDR. The sub-fund aimed to do this with a higher ESG rating than the weighted average of the ESG ratings of the Reference Benchmark constituents.

Asset classes may have included but were not limited to developed markets sovereigns, developed markets investment grade corporate securities, developed markets high yield corporate securities, Emerging Markets sovereigns and Emerging Markets corporate securities.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBCs proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark.

The sub-fund conducted enhanced due diligence on bond issuers that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

### **How did this financial product perform compared to the reference benchmark?**

N/A

#### **● How does the reference benchmark differ from a broad market index?**

N/A

#### **● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

#### **● How did this financial product perform compared with the reference benchmark?**

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>                                                                                                                                                                                                                                                                                                                                                           | <input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund aimed to do this with a higher ESG rating than the Reference Benchmark, calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the Reference Benchmark constituents. The Reference Benchmark had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 7.05            | 6.75                       |
| E Pillar                                                                                                                                                 | 7.53            | 7.34                       |
| S Pillar                                                                                                                                                 | 4.90            | 4.80                       |
| G Pillar                                                                                                                                                 | 5.95            | 5.74                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 103.43          | 177.39                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 1.82%           | 3.02%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Bloomberg US Corporate (1-3 Y) (Inception 11/28/2003)

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

### **What were the top investments of this financial product?**

| <b>Large Investments</b>                                      | <b>Sector</b> | <b>% Assets</b> | <b>Country</b>           |

Cash and derivatives were excluded

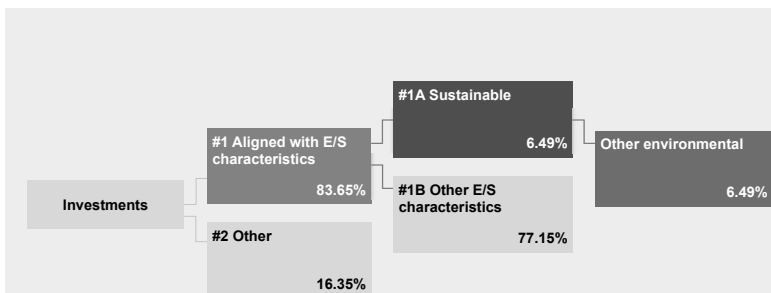

## What was the proportion of sustainability-related investments?

6.49% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 42.13%   |
| Other                  | 27.68%   |
| Government             | 6.86%    |
| Communication Services | 6.29%    |
| Materials              | 4.55%    |
| Industrials            | 3.34%    |
| Energy                 | 2.93%    |
| Consumer Staples       | 2.00%    |
| Consumer Discretionary | 1.55%    |
| Health Care            | 1.21%    |
| Utilities              | 0.66%    |
| Information Technology | 0.56%    |
| Real Estate            | 0.22%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

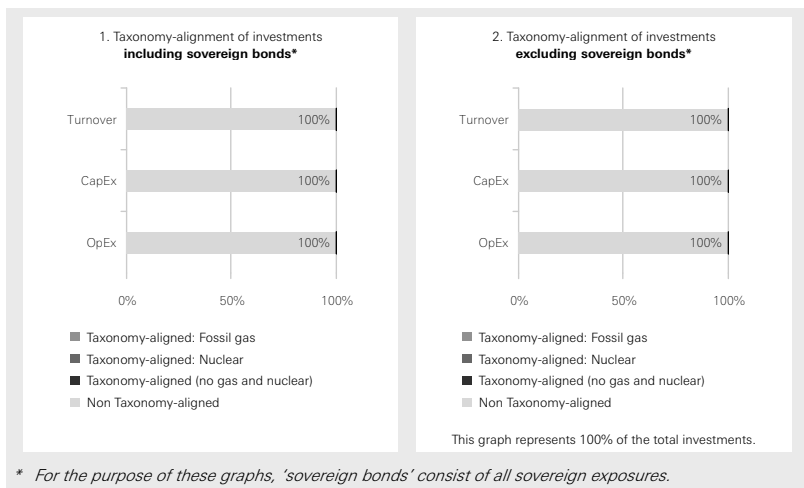

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

6.49%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide short term total return by investing in bonds and money market instruments, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

In normal market conditions, the average duration of the portfolio holdings of the sub-fund was not expected to exceed one year, which was considered to be "ultra short" duration.

The sub-fund invested in normal market conditions in either fixed or floating-rate income and other similar securities including money market instruments which were rated Investment Grade. Such securities were either issued or guaranteed by governments, government agencies and supranational bodies of developed or Emerging Markets or by companies which were domiciled in, based in, or carried out the larger part of their business in, developed or Emerging Markets. In normal market conditions, it would invest less than 30% of its net assets in Non-Investment Grade rated and unrated fixed income securities.

The sub-fund had not invested more than 10% of its net assets in securities issued by or guaranteed by any single sovereign issuer with a credit rating below Investment Grade.

The sub-fund included the identification and analysis of an issuer's ESG credentials ("ESG Credentials") as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns. ESG Credentials are set out above.

ESG Credentials are proprietary to HSBC, subject to ongoing research and change over time as new criteria are identified. Notwithstanding the Excluded Activities as detailed below, the inclusion of an issuer in the sub-fund's investment universe was at the discretion of the Investment Adviser. Issuers with improving ESG Credentials may have been included when their credentials are still limited.

The sub-fund was not invested in bonds issued by issuers with specified involvement in specific excluded activities.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser may have relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The Reference Benchmark was only used to compare the sub-fund's ESG rating.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund aimed to have a higher ESG rating than the Reference Benchmark, calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the Reference Benchmark constituents. The Reference Benchmark had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - Bloomberg US Aggregate

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

**What were the top investments of this financial product?**

| Large Investments                                           | Sector     | % Assets | Country                  |
|-------------------------------------------------------------|------------|----------|--------------------------|

Cash and derivatives were excluded

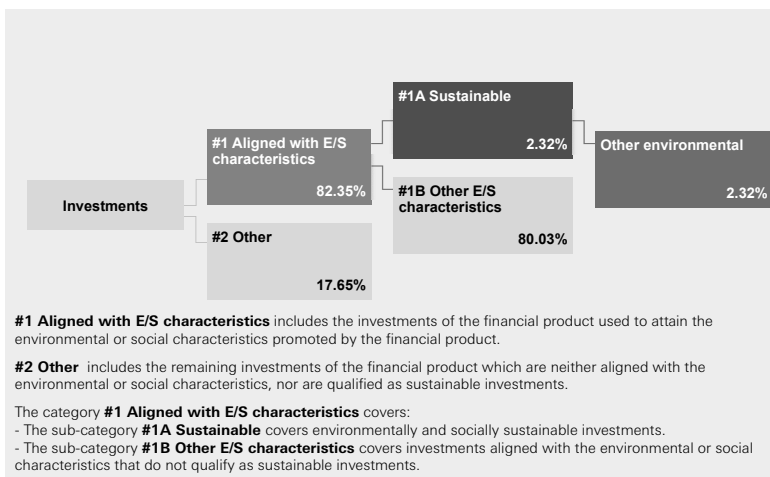

## What was the proportion of sustainability-related investments?

2.32% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Government             | 43.02%   |
| Other                  | 35.95%   |
| Financials             | 13.93%   |
| Consumer Staples       | 1.46%    |
| Industrials            | 1.45%    |
| Information Technology | 1.44%    |
| Communication Services | 1.31%    |
| Real Estate            | 0.77%    |
| Energy                 | 0.60%    |
| Health Care            | 0.07%    |
| Consumer Discretionary | 0.00%    |
| Materials              | 0.00%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

2.32%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested for total return primarily in a diversified portfolio of Investment Grade rated fixed income (e.g. bonds) and other similar securities from around the world, denominated in US dollars, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

Asset classes may have included but were not limited to developed markets sovereigns, developed markets investment grade corporate securities, developed markets high yield corporate securities and Emerging Markets securities. The sub-fund had however, sought to invest primarily in securities issued in developed markets.

The sub-fund included the identification and analysis of an issuer's ESG credentials ("ESG Credentials") as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns. ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have had a material impact on a security issuer's financial performance and valuation
- corporate governance practices that protected minority investor interests and promoted long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and might have changed over time as new criteria are identified. Notwithstanding the Excluded Activities as detailed below, the inclusion of an issuer in the sub-fund's investment universe was at the discretion of the Investment Adviser. Issuers with improved ESG Credentials may be included when their credentials are still limited.

The sub-fund was not invested in bonds issued by issuers with specified involvement in specific excluded activities.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBCs proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser may have relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark, Bloomberg US Aggregate.

## How did this financial product perform compared to the reference benchmark?

N/A

- *How does the reference benchmark differ from a broad market index?*

N/A

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

N/A

- *How did this financial product perform compared with the reference benchmark?*

N/A

- *How did this financial product perform compared with the broad market index?*

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
3. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
4. The sub-fund excluded business activities that were deemed harmful to the environment.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| 1. GHG Emissions - Metric tons CO2 equivalents                                                                                                           | 14,123.85       | 997,922,443.60             |
| 2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)                                                                                     | 34.77           | 176.76                     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 146.76          | 338.51                     |
| 4. Exposure to companies active in the fossil fuel sector                                                                                                | 4.97%           | 5.16%                      |
| 5a. Share of non-renewable energy consumption                                                                                                            | 85.48%          | 89.54%                     |
| 5b. Share of non-renewable energy production                                                                                                             | 17.03%          | 31.73%                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 9.50%           | 7.67%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.02%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI All Country Asia Ex-Japan

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision made process with the aim of reducing sustainability risks and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and  
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint ( Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Share of energy consumption from non renewable sources
- Share of energy production from non renewable sources
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

| Large Investments                            | Sector                 | % Assets | Country   |
|----------------------------------------------|------------------------|----------|-----------|
| Taiwan Semiconductor Manufacturing Co., Ltd. | Information Technology | 9.89%    | Taiwan    |
| Tencent Holdings Ltd.                        | Communication Services | 6.64%    | China     |
| Samsung Electronics Co., Ltd.                | Information Technology | 5.84%    | Korea     |
| Alibaba Group Holding Limited                | Consumer Discretionary | 5.52%    | China     |
| AIA Group Limited                            | Financials             | 4.38%    | Hong Kong |
| MediaTek Inc                                 | Information Technology | 3.78%    | Taiwan    |
| China Construction Bank Corporation Class H  | Financials             | 3.23%    | China     |
| Reliance Industries Limited                  | Energy                 | 3.17%    | India     |
| Baidu, Inc. Class A                          | Communication Services | 3.12%    | China     |
| SK hynix Inc.                                | Information Technology | 2.99%    | Korea     |
| Wuliangye Yibin Co., Ltd. Class A            | Consumer Staples       | 2.68%    | China     |

Cash and derivatives were excluded

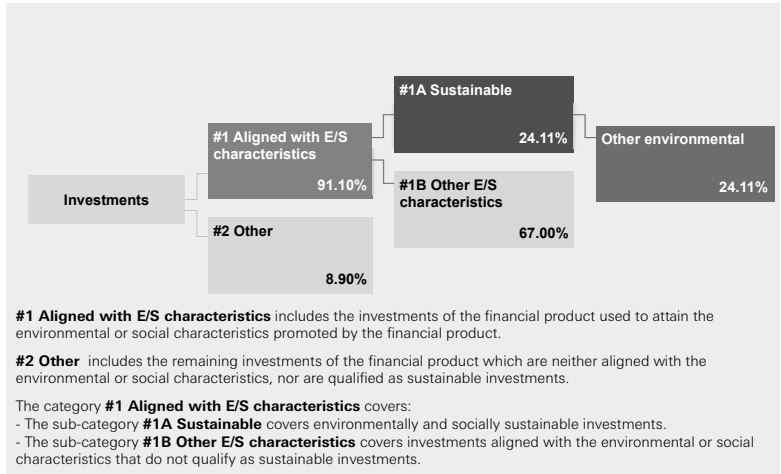

## What was the proportion of sustainability-related investments?

24.11% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 29.61%   |
| Financials             | 21.87%   |
| Consumer Discretionary | 10.53%   |
| Communication Services | 9.76%    |
| Health Care            | 5.32%    |
| Industrials            | 5.05%    |
| Consumer Staples       | 4.99%    |
| Other                  | 4.42%    |
| Energy                 | 3.54%    |
| Real Estate            | 3.02%    |
| Utilities              | 1.89%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

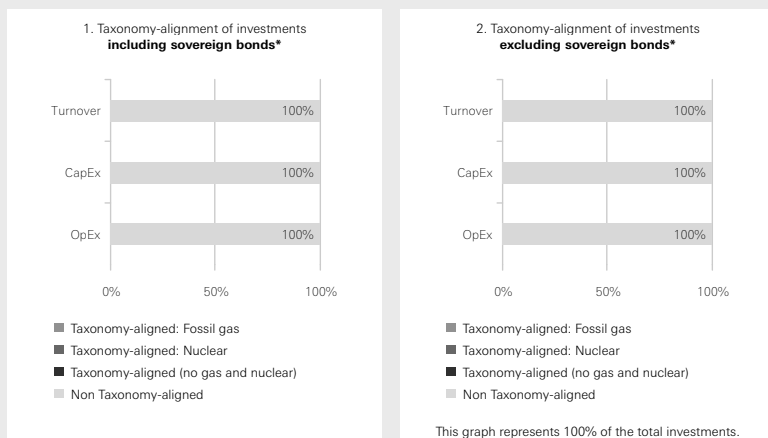

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.  
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.  
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

24.11%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term capital growth by investing in a portfolio of Asian (excluding Japanese) equities, while promoting ESG characteristics within the meaning of Article 8 of SFDR. This included the identification and analysis of a company's ESG credentials (as set out above) as an integral part of the investment decision making process to reduce sustainability risk.

The ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by financial and non-financial data providers.

Enhanced due diligence was conducted on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

**How did this financial product perform compared to the reference benchmark?**

N/A

● ***How does the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

● ***How did this financial product perform compared with the reference benchmark?***

N/A

● ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
3. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
4. The sub-fund excluded business activities that were deemed harmful to the environment.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| 1. GHG Emissions - Metric tons CO2 equivalents                                                                                                           | 38,996.65       | 172,281,034.56             |
| 2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)                                                                                     | 86.46           | 184.15                     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 224.88          | 461.77                     |
| 4. Exposure to companies active in the fossil fuel sector                                                                                                | 3.39%           | 3.53%                      |
| 5a. Share of non-renewable energy consumption                                                                                                            | 85.46%          | 84.37%                     |
| 5b. Share of non-renewable energy production                                                                                                             | 0.00%           | 15.73%                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           | 0.36%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.14%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI AC Asia ex JP Small Cap

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision made process with the aim of reducing sustainability risks and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and  
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint ( Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Share of energy consumption from non renewable sources
- Share of energy production from non renewable sources
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments                                | Sector                 | % Assets | Country   |
|--------------------------------------------------|------------------------|----------|-----------|
| SINBON Electronics Co., Ltd.                     | Information Technology | 2.40%    | Taiwan    |
| Yageo Corporation                                | Information Technology | 2.34%    | Taiwan    |
| Primax Electronics Ltd.                          | Information Technology | 2.18%    | Taiwan    |
| Lendlease Global Commercial REIT                 | Real Estate            | 2.15%    | Singapore |
| KB Financial Group Inc.                          | Financials             | 2.09%    | Korea     |
| Alchip Technologies Ltd.                         | Information Technology | 2.03%    | Taiwan    |
| POYA International Co., Ltd.                     | Consumer Discretionary | 1.96%    | Taiwan    |
| ORION CORP.                                      | Consumer Staples       | 1.94%    | Korea     |
| Gokaldas Exports Limited                         | Consumer Discretionary | 1.86%    | India     |
| Minor International Public Co., Ltd. (Alien Mkt) | Consumer Discretionary | 1.84%    | Thailand  |
| Topco Scientific Co., Ltd.                       | Information Technology | 1.84%    | Taiwan    |
| PT Pakuwon Jati Tbk                              | Real Estate            | 1.80%    | Indonesia |
| Press Metal Aluminium Holdings Berhad            | Materials              | 1.80%    | Malaysia  |
| HL Mando Co., Ltd.                               | Consumer Discretionary | 1.79%    | Korea     |
| MGM China Holdings Limited                       | Consumer Discretionary | 1.74%    | Macao     |

Cash and derivatives were excluded

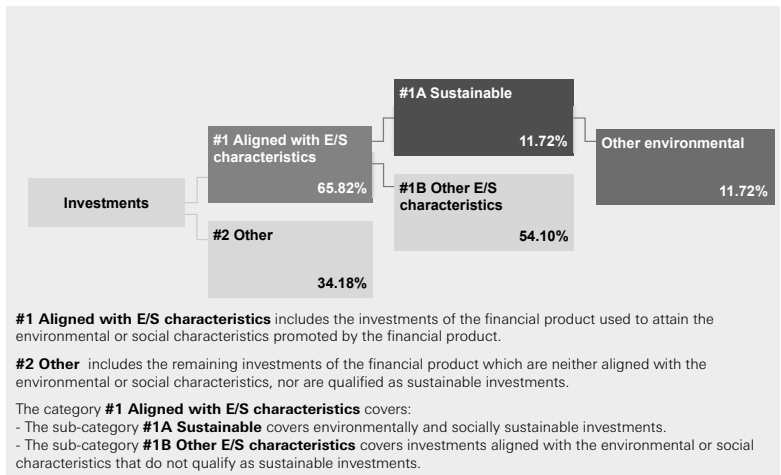

## What was the proportion of sustainability-related investments?

11.72% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 23.97%   |
| Consumer Discretionary | 21.02%   |
| Industrials            | 9.53%    |
| Health Care            | 8.96%    |
| Real Estate            | 8.54%    |
| Financials             | 7.04%    |
| Consumer Staples       | 6.81%    |
| Materials              | 6.72%    |
| Communication Services | 2.86%    |
| Energy                 | 2.70%    |
| Other                  | 1.86%    |
| Total                  | 100.00%  |

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

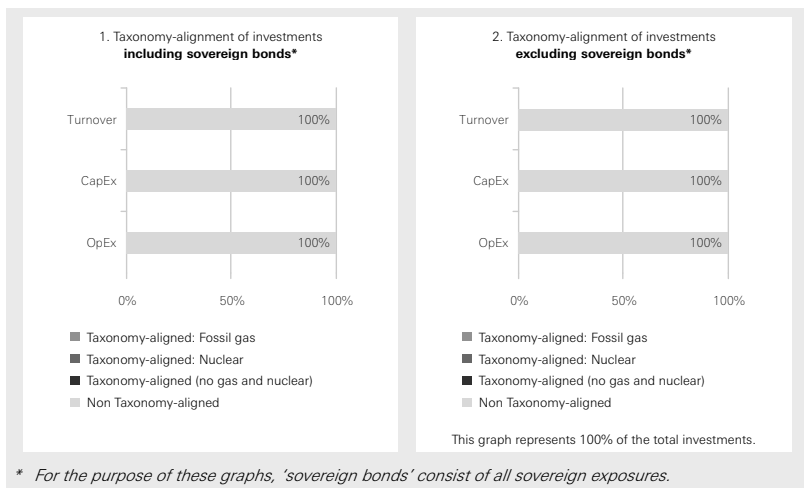

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

11.72%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term capital growth by investing in a portfolio of Asian (excluding Japan) smaller company equities, while promoting ESG characteristics within the meaning of Article 8 of SFDR. This included the identification and analysis of a company's ESG credentials (as set out above) as an integral part of the investment decision making process to reduce sustainability risk.

The ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by financial and non-financial data providers.

Enhanced due diligence was conducted on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
3. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
4. The sub-fund excluded business activities that were deemed harmful to the environment.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| 1. GHG Emissions - Metric tons CO2 equivalents                                                                                                           | 50,526.67       | 1,093,496,502.73           |
| 2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)                                                                                     | 133.21          | 162.10                     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 316.65          | 323.44                     |
| 4. Exposure to companies active in the fossil fuel sector                                                                                                | 4.66%           | 5.55%                      |
| 5a. Share of non-renewable energy consumption                                                                                                            | 76.09%          | 81.93%                     |
| 5b. Share of non-renewable energy production                                                                                                             | 0.00%           | 34.11%                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 4.25%           | 6.38%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.02%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI All Country Asia Pacific Ex-Japan

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision made process with the aim of reducing sustainability risks and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and  
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Share of energy consumption from non renewable sources
- Share of energy production from non renewable sources
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments                                        | Sector                 | % Assets | Country   |
|----------------------------------------------------------|------------------------|----------|-----------|
| Taiwan Semiconductor Manufacturing Co., Ltd.             | Information Technology | 7.40%    | Taiwan    |
| AIA Group Limited                                        | Financials             | 5.07%    | Hong Kong |
| KB Financial Group Inc.                                  | Financials             | 4.89%    | Korea     |
| DBS Group Holdings Ltd                                   | Financials             | 4.62%    | Singapore |
| SK Telecom Co., Ltd.                                     | Communication Services | 4.27%    | Korea     |
| PT Telkom Indonesia (Persero) Tbk Class B                | Communication Services | 4.25%    | Indonesia |
| Baidu, Inc. Class A                                      | Communication Services | 4.09%    | China     |
| Ping An Insurance (Group) Company of China, Ltd. Class H | Financials             | 3.97%    | China     |
| China Construction Bank Corporation Class H              | Financials             | 3.93%    | China     |
| Hong Kong Exchanges & Clearing Ltd.                      | Financials             | 3.90%    | Hong Kong |
| Santos Limited                                           | Energy                 | 3.40%    | Australia |
| Tingyi (Cayman Islands) Holding Corp.                    | Consumer Staples       | 3.38%    | China     |

Cash and derivatives were excluded

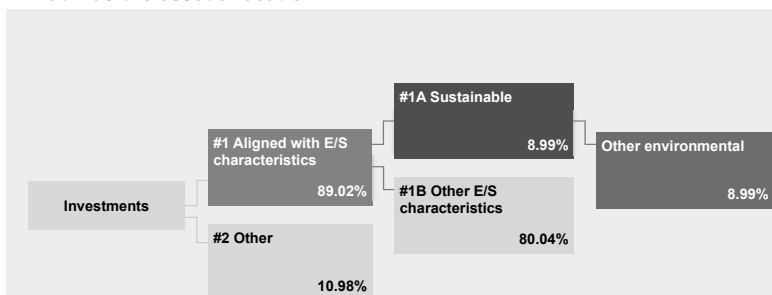

## What was the proportion of sustainability-related investments?

8.99% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 31.05%   |
| Information Technology | 21.86%   |
| Communication Services | 18.41%   |
| Materials              | 5.99%    |
| Consumer Staples       | 5.71%    |
| Energy                 | 4.79%    |
| Industrials            | 3.31%    |
| Utilities              | 3.05%    |
| Consumer Discretionary | 2.85%    |
| Real Estate            | 1.87%    |
| Other                  | 1.12%    |
| Total                  | 100.00%  |

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

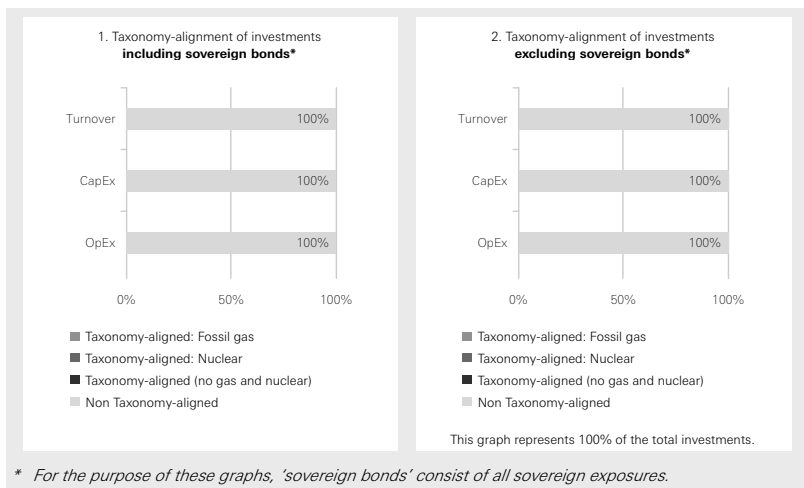

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

8.99%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of Asia-Pacific (excluding Japan) equities, while promoting ESG characteristics within the meaning of Article 8 of SFDR. This included the identification and analysis of a company's ESG credentials (as set out above) as an integral part of the investment decision making process to reduce sustainability risk.

The sub-fund aimed to invest in a portfolio that offered a dividend yield above the MSCI AC Asia Pacific ex Japan.

The ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by financial and non-financial data providers.

Enhanced due diligence was conducted on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***  
N/A
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
3. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
4. The sub-fund excluded business activities that were deemed harmful to the environment.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark was used to measure the sub-fund's carbon intensity, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| 1. GHG Emissions - Metric tons CO2 equivalents                                                                                                           | 9,261.79        | 675,133,162.68             |
| 2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)                                                                                     | 480.16          | 192.54                     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 371.54          | 380.26                     |
| 6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue                                                     | 95.17           | 1,641.30                   |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           | 1.64%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 1.32%           | 1.07%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI China A Onshore

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process to reduce risk and enhance returns.

ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have a material impact on a company's financial performance and valuation.
- corporate governance practices that protected minority investor interests and promote long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria was identified.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC's standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC is also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carried out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments                                        | Sector                 | % Assets | Country |
|----------------------------------------------------------|------------------------|----------|---------|
| Kweichow Moutai Co., Ltd. Class A                        | Consumer Staples       | 5.21%    | China   |
| CNOOC Energy Technology & Services Ltd. Class A          | Energy                 | 5.05%    | China   |
| Hunan Valin Steel Co., Ltd. Class A                      | Materials              | 3.85%    | China   |
| North Huajin Chemical Industries Co., Ltd. Class A       | Materials              | 3.79%    | China   |
| Nanjing Yunhai Special Metals Co., Ltd. Class A          | Materials              | 3.59%    | China   |
| Industrial Bank Co., Ltd. Class A                        | Financials             | 3.53%    | China   |
| Ping An Insurance (Group) Company of China, Ltd. Class A | Financials             | 3.12%    | China   |
| Contemporary Amperex Technology Co., Ltd. Class A        | Industrials            | 2.95%    | China   |
| Sangfor Technologies, Inc. Class A                       | Information Technology | 2.70%    | China   |
| Luxshare Precision Industry Co. Ltd. Class A             | Information Technology | 2.62%    | China   |
| Mango Excellent Media Co., Ltd. Class A                  | Communication Services | 2.45%    | China   |
| Shanghai Pharmaceuticals Holding Co. Ltd. Class A        | Health Care            | 2.43%    | China   |
| Titan Wind Energy (Suzhou) Co., Ltd. Class A             | Industrials            | 2.03%    | China   |
| China Telecom Corp. Ltd. Class A                         | Communication Services | 2.02%    | China   |
| Baoxiniao Holding Co., Ltd. Class A                      | Consumer Discretionary | 2.00%    | China   |

Cash and derivatives were excluded

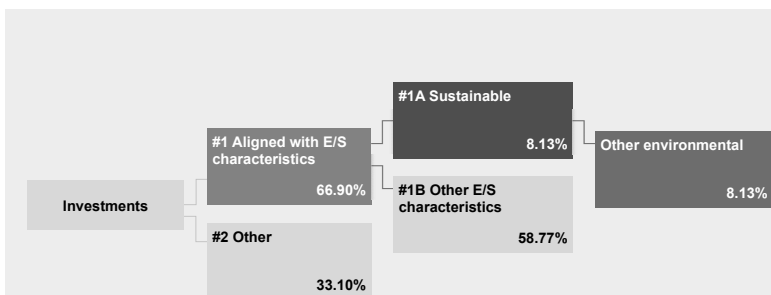

## What was the proportion of sustainability-related investments?

8.13% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 20.81%   |
| Materials              | 18.04%   |
| Industrials            | 14.92%   |
| Consumer Discretionary | 8.60%    |
| Financials             | 8.26%    |
| Consumer Staples       | 7.12%    |
| Health Care            | 7.12%    |
| Communication Services | 6.17%    |
| Energy                 | 5.05%    |
| Real Estate            | 3.17%    |
| Utilities              | 0.75%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

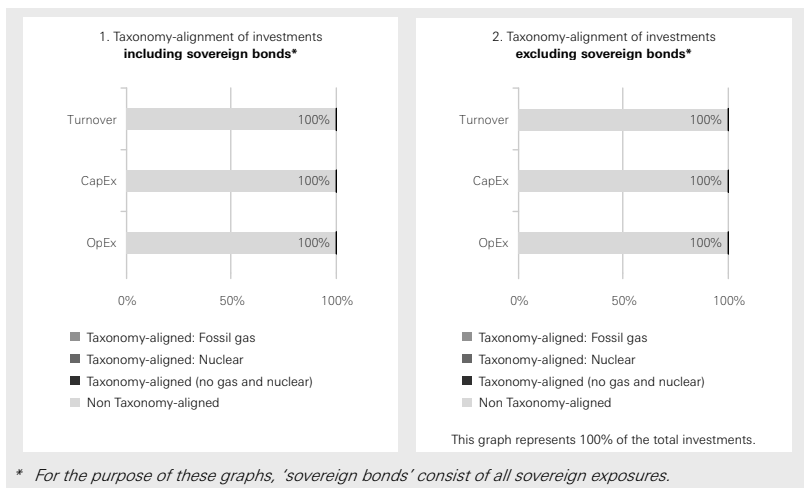

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

8.13%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term capital growth by investing in a portfolio of China A-shares, while promoting ESG characteristics within the meaning of Article 8 of SFDR. This included the identification and analysis of a company's ESG credentials (as set out above) as an integral part of the investment decision making process to reduce sustainability risk.

The ESG Credentials, Excluded Activities (as set out below) and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser may have relied on expertise, research and information provided by financial and non-financial data providers.

Enhanced due diligence was conducted on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| 1. GHG Emissions - Metric tons CO2 equivalents                                                                                                           | 57,062.04       | 438,638,540.00             |
| 2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)                                                                                     | 81.27           | 155.24                     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 160.12          | 271.01                     |
| 6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue                                                     | 91.69           | 119.34                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 13.33%          | 15.04%                     |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.08%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI China 10-40

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process to reduce risk and enhance returns.

ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have a material impact on a company's financial performance and valuation.
- corporate governance practices that protected minority investor interests and promoted long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may have changed over time as new criteria are identified.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC's standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

## What were the top investments of this financial product?

| Large Investments                           | Sector                 | % Assets | Country |
|---------------------------------------------|------------------------|----------|---------|
| Tencent Holdings Ltd.                       | Communication Services | 10.53%   | China   |
| Alibaba Group Holding Limited               | Consumer Discretionary | 10.32%   | China   |
| Meituan Class B                             | Consumer Discretionary | 4.33%    | China   |
| Netease Inc                                 | Communication Services | 4.09%    | China   |
| Baidu, Inc. Class A                         | Communication Services | 3.78%    | China   |
| China Construction Bank Corporation Class H | Financials             | 3.51%    | China   |
| Trip.com Group Ltd. Sponsored ADR           | Consumer Discretionary | 3.34%    | China   |
| Kweichow Moutai Co., Ltd. Class A           | Consumer Staples       | 2.99%    | China   |
| PDD Holdings Inc. Sponsored ADR Class A     | Consumer Discretionary | 2.61%    | China   |
| CNOOC Limited                               | Energy                 | 2.57%    | China   |
| H World Group Limited Sponsored ADR         | Consumer Discretionary | 2.33%    | China   |

Cash and derivatives were excluded

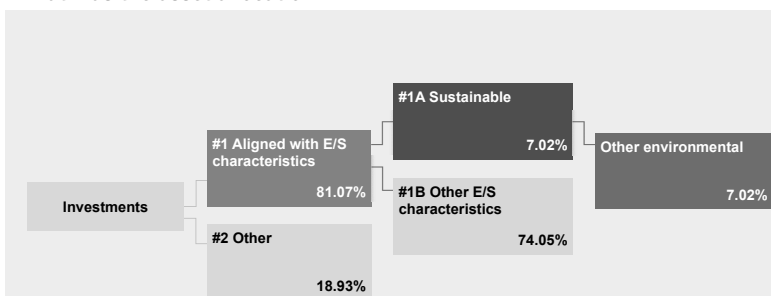

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

7.02% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Consumer Discretionary | 30.52%   |
| Communication Services | 19.35%   |
| Information Technology | 11.14%   |
| Industrials            | 9.90%    |
| Consumer Staples       | 8.69%    |
| Financials             | 7.75%    |
| Health Care            | 5.17%    |
| Real Estate            | 2.72%    |
| Energy                 | 2.57%    |
| Materials              | 1.68%    |
| Utilities              | 0.50%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:
  In fossil gas
  In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

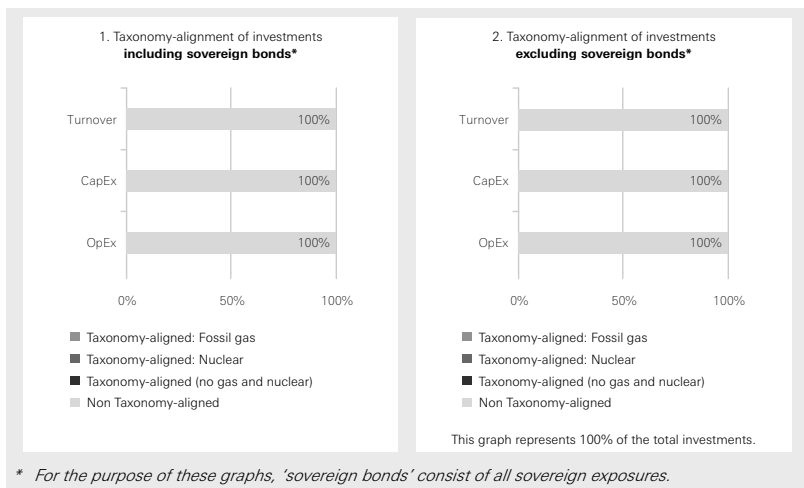

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

7.02%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term capital growth by investing in a portfolio of Chinese equities, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser may have relied on expertise, research and information provided by financial and non-financial data providers.

Enhanced due diligence was conducted on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                  |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 7.46            | 7.27                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 85.08           | 185.89                     |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI EMU Small Mid

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC's standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

## What were the top investments of this financial product?

| Large Investments          | Sector                 | % Assets | Country                                              |
|----------------------------|------------------------|----------|------------------------------------------------------|
| Symrise AG                 | Materials              | 3.81%    | Germany                                              |
| Brenntag Societas Europaea | Industrials            | 3.75%    | Germany                                              |
| Smurfit Kappa Group PLC    | Materials              | 3.50%    | Ireland                                              |
| FinecoBank SpA             | Financials             | 3.37%    | Italy                                                |
| CNH Industrial NV          | Industrials            | 3.15%    | United Kingdom of Great Britain and Northern Ireland |
| Teleperformance SA         | Industrials            | 3.10%    | France                                               |
| ASM International N.V.     | Information Technology | 3.09%    | Netherlands                                          |
| Eurofins Scientific SE     | Health Care            | 3.05%    | Luxembourg                                           |
| Euronext NV                | Financials             | 2.99%    | Netherlands                                          |
| Rai Way SpA                | Communication Services | 2.85%    | Italy                                                |
| SPIE SA                    | Industrials            | 2.82%    | France                                               |
| Metso Corporation          | Industrials            | 2.66%    | Finland                                              |
| Wienerberger AG            | Materials              | 2.38%    | Austria                                              |
| Ipsos SA                   | Communication Services | 2.33%    | France                                               |
| Kesko Oyj Class B          | Consumer Staples       | 2.32%    | Finland                                              |

Cash and derivatives were excluded

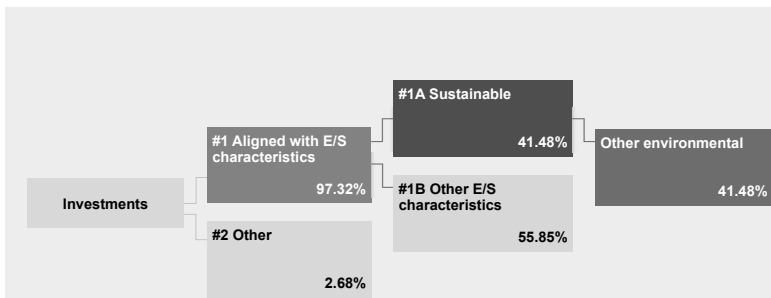

## What was the proportion of sustainability-related investments?

41.48% of the portfolio was invested in sustainable assets.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Industrials            | 27.08%   |
| Financials             | 15.10%   |
| Materials              | 11.36%   |
| Information Technology | 9.73%    |
| Communication Services | 8.93%    |
| Health Care            | 5.85%    |
| Utilities              | 5.60%    |
| Consumer Discretionary | 5.38%    |
| Energy                 | 4.88%    |
| Consumer Staples       | 3.39%    |
| Real Estate            | 2.70%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

41.48%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments may have been used for efficient portfolio management. This may have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund sought long-term total return by investing (normally a minimum of 90% of its net assets) in a portfolio of equity and equity equivalent securities of smaller and mid-sized companies which were based in any Eurozone member country, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

Smaller and mid-sized companies were those companies whose market capitalisation generally comprised the lowest tier of the aggregate Eurozone market, defined as companies whose market capitalisation was below EUR 10 billion as well as companies within the MSCI EMU SMID.

The sub-fund included the identification and analysis of a company's ESG Credentials as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have had a material impact on a security issuer's financial performance and valuation
- corporate governance practices that protected minority investor interests and promote long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified.

### How did this financial product perform compared to the reference benchmark?

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                  |

| <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>                              | <input type="checkbox"/> with a social objective                                                                                                                                                                                 |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>                              | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>                                                                                                                    |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI EMU

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to identify and analyse companies' key products or services which might help reduce overall healthcare spend as an integral part of the investment decision made process to reducing the negative social impact of reduced access to health care and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Board gender diversity
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

| Large Investments                   | Sector                 | % Assets | Country                  |
|-------------------------------------|------------------------|----------|--------------------------|
| ASML Holding NV                     | Information Technology | 9.17%    | Netherlands              |
| LVMH Moët Hennessy Louis Vuitton SE | Consumer Discretionary | 8.16%    | France                   |
| SAP SE                              | Information Technology | 6.04%    | Germany                  |
| L’Air Liquide S.A.                  | Materials              | 4.28%    | France                   |
| L’Oreal S.A.                        | Consumer Staples       | 4.28%    | France                   |
| Hermès International SCA            | Consumer Discretionary | 4.25%    | France                   |
| Allianz SE                          | Financials             | 3.84%    | Germany                  |
| STMicroelectronics NV               | Information Technology | 3.79%    | Singapore                |
| Nestlé Corporation                  | Energy                 | 3.54%    | Finland                  |
| Schneider Electric SE               | Industrials            | 3.51%    | United States of America |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

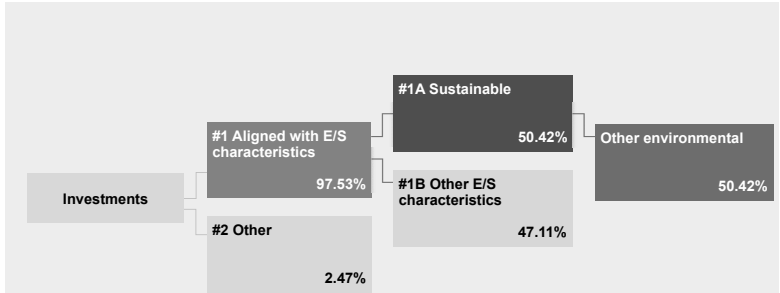

50.42% of the portfolio was invested in sustainable assets.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 34.69%   |
| Consumer Discretionary | 16.53%   |
| Industrials            | 13.74%   |
| Consumer Staples       | 10.45%   |
| Financials             | 8.25%    |
| Materials              | 6.17%    |
| Energy                 | 4.48%    |
| Communication Services | 3.35%    |
| Health Care            | 2.34%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

50.42%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have also included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested in normal market conditions a minimum of 90% of its net assets in equities and equity equivalent securities of companies which were domiciled in, based in, carry out the larger part of their business activities in, or were listed on a Regulated Market in, any European Monetary Union ("EMU") member country. The sub-fund may have also invested in eligible closed-ended Real Estate Investment Trusts ("REITs").

The sub-fund typically focused on profitable companies with higher than average reinvestment rates in order to maintain and or increase their current level of growth.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have had a material impact on a security issuer's financial performance and valuation
- corporate governance practices that protected minority investor interests and promote long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                                  |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- The characteristics promoted by this sub-fund were:
1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  3. The sub-fund excluded business activities that were deemed harmful to the environment.
  4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
  5. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 7.90            | 7.84                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 178.69          | 124.50                     |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI EMU

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision made process with the aim of reducing sustainability risks and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

Principal Adverse Impacts also considered by the sub-fund were:

- Green house gas intensity of investee companies - Scope 1 & Scope 2
- Violation of UNGC and OECD principles
- Board gender diversity
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

| Large Investments               | Sector                 | % Assets | Country                                              |
|---------------------------------|------------------------|----------|------------------------------------------------------|
| Allianz SE                      | Financials             | 4.17%    | Germany                                              |
| TotalEnergies SE                | Energy                 | 3.95%    | France                                               |
| Iberdrola SA                    | Utilities              | 3.91%    | Spain                                                |
| AXA SA                          | Financials             | 3.34%    | France                                               |
| Sanofi                          | Health Care            | 3.22%    | United States of America                             |
| CRH public limited company      | Materials              | 3.10%    | Ireland                                              |
| Koninklijke Ahold Delhaize N.V. | Consumer Staples       | 3.00%    | Netherlands                                          |
| Merck KGaA                      | Health Care            | 2.66%    | Germany                                              |
| Heineken NV                     | Consumer Staples       | 2.53%    | Netherlands                                          |
| Royal KPN NV                    | Communication Services | 2.51%    | Netherlands                                          |
| ING Groep NV                    | Financials             | 2.48%    | Netherlands                                          |
| ENGIE SA.                       | Utilities              | 2.48%    | France                                               |
| Metso Corporation               | Industrials            | 2.46%    | Finland                                              |
| RELX PLC                        | Industrials            | 2.40%    | United Kingdom of Great Britain and Northern Ireland |
| Carrefour SA                    | Consumer Staples       | 2.35%    | France                                               |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

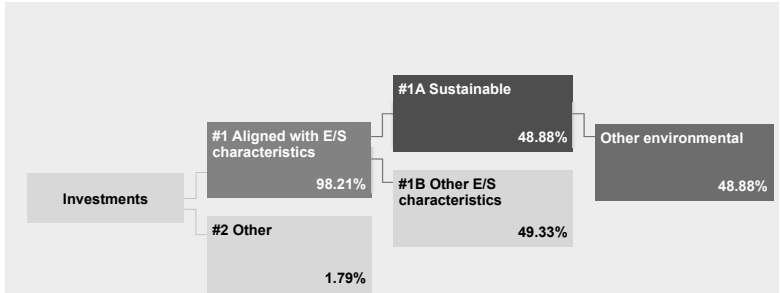

48.88% of the portfolio was invested in sustainable assets.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Industrials            | 20.97%   |
| Financials             | 20.68%   |
| Consumer Staples       | 8.80%    |
| Energy                 | 8.71%    |
| Health Care            | 8.40%    |
| Utilities              | 7.85%    |
| Communication Services | 7.75%    |
| Materials              | 7.19%    |
| Consumer Discretionary | 6.36%    |
| Information Technology | 2.10%    |
| Real Estate            | 1.18%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

48.88%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund sought long-term total return by investing (normally a minimum of 90% of its net assets) in a portfolio of equity and equity equivalent securities of smaller and mid-sized companies which were based in any Eurozone member country, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

Smaller and mid-sized companies were those companies whose market capitalisation generally comprised the lowest tier of the aggregate Eurozone market, defined as companies whose market capitalisation was below EUR 10 billion as well as companies within the MSCI EMU SMID.

The sub-fund included the identification and analysis of a company's ESG Credentials as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have had a material impact on a security issuer's financial performance and valuation
- corporate governance practices that protected minority investor interests and promote long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI Europe

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process with the aim of reducing sustainability risk and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC's standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested were expected to comply with the UNGC and related standards. Companies which had clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance was also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

| Large Investments                | Sector                 | % Assets | Country                                              |
|----------------------------------|------------------------|----------|------------------------------------------------------|
| Reckitt Benckiser Group plc      | Consumer Staples       | 3.47%    | United Kingdom of Great Britain and Northern Ireland |
| Industria de Diseno Textil, S.A. | Consumer Discretionary | 3.31%    | Spain                                                |
| KBC Group N.V.                   | Financials             | 3.25%    | Belgium                                              |
| OMV AG                           | Energy                 | 2.90%    | Austria                                              |
| AstraZeneca PLC                  | Health Care            | 2.83%    | United Kingdom of Great Britain and Northern Ireland |
| Heineken NV                      | Consumer Staples       | 2.71%    | Netherlands                                          |
| Royal KPN NV                     | Communication Services | 2.69%    | Netherlands                                          |
| ING Groep NV                     | Financials             | 2.68%    | Netherlands                                          |
| Anheuser-Busch InBev SA/NV       | Consumer Staples       | 2.66%    | Belgium                                              |
| CRH public limited company       | Materials              | 2.53%    | Ireland                                              |
| Novo Nordisk A/S Class B         | Health Care            | 2.43%    | Denmark                                              |
| Compagnie de Saint-Gobain SA     | Industrials            | 2.42%    | France                                               |
| Deutsche Telekom AG              | Communication Services | 2.41%    | Germany                                              |
| Siemens Aktiengesellschaft       | Industrials            | 2.36%    | Germany                                              |
| UBS Group AG                     | Financials             | 2.35%    | Switzerland                                          |

Cash and derivatives were excluded

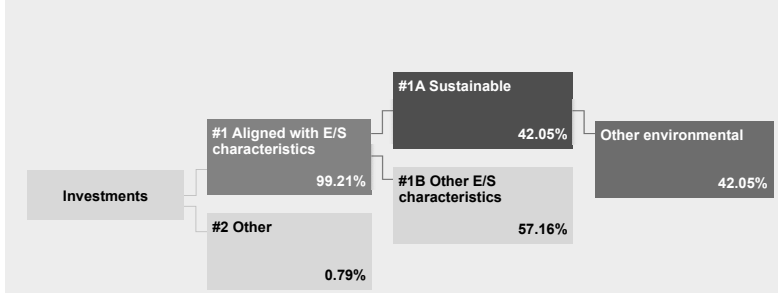

## What was the proportion of sustainability-related investments?

42.05% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Financials             | 21.58%   |
| Industrials            | 19.91%   |
| Materials              | 11.95%   |
| Consumer Staples       | 8.84%    |
| Health Care            | 8.41%    |
| Consumer Discretionary | 8.15%    |
| Communication Services | 7.24%    |
| Energy                 | 6.53%    |
| Utilities              | 3.76%    |
| Information Technology | 3.64%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:
  In fossil gas
  In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
 - **turnover** reflects the "greenness" of investee companies today.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

42.05%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested in normal market conditions a minimum of 90% of its net assets in equities and equity equivalent securities of companies which were domiciled in, based in, carried out the larger part of their business activities in, or were listed on a Regulated Market in, any developed European country. The sub-fund might have also invested in eligible closed-ended Real Estate Investment Trusts ("REITs").

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process with the aim of reduced sustainability risk and enhanced returns.

ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have had a material impact on a security issuer's financial performance and valuation
- corporate governance practices that protected minority investor interests and promoted long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may have changed over time as new criteria are identified.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes                                                                                                                                                                                                                                                                                                                                                                                        | <input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI Emerging Markets

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision made process with the aim of reducing sustainability risks and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments                              | Sector                 | % Assets | Country      |
|------------------------------------------------|------------------------|----------|--------------|
| Taiwan Semiconductor Manufacturing Co., Ltd.   | Information Technology | 8.75%    | Taiwan       |
| Samsung Electronics Co., Ltd.                  | Information Technology | 6.41%    | Korea        |
| Tencent Holdings Ltd.                          | Communication Services | 6.35%    | China        |
| Alibaba Group Holding Limited                  | Consumer Discretionary | 5.57%    | China        |
| Reliance Industries Limited                    | Energy                 | 4.62%    | India        |
| Hon Hai Precision Industry Co., Ltd.           | Information Technology | 3.16%    | Taiwan       |
| Hyundai Motor Company                          | Consumer Discretionary | 3.07%    | Korea        |
| Hindustan Unilever Limited                     | Consumer Staples       | 3.06%    | India        |
| MTN Group Limited                              | Communication Services | 2.96%    | South Africa |
| NARI Technology Co., Ltd. Class A              | Industrials            | 2.67%    | China        |
| PT Bank Rakyat Indonesia (Persero) Tbk Class B | Financials             | 2.54%    | Indonesia    |
| Baidu, Inc. Class A                            | Communication Services | 2.40%    | China        |

Cash and derivatives were excluded

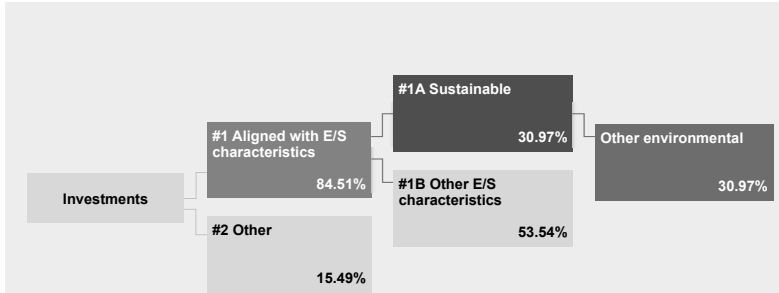

## What was the proportion of sustainability-related investments?

30.97% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 28.36%   |
| Communication Services | 17.05%   |
| Financials             | 15.01%   |
| Industrials            | 12.08%   |
| Consumer Discretionary | 10.67%   |
| Energy                 | 4.62%    |
| Health Care            | 3.68%    |
| Utilities              | 3.50%    |
| Consumer Staples       | 3.06%    |
| Materials              | 1.98%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

30.97%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have also included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a portfolio of Emerging Market equities, while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund invested in normal market conditions a minimum of 90% of its net assets in equities and equity equivalent securities of companies which were domiciled in, based in, or carried out the larger part of their business activities in, Emerging Markets.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process to reduce sustainability risk.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified. Notwithstanding the Excluded Activities, the inclusion of a company in the sub-fund's investment universe was at the discretion of the Investment Adviser. Issuers with improving ESG Credentials may have been included when their credentials were still limited.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes                                                                                                                                                                                                                                                                                                                                                                                        | <input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund invested in companies that supported the transition to a low carbon economy
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 8.32            | 6.82                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 83.75           | 167.71                     |
| 4. Exposure to companies active in the fossil fuel sector                                                                                                | 3.64%           | 7.62%                      |

| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI All Country World

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed for a lower carbon intensity and a higher environmental, social and governance rating, calculated respectively as a weighted average of the carbon intensities and ESG ratings given to the issuers of the sub-fund's investments, than the weighted average of the constituents of the Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in fossil fuel sector
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

| Large Investments          | Sector                 | % Assets | Country                  |
|----------------------------|------------------------|----------|--------------------------|
| Trane Technologies plc     | Industrials            | 4.60%    | United States of America |
| Deere & Company            | Industrials            | 4.31%    | United States of America |
| Schneider Electric SE      | Industrials            | 4.24%    | United States of America |
| Prysmian S.p.A.            | Industrials            | 4.24%    | Italy                    |
| Infineon Technologies AG   | Information Technology | 4.22%    | Germany                  |
| Microsoft Corporation      | Information Technology | 4.12%    | United States of America |
| NIBE Industrier AB Class B | Industrials            | 3.99%    | Sweden                   |
| Ecolab Inc.                | Materials              | 3.93%    | United States of America |
| First Solar, Inc.          | Information Technology | 3.64%    | United States of America |
| Accenture Plc Class A      | Information Technology | 3.63%    | United States of America |
| EDP Renovaveis SA          | Utilities              | 3.61%    | Spain                    |
| Verisk Analytics Inc       | Industrials            | 3.51%    | United States of America |
| Autodesk, Inc.             | Information Technology | 3.45%    | United States of America |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

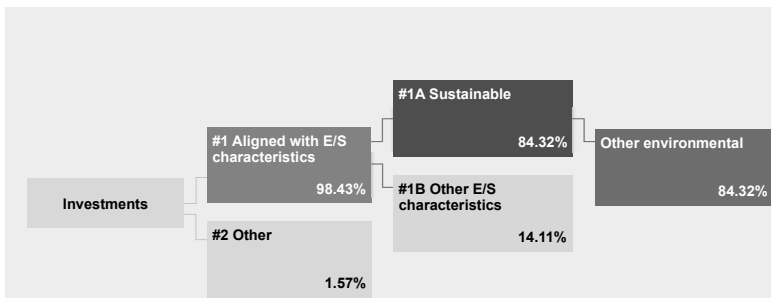

84.32% of the portfolio was invested in sustainable assets.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Industrials            | 43.54%   |
| Information Technology | 28.04%   |
| Materials              | 10.75%   |
| Utilities              | 8.23%    |
| Health Care            | 4.03%    |
| Energy                 | 2.76%    |
| Real Estate            | 2.66%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

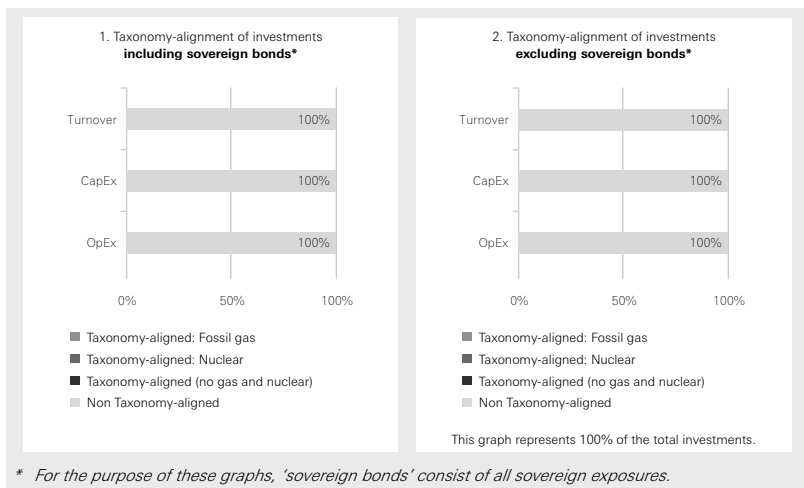

**- capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.

**- operational expenditure (OpEx)** reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

84.32%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have also included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested in normal market conditions a minimum of 70% of its net assets in equities and equity equivalent securities of companies with revenue exposure to climate transition themes ("Climate Transition Themes") which were domiciled in, based in, carried out business activities in, or were listed on a Regulated Market in, any country including both developed markets and Emerging Markets.

Climate Transition Themes included, but were not limited to, renewable energy, energy efficiency, clean transportation and green buildings. Climate Transition Themes were proprietary to HSBC, determined with reference to the eligible activities of the Green Bond Principles of the International Capital Market Association and the Climate Bonds Taxonomy of the Climate Bonds Initiative, subject to ongoing research and may change over time as new themes are identified. The Investment Adviser relied on its own research to identify suitable companies meeting a minimum revenue exposure threshold to Climate Transition Themes. The minimum revenue exposure threshold depended on the specific Climate Transition Theme but was at least 10% of the relevant company's total revenue.

The sub-fund aimed to invest in companies that may benefit from the transition to a low carbon economy.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                      |                                                                                                                                                                                                                  |

|                                                                                                                          | <input type="checkbox"/> with a social objective                                                                                                                                                                 |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

- The characteristics promoted by this sub-fund were:
1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
  2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
  3. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
  4. The sub-fund excluded business activities that were deemed harmful to the environment.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The Reference Benchmark for the sub-fund market comparison purposes was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 7.07            | 6.93                       |
| 1. GHG Emissions - Metric tons CO2 equivalents                                                                                                           | 58,962.73       | 382.13                     |
| 2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)                                                                                     | 97.94           | 186.54                     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 459.20          | 681.35                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           | 0.30%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - HGIF Global Infrastructure Equity Investment Universe

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

This included the identification and analysis of a company's ESG credentials ("ESG Credentials") as an integral part of the investment decision making process to reduce sustainability risk.

ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have a material impact on a company's financial performance and valuation.
- corporate governance practices that protected minority investor interests and promote long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria was identified.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC's standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments            | Sector                 | % Assets | Country                                              |
|------------------------------|------------------------|----------|------------------------------------------------------|
| National Grid plc            | Utilities              | 7.28%    | United Kingdom of Great Britain and Northern Ireland |
| American Tower Corporation   | Real Estate            | 5.94%    | United States of America                             |
| Williams Companies, Inc.     | Energy                 | 5.34%    | United States of America                             |
| VINCI SA                     | Industrials            | 4.55%    | France                                               |
| Semptra Energy               | Utilities              | 4.41%    | United States of America                             |
| Cellnex Telecom S.A.         | Communication Services | 4.40%    | Spain                                                |
| Pembina Pipeline Corporation | Energy                 | 4.08%    | Canada                                               |
| NiSource Inc                 | Utilities              | 3.62%    | United States of America                             |
| Edison International         | Utilities              | 3.47%    | United States of America                             |
| Ferrovial, S.A.              | Industrials            | 3.32%    | Spain                                                |
| Crown Castle Inc.            | Real Estate            | 3.27%    | United States of America                             |
| Keyera Corp.                 | Energy                 | 3.16%    | Canada                                               |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

25.35% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Utilities              | 35.86%   |
| Energy                 | 27.27%   |
| Industrials            | 18.25%   |
| Communication Services | 9.40%    |
| Real Estate            | 9.21%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

25.35%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term total return by investing in a concentrated, globally diversified portfolio of listed infrastructure securities, while promoting ESG characteristics within the meaning of Article 8 of SFDR. The sub-fund aimed to do this with a higher ESG rating, as provided by established third party sources subject to additional HSBC proprietary analysis, calculated as a market cap weighted average of the ESG ratings given to the companies of the sub-fund's investments, than the weighted average of the investable infrastructure equity universe.

The sub-fund used a bottom-up quality and valuation-based investment approach, which aimed to identify listed infrastructure related securities whose underlying assets were considered to have stable long term cash flows, issued by companies with strong management teams and appropriate capital structures and which were favourably priced. Overlaying this was a top-down view on specific infrastructure sectors and geographies. The sub-fund's investments were diversified across geographic regions and infrastructure related sectors.

The investment decision making process integrated ESG Credentials in a number of ways:

- Apportioning a minimum 25% of an infrastructure related security's quality score to ESG Credentials.
- Excluding companies with a low ESG rating and companies that were considered to be non-compliant with the UN Global Compact Principles. This exclusion was at the discretion of the Investment Adviser. Companies with an improving but still low ESG rating and companies with a discernible direction of travel towards UN Global Compact Principles compliance may have still been invested in.
- Conducting enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.
- Engaging with multiple stakeholders on various ESG matters such as energy transition, regulation and governance.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
N/A
- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes                                                                                                                                                                                                                                                                                                                                                                             | <input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact Principles.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used to measure the sub-fund's carbon intensity and ESG scores, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 8.37            | 6.94                       |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI World

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The promotion of human rights

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction and to make an improvement of the overall ESG score when compared to the benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

This sub-fund paid particular attention to:

- Greenhouse Gas emissions: the Investment Adviser aimed to reduce the overall portfolio carbon intensity compared to its benchmark, they also reduced the overall carbon footprint of the portfolio versus the benchmark. In addition, companies which generate more than 10% revenues from thermal coal extraction and coal-fired power generation would be excluded and finally the Investment Adviser also improved on the MSCI E score of the sub-fund versus the benchmark
- Social and employee matter: exclusion of stocks that were in breach of the UNGC principles, improvement of MSCI S score versus the benchmark and overall ESG score versus the benchmark, exclusion of controversial weapons from the portfolio
- Anti-corruption and anti bribery: improvement of MSCI G score versus the benchmark

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hbsc/about-us/responsible-investing/policies](http://www.assetmanagement/hbsc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managed sustainability risks. Companies in which the sub-fund invested were expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails.

As a result of such screening, HSBC did not invest in certain companies and issuers.

### What were the top investments of this financial product?

| Large Investments               | Sector                 | % Assets | Country                                              |

Cash and derivatives were excluded

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

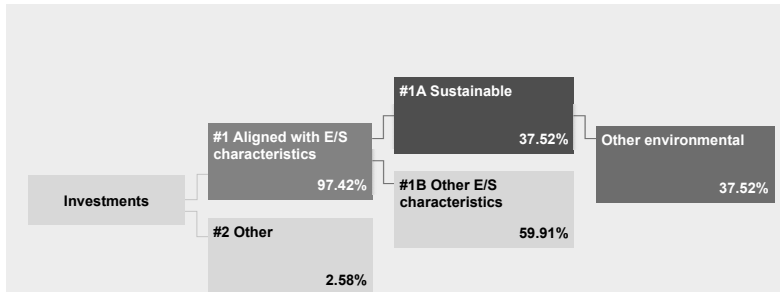

31/03/2023

## What was the proportion of sustainability-related investments?

37.52% of the portfolio was invested in sustainable assets.

### ● What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 26.41%   |
| Financials             | 14.95%   |
| Industrials            | 13.36%   |
| Health Care            | 12.15%   |
| Consumer Discretionary | 10.87%   |
| Consumer Staples       | 6.29%    |
| Energy                 | 5.82%    |
| Communication Services | 3.89%    |
| Materials              | 3.41%    |
| Real Estate            | 2.60%    |
| Utilities              | 0.25%    |
| Total                  | 100.00%  |

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

37.52%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund invested in normal market conditions a minimum of 90% of its net assets in accordance with the Lower Carbon Strategy as described below, in equities and equity-equivalent securities of companies which were domiciled in, based in, carried out the larger part of their business activities in, or were listed on a Regulated Market in developed markets.

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction.

The sub-fund used a multi-factor investment process, based on five factors (value, quality, momentum, low risk and size), to identify and rank stocks in its investment universe with the aim of maximising the portfolio's risk-adjusted return. In order to lower exposure to carbon intensive businesses and raise the sub-fund's ESG rating, all holdings in the portfolio were assessed for their individual carbon intensity and ESG scores.

A HSBC proprietary systematic investment process was then used to create a portfolio which:

- maximised exposure to higher ranked stocks, and
- aimed for a lower carbon intensity and higher ESG rating calculated respectively as a weighted average of the carbon intensities and ESG ratings of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark.

## How did this financial product perform compared to the reference benchmark?

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund excluded the share of investment involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used to measure the sub-fund's carbon intensity and ESG scores, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 8.43            | 6.94                       |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI World

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The promotion of human rights

The sub-fund aimed to achieve a lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark.

In addition, the sub-fund aimed to improve on the Reference Benchmark's individual environmental, social and governance metrics ("E, S and G Metrics").

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC's standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails.

As a result of such screening, HSBC did not invest in certain companies and issuers.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

| Large Investments              | Sector                 | % Assets | Country                  |
|--------------------------------|------------------------|----------|--------------------------|
| Microsoft Corporation          | Information Technology | 4.75%    | United States of America |
| Apple Inc.                     | Information Technology | 4.56%    | United States of America |
| Novo Nordisk A/S Class B       | Health Care            | 1.54%    | Denmark                  |
| Home Depot, Inc.               | Consumer Discretionary | 1.42%    | United States of America |
| Coca-Cola Company              | Consumer Staples       | 1.38%    | United States of America |
| Merck & Co., Inc.              | Health Care            | 1.36%    | United States of America |
| Novartis AG                    | Health Care            | 1.35%    | Switzerland              |

Cash and derivatives were excluded

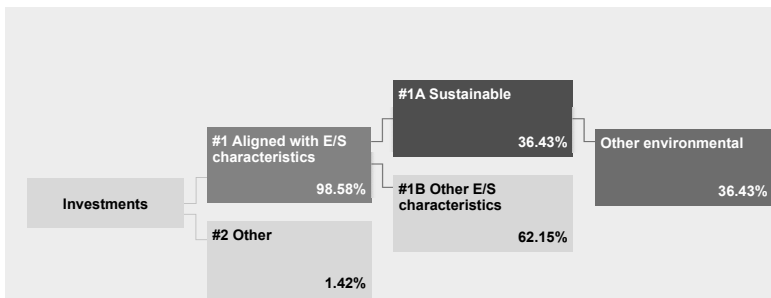

## What was the proportion of sustainability-related investments?

36.43% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 22.27%   |
| Financials             | 13.51%   |
| Industrials            | 12.51%   |
| Health Care            | 12.49%   |
| Consumer Discretionary | 10.52%   |
| Consumer Staples       | 8.54%    |
| Real Estate            | 4.82%    |
| Communication Services | 4.35%    |
| Energy                 | 4.18%    |
| Utilities              | 3.54%    |
| Materials              | 3.27%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

36.43%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested in normal market conditions a minimum of 90% of its net assets in equities and equity-equivalent securities of companies which were domiciled in, based in, carry out the larger part of their business activities in, or were listed on a Regulated Market in, developed markets.

The sub-fund used a factor based portfolio construction process to identify securities in its investable universe and ranks them based on an income score derived from quality income characteristics ("Quality Income Characteristics"). Quality Income Characteristics, (which subject to ongoing research and may have changed over time) may have included but were not limited to:

- Dividend yield
- Return on Investment Capital
- Free Cash Flow yield

Following identification and ranking of the investment universe based on the income scores described above, the Investment Adviser used a HSBC proprietary systematic portfolio construction process to construct an optimised portfolio.

The optimised portfolio aimed to maximise exposure to stocks with a higher income score, while also improving on the E, S and G Metrics and having a lower carbon intensity than that of the Reference Benchmark. Carbon intensity was calculated as a weighted average of the carbon intensities of the sub-fund's investments and the weighted average of the constituents of the Reference Benchmark.

The Investment Adviser also applied additional constraints in order to control the portfolio's risk characteristics, such as but not limited to, sector, country and stock weights.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes                                                                                                                                                                                                                                                                                                                                                                                        | <input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund. The performance of sustainability indicators can be seen in the table below.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 8.43            | 7.04                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 74.96           | 219.29                     |

| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI ACWI High Dividend Yield

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund aimed to provide income from dividends and long term capital growth by investing in companies that may have benefited over the long term from the transition to a more sustainable global economy (“Sustainable Companies”), thereby promoting ESG characteristics within the meaning of Article 8 of SFDR.

After excluding those companies carrying out Excluded Activities as explained below, proprietary research was used to assess and grade certain sustainability criteria according to a 3-point scale, or similar grading scale. Sustainability criteria were subject to ongoing research and may have changed over time but may have included sustainability of practices and culture, sustainability of business model, sustainability of products. The Investment Adviser then considered a company’s sustainability criteria grades and its alignment with UN Sustainable Development Goals to come to an initial conclusion as to whether a company was considered a Sustainable Company.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC’s standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC’s Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies’ commitment to lower carbon transition, adoption of sound human rights principles and employees’ fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

## What were the top investments of this financial product?

| Large Investments                                 | Sector                 | % Assets | Country                  |
|---------------------------------------------------|------------------------|----------|--------------------------|
| ASML Holding NV                                   | Information Technology | 8.86%    | Netherlands              |

| Nintendo Co., Ltd.                                | Communication Services | 3.72%    | Japan                    |
| Recordati Industria Chimica e Farmaceutica S.p.A. | Health Care            | 3.56%    | Italy                    |
| Jeronimo Martins, SGPS S.A.                       | Consumer Staples       | 3.55%    | Portugal                 |
| L'Oreal S.A.                                      | Consumer Staples       | 3.43%    | France                   |

Cash and derivatives were excluded

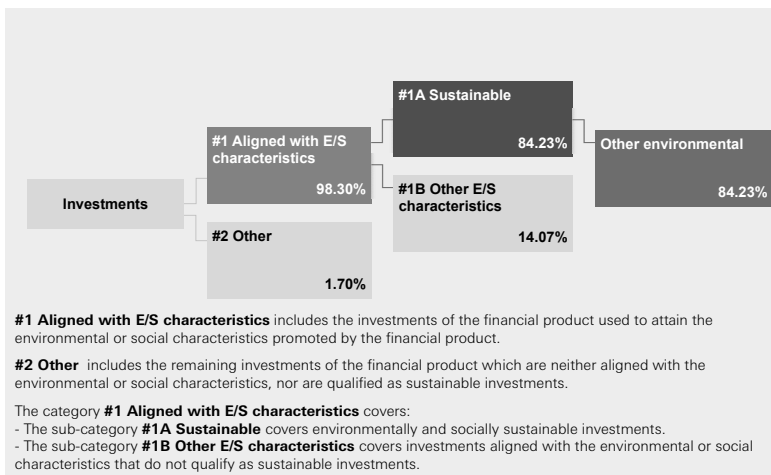

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

84.23% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 33.40%   |
| Consumer Staples       | 19.11%   |
| Health Care            | 16.44%   |
| Industrials            | 11.62%   |
| Materials              | 7.78%    |
| Utilities              | 4.79%    |
| Communication Services | 3.72%    |
| Consumer Discretionary | 3.15%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this was the first reporting period for the sub-fund, no comparison is required.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflects the "greenness" of investee companies today.  
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.  
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

84.23%

### **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund may have held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide income from dividends and long term capital growth by investing in companies that may have benefited over the long term from the transition to a more sustainable global economy ("Sustainable Companies"), thereby promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund was actively managed to achieve its objective and committed to not investing in equities or equity equivalent securities or REITs issued by companies with specified involvement in specific Excluded Activities as explained below.

The Investment Adviser had considered a company's sustainability criteria grades and its alignment with UN Sustainable Development Goals to come to an initial conclusion as to whether a company is considered a Sustainable Company. The company needed to align with at least one UN Sustainable Development Goal and would typically have achieved top grades for the majority of its sustainability criteria for the Investment Adviser to give such an initial conclusion that it was a Sustainable Company. Finally, the Investment Adviser had compared its initial conclusion to ESG scores provided by well-established financial data providers. Where ESG scores corroborate the Investment Adviser's initial conclusion, the conclusion would be considered final. Where ESG scores did not corroborate the Investment Adviser's initial conclusion then the Investment Adviser would consider the reasons but might have still finally concluded it is a Sustainable Company if it considered that ESG scores did not accurately reflect a company's sustainability profile.

Enhanced due diligence had been conducted on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

### **How did this financial product perform compared to the reference benchmark?**

N/A

#### **● How does the reference benchmark differ from a broad market index?**

N/A

#### **● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***  
N/A
- ***How did this financial product perform compared with the broad market index?***  
N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The characteristics promoted by this sub-fund were:

1. The sub-fund invested in a concentrated portfolio of equities of companies that benefitted from increasingly constrained healthcare budgets world-wide.
2. The sub-fund considered responsible business practices in accordance with UN Global Compact Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.
4. The sub-fund identified and analysed company's social characteristics, including but not limited to patient access to care.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● **How did the sustainability indicators perform?**

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI World Health Care

● **...and compared to previous periods?**

This is the first SFDR Periodic report and as such there is no comparison.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the sub-fund contributed to environmental and social objectives.

The sub-fund aimed to provide long term total return by investing in a concentrated portfolio of equities of companies that may benefit from increasingly constrained healthcare budgets world-wide, while promoting ESG characteristics within the meaning of Article 8 of the European Union's SFDR.

The sub-fund aimed to identify and analyse companies' key products or services which might help reduce overall healthcare spend as an integral part of the investment decision made process to reducing the negative social impact of reduced access to health care and enhancing returns.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

| Large Investments                   | Sector      | % Assets | Country                                              |
|-------------------------------------|-------------|----------|------------------------------------------------------|
| UnitedHealth Group Incorporated     | Health Care | 5.91%    | United States of America                             |
| Eli Lilly and Company               | Health Care | 4.91%    | United States of America                             |
| Novo Nordisk A/S Class B            | Health Care | 4.81%    | Denmark                                              |

| Thermo Fisher Scientific Inc.       | Health Care | 4.02%    | United States of America                             |
| McKesson Corporation                | Health Care | 3.90%    | United States of America                             |
| Elevance Health, Inc.               | Health Care | 3.88%    | United States of America                             |
| BioMarin Pharmaceutical Inc.        | Health Care | 3.81%    | United States of America                             |
| DexCom, Inc.                        | Health Care | 3.69%    | United States of America                             |
| Neurocrine Biosciences, Inc.        | Health Care | 3.62%    | United States of America                             |
| AstraZeneca PLC                     | Health Care | 3.48%    | United Kingdom of Great Britain and Northern Ireland |
| Boston Scientific Corporation       | Health Care | 3.40%    | United States of America                             |

Cash and derivatives were excluded

## What was the proportion of sustainability-related investments?

31.68% of the portfolio was invested in sustainable assets.

**Asset allocation** describes the share of investments in specific assets.

● **What was the asset allocation?**

● **In which economic sectors were the investments made?**

| Sector      | % Assets |
|-------------|----------|
| Health Care | 100.00%  |
| Total       | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

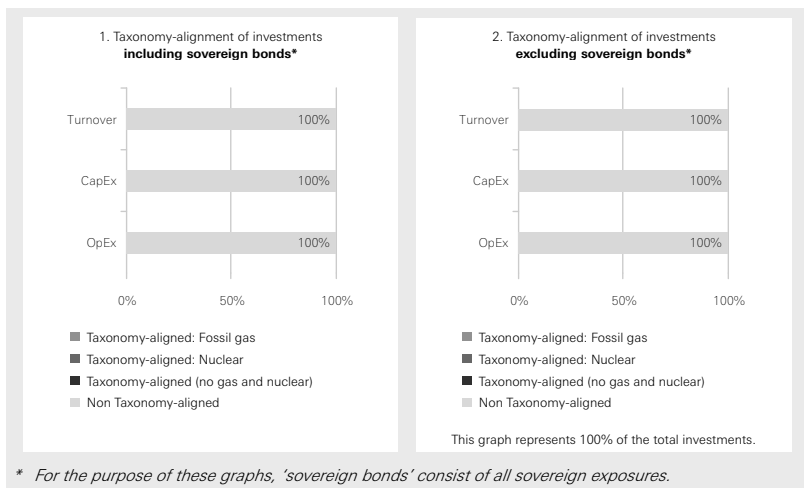

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**- operational expenditure (OpEx)** reflects the green operational activities of investee companies.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

31.68%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have also included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund invested a minimum of 70% of its net assets in equities and equity equivalent securities of Sustainable Healthcare Companies, which were domiciled in, based in, carried out business activities in, or were listed on a Regulated Market in, any country including both developed and Emerging Markets. Sustainable Healthcare Products may have included, but were not limited to, drugs which helped reduce the days a patient spent in an intensive care unit, diagnostic tests which enabled early detection and treatment, disease prevention, operational improvements and deployment of technology. The sub-fund may have been relatively concentrated in equities of companies domiciled in the USA.

sub-fundamental analysis of the healthcare sector and sub-sectors was undertaken to identify companies that presented an investment opportunity. For each identified company, proprietary analysis was then undertaken on their products that were currently, or expected to become, their top revenue generating products, representing at least 10% of their net presented revenue generating value in aggregate. This proprietary analysis was used to determine Sustainable Healthcare Scores for each product according to both improved clinical benefits and cost savings. Scores could range from -3 to +3 or a similar scoring scale for each product. Following this, the overall Sustainable Healthcare Scores for each identified company would be calculated as the average of their top revenue generating products' Sustainable Healthcare Scores, weighted by their net presented revenue generating values. Companies with zero to positive Sustainable Healthcare Scores were considered Sustainable Healthcare Companies.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>Yes</b>                                                                                                                                                                                                                                                                                                                                                                                 | <input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
3. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
4. The sub-fund excluded business activities that were deemed harmful to the environment.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| 1. GHG Emissions - Metric tons CO2 equivalents                                                                                                           | 6,752.00        | 298,728,712.66             |
| 2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)                                                                                     | 53.11           | 136.43                     |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 139.78          | 262.14                     |
| 6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue                                                     | 31.40           | 392.68                     |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 13.32%          | 13.14%                     |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.06%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - FTSE MPF Hong Kong

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others.

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy;
3. The promotion of human rights

The sub-fund identified and analysed a company's ESG credentials as an integral part of the investment decision made process to reducing risk and enhancing returns.

ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have had a material impact on a company's financial performance and valuation.
- corporate governance practiced that protected minority investor interests and promoted long term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing researched and may be changed over time as new criteria are identified.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint ( Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Energy consumption intensity per high impact climate sector : Agriculture, forestry and fishing
- Energy consumption intensity per high impact climate sector : Water supply; sewerage, waste management and remediation activities
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

## What were the top investments of this financial product?

| Large Investments                           | Sector                 | % Assets | Country   |
|---------------------------------------------|------------------------|----------|-----------|
| Tencent Holdings Ltd.                       | Communication Services | 10.56%   | China     |
| Alibaba Group Holding Limited               | Consumer Discretionary | 9.93%    | China     |
| AIA Group Limited                           | Financials             | 6.67%    | Hong Kong |
| Meituan Class B                             | Consumer Discretionary | 4.01%    | China     |
| Hong Kong Exchanges & Clearing Ltd.         | Financials             | 3.73%    | Hong Kong |
| Baidu, Inc. Class A                         | Communication Services | 3.65%    | China     |
| China Mobile Limited                        | Communication Services | 3.30%    | China     |
| Netease Inc                                 | Communication Services | 3.00%    | China     |
| China Construction Bank Corporation Class H | Financials             | 3.00%    | China     |
| China Resources Beer (Holdings) Co. Ltd.    | Consumer Staples       | 2.71%    | China     |

Cash and derivatives were excluded

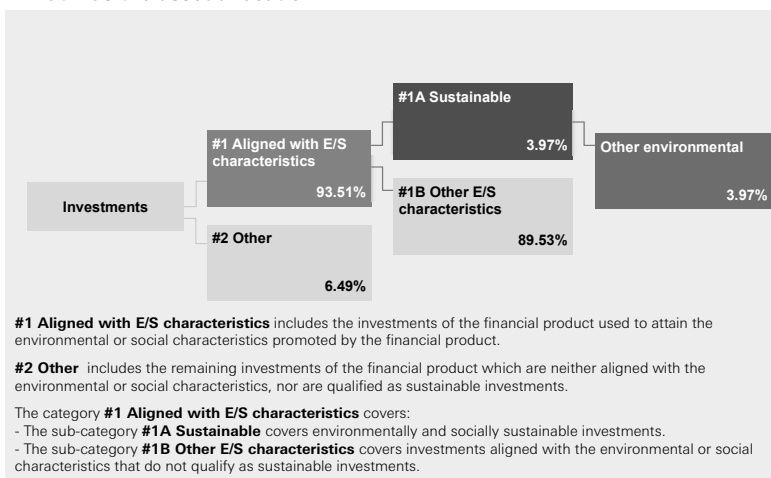

## What was the proportion of sustainability-related investments?

3.97% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Consumer Discretionary | 27.90%   |
| Communication Services | 21.46%   |
| Financials             | 20.27%   |
| Real Estate            | 9.85%    |
| Consumer Staples       | 6.16%    |
| Industrials            | 4.19%    |
| Information Technology | 3.88%    |
| Health Care            | 2.53%    |
| Energy                 | 2.39%    |
| Materials              | 0.69%    |
| Utilities              | 0.68%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:
  In fossil gas
  In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

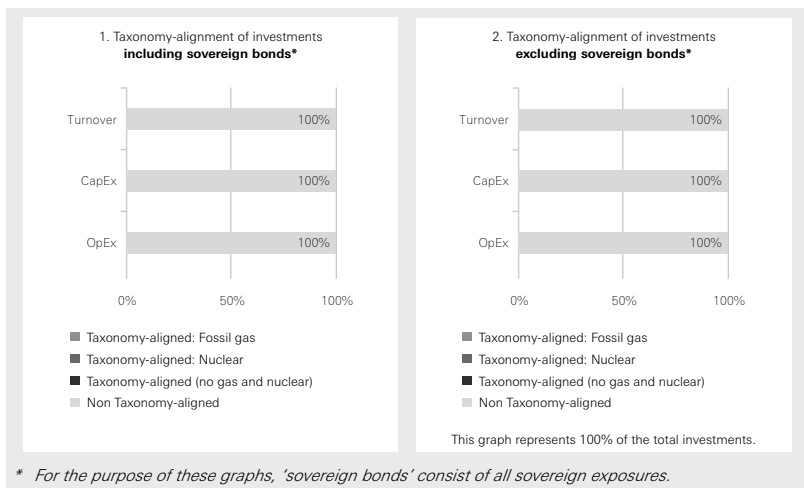

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

3.97%

 **What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for the purposes of efficient portfolio management. The sub-fund held investments that were not aligned for other reasons such as corporate actions and non-availability of data.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund aimed to provide long term capital growth by investing in a portfolio of Hong Kong SAR equities, while promoting ESG characteristics within the meaning of Article 8 of SFDR. This included the identification and analysis of a company's ESG credentials (as set out above) as an integral part of the investment decision making process to reduce sustainability risk.

The ESG Credentials, Excluded Activities and the need for enhanced due diligence may have been identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, sub-fundamental qualitative research and corporate engagement. The Investment Adviser relied on expertise, research and information provided by financial and non-financial data providers.

Enhanced due diligence was conducted on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings.

### **How did this financial product perform compared to the reference benchmark?**

N/A

- ***How does the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?                                                                 |                                                                                                                                                                                                                   |

### To what extent was the sustainable investment objective of this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund invested into a portfolio of fixed income securities issued by companies that actively contribute to the United Nations Sustainable Development Goals (UNSDGs). Particularly those in relation to Climate Action, Affordable and Clean Energy, Clean Water and Sanitation, Good Health and Well Being and Reduced Inequalities.
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the sustainable investment objective promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                          | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| 4. Exposure to companies active in the fossil fuel sector                                                                                                 | 0.00%           | 20.41%                     |
| 6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue                                                      | 13.15           | 1,394.07                   |
| 8. Emissions to water - Thousands of Metric tons per million of Euros invested                                                                            | 0.00            | 0.00                       |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises  | 0.00%           | 5.33%                      |
| 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises | 0.00%           | 0.00%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                  | 0.00%           | 0.06%                      |
| 15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)                                                                            | 0.00            | 0.00                       |
| 17. Exposure to fossil fuels through real estate assets                                                                                                   | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - JP Morgan CEMBI Broad Diversified

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

We can confirm that do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific Principal Adverse Impacts for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: [www.assetmanagement/hsbc/about-us/responsible-investing/policies](http://www.assetmanagement/hsbc/about-us/responsible-investing/policies)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

## What were the top investments of this financial product?

| Large Investments                                                                       | Sector                 | % Assets | Country                      |

Cash and derivatives were excluded

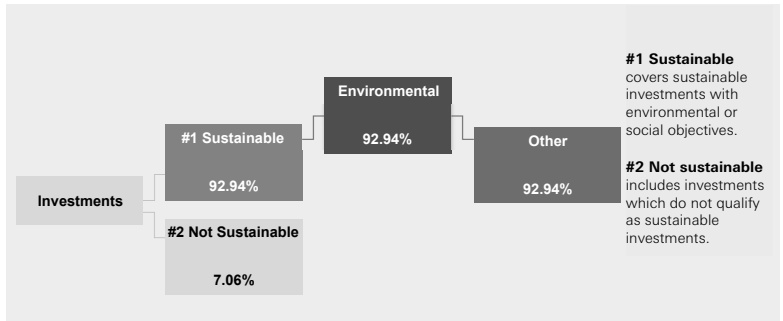

## What was the proportion of sustainability-related investments?

92.94% of the portfolio was invested in sustainable assets.

### ● *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

**In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Other                  | 21.29%   |
| Utilities              | 17.95%   |
| Materials              | 13.72%   |
| Financials             | 13.19%   |
| Communication Services | 12.16%   |
| Real Estate            | 6.74%    |
| Consumer Discretionary | 6.30%    |
| Industrials            | 4.91%    |
| Health Care            | 2.56%    |
| Consumer Staples       | 1.17%    |
| Total                  | 100.00%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes:

In fossil gas     In nuclear energy

No

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

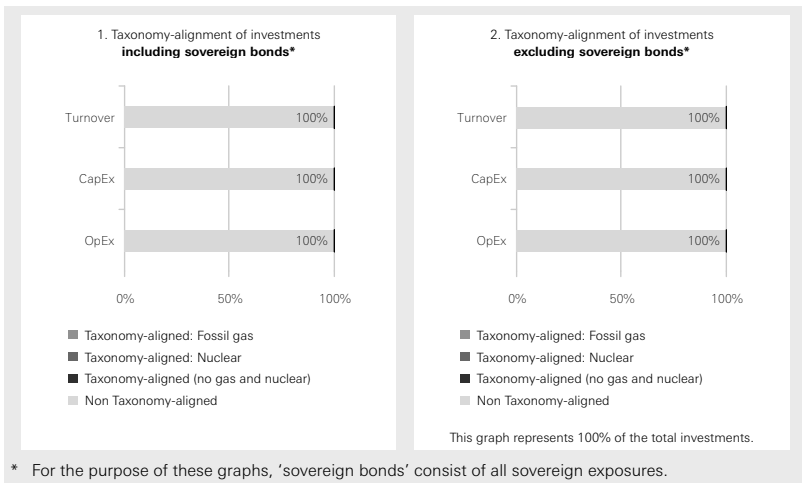

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>1</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**  
N/A - the sub-fund is not investing in transitional or enabling activities.
- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**  
As this was the first reporting period for the sub-fund, no comparison is required.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

92.94%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have also included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

The sub-fund invested in Investment Grade, Non-Investment Grade and unrated fixed income securities of Contributing Companies. Contributing Companies were those that the Investment Adviser deems to be contributing to the support of the UNSDGs included but were not limited to, Climate Action, Affordable and Clean Energy, Clean Water and Sanitation, Good Health and Well Being and Reduced Inequalities. The sub-fund was also invested in ESG labelled fixed income securities that were aligned with the ICMA principles, which were not necessarily issued by Contributing Companies. Labelled Securities included, but were not limited to, Green, Social, Sustainable, and Sustainability-Linked bonds.

The sub-fund invested in normal market conditions, a minimum of 90% of its net assets in Investment Grade, Non-Investment Grade rated and unrated fixed income and other similar securities issued by Contributing Companies which were domiciled in, based in, carried out business activities in, or were listed on a Regulated Market in Emerging Markets. Securities were primarily denominated in US Dollar.

The sub-fund was also invested in ESG labelled fixed income securities ("Labelled Securities") that were aligned with the International Capital Market Association principles ("ICMA Principles"), which were not necessarily be issued by Contributing Companies. Labelled Securities included, but were not limited to, Green, Social, Sustainable, and Sustainability-Linked bonds.

The Investment Adviser analysed the sub-fund's ESG impact as the sub-fundamental consideration when determining the sub-fund's investment universe. The sub-fund's investment principles ("Investment Principles"), which were used together with ESG impact analysis and sub-fundamental qualitative issuer analysis to determine the sub-fund's investments, may have included but were not limited to:

- Continuous engagement with Contributing Companies regarding their ESG credentials.
- Continuous engagement with issuers regarding their ESG credentials at various stages of their ESG transition.
- Issuers following good ESG practices included, but were not limited to, issuers with efficient electricity and water usage and issuers with sound business ethics and transparency.
- Issuers following good ESG practices resulting in low and/or decreasing carbon intensity.

Labelled Securities aligned with ICMA Principles. Labelled Securities were not subject to the Excluded Activities.

## How did this financial product perform compared to the reference sustainable benchmark?

N/A

- ***How did the reference benchmark differ from a broad market index?***

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?                                                                 |                                                                                                                                                                                                                   |
|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                                                                                                                                     | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>                                                                                                     |

### To what extent was the sustainable investment objective of this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund invested into a concentrated portfolio of companies that actively contribute to the transition to a more circular global economy and was based on the principles of designing out waste and pollution, keeping products and materials in use and regenerating natural systems.
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

4. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark had not been designated for the purpose of attaining the sustainable investment objective of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 8.23            | 6.82                       |

| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 150.78          | 154.34                     |
| 4. Exposure to companies active in the fossil fuel sector                                                                                                | 0.00%           | 7.62%                      |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00%           | 1.65%                      |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI All Country World

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

We can confirm that do no significant harm (DNSH) analysis was completed as part of HSBC's standard investment process for sustainable assets. The DNSH analysis covered the ESG best in class, a minimum governance score, normative and controversial activities monitoring, the consideration of Principal Adverse Impacts and Principal Adverse Impact integration.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

The sub-fund also considered the Principal Adverse Impacts that are listed below:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in fossil fuel sector
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

31/03/2023

### What were the top investments of this financial product?

| Large Investments            | Sector                 | % Assets | Country                  |
|------------------------------|------------------------|----------|--------------------------|
| ASML Holding NV              | Information Technology | 3.59%    | Netherlands              |
| L'Oreal S.A.                 | Consumer Staples       | 3.46%    | France                   |
| Autodesk, Inc.               | Information Technology | 3.28%    | United States of America |
| Cisco Systems, Inc.          | Information Technology | 3.23%    | United States of America |
| Ecolab Inc.                  | Materials              | 3.10%    | United States of America |
| Home Depot, Inc.             | Consumer Discretionary | 2.94%    | United States of America |
| Ajinomoto Co., Inc.          | Consumer Staples       | 2.86%    | Japan                    |
| United Rentals, Inc.         | Industrials            | 2.85%    | United States of America |
| Waste Management, Inc.       | Industrials            | 2.64%    | United States of America |
| Bayerische Motoren Werke AG  | Consumer Discretionary | 2.60%    | Germany                  |
| Copart, Inc.                 | Industrials            | 2.46%    | United States of America |
| Sprouts Farmers Market, Inc. | Consumer Staples       | 2.44%    | United States of America |
| Equinix, Inc.                | Real Estate            | 2.43%    | United States of America |
| Shopify, Inc. Class A        | Information Technology | 2.39%    | Canada                   |
| Kroger Co.                   | Consumer Staples       | 2.31%    | United States of America |

Cash and derivatives were excluded

### What was the proportion of sustainability-related investments?

96.74% of the portfolio was invested in sustainable assets.

#### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

| Sector                 | % Assets |
|------------------------|----------|
| Industrials            | 24.21%   |
| Information Technology | 23.22%   |
| Consumer Staples       | 12.28%   |
| Materials              | 11.91%   |
| Consumer Discretionary | 11.43%   |
| Utilities              | 6.15%    |
| Financials             | 3.96%    |
| Communication Services | 3.51%    |
| Real Estate            | 3.32%    |
| Total                  | 100.00%  |

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ?**

Yes:  In fossil gas  In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **turnover** reflecting the share of revenue from green activities of investee companies  
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.  
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

96.74%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have also included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

In line with a thematic approach, the sub-fund invested in normal market conditions a minimum of 90% of its net assets in equities and equity equivalent securities of companies with exposure to circular economy themes ("Circular Economy Themes") which were domiciled in, based in, carried out business activities in, or were listed on a Regulated Market in any country including both developed markets and Emerging Markets.

To define the eligible investment universe, the Investment Adviser initially identified companies with exposure to Circular Economy Themes, which may have included, but were not limited to, production and provision of sustainable resources, circular products, circular economy technologies and services, and recovery activities. Circular Economy Themes are proprietary to HSBC, determined with reference to United Nations Sustainable Development Goals, subject to ongoing research and may change over time as new themes are identified.

**How did this financial product perform compared to the reference sustainable benchmark?**

N/A

● **How did the reference benchmark differ from a broad market index?**

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

N/A

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

N/A

- ***How did this financial product perform compared with the reference benchmark?***

N/A

- ***How did this financial product perform compared with the broad market index?***

N/A

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

| Did this financial product have a sustainable investment objective?                                                                 |                                                                                                                                                                                                                   |
|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### To what extent was the sustainable investment objective of this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund invested into a concentrated portfolio of companies that actively contribute to United Nations Sustainable Development Goals, including, but not limited to, Climate Action, Affordable and Clean Energy, Clean Water and Sanitation, Good Health and Well Being and Reduced Inequalities.
2. The sub-fund considered responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

● ***How did the sustainability indicators perform?***

| <b>Indicator</b>                                                                                                                                         | <b>Sub-Fund</b> | <b>Reference Benchmark</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------------------|
| ESG Score                                                                                                                                                | 8.51            | 6.82                       |
| E Pillar                                                                                                                                                 | 6.45            | 6.60                       |
| S Pillar                                                                                                                                                 | 6.22            | 5.16                       |
| G Pillar                                                                                                                                                 | 6.38            | 5.66                       |
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue                                                         | 52.42           | 154.34                     |

| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 | 0.00%           | 0.00%                      |

The data in this SFDR Periodic Report are as at 31 March 2023

Reference Benchmark - MSCI All Country World

● ***...and compared to previous periods?***

This is the first SFDR Periodic report and as such there is no comparison.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

We can confirm that do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the United Nations Global Compact (UNGC). These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one, or with at least two presumed violations, of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/03/2023

| Large Investments        | Sector                 | % Assets | Country                  |
|--------------------------|------------------------|----------|--------------------------|
| ASML Holding NV          | Information Technology | 8.62%    | Netherlands              |
| Adobe Incorporated       | Information Technology | 7.20%    | United States of America |
| Microsoft Corporation    | Information Technology | 5.77%    | United States of America |
| Intuit Inc.              | Information Technology | 5.40%    | United States of America |
| L'Oreal S.A.             | Consumer Staples       | 4.57%    | France                   |
| Coloplast A/S Class B    | Health Care            | 4.56%    | Denmark                  |
| MSCI Inc. Class A        | Financials             | 4.35%    | United States of America |
| Zoetis, Inc. Class A     | Health Care            | 4.17%    | United States of America |
| Kone Oyj Class B         | Industrials            | 4.02%    | Finland                  |
| Novo Nordisk A/S Class B | Health Care            | 3.90%    | Denmark                  |

Cash and derivatives were excluded

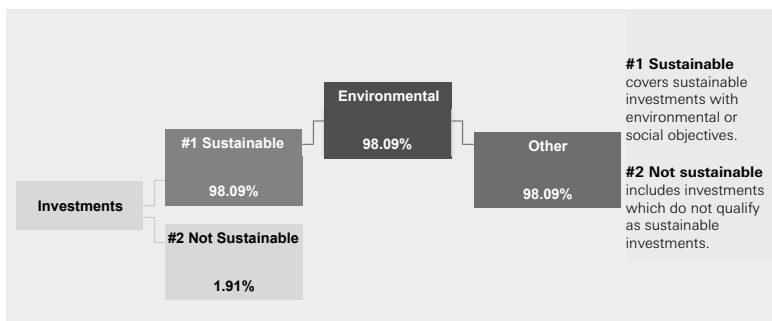

## What was the proportion of sustainability-related investments?

98.09% of the portfolio was invested in sustainable assets.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made?

| Sector                 | % Assets |
|------------------------|----------|
| Information Technology | 34.13%   |
| Health Care            | 20.46%   |
| Consumer Staples       | 17.27%   |
| Materials              | 9.49%    |
| Consumer Discretionary | 7.44%    |
| Industrials            | 6.18%    |
| Financials             | 4.35%    |
| Communication Services | 0.68%    |
| Total                  | 100.00%  |

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A - the sub-fund did not make sustainable investments aligned with the EU Taxonomy.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas     In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

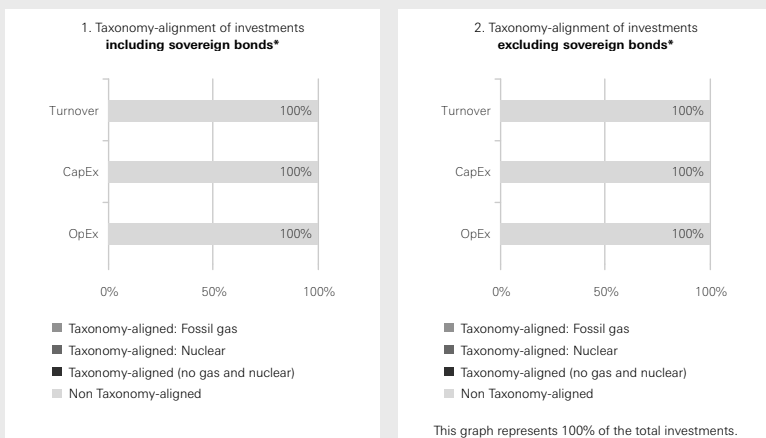

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● **What was the share of investments made in transitional and enabling activities?**

N/A - the sub-fund is not investing in transitional or enabling activities.

### ● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

As this was the first reporting period for the sub-fund, no comparison is required.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

98.09%

**What was the share of socially sustainable investments?**

N/A. The sub-fund did not invest in socially sustainable investments.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The sub-fund may have held cash and cash equivalents and financial derivative instruments for efficient portfolio management. This may have also included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

The Investment Adviser analysed ESG impact as the sub-fundamental consideration when determining the sub-fund’s investments. The sub-fund’s investment principles (“Investment Principles”), which were used together with ESG impact analysis and sub-fundamental qualitative company analysis to determine the sub-fund’s investments, may have included but was not limited to:

- continuous engagement with Contributing Companies regarding their ESG credentials.
- continuous engagement with companies regarding their ESG credentials at various stages of their ESG transition.
- companies following good ESG practices. Good ESG practices including, but not limited to, companies with efficient electricity and water usage and companies with sound business ethics and transparency.
- included companies following good ESG practices resulting in low and/or decreasing carbon intensity.

**How did this financial product perform compared to the reference sustainable benchmark?**

N/A

● ***How did the reference benchmark differ from a broad market index?***

N/A

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

N/A

● ***How did this financial product perform compared with the reference benchmark?***

N/A

● ***How did this financial product perform compared with the broad market index?***

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

HSBC Global Asset Management, the initiator of HSBC Global Investment Funds, is the asset management specialist of the HSBC Group and operates through HSBC Bank PLC and its subsidiaries.

HSBC Global Asset Management is the trading name of HSBC Global Asset Management Limited. HSBC Global Asset Management is established at 8 Canada Square, London E14 5HQ which is its registered office.
