

## HSBC Global Investment Funds

# Strategic Duration and Income Bond

Monthly report 31 March 2025 | Share class AMFIXAHKD

Fund center

## Risk Disclosure

- The Fund mainly invests in a portfolio of fixed income securities with average duration of around 3-8 years.
- Fixed payout classes pay out a pre-determined annualized fixed percentage of their net asset value (NAV) or adjusted NAV at a pre-determined frequency. The pre-determined annualized fixed percentage does not reflect either the actual or expected income or performance of the Fund. Consequently, fixed payout classes are expected to payout capital gains and/or of capital and may do so over a prolonged or indefinite period. Paying-out of capital represents a withdrawal of investor's initial investment and may result in an immediate reduction of the NAV per unit and a substantial erosion of an investor's initial investment over the long term. Over the very long term an investor's initial investment may be nearly or even completely exhausted. A positive payout does not imply a positive return.
- The Fund may invest in financial derivative instruments for investment purpose which may lead to higher volatility to its net asset value.
- The Fund's investments may involve investment, volatility, liquidity, debt securities, non-investment grade and unrated debt securities, sovereign debt, currency, tax and political risks. Investors may suffer substantial loss of their investments in the Fund.
- Portfolio Currency Hedged Share Classes or RMB denominated class are subject to higher currency and exchange rate risks.
- Investors should not invest solely based on this document and should read the offering documents for details including risk factors.

## Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of bonds with an average duration expected to be between 3 years and 8 years.

## Investment strategy
